I thank the Chair.

Mr. HEFLIN. Mr. President, my remarks will be very brief on this amendment. As I understand it, the language of least-landed cost referred to in this amendment would result in greater shipments of Public Law 480 commodities from the Great Lakes. I am somewhat concerned about shipment of grains that could occur in other sections of the country. I have an interest in my own State that includes the Port of Mobile and the Tennessee-Tombigbee Waterway that just recently opened. The Corps of Engineers developed cost-benefit ratios for the Tenn-Tom as it was in the inception period and in the planning period. These ratios were revised as Congress began making appropriations for the waterway construction. The basis of those cost-benefit ratio figures was to show that investment of Federal money into the Tennessee-Tombigbee Waterway would result in benefits in excess of costs to the region.

Primarily, the two elements that were involved in the Tennessee Tombigbee cost-benefit ratio studies were coal and grain. This amendment, Mr. President would in effect, declare that all of the Public Law 480 commerce would have to originate from the Great Lakes ports. It would prohibit grain shipments from passing through the Tennessee-Tombigbee Waterway, and could cause serious consequences to the development of this waterway, that America has spent many resources constructing, and which I think will end up being highly beneficial to the Nation as a whole.

There were many other cargo considerations beyond coal and grain that went into the cost-benefit ratio study figures, but these are the primary two products considered. To reroute the Public Law 480 shipments of grain to another country and to prohibit origination on the waterway or from the Port of Mobile, I think it would have a disastrous effect during this early, really embryonic period of the Tennessee Tombigbee Waterway development. I think it is something that we should be cautious about.

I merely wanted to bring that to the attention of Members of the Senate.

Mr. COCHRAN addressed the Chair.

The PRESIDING OFFICER. The Senator from Mississippi.

Mr. COCHRAN. Mr. President, I would like to make a few remarks regarding the Dixon amendment.

It requires shipments under title II of the Public Law 480 program to be booked at "lowest landed cost." In addition, the amendment would impose a limitation on freight rates for U.S. vessels participating in cargo preference shipments, which would be tied, not to U.S. vessel owners' costs of doing business, but to foreign-flag freight rates. Senator DIXON's amendment should be rejected.

Both components of the amendment have already been debated and decisively rejected by the Senate in connection with an earlier amendment offered by Senator DIXON and a separate amendment offered by Senator BOSCHWITZ. There is no occasion for the Senate to revisit these issues, particularly given the urgency of the need to complete work on the overall farm bill.

The amendment seeks to confer special protection on Great Lakes ports, at the expense of east coast, west coast, and gulf ports. It would seriously distort the competitive environment that has historically allowed all four port ranges to grow and prosper. The Senate should reject amendments that only serve to engage its Members in a divisive debate.

The Cochran compromise between agriculture and maritime adequately protects the Great Lakes. The compromise, already approved by a wide margin, directs the Secretary of Transportation to administer the cargo preference laws so as to preserve, to the greatest extent practicable, each port range's historic share of agricultural preference cargoes. This authority is adequate to prevent any real hardship to the lakes. There is no need for rigid provisions that tie the hands of the agencies involved in arranging for shipment of our food relief exports.

A strict requirement to book shipments on a cost basis will not benefit the lakes. Any meaningful cost determination must include not only the cost of purchasing agricultural commodities and the freight rates for shipment, but also the time required for shipment. Shipment through the St. Lawrence Seaway significantly adds to the time required to ship agricultural commodities abroad, so that Great Lakes ports might actually be disadvantaged by a lowest landed cost requirement.

Support for our merchant marine should not be tied to foreign shipment rates. U.S. vessels participating in cargo preference shipments are required to offer fair and reasonable rates for U.S. vessels. This standard allows the Maritime Administration to take into account the actual costs of doing business in the United States, in compliance with our health and safety regulations and based on a reasonable wage rate for our seamen. Foreign competition is characterized by heavy government subsidization of shipping, less stringent health and safety standards, and very low-wage rates. No other subsidy program, including the Farm Support Program, is tied to the prices charged by foreign competition, and the Senate should not single the maritime industry out for such unreasonable treatment.

The amendment the Senator has offered this morning can be referred to as the lowest landed cost amendment. What he is saying is that shipments of U.S. grain should be transported in ships that operate at the lowest possible cost. This would undermine cargo preference, even under current law, because the ships chosen would not have to be U.S. ships. They could be ships under any flag, as I understand the amendment.

Mr. DIXON. Mr. President, will my colleague yield?

Mr. COCHRAN. I am happy to yield?

Mr. DIXON. May I say to my colleague from Mississippi that my understanding of the amendment—on the basis of everything I have been advised—is that it only applies to American bottoms within the purview of the Merchant Marine Act. So while I do not want to interrupt a friend and colleague in the course of his speech, I would assert that the lowest landed cost requirement only pertains to American bottoms.

Mr. COCHRAN. Mr. President, I thank the Senator for his comments. The fact of the matter is that, on the Great Lakes, there are essentially no American bottoms available. Only one line—the Lykes line—has any ships available, so basically there are only foreign ships operating on the Great Lakes. To impose this requirement would, in effect, set aside the law about preference for U.S.-flag vessels.

This is another attempt, Mr. President, to unravel the compromise that is before the Senate. If this amendment were agreed to, even though it might sound attractive and fair on the surface, it would jeopardize the effort that we are making to settle this dispute. It would undermine the effort to put an end to the controversy that has historically existed between these two major and important industries in America, the maritime industry and the agriculture industry. Both are so important. Both are confronted with very serious challenges today to be competitive, and to survive in a world that is growing more and more difficult in terms of our ability to operate economically and to claim market share around the world.

Today we see estimates of U.S. exports dropping continually, from a high just a few years ago of over $40 billion for agriculture to an estimated value this year of only $32 billion. This is a problem, Mr. President. It is a problem for agriculture, for the American farmers, and for the maritime industry. The Senator from Illinois has figures showing the tonnage that has been transported out of Great Lakes ports over the past 5 years. In 1979 and 1980, we were in a growth era. Tonnage was going up. But then, in 1982, we saw a sharp decline.

That is not something that is peculiar to the Great Lakes; it is a problem of the entire American effort to export agricultural commodities. We are in a downward trend. That is what we are trying to put a stop to. We are trying to become more competitive for the benefit of American agriculture, for the U.S. economy, and for our maritime industry. That is why we are urging that this compromise be accepted and that the amendments—the efforts to unravel it, or to undermine it—be rejected.

Mr. President, again, that is what the Dixon amendment attempts to do. I admire the Senator's imagination, his hard work, his diligence, and his initiative; nonetheless, I have to urge that we reject this amendment.

Mr. President, I know of no other Senators who want to be heard on this subject. I am prepared to try to answer any questions that any may have on this subject, but at the appropriate time, it is my intention to move to lay the amendment on the table and to ask for the yeas and nays. I yield the floor at this point.

Mr. HELMS. Mr. President, I can think of no more appropriate time to do it. I suggest that the Senator proceed.

Mr. COCHRAN. Mr. President, I move to lay the Dixon amendment on the table. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay the amendment of the Senator from Illinois on the table. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Delaware [Mr. BIDEN] and the Senator from Georgia [Mr. NUNN] are necessarily absent.

The PRESIDING OFFICER (Mr. KASTEN). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 71, nays 27, as follows:

[Rollcall Vote No. 263 Leg.]

YEAS—71

Andrews	Bumpers	Cohen
Baucus	Burdick	Cranston
Bentsen	Byrd	D'Amato
Bingaman	Chiles	DeConcini

NOT VOTING—2

Biden	Nunn

So the motion to lay on the table the amendment (No. 926) was agreed to.

Mr. COCHRAN. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. HELMS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 927

(Purpose: To provide for cost efficiency in the shipment of United States Government cargoes, to establish the Great Lakes and Saint Lawrence Seaway Advisory Council, and for other purposes)

Mr. DIXON. Mr. President, I have an amendment at the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Illinois [Mr. DIXON] proposes an amendment numbered 927.

Mr. DIXON. Mr. President, if I may have the attention of the Senate, this is a lengthy amendment and a very good one. As the amendment is read, I wish my colleagues would listen to the entire reading of the amendment because it is very informative.

Will the clerk read the amendment.

Mr. BUMPERS. Mr. President, is it in order for me to ask a question of the Senator from Illinois prior to the reading of the amendment?

The PRESIDING OFFICER. The regular order is the reading of the amendment.

Unanimous consent would have to be required to change that sequence.

Mr. BUMPERS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BUMPERS. Can the Chair tell us about how long that is going to take? Maybe the sponsor of the amendment can tell us.

Mr. DIXON. Probably 15 minutes.

The PRESIDING OFFICER. The amendment is 15 pages long.

The clerk will read the amendment.

The legislative clerk read as follows:

At the end of the pending amendment, insert the following new sections and renumber succeeding sections accordingly:

TITLE II—COST EFFICIENCY IN THE SHIPMENT OF UNITED STATES GOVERNMENT CARGOES

FINDINGS

SEC. . The Congress finds that—

(1) it is in the best interests of the United States to maintain a strong merchant marine fleet for the efficient transport of United States Government cargo;

(2) it is in the best interests of the United States to ensure fair and reasonable participation for all four port ranges in the movement of United States Government impelled cargo; and

(3) such cargo should be shipped in the most efficient manner, at the lowest cost to the United States Government, which is not inconsistent with the provisions of section 901(b) of the Merchant Marine Act of 1936 (46 U.S.C. 1241(b)), the joint resolution entitled "Joint Resolution Requiring agricultural or other products to be shipped in vessels of the United States where the Reconstruction Finance Corporation or any other instrumentality of the Government finances the exporting of such products", approved March 26, 1934 (46 U.S.C. 1241-1), section 603 of the Foreign Assistance Act of 1961 (22 U.S.C. 2353), and section 2631 of title 10, United States Code (commonly known as the cargo preference laws).

DEFINITIONS

SEC. . For purposes of this title—

(1) the term "least cost to the United States" means the lowest expense to the United States Government determined by calculating the total cost of a commodity and all related transport costs, including but not limited to inland freight, ocean freight, wharfage, dockage, terminal transfer, stevedoring charges, freight forwarding, customs brokers, and freight differential charges; and

(2) the term "lowest landed cost" means—

(A) in the case of export cargo, all costs associated with the procurement and transportation of cargo from the United States to the port of entry abroad; and

(B) in the case of import cargo, the cost of transporting the cargo from the originating port abroad to the point of final destination in the United States.

SHIPMENT OF UNITED STATES GOVERNMENT CARGO AT LOWEST COST

SEC. . (a) Any agency of the United States that ships, generates, finances, or otherwise impels United States Government cargo shall ship such cargo at the lowest cost to the United States. Such cargo shall be shipped at—

(1) the least cost to the United States if such cargo is—

(A) an agricultural commodity that—

(i) the sale and exportation of which is fully paid by the Commodity Credit Corporation; and

(ii) is exported under an agreement with a foreign nation pursuant to title I of the Agricultural Trade Development and Assistance Act of 1954;

(B)(i) shipped, generated, financed, or otherwise impelled by the Department of Defense; and

(ii) is not cargo shipped at the lowest landed cost pursuant to paragraph (2)(B);

(C) a commodity shipped pursuant to an agreement financed by the Export-Import Bank of the United States;

(D) a commodity shipped pursuant to chapter 4 of part II of the Foreign Assistance Act of 1961 pursuant to an agreement financed under the Commodity Import Program, or any other export generating program administered by the Agency for International Development; or

(E) any other United States Government cargo, except a cargo shipped at the lowest landed cost pursuant to paragraph (2); and

(2) the lowest landed cost to the United States if such cargo is—

(A) an agricultural commodity that—

(i) the sale or donation of which, including freight and associated expenses, is financed by the Commodity Credit Corporation; and

(ii) is exported as assistance or a donation pursuant to title II of the Agricultural Trade Development and Assistance Act of 1954; or

(B) shipped, generated, financed, or otherwise impelled by the Department of Defense and such Department pays all expenses associated with such cargo.

(b) Nothing in the provisions of subsection (a) shall be construed to supercede, or applied inconsistently with the provisions of—

(1) section 901(b) of the Merchant Marine Act of 1936 (46 U.S.C. 1241(b));

(2) the joint resolution entitled "Joint Resolution Requiring agricultural or other products to be shipped in vessels of the United States where the Reconstruction Finance Corporation or any other instrumentality of the Government finances the exporting of such products", approved March 26, 1934 (46 U.S.C. 1241-1);

(3) section 2631 of title 10, United States Code; or

(4) section 603 of the Foreign Assistance Act of 1961 (22 U.S.C. 2353).

PROMPT PAYMENT TO UNITED STATES SHIPPING INTEREST FOR THE SHIPMENT OF UNITED STATES GOVERNMENT CARGO

SEC. . (a) Any agency of the United States that contracts with a foreign entity for the sale or transfer of United States Government cargo shall include as a term of such contract a provision for—

(1) the prompt payment within thirty days of any cost incurred by a United States shipping interest; and

(2) a late charge or interest penalty based on the principal amount owed, if such prompt payment provision is breached.

(b) If a foreign entity breaches a prompt payment provision of such contract made pursuant to subsection (a)(1), the affected United States shipping interest may petition the Federal agency that negotiated the contract to take action regarding payment. If such foreign entity has not made such payment within thirty days after the filing of the petition, the agency, in cooperation with the affected shipping interest, shall file suit in the appropriate Federal district court for the recovery of such payment and the late charge or interest penalty for late payment.

(c)(1) If the prompt payment provision included as a term of a contract pursuant to subsection (a)(1) provides that a Federal agency shall make such payment to a United States shipping interest and such agency breaches such provision, such ship-

ping interest aggrieved by nonpayment may—

(A) file a petition for such payment and the amount of the late charge or interest penalty included in such contract pursuant to subsection (a)(2); and

(B) after thirty days from the date of filing of a petition under subparagraph (A), file suit in the appropriate Federal district court for recovery of such payment and the late charge or interest penalty.

(2) If the district court determines that the United States agency is liable in any suit filed pursuant to subparagraph (B) of paragraph (1), the court may award to the shipping interest an amount equal to three times the late charge or interest penalty in addition to the principal amount owed and the late charge or interest penalty.

(d) For the purposes of this section the term—

(1) "foreign entity" means any foreign nation, agent of a foreign nation, or foreign person; and

(2) "United States shipping interest" means any person or business concern of the United States involved in the transport of such cargo, including but not limited to port authorities, stevedoring companies, producers and processors, ship owners, and inland freight companies.

EFFICIENT USE OF THE UNITED STATES MERCHANT MARINE FLEET

SEC. . (a) Any Federal agency shipping United States Government cargo shall solicit bids from any ship operator for the transport of United States Government cargo over a route which is not serviced by such ship operator if—

(1)(A) there is no ship operator using United States-flag vessels that services such route; or

(B) any ship operator using United States-flag vessels that services such route is unable or unwilling to transport such cargo;

(2) such cargo would be transported in United States-flag vessels; and

(3) the transport of such cargo shall result in the lowest cost to the United States pursuant to section 203.

(b) Notwithstanding any other provision of law, any United States-flag vessel constructed in the United States may transport United States Government cargo on any route if such transport—

(1) is the first voyage of such vessel; and

(2) shall result in the lowest cost to the United States pursuant to section 203.

REPORT TO CONGRESS

SEC. . Within twenty-four months after the date of enactment of this Act, the General Accounting Office shall review the compliance of all Federal agencies with the provisions of this title and report the findings and recommendations from such review to Congress.

TITLE III—THE GREAT LAKES AND SAINT LAWRENCE SEAWAY ADVISORY COUNCIL

FINDINGS

SEC. . The Congress finds that it is in the long-term economic interests of the Nation to develop a coordinated economic revitalization strategy for shipping activities on the Great Lakes, the connecting channels, and the Saint Lawrence Seaway (commonly known as the fourth seacoast of the United States) in order to increase exports from the Great Lakes region and favorably affect the United States balance of trade.

COUNCIL ESTABLISHED

SEC. . (a) There is hereby established a council to be known as the Great Lakes Saint Lawrence Seaway Advisory Council (hereinafter referred to as the "Council").

(b) The Council shall be composed of twelve members which shall include—

(1) the Secretary of Commerce, or his designee, who shall chair the Council;

(2) the Secretary of Transportation, or his designee;

(3) the Secretary of Agriculture, or his designee;

(4) the Assistant Secretary of the Army for Civil Works;

(5) the Administrator of the Saint Lawrence Seaway Development Corporation or his designee;

(6) the Administrator of the environmental Protection Agency, or his designee;

(7) the Chairman of the Council of Great Lakes Governors; and

(8) five members of the transportation industry, appointed by the Chairman from nominations by the industry of whom—

(A) two shall represent ports on the Great Lakes, of whom—

(i) one shall represent ports on Lakes Michigan and Superior; and

(ii) one shall represent ports on Lakes Huron, Erie, and Ontario and connecting channels;

(B) one shall represent operators of ocean going United States-flag vessels;

(C) one shall represent operators of ocean going foreign-flag vessels; and

(D) one shall represent maritime unions active on the Great Lakes.

(c) Members of the Council shall serve until the expiration of the Council.

(d) Seven members of the Council shall constitute a quorum but a lesser number may hold hearings.

(e) The Council shall meet at the call of the Chairman or a majority of its members.

FUNCTIONS OF THE COUNCIL

SEC. . (a) The Council shall make a complete study of the means to develop and implement a comprehensive economic strategy to improve the capacity of the Great Lakes region to market and transport commodities in a timely manner and to maximize the efficiency and benefits of market products produced in the Great Lakes region and products shipped through the Great Lakes Saint Lawrence Seaway system. The strategy shall include—

(1) methods to improve and promote both bulk and general cargo overseas trade through Great Lakes ports;

(2) methods to accelerate the movement of grains and other agricultural commodities through the Great Lakes;

(3) methods, materials, and programs to promote trade from the Great Lakes region and through Great Lakes ports, particularly with European, Mediterranean, African, Caribbean, Central American, and South American nations;

(4) methods to increase the overseas routing of cargoes owned, financed, and sponsored by the Government of the United States through Great Lakes ports; and

(5) methods to encourage United States-flag vessels to engage in international trade from the Great Lakes.

(b) In developing the strategy, the Council shall conduct and consider the results of—

(1) an analysis of the constraints on overseas shipments of agricultural products through the Seaway resulting from marketing problems caused by—

(A) a late harvest season;

(B) the need for additional storage capacity;

(C) the loss of grain shipment from Great Lakes ports due to diversion by rail to Canadian or United States tidewater ports; and

(D) other constraints identified by agricultural interests;

(2) an analysis of—

(A) the types and quantities of export cargoes produced in the Midwest and North Central region that are owned, financed, and sponsored by the Government of the United States;

(B) the contraints on the shipment of such cargoes through the Great Lakes and Saint Lawrence Seaway system; and

(C) administrative and statutory changes that could achieve increased shipments of such cargoes through Great Lakes ports; and

(3) an analysis of—

(A) the effectiveness of ongoing promotional programs by Federal, regional, State, and local agencies directed at attracting shippers to the Great Lakes and Saint Lawrence Seaway system; and

(B) recommendations on types of promotional programs to enhance the image and awareness of the Great Lakes and Saint Lawrence Seaway system by importers and exporters in the United States and overseas.

(c) No later than September 30, 1987, the Council shall transmit to the President and to each House of the Congress a report stating the strategy developed under this section and the results of each analysis conducted under this section. Such report shall contain a detailed statement of the findings and conclusions of the Council together with its recommendations for such legislative and administrative actions as it considers appropriate to carry out such strategy and to assure maximum economic benefits to the Great Lakes region.

(d) The Council shall cease to exist one-hundred and eighty days after submitting its report pursuant to subsection (c).

POWERS AND ADMINISTRATIVE PROVISIONS

SEC. . (a) The Council may, for the purpose of carrying out the provisions of this title, hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence, as the Council considers appropriate.

(b) Subject to such rules as may be adopted by the Council, the Chairman, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to the provisions of chapter 51 of subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, is authorized—

(1) to appoint and fix the compensation of such staff personnel as he deems necessary, including an executive director who may be compensated at a rate not in excess of that provided for level V of the Executive Schedule in title 5, United States Code, and

(2) to procure the services of experts and consultants in accordance with section 3109 of title 5, United States Code.

(c) Each department, agency, and instrumentality of the executive branch of the Federal Government, including independent agencies, is authorized and directed to furnish to the Council, upon request made by the Chairman, such information as the Council deems necessary to carry out its functions.

(d) Upon request of the Council, the head of any Federal agency is authorized to detail, on a reimbursable basis, any of the

personnel of such agency to the Council to assist the Council in carrying out its duties.

(e) The Administrator of General Services shall provide to the Council on a reimbursable basis such administrative support services as the Council may request.

(f) The Council may use the United States mail in the same manner and under the same conditions as other departments and agencies of the United States.

(g) Any member or agent of the Council may, if so authorized by the Council, take any action which the Council is authorized to take by this section.

COMPENSATION OF MEMBERS

SEC. . Members of the Council shall serve without compensation, but shall be reimbursed for travel or transportation expenses under subchapter I of chapter 57 of title 5, United States Code, while away from home or a regular place of business and engaged in the actual performance of duties vested in the Council.

AUTHORIZATION OF APPROPRIATIONS

SEC. . There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this title.

Mr. DIXON. Mr. President, I again think that we have been engaged in a sort of forceful way, for most of yesterday and all of this morning, in a dispute concerning cargo preference which everyone in the Senate understands very well. I would want to say once again that I have the highest regard and the deepest personal affection for the Senator from Mississippi. I do not think I need to say again that anything in the course of this discussion in any way reflects upon his purpose. We simply have a difference of opinion about whether the public is best served by this amendment or not.

So obviously it is necessary for me to pursue the goal of persuading my colleagues—who are all reasonable people—that a better disposition of this problem is in order.

Mr. President, I want to congratulate the clerk. This was a long amendment, 15 pages. I followed him closely. He read it flawlessly. His elocution was excellent. I want him to know that I enjoyed every golden minute of his presentation of this amendment. I want the record to know that he did it without a single error.

I do not think any colleague will find any fault with this amendment. This amendment, incidentally, has been cleared with the maritime industry on past occasions. It is, I think, an amendment that serves the interest of the public generally, and is well-intentioned.

Title II simply says, first of all, that it is in the best interests of the United States to maintain a strong merchant marine fleet. I think we all agree about that. I believe that the advocates of the point of view presented so eloquently by my distinguished friend from Mississippi—and I particularly would want to say that there have been contributions by the Senators from Alaska, Hawaii, and others—have all said this is to give us a strong merchant marine fleet. We acknowledge that is the first purpose in this amendment.

Then we say:

It is in the best interests of the United States to ensure fair and reasonable participation for all four port ranges in the movement of United States Government impelled cargo.

I would argue that nobody would question that. In the broadest sense there are four port ranges in the country—the west, the east, the gulf, and Great Lakes. My friend from California, the distinguished junior Senator from California, made some remarks last night. The Senator is interested in the west coast ports. My distinguished friend, I think a giant of this body who will soon be leaving us by his own decision, the distinguished senior Senator from Louisiana, spoke eloquently last night. He is interested in the gulf coast ports. Obviously, many of us here are interested in the east coast ports. Many are also interested in the Great Lakes ports.

But who would question this language?

It is in the best interests of the United States to ensure fair and reasonable participation for all four port ranges in the movement of United States Government impelled cargo.

Mr. President, the Presiding Officer is from the Great Lakes area. The Senator is a fair man. I know he wants to see fairness in this bill for all the ports of the country, not just for the Great Lakes—for all the ports of the country. That is what this Senator wants.

So we express that at the beginning so our friends here, wherever they come from in the country, will know that we are not trying to take something from them at all. We are trying to share fairly, equitably, and reasonably with all parts of the country.

I hope every Senator in his office has set aside other business to listen to the reading of the amendment, and now are listening to the explanation of the amendment because it occurs to me that if everybody knows what is in this amendment it should pass unanimously.

Here is a third provision. I do not think anybody would argue with this. It says "Cargo should be shipped in the most efficient manner." Who would argue about that? Cargo ought to be shipped in the most efficient manner. It speaks for itself. Then the amendment goes on to say cargo ought to be shipped at the "lowest cost to the U.S. Government." I think we all agree with that. Why should the Government not ship at the lowest cost? But we go on to qualify that by saying "which is not inconsistent with the provisions of the Merchant Marine Act of 1936." The joint resolution entitled "joint resolution requiring agricultural or other products to be shipped in vessels of the United States" approved in 1934, and also we say—and listen to this, may I say to my friend from Mississippi, in lines 18, 19, and 20 on page 2—"and section 2631 of title 10, United States Code, commonly known as the cargo preference laws." So we want them to apply in connection with this provision.

Then we clarify what we have done in the beginning of the bill. I think to elucidate what is being done, to simplify it so that every person can understand it, is significantly important. There cannot be any difference of opinion.

We define what least cost to the United States really is. Up at the desk, some people asked, "What does this mean?"

Here is what it means: "the term 'least cost to the United States' means the lowest expense to the U.S. Government determined by calculating the total cost of a commodity and all related transport costs, including but not limited to inland freight, ocean freight, wharfage, dockage, terminal transfer, stevedoring charges, freight fowarding, customs brokers, and freight differential charges."

On that last amendment, several came up to me and asked, "What does the term lowest landed cost mean?"

That was in the prior amendment which was just rejected by the Senate. We define that here.

In the case of export cargo, all costs associated with the procurement and transportation of cargo from the United States to the port of entry abroad; in the case of import cargo, the cost of transporting the cargo from the originating port abroad to the point of final destination in the United States.

I think that clearly defines what we are attempting to do in this bill.

We then say that any agency of the United States that wants to ship shall ship such cargo at the lowest cost to the United States.

We define how we mean that with respect to the variety of cargos as follows:

The least cost to the United States of such cargo is an agricultural commodity that the sale and exportation of which is fully paid by the CCC; and is exported under agreement with a foreign nation pursuant to title I of the Agricultural Trade Development and Assistance Act of 1954.

We go on to define at great length how you make that determination with respect to agricultural products.

Then on page 5 we assure prompt payment to United States shipping interests. I think that should please shipping interests, who, after all, are in business to make a profit.

We assure that there will be prompt payment and we give them the right to go into the Federal district court for recovery of such payment, for interest and penalties.

Then on page 7 we talk about the efficient use of our U.S. merchant marine fleet, saying that, "Any Federal agency shipping U.S. Government cargo shall solicit bids from any ship operator for the transport of U.S. Government cargo over a route which is not serviced by such operator," and then give the qualifying reasons why we do it.

Then on page 8 we require a report to the Congress. We say that "24 months after the date of enactment of this act, the General Accounting Office shall review the compliance" with the act. We set up a Great Lakes and St. Lawrence Seaway Advisory Council, which is a council that serves without pay, made up of 12 members. I think no one would argue with the composition: the Secretary of Commerce, the Secretary of Transportation, the Secretary of Agriculture, the Assistant Secretary of the Army for Civil Works, the Administrator of the St. Lawrence Seaway, the Administrator of the Environmental Protection Agency, the chairman of the Council of Great Lakes Governors, five members of the transportation industry, and so on.

Then on page 10 we set forth the functions of the Council, telling what the Council's responsibility will be.

Then on page 13 we set forth the powers and administrative provisions of the Council. We provide that the members shall serve without compensation so that those who serve on this Council do so without pay and in the public interest.

I would say in all sincerity, though I doubt that the rollcall will reflect this, that if every Member would read this amendment and understand the consequences of it, there would not be a single vote against this amendment. It is a good amendment, carefully crafted, in the interest of the Government and in the interest of the American taxpayer. It honors the Merchant Marine Act. It has been cleared, as I understand it, with the merchant marine industry generally. It accomplishes a very unique and important service in guaranteeing the use of reasonable prices for the shipment of these products.

I am very hopeful that as this debate continues on this amendment, my dear friend from Mississippi might surprise me by indicating that upon careful reflection, having heard the reading of it by the clerk and the explanation of it by this Senator, he will be persuaded to the intelligence of my position. I wonder if that is a possibility.

Mr. COCHRAN. Mr. President, will the Senator yield?

Mr. DIXON. I am delighted to yield.

Mr. COCHRAN. Mr. President, I congratulate the Senator on his effort to attract attention to the fact that there are some Senators who are not pleased with the provisions of this compromise insofar as they relate to the shipments out of the Great Lakes region. I wish he could be pleased, and I wish others who have expressed their concerns about the Great Lakes area could be persuaded that this bill does reflect a sensitivity to those concerns.

The compromise provides for the creation of an advisory commission to address these concerns. The commission would study this problem, come up with answers to questions that have been raised about why the tonnage is decreasing in the Great Lakes ports, outline how changes can be made in laws and procedures to provide fair and equitable allocation of Government-financed shipping, and show how the Great Lakes area could benefit from an allocation that would be more fair and equitable.

These are concerns that we understand. We know they exist. I congratulate the Senator for bringing these to the attention of the Senate.

We have had these expressed through the offering of several amendments now. We have had votes on those amendments, or at least votes on motions to table those amendments. Consistently, a substantial majority of the Senate has spoken that this compromise is the best we can do right now. To adopt preferential language—language that actually would prefer Great Lakes ports over east coast, gulf coast, or west coast ports—is not appropriate.

I am afraid that, in spite of the nice language we have heard read so accurately by the clerk and described with such eloquence by the distinguished Senator from Illinois, this is another amendment that is really more of the same. The operative language in this amendment is "lowest landed cost," and we just voted on that. Senators just voted to table an amendment that would require the shipping of U.S. agricultural commodities on the basis of lowest landed cost. That undermines and can disregard even the provisions of current law with respect to cargo preference.

It would do violence to the maritime industry, it would not help our beleaguered farmers, and it would have serious consequences to our merchant marine.

The amendment attempts to benefit the Great Lakes at the expense of the other three seacoasts. The Great Lakes are already adequately protected by the formation of the advisory commission that is part of the language of the compromise amendment. The compromise also directs the Secretary of Transportation to administer this program so that the historic trading patterns and movement over port ranges are taken into account.

That is about all we can do right now, Mr. President. Everybody would like to have more shipping out of their ports. We would like to have more from the Mississippi River ports in Mississippi. But there are some practical problems that we run into sometimes that we cannot legislate away.

I know that the Saint Lawrence Seaway is an impediment insofar as the large modern ships are concerned. They cannot get in there to service a lot of those Great Lakes ports. The locks are narrow in some cases. I can recall, I might say to my friend from Illinois, that when I was in the Navy, the ship I was on, the U.S.S. *Macon*, took an inland seas cruise. I was not aboard for that cruise, but I recall the events surrounding the cruise. The H.M.S. *Britannia* was on that cruise and they made calls at the Great Lakes ports. I recall when the ship came back and was home ported at Charlestown Naval Shipyard in Boston. we had to put it in the yard for repairs because the screw guards were bent and damaged in those narrow locks.

This was a heavy cruiser. I have forgotten the exact beam of that ship, but it was much less than the beams of ships in our modern merchant marine fleet. That is the problem.

It is the same problem that we had at Natchez, MS; Vicksburg, MS; and Greenville, MS, when the bridge was constructed over the Mississippi River at Baton Rouge. The bridge was so low that oceangoing vessels could not get under it. They could not put in any longer at Natchez, Vicksburg, or Greenville. Those ports dried up.

Some give credit to Gov. Huey Long for constructing that bridge at that level so the large, oceangoing ships had to stop at Baton Rouge. They could not go any farther. Baton Rouge is unique as a Mississippi port because it is not located at a point where the river is the boundary of both Louisiana and Mississippi; on both sides of the river at Baton Rouge, you have Louisiana. This is not the case at Natchez, where you have Vidalia, LA, on one side and Natchez, MS, on the other. To construct a bridge there, you would have to have the cooperation of both State governments. But at Baton Rouge, in those days, we witnessed the construction of a bridge that was so low that ships of a certain size were not able to get north of that point. As a result, Baton Rouge flourished as a port and so did New Orleans, and we have seen the consequences.

Of course, there are now container barges available, and we have seen ports recreated on the Mississippi north of Baton Rouge. These ports are doing business once again. Just recently, within the time I have served in Congress, the port at Natchez has been reconstructed with the help of an EDA grant and initiative from local business leaders. We have had a new

port constructed at Rosedale, MS, just north of Greenville.

The point I am making is that some of the great Lakes ports have a similar problem. There is an impediment to the servicing of those ports.

I am not saying that that is the only problem the Great Lakes have. We have recognized that there are some legitimate concerns. We understand the problems the Senator from Illinois has. We are trying to address these concerns in the compromise. We think the language of the compromise addresses these in a sensitive way. The Senate has said that it believes so, too, by a 70-to-30 vote. Last night, by 71 votes to 22 votes, and here again this morning, by a similar margin, the Senate has spoken on this issue.

I hope the Senator will accept the decision of the Senate and let us move on to the consideration of the other provisions of the farm bill. I do not want to suggest that the Senator is intentionally delaying the progress of the Senate on the farm bill. He represents a great farming region. He has been an active member of the Committee on Agriculture in the development of this important legislation. He and I have worked closely together on amendments in the Agriculture Committee and I have the highest regard for him. I respect him. I have a great deal of affection for him as a person. He has done a great job in the Senate in advancing the concerns that he has with respect to the cargo preference provisions that relate to the Great Lakes interests.

However, we have voted on that, Mr. President. We have voted on that five times now. I wonder how many more times we have to vote on it. The Senator can answer that; I cannot. I hope that this time, when we vote on the motion to lay the Senator's amendment on the table, that this will be the last amendment we will have on this subject.

Mr. President, it is not my intention to cut off the debate. If any other Senators want to speak out on this issue or ask questions, I certainly hope they will come to the floor and we can conclude the debate on this amendment of the Senator from Illinois. I shall move to table and get the yeas and nays so the Senator can have another vote on this issue, but I hope this will be the last vote on this issue so we can move along to other provisions of the bill.

Mr. DIXON. Mr. President, I think the subject has been fairly thoroughly examined. I thank my colleague from Mississippi for expressing his views about it. I ask for the yeas and nays, Mr. President.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. COCHRAN. Mr. President, I move to lay the amendment of the Senator from Illinois on the table, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Mississippi to lay the amendment of the Senator from Illinois on the table. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Mississippi [Mr. STENNIS] is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 70, nays 29, as follows:

[Rollcall Vote No. 264 Leg.]

YEAS—70

Andrews	Gore	McClure
Baucus	Gorton	Melcher
Bentsen	Gramm	Mitchell
Biden	Grassley	Murkowski
Bingaman	Harkin	Nunn
Bradley	Hart	Packwood
Bumpers	Hatch	Pell
Burdick	Hatfield	Pryor
Byrd	Hawkins	Rockefeller
Chiles	Hecht	Rudman
Cochran	Heflin	Sarbanes
Cohen	Heinz	Sasser
Cranston	Hollings	Specter
D'Amato	Inouye	Stafford
DeConcini	Johnston	Stevens
Denton	Kennedy	Symms
Dodd	Kerry	Thurmond
Dole	Lautenberg	Trible
Domenici	Laxalt	Warner
Evans	Leahy	Weicker
Exon	Long	Wilson
Ford	Mathias	Zorinsky
Garn	Matsunaga	
Goldwater	Mattingly	

NAYS—29

Abdnor	Glenn	Nickles
Armstrong	Helms	Pressler
Boren	Humphrey	Proxmire
Boschwitz	Kassebaum	Quayle
Chafee	Kasten	Riegle
Danforth	Levin	Roth
Dixon	Lugar	Simon
Durenberger	McConnell	Simpson
Eagleton	Metzenbaum	Wallop
East	Moynihan	

NOT VOTING—1

Stennis

So the motion to lay on the table the amendment (No. 927) was agreed to.

Mr. COCHRAN. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, we have been discussing cargo preference here now for about 24 hours—maybe not that much in the Chamber—and I understand there continue to be amendments offered until there is some "compromise" but no one is working on the compromise. So I do not know how we can work out a compromise if we have a continuous stream of amendments.

So I have suggested to my staff that perhaps they could get together with the staff of the Senator from Illinois, the Senator from Minnesota, and the Senator from Mississippi, if we can be of assistance, because there are still 60 amendments remaining on the farm bill. I do not think all of those will be offered. But there is an outside chance we could finish the bill this week and that would help our whole calendar for the remainder of the year.

Hopefully after this next amendment we will have maybe something we can compromise on or move on to payment limitations or 1-year target price freeze, or some other portion.

Mr. DIXON. Mr. President, will the Senator yield?

Mr. DOLE. I am happy to yield.

Mr. DIXON. Mr. President, I am advised that the staff of my office and the staff of the office of the Senator from Minnesota have given to the staff of the distinguished Senator from Mississippi compromise language that I am advised was satisfactory to the staff people of the Senator from Mississippi but that others present in the Chamber or elsewhere are not pleased with that language.

I do not know how many other people have to play, and they are welcome to. I do not want to misrepresent what the facts are here, but I had just been told that language we agreed upon, those of us on both sides who are concerned about a compromise, and been given to the staff of the Senator from Mississippi, was found to be satisfactory.

I say to the majority leader that anything that my colleague on the Senator's side, the Senator from Minnesota, will agree to is satisfactory to the Senator from Illinois. We have crafted language that I thought was reasonable. A report came back that the staff of the manager at least thought it was reasonable but others apparently do not.

I do not want to be difficult about this, but I am willing to agree in a reasonable way with reasonable terminology.

I have another amendment at the desk I am prepared to call up, and it is a very good amendment. I am hopeful about it.

Mr. HARKIN. Mr. President, will the distinguished majority leader yield?

Mr. DOLE. Mr. President, let me respond. I understand the Senator from Minnesota, Senator BOSCHWITZ, is trying to locate staff members.

Mr. DIXON. He is in the Chamber now, I say to the majority leader. I spoke with him a moment ago. Our staff is working and met with them.

We are making a conscientious effort to accommodate the differing points of view.

Mr. DOLE. Mr. President, the only point I will make is we have agreed with the chairman and ranking Democrat on the Budget Committee, Senator DOMENICI and Senator CHILES, if they can bring reconciliation back we will interrupt the farm bill, and also there is some hope that we might have the debt ceiling back here tomorrow or the next day and that would interrupt the farm bill.

So I am just suggesting. I do not find any fault with anyone. I am just suggesting if we could resolve this, it would permit us to move on to the other issues in the farm bill, and I do not quarrel with anyone who is trying to work out a compromise.

So we will try to do what we can to facilitate it.

Mr. DIXON. Mr. President, as long as I can make it clear to the majority leader I am not on this side doing this for fun, I want to do so. Each time we have a rollcall I address my personal friend over there and let him know I am ready for a compromise. We have crafted language we thought was good. I am ready to adopt it when the Senator from Mississippi can accept it.

Mr. PROXMIRE. Mr. President, will the majority leader yield for a minute on that?

Mr. DOLE. I yield.

Mr. PROXMIRE. Mr. President, I point out that the Senators from Illinois and Minnesota are on the committee. They have been making a fight for many of us. We feel very strongly about this.

This is something that is devastating to our States, absolutely devastating. We could lose two-thirds of our port traffic. It will have an adverse effect on our economy and our employment in our States.

This is something of greatest importance. So it is vital that we work out some kind of a compromise.

We recognize we cannot get what we want. But we want some equitable settlement.

I think the Senator from Mississippi is a very reasonable man. All we want is a compromise.

Mr. COCHRAN. Mr. President, let me say in response to the comments of the distinguished Senator from Illinois and the distinguished Senator from Wisconsin that we are certainly willing to listen and consider any suggestions that they or others may have with respect to an improvement in the language of this compromise. We want it to be fair. We want it to be equitable to all four seacoasts.

We had hoped that the language that was in the compromise—as it is reflected in the amendment that is at the desk, and which has already been approved by 70 Senators—would take care of the concerns. We had felt that it addressed, in a fair and equitable way, the interests of those who represent the Great Lakes region.

It is apparent that it does not satisfy their concerns. I wish this compromise could satisfy every Senator's concern. I wish we could have 100 votes for it. We have 70 for it. That is pretty strong. I am hoping at some point Senators will recognize that there is a lot of leverage on their side. We do not have any changes, in my judgment, at this point.

Mr. LONG. Mr. President, will the Senator yield?

Mr. COCHRAN. I am happy to yield to the Senator from Louisiana.

Mr. LONG. Mr. President, is it not true that the Senator from Mississippi on behalf of his side offered a compromise that the other side turned down?

Mr. COCHRAN. The Senator is correct.

Mr. LONG. So in the effort to meet their problem the Senator has already proposed a compromise that from his point of view went about as far as he thought he could go to meet their concerns, and they turned it down.

Now, in this legislative body if you are in the minority—at some point it happens all the time—someone wins and someone loses, so having been offered a compromise, I applaud the Senator for indicating he is still willing to consider something that his supporters, his troops could accept. But in the last analysis they do not want what he can agree to. It would appear to me since he had 70 votes he has the vote to work his will and, of course, that takes some time. I understand that. But as a rule with 60 percent of the votes—it does not take 70—60 is enough.

So far the Senator's forces have not fallen below 60 in any rollcall vote.

Mr. COCHRAN. The Senator is correct. Sixty-three is the lowest vote we had.

Mr. LONG. So in the last analysis he is not only speaking for the majority he is speaking for enough to prevail, even if he had to resort to cloture. It would take time to wear out the filibuster. But he has the votes on his side. That is this Senator's judgment.

Mr. COCHRAN. I thank the Senator.

Mr. LONG. I thoroughly approve of the Senator making a compromise if he thinks it does not sacrifice what he thinks is vital for those he is speaking.

I plead to the Senator do not give away the store to these fellows. He has the votes. If he has the votes he should not be giving it all away.

Mr. COCHRAN. I thank the Senator.

Mr. ZORINSKY. Mr. President, I would like to call attention to the fact that there are a lot of people on America's farms who are waiting to find out what kind of a farm bill they are going to end up with.

This particular bill is going to generate a lot of heat that will make the cargo preference issue rather minor.

There are a lot of things in this bill of vital concern to dairy-producing States, to grain-producing States, to rice-producing States, and to peanut-producing States. There are very important issues in the bill.

But for some people in November 1986, when they do not come back again, they are going to find out that the vote in November contained no compromises in it.

The farm bill was developed by a fragile coalition, and if we are not going to abide by the overwhelming vote of a majority in this Chamber, we are going to be on the bill for a long, long, long time.

There are many things sacred to my State that are worth filibustering for. However, there is one factor that is more important than any parochial issue, and that is the welfare of the United States of America. In that regard, agriculture plays a vital and important role. It is vital to the sustenance of the people of this Nation. To maintain a viable agricultural industry, it is important that we let the farmers of America know what is in store for them in a timely fashion. They are entitled to that without our becoming bogged down in parliamentary procedures in this Chamber.

That is why, when I get calls, as a Senator from Nebraska and as the ranking Member on our side of the aisle managing this bill, as to what is happening—why is the bill not moving forward—I am going to forward the calls to those of my colleagues who are continuing to hold up the work of this Senate. I am going to give them their telephone numbers. I am going to give them their home telephone numbers. I am going to give them an address and refer all those questions to those Members of this body. The farm bill is important. We spent 4 months marking up this bill in our committee. I think enough is enough.

Mr. BOSCHWITZ. Will the Senator yield for a question?

Mr. ZORINSKY. Yes.

Mr. BOSCHWITZ. How much time did we spend on this particular matter in committee? I know that you were there each time and that you spent a great deal of time there. How much time did we talk about cargo preference? Was this so-called compromise, in which we had no part, was this ever discussed there and were any hearings held on it?

Mr. ZORINSKY. I would have been prepared to discuss it in committee if it were brought up. I was satisfied when we had the committee markup and I am satisfied that the Cochran compromise is the best we can get on the floor of the Senate. I love Utopia.

I would like to always have things my way.

But, do you know what? When I get a vote of 70 to 30 against me, I am going to accept that vote because I think we have to finish this farm bill.

Mr. BOSCHWITZ. Did the Senator say that he is going to make telephone numbers available and so forth? Is that what I heard him say?

Mr. ZORINSKY. Pardon?

Mr. BOSCHWITZ. Did I hear the Senator say that he was going to make my telephone number available so people could call?

Mr. ZORINSKY. I have not determined that the distinguished Senator is the one who is holding up the session. If that is the case, I will do that.

Mr. BOSCHWITZ. It is in the phone book, so you will not have any trouble finding it.

But in any event, we feel that we have been terribly injured. We are going to have ports closing. It may even affect some wheat coming out of Nebraska. Certainly, it will affect the wheat coming from the Middle West.

We are being subjected to a compromise that we were not part of. We are being subjected to a compromise that we tried to become a part of and tried to participate in and we were not permitted. Interestingly, we were not part of a compromise. The principal negotiator in the compromise has now turned against us, the majority leader. So if the Senator is satisfied with it, that is good, but we are not.

Mr. ZORINSKY. Well, I would just like to clarify what I said to the Senator from Minnesota. I take no issue with his doing whatever he wants to do with regard to retaining the cargo preference provisions of the committee reported bill. All I said was, when my constituents ask me what I feel is holding up the farm bill, I was going to refer them to those who are doing that. And the distinguished Senator can make the explanation to them, just as he did to me. I yield the floor.

Mr. PRESSLER. Mr. President, if it is proper, may I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The Chair must inform the Senator that the amendment is not in order at this time. Only an amendment to the amendment No. 916 would be in order at this time.

Mr. PRESSLER. Mr. President, could I ask my colleagues for unanimous consent? This is an amendment to establish a 3-tier target price for feedgrains and wheat. If the pending business could be laid aside, I could offer the amendment now. The majority leader and others have asked if we could go on ahead, as I understand it. I am ready to offer this amendment and debate it.

I am not trying to get ahead of anybody or anything of that sort, but I am ready to go on this amendment.

The PRESIDING OFFICER. Is there objection?

Mr. COCHRAN. Mr. President, reserving the right to object, let me ask the Senator if he could withhold the offering of that amendment. I think an objection would probably be made—I know one would be made if the Senator asks unanimous consent for the purpose of going to that subject now.

I hope we can stay on the issue of cargo preference and resolve it. I think we ought to resolve it now and move forward with any other amendments that are going to be offered on this subject so we can go to the other parts of the bill.

Mr. PRESSLER. Let me say to my friend, I was just trying to be helpful. I heard the majority leader say that Senators should come to the floor with their amendments. I am ready to go.

Mr. DIXON. Mr. President, may I make it clear that, for the purpose of the amendment of my distinguished friend, I would not have any problem to set aside this cargo preference question for that amendment, only reserving the right to pursue the amendment I have at the desk, which is the proper amendment on the amendment at issue before the Senate right now. But, for the limited purpose of taking up my friend's amendment, I would have no objection to that.

Mr. PRESSLER. I thank my friend. I do not know what the current situation is. I am willing to offer an amendment and get the business going forward. I do not anticipate anybody is going to try to amend my amendment.

Mr. DIXON. May I say to my friend from South Dakota, for the limited purpose of setting this aside only to go to his amendment, with that understanding, I would have no objection and then return again to my amendment which is at the desk.

Mr. PRESSLER. I only have a 8- to 10-minute speech. I come from the House of Representatives where we never spoke more than 5 minutes. I will just double that.

Mr. DIXON. May I say to my friend from South Dakota, I have always enjoyed his talks. I know I speak for many on this side, and my colleague from Minnesota, we would like to hear a longer talk. The Senator's talks I have found to be very enlightening and useful. So, please, do not limit yourself.

Mr. PRESSLER. I say to my colleague, his speeches have been very inspiring.

Mr. DIXON. I do not object to setting aside this amendment for the limited purpose only of considering the amendment of the Senator from South Dakota.

Mr. PRESSLER. Mr. President, I ask unanimous consent to proceed with my amendment.

Mr. COCHRAN. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

AMENDMENT NO. 928

(Purpose: To specify criteria for the availability of United States-flag commercial vessels for purposes of the cargo preference laws)

Mr. DIXON. Mr. President, I have an amendment at the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Illinois [Mr. DIXON] proposes an amendment numbered 928.

At the end of the pending amendment, insert the following new section:

"SEC. . Section 901 of the Merchant Marine Act, 1936 (46 U.S.C. 1241) is amended by inserting the following after the first sentence in subsection (b):

"No United States-flag commercial vessel shall be deemed to be available for the transportation of cargoes subject to this section and the Joint Resolution of March 26, 1934 (48 Stat. 500, 46 U.S.C. 1241-1) unless such vessel—

"(A) is able to provide full commercial insurability;

"(B) is available for loading within 10 days of the the specified loading date; and

"(C) is suitable, in terms of vessel type, size, and ability to discharge cargo, to transport the specific cargo to be shipped.".

Mr. HELMS. Mr. President, will the Senator yield?

Mr. DIXON. I am delighted to yield.

Mr. HELMS. I wonder if I might approach the Senator about a time agreement on this amendment.

Mr. DIXON. Mr. President, may I say to my dear friend, who I admire greatly—I serve on the committee with him; I have the greatest regard for him—he has been in the same circumstance as I am a couple of times.

Mr. HELMS. No time agreement.

Mr. DIXON. I am afraid I could not be agreeable to a time limit. I hope my colleague and friend knows I do not like to be obstreperous. One of the joys of my life has been to get along with people pretty well. I am here doing a piece of work I do not care much for. I am just trying to get an accommodation with my friend from Mississippi and his associates. Whenever they do that, I would be more than happy to accommodate everybody.

In the meantime, I would like to explain what I am doing at some length from time to time on some of these amendments.

Mr. HELMS. Very well, if the Senator will yield further in the response to the remarks by my distinguished friend from Nebraska about the telephone numbers, I have, I believe, eight requests for Senators' telephone num-

bers—four from Bo Derek and four from Kate Jackson.

[Laughter.]

Mr. DIXON. Mr. President, may I say to my friends in the Senate I am very serious about this amendment. I do not know that anybody listens when we get into this kind of a situation. I think we are pretty much committed to 70-30 rollcall votes or some variation of that. But all this amendment does, may I say to my friends who are voting on the other side of this issue, is, say, that if you buy a foreign vessel, you can put an American flag on it right away if it meets American standards.

I wish Senators, in their offices, wherever they are, would listen to this because in all fairness there is nothing the matter with this amendment. The administration wants this amendment. I do not know how persuasive that might be to anybody. But it simply would permit American companies in view of what we have done here—may I say to my friend from Mississippi—where we are saying 75 percent of them have to be American bottoms, we do not have that many American bottoms right now.

All we are saying is somebody on the Great Lakes in business can buy a foreign vessel, make it an American bottom, if it meets the standards, they get the insurance, meet the test, they put an American flag on the flag post, and operate it in compliance with the Cargo Preference Act.

Everybody here knows there is only one American bottom on the Great Lakes. By in the face of what you have done to cargo preference—I want to say again how anybody could have had a compromise, not have Great Lakes people there to play their part, do to us what is being done here—at least this amendment gives us a chance to go buy a ship. You ought to at least let us get a ship.

Maybe we would like to make these high prices, too, now that you have jacked up profit. Now that everybody can make 300 percent of what they were making before, I think there are a lot of people who want to go into the shipping business. When you have ice cream cones, for $10, everybody wants to sell ice cream cones.

So all we are saying here is, look, as long as you are going to make it so profitable, let us go buy a ship. I do not think that is very unreasonable.

I have been spending all my life in public service listing to speeches about the free enterprise system. And we abuse it quite a bit around here. If there is anything that is free enterprise, it is competition. All we are saying is let us buy a foreign ship. That foreign ship has to meet every standard—every standard—of an American ship. It must be suitable in terms of vessel type, size, and ability to discharge cargo to transport the specific cargo to be shipped. It must provide—listen to this—full commercial insurability. I mean it is absolutely a four square request. We are just saying we would like to play on this field if this is the field you are going to play on.

I do not see anything that could be more reasonable than that. I think it was suggested in support of this thing in the first place that it would help the military. We are willing to assist. We are going to help the military in having more and newer ships. If you adopt this amendment before you now, American businessmen under this amendment will buy foreign ships, and on the purchase under this act they will become American bottoms. You raise the American flag. They are fully insured. They meet all the standards. They become an American ship. What is more fair than that?

I just want to say this: Somewhere along the line the rule of reasonableness has to apply to what is taking place here. I ask my colleagues to consider very closely this particular amendment. I want to say again it is very simple. This amendment simply says an American businessman can buy a foreign vessel that meets all American standards, that fully complies with all American laws, that is fully insured, and make it an American ship so it complies with the cargo preference laws. That is absolutely all there is to this. It is a fair amendment.

I cannot imagine anybody that would be opposed to this. For that purpose, I ask my colleagues notwithstanding the 70 to 30 vote to look at this one more generously. It is a good amendment.

Mr. BOSCHWITZ addressed the Chair.

The PRESIDING OFFICER. The Senator from Minnesota.

Mr. BOSCHWITZ. Mr. President, I rise in support of the Senator's amendment, and would like to describe it once again keeping in mind what the purpose of the cargo preference is. The purpose, as I understand it, is that the United States should have a fleet that is available in the event of hostilities, and that the various subsidies given to the maritime industry are for that purpose. We do not contest that. We think that is an important and viable purpose to achieve. I supported the maritime industry in all other areas other than in this area of cargo preference where it comes into conflict with other elements of the economy.

This amendment says that we would be able to reflag ships that are owned by Americans that are now under the foreign flag, be they Panamanian, Liberian, and others, so that they would be able to qualify for hauling cargo preference types of goods.

This would accomplish several things. It would accomplish, first of all, that we would have an adequate fleet in the event of an emergency. It would give us a new method of obtaining such fleet. In addition, it would also bring down the cost of cargo preference.

As a result of that, we would be able to increase our fleet numbers, and in the event there were difficulties in the world, and some would not transport our goods, we would have adequate number of ships available to do just that. It makes great sense to allow the reflagging of ships now under foreign flags to the American flags.

It would also accomplish another objective; that is, to make the cargo preference of the shipments go at more reasonable rates. Yesterday, I pointed out that in one recent shipment in September to the Sudan the price per ton was $63 per metric ton while the international price was just slightly over $20 per metric ton.

The result of that is that a very large share of the cost of goods becomes greater. Where there are 37.7 bushels of wheat per metric ton, it amounts to 53 or 54 cents. If you take $63, it becomes $1 or $1.75. It is amazing but virtually two-thirds of the cost of the goods is in bulk cargo. This is a bulk shipment where freight should be much cheaper.

We really do not have much problem, Mr. President, with liner type shipment. As you may know, in the maritime shipments, there are two types of shipment, being the liner shipment and the other being the bulk shipment.

There really is not much of a problem with liner shipments, because with liner shipments our American fleet is quite able to compete with foreigners. The rates are established and we are able to compete along with other nations.

However, when it comes to bulk, there the disparity is different.

When we speak about Great Lakes ports, we are talking about liner shipments because that is what comes into the Great Lakes, liners. Liners also provide a good deal of the port work, and much more so than would a bulk shipment.

In the event these ships were made available as is requested in the amendment of the Senator from Illinois, then there is no question that the bulk rates would go down, as they have gone down in recent years.

There was a short window that was allowed to the maritime industry to allow ships that were built abroad to be included in the U.S. maritime fleet. As a result of allowing ships that were built abroad into the U.S. maritime fleet, the rates for cargo preference goods went down quite considerably.

The result of that is that it was not four and five times the way it was in the past, or three times now, and

lower than that in some instances, but we think that the freight or cargo preference shipments could indeed come down in the event that ships that are now sailing under foreign flags were allowed to be reflagged under the American flag. We would keep down the cheaper rate for cargo preference shippers, but we would also achieve the highly commendable goal of having a more aggressive and more modernized merchant marine that would serve us in the event this country was engaged in some form of hostilities.

So I join the Senator from Illinois in his amendment and say to him that he is certainly on the right track. I am happy to support his amendment and I will be happy to talk at some length on this subject if he wishes.

Mr. DIXON. I thank my colleague from Minnesota.

Is there something that the distinguished chairman wanted to say concerning this discussion or is there a possibility of setting this aside temporarily while we talk further?

Mr. HELMS. I was going to suggest that we go to a vote.

Mr. DIXON. We can go to a vote because my next amendment the chairman of the Agriculture Committee will love. It is an amendment where we comply with Gramm-Rudman-Hollings. He will love it. I know everyone will want to vote for that because we have endorsed it enthusiastically. That will be the next one. We can get to that as quickly as we want to.

Mr. COCHRAN. Mr. President, if the Senator will yield for a question, I have an amendment which I am told is the pending amendment. In the purpose section it says to specify criteria for the availability of U.S.-flag merchant vessels for purposes of the cargo preference.

May I ask the Senator from Illinois if that is the amendment he submitted to the committee amendment?

Mr. DIXON. The pending amendment says to specify criteria for the availability of U.S.-flag commercial vessels for purposes of the cargo preference laws.

Mr. COCHRAN. It is my understanding the Senator was talking about waiving the 3-year requirement for foreign-built ships to qualify under cargo perference.

Mr. DIXON. It does. It does by saying when you buy it, if you meet the full commercial insurability and all the other requirements of the vessels, you can qualify.

Mr. COCHRAN. If there are no other Senators who desire to be heard on this amendment, it appears to this Senator that this is another effort to undermine the compromise. It appears to be another effort to unravel the agreement which was forged after months of work to try to settle the controversy over cargo preference that was brought on by the recent Federal court decision that resulted in the Department of Agriculture's having to cancel its fledgling credit program.

Our exports are drying up. We are seeing the American farmer hurt by the impasse which has developed. We have seen the merchant marine hurt by this impasse. Seventy Senators have spoken through their votes. The compromise is acceptable and should be adopted by the Senate. I am hoping that that decision can be accepted by Senators.

There are provisions in here that protect the interests of those who are concerned about Great Lakes ports and Great Lakes shipping. I would grant they are not particularly satisfied. I am not completely satisfied by this compromise. There are some of my closest friends in my State who think this is a bad deal, but it is the best deal available right now under the circumstances. I am convinced of this, so I am supporting the compromise.

While it is not something I would like to do ordinarily, I am convinced that, in the long run, this will be a good solution to a tough problem.

I am hoping that Senators will continue to support the compromise by rejecting this amendment.

Mr. President, I move to table the amendment and I ask for the yeas and nays.

Mr. DIXON. May I say this to my colleague, that I have no objection. I join in the request for the yeas and nays. The next amendment I will send to the desk is the flag amendment. I will correct my response to the Senator by saying this one only requires full insurability and that the vessel is suitable by American type standards as to vessel, type, size, discharge of cargo, and so on. The next one concerns the power to acquire and put up the American flag. It is the next in the series that will do that.

Mr. COCHRAN. Mr. President, I renew my request.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BOSCHWITZ. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. COCHRAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. DIXON. Objection.

The PRESIDING OFFICER. Objection is heard.

The assistant legislative clerk resumed the call of the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The question is on agreeing to the motion to table the amendment of the Senator from Illinois. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Nevada [Mr. LAXALT] and the Senator from Virginia [Mr. TRIBLE] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Mississippi [Mr. STENNIS] and the Senator from Michigan [Mr. RIEGLE] are necessarily absent.

The PRESIDING OFFICER (Mrs. KASSEBAUM). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 73, nays 23, as follows:

[Rollcall Vote No. 265 Leg.]

YEAS—73

Andrews	Goldwater	Mattingly
Baucus	Gore	McClure
Bentsen	Gorton	Melcher
Biden	Gramm	Metzenbaum
Bingaman	Grassley	Mitchell
Bradley	Harkin	Moynihan
Bumpers	Hart	Murkowski
Burdick	Hatch	Nunn
Byrd	Hatfield	Packwood
Chafee	Hawkins	Pell

Danforth	Lugar	Simpson
Dixon	McConnell	Thurmond
Durenberger	Nickles	Wallop
East	Pressler	

NOT VOTING—4

Laxalt	Stennis
Riegle	Trible

So the motion to lay on the table the amendment (No. 928) was agreed to.

Mr. DOLE. Madam President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. ZORINSKY. Madam President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. DOLE. Madam President, we have a little discussion going on in the Vice President's room to see if we can resolve the problem here because I

51-059 O-87-39 (Pt. 21)

think we have consumed more than adequate time on this issue. I know the managers of the bill are anxious to get into some of the farm amendments, the real guts of the whole bill, whether they can have a 1-year target price freeze or some variation thereof, and a lot of other amendments that are pending.

I would hope that we could resolve this problem. If not, I would hope that those who have the problem will let us set it aside and give them the remainder of the day and part of tomorrow to try to work out some agreement.

I do not have any chips on either side. I think there is some merit in the remarks made earlier by the distinguished Senator from Wisconsin.

I would hope that if we cannot reach some agreement in the next few minutes we be permitted to set this amendment aside temporarily and go to some other amendments and see if we cannot get the farm bill passed.

Mr. PROXMIRE. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I suggest that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. SYMMS). Without objection, it is so ordered.

Mr. DOLE. Mr. President, about an hour ago a quorum call was requested in hopes that we might be able to work out some agreement on the pending cargo preference controversy. We have now consumed all of yesterday and about half of today on this one issue. But there are still 60 or more amendments pending to S. 1714, the Agriculture, Food, Trade, and Conservation Act of 1985. So I would hope, if we cannot resolve this problem, those interested parties would be willing to set it aside. It is not going to go away, and the farm bill is never going to go away if we do not start voting on some of the agricultural amendments. So I am going to suggest in about 5 minutes, if we have not reached some agreement, that we ask unanimous consent to temporarily set aside this amendment and move on to some other amendment. As soon as we finish that amendment, this amendment will be right back. So maybe by that time there will be some agreement.

It does not make sense to fritter away 5½ hours so far today on an issue where we have not made any headway. And there is demand that we complete action on the farm bill itself, so I would say in about 5 minutes we will ask unanimous consent to temporarily lay this amendment aside unless there is some agreement.

Mr. DIXON. May I say to my friend, the majority leader, I guess he does know that Senator COCHRAN, Senator INOUYE, Senator PROXMIRE, Senator BOSCHWITZ, and myself did meet for a period of time. Senator INOUYE, left us, informing us he would be back with some kind of a proposition. Our staffs are all working on the matter as well. I certainly have no objection to temporarily setting this aside to go to another amendment and then return to this amendment.

Mr. DOLE. If there is some agreement being worked out, that is fine. We do not need to hold up the whole Senate while four or five work out an agreement. That is my point.

So I hope that in a few minutes we can start making some progress.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending business is amendment No. 916.

Mr. DOLE. Mr. President, I am advised that the chairman is now in position to request that the amendment be set aside—I think we have cleared that all the way around—until 4:30 p.m. and then we can move on to another amendment or amendments between now and then.

Mr. HELMS. Mr. President, the majority leader is referring to the underlying amendment, of course.

Mr. DOLE. Yes.

Mr. HELMS. Mr. President, I ask unanimous consent that amendments 914, 915, and 916 be temporarily set aside for a period of 2 hours and that the Senator from Indiana [Mr. LUGAR] be recognized to call up an amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. I thank the Chair.

The PRESIDING OFFICER. The Senator from Indiana is recognized.

AMENDMENT NO. 930

(Purpose: To provide for a 1-year freeze in target prices and a 5-percent reduction thereafter)

Mr. LUGAR. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Indiana [Mr. LUGAR] proposes an amendment numbered 930.

Mr. LUGAR. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 88, strike out lines 18 through 23 and insert in lieu thereof the following:

"(i) in the case of the 1986 crop, $4.38 per bushel; and

"(ii) in the case of each of the 1987 through 1989 crops, such level as the Secretary determines to be appropriate taking into consideration the total supply of wheat, total program costs, and such other factors as the Secretary determines to be appropriate, except that the established price for a crop determined under this clause may not be reduced by more than 5 percent from the level determined for the preceding crop.

On page 114, strike out lines 20 and 21 and insert in lieu thereof the following:

"(E) The established price for corn shall not be less than—

"(i) in the case of the 1986 crop, $3.03 per bushel; and

"(ii) in the case of each of the 1987 through 1989 crops, such level as the Secretary determines to be appropriate taking into consideration the total supply of corn, total program costs, and such other factors as the Secretary determines to be appropriate, except that the established price for a crop determined under this clause may not be reduced by more than 5 percent from the level determined for the preceding crop.

On page 138, strike out lines 16 and 17 and insert in lieu thereof the following:

"(5) The established price for upland cotton shall not be less than—

"(A) in the case of the 1986 crop, $0.81 per pound; and

"(B) in the case of each of the 1987 through 1989 crops, such level as the Secretary determines to be appropriate taking into consideration the total supply of upland cotton, total program costs, and such other factors as the Secretary determines to be appropriate, except that the established price for a crop determined under this subparagraph may not be reduced by more than 5 percent from the level determined for the preceding crop.

On page 165, strike out lines 1 and 2 and insert in lieu thereof the following:

"(5) The established price for rice shall not be less than—

"(A) in the case of the 1986 crop, $11.90 per hundredweight; and

"(B) in the case of each of the 1987 through 1989 crops, such level as the Secretary determines to be appropriate taking into consideration the total supply of rice, total program costs, and such other factors as the Secretary determines to be appropriate, except that the established price for a crop determined under this subparagraph may not be reduced by more than 5 percent from the level determined for the preceding crop.

Mr. LUGAR. Mr. President, I wish to rise today to offer an amendment to reduce the enormous cost overruns of this legislation, and the effect of my amendment I would hope would be to send marketing signals that would discourage farmers from producing surplus crops which cannot be marketed for profitable prices.

The amendment would freeze the crop year 1986 target price levels for wheat, feed grains, cotton, and rice at present 1985 levels and allow for no

more than a 5-percent reduction in each year thereafter.

The Senate Agriculture Committee has reported a farm bill that ignores all reasonable budgetary limits; 14 of the 17 members of the committee voted in support of the budget resolution which was approved by the Senate and the House of Representatives. A majority of the committee, however, voted later to report a farm bill estimated to exceed the 3-year budget resolution by nearly $9 billion, using the assumptions of the January baseline.

According to more recent estimates by the Congressional Budget Office from the July baseline figures, the farm bill presently before the Senate will exceed the budget resolution by over $20 billion over the next 3 years of time.

Mr. President, let me say parenthetically that considerable dispute will occur throughout the remainder of this debate on target prices on the basis of these changing budget figures. The January situation was one in which the price of corn, wheat, cotton, and rice were higher than they were in July. Specifically, production of the major crops during this period of time from January onward changed dramatically in terms of estimates. For example, corn increased to 8.6 billion bushels, up 10.2 percent from the January estimate. Cotton went up 22.9 percent from January to the current estimate in terms of the estimate of number of bales now estimated at 13.6 million bales. And dairy was 4 percent more production during this period of time.

The gist of this, of course, is that prices are likely to fall as production rose. Estimates of production went up. At each estimate both futures prices as well as actual cash prices fell. This means that estimates of how much farm programs were going to cost also went up because, as will be explained a number of times in the course of this debate, the deficiency payments by the Commodity Credit Corporation are based on the target price minus a 5-month average of cash prices after the crop comes in but no more than the difference between the target price and the loan rate.

To take corn, because this is perhaps arguably the most expensive situation we will have this year, the target price is $3.03 for the current crop; the loan rate is $2.55. Since the price of corn is very likely to remain for 5 months under the $2.55 loan rate, the so-called deficiency payment will be $3.03 minus $2.55 or 48 cents per bushel for every bushel on every acre covered under the program for which a farmer signed up. It was about 71 percent compliance with the Corn Program this year.

That could lead in corn alone to about a $6 billion price tag for direct payments to farmers under this deficiency situation.

Mr. President, that is the reason there are differences in the estimates, and the gist of my amendment today will not be to resolve the entirety of all the cost overrun or budgetary estimate dilemma but simply to set in motion a trend which I would argue will be healthy.

In short, Mr. President, in figures supplied yesterday to us by the U.S. Department of Agriculture, in January the current baseline estimate for support costs by the Commodity Credit Corporation was $11.1 billion. The current estimate in October is that for the same law that we are now working under that would be $19.9 billion.

So at the time we are discussing the judgment in January, if we thought we had a $11 billion problem as we discussed it, now we have $19 billion, and that is for the current situation in fiscal year 1986. This is why everything becomes subject to the changes of these baseline figures, and there is no conceivable way Congress can deal with those horrendous overruns because even as we discuss the bill the prices of many commodities are continuing to go down and, therefore, the costs of the governmental payments that have already set their figures are clearly there and the terms are there and people are going to be paid and the price goes up.

All I am saying, Mr. President, is that if we had a $9 billion problem over a 3-year period of time in January, using the same assumptions, we have a $20 billion problem now. And that is too much.

In short, it is fair to say that the same Senators who discussed in this body the Gramm-Rudman amendment or the balanced budget amendment or various budgetary debates that we have had have talked and rightly so about the problems that are caused to farmers, to manufacturers, to exporters, by high interest rates, by the problems of a high dollar. They have said that there is some relationship between these problems and the Federal budgetary deficit. We do not know precisely the relationship, but it is there.

We have, all of us, condemned a $200 billion deficit in the fiscal year just passed and condemned the thought we would be fated to have $200 billion of deficits for almost each year in the future.

But now almost immediately the first debate after Gramm-Rudman we are confronted with the fact that in the agricultural sector we are going to run well beyond all of our budgetary estimates.

The question is, How in the most conservative humane fashion we can change even slightly that situation?

My amendment is not meant to do more than merely get the process in motion.

Mr. President, I have no argument with those in this Chamber who have pointed out that farmers in the current emergency need the certainty of the law as it stands. Therefore, the first provision in my amendment is to freeze the target prices for the fiscal year 1986 so that the situation will remain the same, bleak as it is; but it will remain the same, no worse. But then to suggest, I think, in a logical fashion, that our only hope in terms of some cost containment with regard to the deficit, with regard to taxpayers in general, with regard to farmers who are deeply interested in high interest rates and what have you, is to give the Secretary of Agriculture an option of reducing the target prices by no more than 5 percent in the next 3 years of time after that first freeze.

That is not a radical proposal. It, I think, solves one of two things that must come forward in this legislation. The first is that loan rates must decline so that we become more export competitive, and the second is that target prices must decline so that the enormous expense of the bill will not completely ruin all budgetary strategies that lead to overall economic health on the farm, in industry, or elsewhere.

Mr. President, the Senate recently voted to broaden the President's authority to impound Federal spending if the budget deficit is above specified levels. If the Congress is indeed serious about reducing the deficit, then we cannot vote to restructure our entire budget process for the purpose of reducing the budget deficit and then vote shortly thereafter to approve a farm bill that is from $9 to $20 billion over the budget resolution, depending upon which baseline, January, or July, or October, that one wants to use.

The argument that the budget resolution treats farmers unfairly is simply without substance. Prior to 1981, Farm Program costs averaged about $3 billion annually—$3 billion annually prior to 1981.

The Congress passed and the President signed a farm bill in 1981 that had an estimated cost in those days of less than $4 billion annually. That was our last time around the track, just 4 years ago—a farm bill that would average less than $4 billion a year at that time. The 1981 cost projections were not very accurate. Actual outlays since that time have averaged more than $12 billion annually.

Mr. President, Members may ask how that could have occurred. Even presently as we argue this farm bill and we say it is $9 to $20 billion over the budget, just 4 years ago when we argued this on the floor, the record

will show this bill total was going to cost us $3 to $4 billion a year. In fact, it cost $12 billion.

The reason, Mr. President, is not that Members tried to fudge the figures. It was that we set in motion various principles that were bound to lead to this effect. In short, we set high target prices. We set them higher for each of the 4 years. The incentives in the market were clear to produce more. There is no way to read higher target prices except as an incentive to produce more.

Even in this particular year, Mr. President, when there has been 71 percent compliance on farms that produce corn and, by all odds, the number of acres that should have been in production have been sharply less, and in some States were sharply less, we have a record crop—8.6 billion bushels and going upward. The fact is that we have been producing because the market, as the Federal Government suggested with higher target prices, signaled more production, and thus we tripled the estimates that we had, modest as they may now seem, when we debated this 4 years ago.

The Senate Agriculture Committee has recently recommended—and in this bill that idea is incorporated—a 4-year freeze in target price support levels, despite the fact that the present target price levels are some 50 percent greater than actual market prices. Under the committee's bill, Federal payments for target prices are estimated to exceed 47 percent of the total value of all production for wheat, 36 percent for corn, 43 percent for cotton, and 62 percent for rice.

My amendment freezes the crop year 1986 target prices for wheat, corn, cotton, and rice at the 1985 levels, but gives the Secretary of Agriculture the authority to reduce target prices by not more than 5 percent in crop years 1987, 1988, and 1989. The Congressional Budget Office estimates this amendment would reduce the 3-year costs of the committee's bill, using the $9 billion overrun on the January estimate, by $2.4 billion. A relatively modest savings, but, Mr. President, I would suggest probably the most substantial savings that is going to be offered during the course of this debate, if one takes a look at history of the target price situation in the last 4 years.

If one were to use the July baseline figures, of course, the $2.4 billion savings is magnified considerably, probably in the order of two and-a-half to three times, in the same manner that the $9 billion became $20 billion. But, attempting to keep things at the January level, essentially a $2.4 billion savings for what would be a modest 5-percent reduction for 3 years of time.

The target price mechanism works as follows: Whenever the national average price for a crop falls below the target price for a specified period, a producer of that crop becomes eligible for a "deficiency payment" equal to his normal production multiplied by the payment rate. The payment rate is the difference between the target price and the average market price, or between the target price and the average loan rate for nonrecourse loans, whichever is smaller. The farmer's actual production and actual price received for his crop are not factors; he can receive payments even though he may have sold the crops at a much higher price.

Target prices were established for wheat, feed grains, cotton, and rice in the early 1970's. Former Secretary of Agriculture Earl Butz agreed to the target price concept as a tradeoff for more export oriented policies at that time. The target price levels enacted at the time were believed to be low enough to avoid any budgetary outlays.

As has proven to be the case with virtually all instances involving target prices, the cost projections were, to say the least, inaccurate. The 1986 farm bill, as reported by the Senate Agriculture Committee, calls for an estimated $45 billion in outlays for target price deficiency payments over the next 4 years.

So that is our estimate, as we start this 4-year period, about $11¼ billion a year, somewhat more substantial than the estimate of $3 to $4 billion a year we made just 4 years ago, which proved to be barely one-third of the cost of what the program finally came to.

Target prices are no more than guaranteed minimum prices fixed by law. They trigger Federal outlays that are as uncontrollable and unpredictable as U.S. agriculture itself. We have no idea what the weather will be in 1986, 1987, and 1988. Economists cannot accurately predict if the estimated $45 billion in deficiency payments will ultimately go to the farmer or, if market prices rise, the payments would become less significant. The point is simply that the Senate cannot knowingly predict the farming situation for 1989 and should not attempt to establish the minimum price levels for a situation that is unpredictable.

The Secretary of Agriculture simply must have some authority for modest—modest—downward adjustments in the target prices for later years in response to the prevailing market conditions at that time.

Of course, Mr. President, the Secretary of Agriculture is not entirely defenseless against this cost situation. The Secretary may use his authority under law to announce acreage retirement programs in order to reduce production and shore up farm prices. For example, if you have historically planted 100 acres of wheat and the Secretary announces a 30-percent set-aside program, you can only plant on approximately 70 acres for that particular year in order to qualify for the target price payments. This is not authority that the Secretary employs in a limited way. As matter of fact, he announced acreage retirement programs for all program crops this year. Corn farmers had to retire 10 percent of their acreage in order to qualify for deficiency payments. As I have pointed out, Mr. President, even after this retirement corn farmers are producing a record crop—in excess of 8.6 billion bushels. Wheat farmers had to reduce by 25 percent; cotton farmers had to reduce by 30 percent, and rice farmers had to reduce acreage by 30 percent.

The predicament we face with acreage diversions is that most farmers tend to idle their least productive acres. Despite large acreage diversions this year, we are harvesting bumper crops for virtually all commodities. The prudent farmer simply idles his least productive acres and more intensively farms what is left with extra fertilizers and better overall management situations. In the end, we could end up with the worst of all worlds with the USDA taking on the significant regulatory burden of spot checking and measuring to ensure that farmers plant within their allotted acres, and yet, we achieve no measurable decrease in production.

The other side of this argument is that acreage diversions can reduce production if implemented in a significant way as was the case in 1983 with the Payment-in-Kind Program. This program idled 80 million acres—one-half of our total cropland base for wheat, feed grains, cotton, and rice. Farmers were given $9 billion in Government-owned commodities in exchange for reducing their production acreage.

Unfortunately, there are tremendous downsides to programs of this sort. U.S. farmers cannot expect to compete in international markets with over one-half of his land and machinery idled for an entire crop year. In essence, export sales are ceded to other nations under those conditions. Large acreage reductions efforts also have a devastating impact upon U.S. agribusiness firms. The fertilizer industry alone lost an estimated $2 billion in revenues as a result of the Payment-in-Kind Program. Many farm implement firms have since been forced into mergers and consolidations in a desperate attempt to retain profitability. In order to prosper and compete in international markets, U.S. agriculture simply must maintain a viable and highly competitive agribusiness industry. The Payment in Kind, or other similar programs, simply cannot become a permanent feature of U.S. farm policy.

The market is presently signaling for greatly reduced supplies of all major crops. U.S. carryover stocks of wheat exceed 65 percent of total annual consumption; corn stocks exceed 30 percent of total usage; cotton carryover stocks are 60 percent of total annual consumption; and rice stocks exceed 60 percent.

Not surprisingly, current market prices for each of these crops are very low. The market is attempting to balance supply and demand at a time when U.S. agricultural exports have declined by 20 percent and favorable growing conditions have produced record crops in 3 out of the last 4 years. But the 1985 target price levels and the levels retained by this legislation continue to signal for business as usual. The farmer does not make the necessary production adjustments which are called for by market demands. Surplus production continues to accumulate in government warehouses. Carryover stocks grow larger which forces market prices even lower.

From personal bookkeeping experiences on my family's farm in Marion County, IN, I am well aware of the current financial problems facing many farmers.

Let me say parenthetically, Mr. President, that in the case of my family farm, we are fortunate to have no debt. That makes an enormous difference in the possible profitability of that operation. Approximately a third to a half of all farms in Indiana have little or no debt. The situation for our farm which we believe is being well managed and for comparable family sized farms—ours is 604 acres in size, and this hits a general idea of the family farm size—our return on invested capital is approximately 2 to 3 percent. That return is increasing as the value of the land decreases—as that divisor decreases. But it is in line with at least well-managed Indiana farms—return of about 2 to 3 percent on invested capital with no debt involved. Mr. President, that of course is the heart of the matter for most investors in this country with a similar amount of money. By putting it in the U.S. Treasury securities, one can make 10 to 11 percent—considerably more than the 2 to 3 percent on the farm.

Farming is not a profitable business, or at least a remunerative business even if one has no debt, the situation is well managed, and the weather has been reasonably favorable. We are in a secular decline of farmland prices that has probably not yet run its course. We are in a situation of lowered crop prices because we have enormous surpluses. The figures that I just read may not have sunk in, but if there is 60 percent of all that is needed in cotton and rice, 30 percent of all the corn that is needed for the next year already there, the depression upon price is obvious.

Mr. President, if our customers abroad do not have the resources—many do not as Latin American countries work through the International Monetary Fund to work out plans, as people by the force of the international debt situation simply cannot buy—if export sales go down, we have enormous surpluses here well beyond our capacity, prices go down, and then stay down. That is reflected in agricultural land prices. Therefore, about the best a farm situation could do, unless it is a highly leveraged speculative situation or a specialty crop is to move somewhere in the 2 to 5 percent—if you are very fortunate—return on income. That is why we have a problem. That we recognize.

Mr. President, let me just say that to keep the target prices at the current levels to send signals to farmers all over this country, a guaranteed price of $3.03 per bushel of corn is to guarantee the price on the market is going to keep going down. The facts of life are that with borrowing in a national weather disaster or some total cleanup of debt around the world, we have a very large surplus overhanging the market.

Mr. President, let me concede so that all understand, for the first year of these 4 years, even given everything I have said, we would leave the target price as it is so there would be assurance to farm families, to the farm industry, to every infrastructure of farming in every small town or large town of America that there will be stability for 1 year. But then, Mr. President, we must at least make a modest start in moving the target price situation and in giving the Secretary the latitude to change target prices for these four commodities by no more than 5 percent.

Mr. President, I submit that this modest amendment, although it will only solve a part of the problem, is a policy concept that is tremendously important. It is tremendously important as we begin to face the future. We begin to get some idea to American agriculture of a movement toward the market—just the movement—with a lot of props, a lot of money, and a lot of income still in there behind it.

Mr. President, I am hopeful that my colleagues will favor this amendment with their votes. I hope they will give it thoughtful support. It seems to me that we have an opportunity to fashion a farm bill even at this late hour that might meet all of the requirements of a nation that is compassionate, that wants to bring farm income at least to a point where people can continue to farm, and continue to serve in the infrastructure of American agriculture, but looks to the Senate for at least a minimal foresight with regard to the future.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I thank the Senator for his remarks. The figures presented by the Senator are very interesting.

I believe, however, that the Senate needs to understand where we are in terms of the cost of this bill, which led this Senator to the regrettable position of being the first chairman of the Senate Agriculture Committee in history to vote against reporting a farm bill. I just could not in good conscience support the bill. I said so at the time, with all due respect to my colleagues who felt differently about the spending level.

Mr. President, I do not know whether I can serve to simplify the issue, but let me try.

I think the first thing that needs to be understood by target prices—and a lot of people do not understand what is meant by target pricing—is that target prices really have nothing to do with market prices. Target prices are simply an arbitrary standard used to determine how much of the taxpayers' money the Congress proposes to transfer from the nonfarm sector to the farm sector. These are most always referred to as subsidies.

The problem with target prices, I have decided after having served for nearly 13 years on the Agriculture Committee, and since 1981 as its chairman, is that target prices fall into the category of spending which we call around this place as entitlements. But the irony is that the entitlements are not to individuals on the basis of need. They are paid on the number of bushels, pounds, and hundredweights a farmer can possibly manage to produce.

I think we all should know the marketplace has been pleading for reduced incentives for overproduction. The Senator from Indiana made that perfectly clear. The trouble is overproduction is induced by target price payments. The consequential fact is that the American farmer today is not producing for the marketplace, but producing for the Government. When one say the Government, one means at the taxpayers' expense.

The signal has not gotten through to the farmers in many cases. The way the system has worked is the lower the market prices go down, the more taxpayers' money Congress spends to mask these lower prices.

In addition, the system obviously rewards farmers for producing more or producing in excess of needs because the more they produce the more dollars they get from the Federal Government.

Let me make it perfectly clear that I do not, and I think Senator LUGAR does not, question the good intent of those who disagree with us. But the

side effect of it is that these good intentions have gone awry. We are indiscriminately spending billions of dollars on an industry, to wit, farming, in a fashion that may ease the pain in the short run but exacerbates the disease of surplus production and consequent falling market prices.

Giving the Secretary the authority to freeze target prices for 1 year will result in no cut at all in 1986, but it will result in a saving of approximately $2.4 billion over 3 years. I might make that relative by saying that $2.4 billion, Mr. President, is about what Congress provided for these subsidies for an entire year 10 years ago. That is how far we have come.

Obviously, I support Senator LUGAR's amendment, which does nothing more than freeze the target prices where they are for 1 year and thereafter allows secretarial discretion for up to 5 percent reductions for each of the crop years 1987 through 1989.

During the consideration of the farm bill, those 4 or 5 months we spent in markup, I repeatedly said to my colleagues, "Let us do what we can to participate in deficit reduction. This committee is not going out of business, the Senate is not going out of business, the Congress is not going out of business. Next year or the year after we can take a look at it and see what, if anything, needs to be done. But in the meantime, let us freeze it," as Senator LUGAR proposed, "for 1 year and then stand back and watch the reaction of the marketplace."

I think farmers everywhere would be amazed how much that would help in terms of exports, in terms of prices, because it would send a signal that has not been sent by this Congress in a long, long time.

During the past 12 months, Mr. President, through the extensive hearing process, private conversations with agricultural leaders and discussions with so many of my colleagues, I think I am fair in saying that there is little disagreement about the desirability of reducing the Federal role in American agriculture.

I go back into the cloakrooms, I visit around, and I do not hear any informal disagreement about that.

The problem comes when we get here on the Senate floor and Senators begin wondering how this is going to play back in Peoria or somewhere else.

Sure, it is tough to draw the line, but I think we were hired by the people in our respective elections in our respective States to come up here and make the hard judgments.

There is disagreement, it seems, around this place, informally and formally, to center more around the pace at which the Federal Government should withdraw after 50 years of intervention.

I believe that a slow withdrawal is somewhat akin to the man who loved his dog so much that when his dog's tail became infected, he did not want to do anything drastic to the dog, he did not want to hurt it too badly, so he cut off a little bit at a time.

I think we are at the crossroads, Mr. President, in a slow withdrawal from the failed policies of the past. We are going to help one group of farmers, a very large group of farmers, and that is the farmers overseas, our competitors in other countries. It is going to result here, at home, in a further bleeding of the American farmers without any benefit in the long term.

On the other hand, a rapid withdrawal such as that proposed in the original administration farm bill would have left the farmers with too much uncertainty given the financial distress that many farmers are faced with. The White House agreement with Congress regarding Senate Concurrent Resolution 32, the first concurrent resolution on the budget for fiscal year 1986, provided something in the neighborhood of $14 billion more for Commodity Credit Corporation farm price support programs than was originally proposed in the President's budget request and which was embodied in the administration farm bill proposal.

Congressional approval of the budget compromise gave the Senate Agriculture Committee more elbow room to develop a farm bill that did not jerk the rug out from under farmers but, nevertheless, forced a rapid enough adjustment that foreign competitors would need to become participants in our efforts to balance supply and demand on a global basis.

So, Mr. President, the people who love these high target prices the most are our competitors overseas, because all they have to do is come in a little bit below us on the market price and they have it made. They can capture more and more of the world market that we used to have. Our exports, percentagewise, drop and they have fun and we have distress.

(Mr. MATTINGLY assumed the chair).

Mr. GRASSLEY. Would the Senator yield on that point?

Mr. HELMS. I will in just a moment, Mr. President. Let me finish my train of thought. Then I shall yield the floor.

Of course, there is disagreement about this thing, there is political pain. I understand that.

Mr. GRASSLEY. Mr. President, the reason I wanted the Senator to yield, if he would, is just for clarification.

Mr. HELMS. Yes, Mr. President, I yield for that.

Mr. GRASSLEY. There might be some truth, there is a factual basis for what he says in regard to loan rates, but I am not sure that there is for the target-price system as far as our competition overseas.

Yes, the extent to which we can or cannot move our products into the world market because of the loan rate, I would agree with the Senator from North Carolina. But I do not think that is applicable to the target price.

Mr. HELMS. They are kissing cousins and they are part and parcel of the failed policies, I say to the Senator. That is the point I was trying to make. The target prices induce surpluses that cause farmers market prices to go down.

What happened in the committee in the markup of this bill, and I say again I fully respect all Senators on and off the committee who disagree with me, but what happened during our markup was this: Instead of following through on the budget agreement adopted by the Senate—and by the way, 14 out of 17 members of the Senate Agriculture Committee voted for that resolution—the committee nevertheless voted to report to the full Senate what I regard as a budget-buster beyond the wildest dreams of even the most ardent advocates of Federal intervention into agriculture.

That is the reason I felt obliged to vote against this bill. It gave me no pleasure; it gave me a great deal of pain, as a matter of fact. The committee-approved bill is almost 25 percent higher than what the Senate voted in the budget resolution to spend on farm programs over the next 3 years—$9 billion more. The irony is that it will hurt farmers most of all, in my judgment.

This excessive spending actually victimizes farmers. It hurts them in two ways.

First, target price payments are based on production. The more you produce the more payments you get. Yet, when market prices are driven low by surpluses created by massive subsidies, it becomes important to individual farmers to receive as many Government payments as possible. Therefore, we have a situation in which production is increased beyond what it would be so participating farmers can receive more payments. The result has been more production, ever lower prices, and higher taxpayer expense.

Second, farmers are the ones most adversely impacted by runaway deficit spending. High real interest rates have caused interest expenses to become the largest single element in farmers' costs of production. They have turned otherwise profitable operations into foreclosure cases.

The deficit has also impacted the value of the dollar. Few industries are as dependent on exports as agriculture. For what impact the deficit has had on increasing the value of the dollar relative to other currencies—agriculture has suffered.

I know that most farmers do not realize just how much money has been spent in an effort to shield them from market realities. Many Members of Congress also do not realize how much has been spent.

Most people think that defense spending or spending to pay interest on the national debt have been the fastest growing items in the budget.

Not so. Agricultural price support programs are the fastest growing item in the Federal budget.

In the 4 years prior to President Reagan's first term, those years governed by the 1977 farm bill, price support costs averaged between $2 and $4 billion annually.

The spending average for the 1981 farm bill, which coincides with Mr. Reagan's first term, averaged a whopping $10.4 billion—an almost 250-percent increase! These figures do not include any other spending incurred by the Department of Agriculture for other than net price support activities.

As you can see, if money was the standard, President Reagan should be more popular than Willie Nelson.

But money is not the only standard—not for President Reagan and not for this Senator. If money were the only standard for this Senator, I would have voted for the proposal offered in committee by the Senator from Iowa, Mr. HARKIN. But I did not, because I thought it was a bad policy for farmers and for the Nation.

My point is this: The Senator from North Carolina and the Senator from Indiana and many other Senators are prepared to spend tremendous amounts of money on farm programs and farmers in an effort to help get them through this period and back on track toward greater income from the marketplace. But we are not prepared to go on a wild spending spree. Some restraint, not miserly by any means, must be imposed.

The budget resolution allows Congress to spend about $11.5 billion per year on price support programs—depending on what we spend for farm credit—more than has been spent in the past—no cuts!

I repeat. The budget resolution will allow spending on price support programs without any cuts.

The committee bill, on the other hand, increases price support spending to about $14 billion per year—or around 20 percent more than the past 4 years which was 250 percent above the previous 4 years.

The Congressional Budget Office [CBO] estimates that this amendment will save $2.4 billion over 3 years; $2.4 billion is a significant savings, but far from the $9.2 billion we need to save in order to conform with the budget resolution agreed to by this body including 14 of the 17 members of the Senate Agriculture Committee.

By reducing target prices we have a rare chance to do something positive for farmers as well as the Nation. Conversely, failure to reduce target prices in a gradual, but steady manner, such as that proposed in the amendment, will hurt farmers more than help them, by adding further inducements to create even greater surpluses of all commodities than now exist, and by adding further to the massive Federal deficits that are debilitating the entire economy with an overvalued dollar and interest rates that are higher than they would be if we operated the Government in a fiscally responsible way.

Mr. President, I know that other Senators wish to speak and I am not going to continue. I thank the Chair and I yield the floor.

Mr. ZORINSKY addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. ZORINSKY. Mr. President, with effective target prices, we can maintain a safety net for agricultural producers, thereby enabling them to provide American consumers with the most diverse, highest quality and cheapest food and fiber in the world. It is true, there is great concern about the cost of this particular bill. I point out, though, that there is more than one way to reduce the cost of this agriculture bill. You don't have to change a 4-year target price freeze to a 1-year target price freeze.

I am concerned about the cost of this farm bill as are my colleagues on this side of the aisle. Currently, one of my colleagues is working on an amendment to reduce the bill's cost substantially and bring it more in compliance with the budget resolution. However, he does not propose to reduce the 4-year target price freeze to a 1-year target price freeze.

My dear colleagues, I speak to you as one who was a businessman for 40 years. If we do not have a safety net for the farmers of America, we are going to lose the engine that pulls the train called agriculture. We won't have enough commodities for our people at home or to ship into the international marketplace.

Many feel that the ultimate goal of the Lugar amendment is to bring it into line with the budget. I submit to my colleagues that we have to look at the bottom line of what this farm bill is going to do when we finish with it.

No. 1, it should be somewhere in compliance with the budget. But more important than that, it should enable the agricultural industry and rural America to continue to exist. We have, for all these many years, claimed to be experts in the area of agriculture. We have had setaside programs. I read yesterday where a member of the administration said we cannot unilaterally, as in the PIK Program, set aside millions of acres while our competitors fill the gap. Well, I say to you, Mr. President, there was no gap for them to fill even with the setaside of the acres, inasmuch as we had such tremendous surpluses we still could have furnished and completed any sales that were required of us for foreign sales abroad.

The problem is that this Nation does not have the commitment to our farmers as other countries do. Our farmers can compete with the farmers of other countries but they cannot compete with the treasuries of those other countries. That is why I think the time has come when this Nation has to become serious as to whether we want to again become a factor in the agricultural international marketplace.

As a businessman, let me tell you I have never known a businessman who continues to produce more than he or she can sell to stay in business. I think it is time for the farmers of America to begin to produce for sale rather than for storage. We continue to produce for storage and what happens? We have storage costs. And the surplus that overhangs the market further depresses the price of the commodity to such an extent that the farmers are producing themselves out of business.

Now, I agree with my colleague from Indiana that land prices have not now bottomed out. And this is happening without S. 1714—the 1985 farm bill—being in effect.

Now, a comment was made by my friend from Indiana that his proposal will allow stability in agriculture at least for 1 year. Well, let me say that agriculture cannot exist, no business can exist, without long-term stability. You cannot live with peaks and valleys. My colleague from North Carolina indicated that the Congress is not going to go away, so let us accept something like this, a 1-year freeze, and we can always come back and change and refine it.

Well, conversely, what is the matter with accepting a 4-year freeze? If we do not like it, we can come back and refine it. At least you are giving some out-year income protection to farmers that will allow them to plan for the future.

Now, we have established a terrible record of credibility in this institution called the U.S. Congress with respect to 4-year farm bills. We were 2 years into the 1981 farm bill and what happened? Lo and behold, we came back in this august body and decided that what we did in 1981 was wrong. The $4.45 target price for the 1984 crop of wheat was reduced to $4.38, and the $4.65 target price for the 1985 crop was reduced to $4.38. We changed the 1981 bill. This is graphic evidence, proof of what my colleague from North Carolina said; that this body

will not go away; that we can modify and change things.

As a matter of fact, I have hesitancy in locking farmers into a 4-year target price freeze—not for the same reason that my friend from Indiana indicates. If we continue in the direction we are now going we will have such chaos, confusion, and economic turmoil in this industry that 2 years from now we may not want target prices frozen, we may want them increased, not frozen by law in the year 1985. And we may want to go the other way with target prices.

But be that as it may, project yourself as a farmer or as any businessman in 1981, sitting down with his banker, taking his books out, looking at his average annual yield, projecting commodity prices, looking at the drought capabilities and the cost of borrowing money and the interest rates and saying, "This is what Uncle Sam says. Now, Mr. Banker, my target prices will be this, the loan support prices will be this for the next 4 years." The banker looked at it, looked at his cash flow and said, "We can loan you up to x number of dollars based on what we feel the Government is going to do for the next 4 years." So they loan the money. Then land values begin to plummet. Then more collateral is required, and on top of that all of a sudden dear old Uncle Sam comes along and says, "We don't care under what basis you made a decision to borrow money in 1981 under the 1981 farm bill. We are telling you it is a new ball game now. We are going to drop target prices 2 years out after we promised you in a 4-year farm bill they would be at x number of dollars."

Now, that would have been, I guess, tantamount to going up to the manager of the St. Louis Cardinals baseball club and saying to him, after 9 innings were completed, "How would you like a 10th inning to try to get even?" You cannot change the rules of a ball game once an individual has made an economic decision based on what Government has promised in the way of financial assistance. If you are not going to provide them anything, do not provide it from the beginning. At least they will know where they stand. But you never want to pull the rug out from under someone after you have made that commitment.

There used to be a time in this country when your word was your bond. You could shake hands with an individual; you did not need 10 accountants and 15 lawyers looking over your shoulder wondering if this commitment is going to last 10 minutes, 10 hours, 10 days, 10 months, or 10 years. But today I guess that has become a fact of life, and the Federal Government itself is as much responsible for the erosion of credibility as is anyone else.

Now, I would say that the fact that we have a glut, an overabundance on the market of commodities and the fact that prices are depressed have led to a recession in rural America. Now, when you say, "Let's have a 1-year target freeze and we will see what happens next year," this is what is going to happen next year. I can predict this with a great degree of credibility because it is happening this year, let alone next year. Take a look as a businessman at the alternative to not spending for agriculture. And I am not saying we should spend in excess of the budget. But I am saying, what if we do not, what is the down side? Because, again, I am looking at this as a businessman. If I fail to put an investment on the front end and chaos happens, what is my exposure on the down side of the situation?

This is what it is. The FDIC gets to come in and idemnify depositors in failed banks up to $100,000. Approximately 16 or more banks have failed in the State of Nebraska this year alone. That is a cost somewhere to someone. It is coming out of someone's pocket to reimburse depositors of banks.

Second, you get calls pretty soon, which I have already received from school boards, saying: "Mr. Senator, how do I set the mil levy for our school system, inasmuch as we are in rural districts? The farmers cannot pay the property tax; our mil levy is in the property tax. We have to know how many teachers to let go and how many schools to close."

Then you have your farm implement dealers and the fertilizer people. Many people say they are the ones who are really adversely affected if you control production.

As a businessman, I constantly had half a million dollars in the accounts receivable on the books when I was in business. Do you know what I did? Every night I went to bed and prayed that those people who owed me money stayed in business so that they could pay me the money they owed me.

The farm implement dealers I have talked to and the fertilizer people I have talked to would rather get paid for 100 percent of their accounts receivable than sell twice as much product and get paid for none of it.

So, what you try to do with a 4-year target freeze is lock in a safety net.

This farm bill—as reported by the Agriculture Committee—already has market-clearing loan support prices. As the Senator from Indiana aptly pointed out, the loan rate heralds the setting of world prices, not the target price. Target prices assure the farmer of a certain return, regardless of the market price. So target prices in no way signal our international customers or competitors.

Let us look at what really is the problem. We continue to produce as though we are going to eat that market alive in the international marketplace.

Without this bill been passed—we do not even have it out of the Senate, let alone to conference, let alone to the President, let alone back to override a veto, let alone maybe to have to start all over again—without this bill hurting agriculture, as people say it will, and affecting the budget, we are losing our share of the world marketplace. So let us not blame this bill for what is happening to us in the international marketplace.

Right now we have many more competitors in the international marketplace. India has become a net exporter of corn. They are self-sufficient in that area. The People's Republic of China has developed the technology to become a factor in the international marketplace in agriculture. The European Economic Community is currently producing twice the amount of products it can consume domestically—and guess where that is going to go in the competition? That is going into the world marketplace. Argentina is increasing its production.

I say let us produce for sales and let our competitors begin to produce for storing their commodities and paying storage on their surplus, as we have been dumb enough to do all these past years.

So I ask my colleagues to vote against this amendment. Let's give our people an opportunity to see some light at the end of the tunnel. Let's save an industry that ranks high in the national security of this country. If we lose the engine that pulls the train called agriculture, we will not have to worry about foreign policy and we will not have to worry about missiles. We will have to worry about an internal situation within this country.

Read any history book: The great nations have never been conquered from outside the country. It was always within that country, and within that country, there was always a factor of starvation and inability to feed itself.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. PRYOR. I thank the Chair for recognizing me.

Mr. President, I salute my colleague on the Agriculture Committee, the very distinguished Senator on our side of the aisle who is handling this bill, one of the floor managers of one of the most difficult bills to piece together and patch together to come to the floor of the U.S. Senate. I salute him for his dedication in trying to make common sense out of this measure.

I also salute him for the literally hundreds of hours the Senator from Nebraska has sat in the Agriculture

Committee and helped to fashion this bill that is today under consideration.

Mr. President, before I make a remark or two about the bill that is presently before the Senate and the amendment, I should like to ask a question of the Senator from Indiana [Mr. LUGAR], a gentleman I equally admire, one whose intelligence and forethought and wisdom I respect.

I ask the distinguished author of the Lugar amendment, which is now the pending business, if this amendment is supported by the administration.

Mr. LUGAR. The administration has not indicated anything by letter with respect to the amendment. In conversation with Secretary Block, the Secretary has indicated that he supports my amendment and hopes it will receive a favorable vote.

Mr. PRYOR. So the distinguished Senator from Indiana does indicate that the Secretary of Agriculture does support the pending amendment?

Mr. LUGAR. Yes, he does.

Mr. PRYOR. I thank the Senator.

Mr. President, this will be one of the key votes that the Senate will face on this year's agriculture bill. This piece of legislation, this agriculture measure, which is a 4-year program for the farmers and for the consumers of this country, has consisted of literally hundreds and hundreds of hours of hearings, discussion, and debate, and was completed after 71 rollcall votes in the Agriculture Committee.

It was not an easy bill to bring before the Senate. On many occasions, I was very uncertain as to whether my position was correct. But as we look at the various provisions, the hundreds of pages that encompass this committee report, I can truthfully say that I believe the Committee on Agriculture has brought to the floor of the Senate the best of all possible bills, under the circumstances.

Not everything I wanted in the agricultural bill prevailed. I lost on several votes, as I am sure all of us did in the Agriculture Committee.

Mr. President, the amendment proposed by the distinguished Senator from Indiana, as I have stated, will truly be one of the critical votes facing us on this piece of legislation. In simple terms, this measure on which we will be voting today, perhaps tomorrow, perhaps sometime next week--the way we do our business around this place, who knows when we will vote on the Lugar amendment?—represents, and I say this respectfully to the Senator from Indiana, a difference of philosophy between stability and instability in the American farm posture for the next 4 years.

We have talked and we have heard the distinguished chairman of the Agriculture Committee, the Senator from North Carolina, talking about sending signals to the country, sending signals to this country or that country, or this marketplace, or that bank, or whatever. But, Mr. President, should we by chance adopt the amendment offered by the distinguished Senator from Indiana to this farm bill we are in effect stating unequivocally, without reservation, that, yes, 1 more year the same program will be in effect but after that that program is over and farmers of America, farm families of America, you are out there and you are on your own because we are going to start pulling that life-support system out, not quickly, but a little bit at a time.

It is just like the distinguished chairman from North Carolina talking about that dog where you cut his tail off a little bit at a time. That is exactly what we are going to do in a very painful way, and I say to my friend from Indiana that the signal that will be heard in Brazil, the signal that will be heard in Argentina, the signal that will be heard in Canada, the signal that will be heard across the countries that compete, in many cases unfairly with the American farmer, that signal is going to be simple, it is going to be sure, it is going to be loud, and it is going to be plain because that signal is going to indicate, Mr. President, that the U.S. Government is pulling the plug on those farmers who are today remaining.

My friend from Indiana just got up and said only one-third to one-half of the farmers in the State of Indiana have any debt. I do not know what is happening in Indiana. I do not know whether Indiana farmers know a lot more than the farmers in Arkansas or not. But I can assure and promise my friend from Indiana that that is not the case in the 25 farm States. Most of the farmers today are in debt. The rural banks are crumbling. The Farm Credit System is going to be looking for a massive bailout. And for some reason or another, even though after repeated requests from members of the Agriculture Committee, we have not yet been able to obtain a hearing in the Agriculture Committee on the Farm Credit System and the implication of that Farm Credit System's debts and its woes.

I say to my friend from Indiana that really I think we are doing this thing backward. We probably should be talking about the Farm Credit System even before we bring up a 4-year farm bill that is under consideration today.

But once again that is not how the system has worked. We are on the farm bill and once again I remind my colleagues that this is truly going to be one of the key votes of this next several-day exercise in establishing our relationship with the farmers of this country.

Mr. President, I am not going to speak long.

Mr. HEFLIN. Mr. President, will the Senator yield?

Mr. PRYOR. I am glad to yield to my friend from Alabama.

Mr. HEFLIN. Mr. President, the distinguished Senator from Arkansas raised some interesting issues. I wish to inquire of him, No. 1, when this is called a 1-year freeze I really believe it is a misnomer because actually looking at what has happened to agriculture commodities, corn in 1984 the target price was $3.03, in 1985 it was $3.03, and now under this it would be $3.03 for 1986, and then start declining.

So I suppose as we are talking about a freeze I believe really that is a misnomer because we froze target prices in 1984 for 1985 at that level and we now are down on a downward escalation. We are coming down the ladder. Most of the time it is about 6 percent per year.

Has there been any indication to the Senator of any farm community on any farm economy that has had sufficient profit to justify a reduction of target prices?

Mr. PRYOR. I know of no commodity, no section of our country, no farmer, no farm group that actually would come in and say this is going to do anything but further damage the American farm family. I think that is what this amendment speaks to.

I think the Senator from Alabama has raised a very good question.

I might just add, the Senator from Alabama is a very distinguished member of the Agriculture Committee. The Senator from Alabama knows as well as the Senator from Arkansas knows that as to this piece of legislation, this farm bill of 1985, no one is happy with it. No one is excited about it. No one is going to become unjustly enriched because of it.

Basically, if we want to be honest with ourselves working within the parameters of the budget, working within the parameters of system, if we want to be totally honest, it is nothing to write home about. No one is proud of it. I am not proud of it. I did not even want to vote for it in the committee because I do not think it goes far enough. But the majority of my colleagues said this is as far as we can go.

Let me just conclude my statements, I say to my friend from Alabama and other friends on the floor this afternoon, I think once again on this piece of legislation, the farm bill of 1985, this truly could be one of the key votes that we will be facing on this bill. And I hope the Members of this body will really study this amendment, realize what signals we are going to be sending overseas and if we think exports are eating us up alive now, just wake up tomorrow in Argentina or Brazil or Canada, or wherever, and read the headlines the U.S. Government is about to pull the plug on the American family farmer, and then you are going to see, we are going to see

some imports flooding into this country and our export condition continue to worsen.

Mr. HEFLIN. Mr. President, will the Senator yield?

Mr. PRYOR. I am glad to yield to the Senator for a question.

Mr. HARKIN. Mr. President, if the Senator will yield for a second, the Senator is absolutely right on this idea.

We have already had a freeze.

I was listening to the remarks of the distinguished Senator from Alabama, observing this is not a freeze. He is absolutely right. What this is is not a freeze; it is a deep-freeze. It is a deep-freeze in which they plan to put the farmers of America if we follow this kind of program.

I thank the Senator for yielding.

Mr. HEFLIN. Mr. President, if we, therefore, are looking at this, we should realize what this would do as a 4-year farm program. It would have 1 year where we would maintain the target prices where they are and then start escalating down with no guarantee that farm income is going to increase or that they are going to get better in any way.

The only thing that we can point to is the issue of deficits, and saying, well, in budgetary restraint we must do something.

It is my understanding that the distinguished Senator from Montana [Mr. MELCHER] is preparing an amendment which will bring the farm bill within budgetary limits and it looks to me, if he can do it in a palatable manner where it is not harmful to the farmer, that is the approach that should be used rather than the approach of lowering target prices.

Maybe the amendment of the Senator from Indiana is premature. I do not know on this yet. But I do know there are some efforts being made to try to bring it within certain budgetary limits where it will not harm the farmer. I think that is something that should be considered.

But other than budget, does the Senator know of any justification at this time of saying that we should enter into a downward escalator which would lower farm income? Does he know any justification?

Mr. PRYOR. I see no justification whatsoever.

Mr. HEFLIN. I am not saying it is justification because of the budget but that is something we should look at and something we should be considering. If the Senator finds an alternative, then that to me is a far better approach.

Mr. PRYOR. I am so proud that the distinguished Senator from Alabama has mentioned a proposed amendment that ultimately will be offered by our colleague on the Agriculture Committee, the distinguished Senator from Montana, Senator MELCHER. I have looked at the outline and the concepts of Senator MELCHER's amendment. I can say that the Senator from Montana, I truly believe, has worked diligently and he has worked sincerely on both sides of the aisle in attempting to craft an amendment which will bring the 1985 agriculture bill within the parameters and constraints of the budget resolution. I applaud the Senator and say at this point that I am going to support the Senator's amendment, because most of us did support the budget resolution. We did adopt constraint on this particular bill as on many, many other expenditures.

But the Senator from Alabama has raised another good point. We are going into a downward escalator at this particular moment should the Lugar amendment pass the Senate. The Senator from Alabama is absolutely right, as is the Senator from Iowa, in stating the ramifications and the impact of this particular amendment, the Lugar amendment, which is supported by the administration and Secretary Block, which I hope that our colleagues will vote no on.

Finally, I say to my friend from Alabama—and then I would love to yield the floor and listen because I know other colleagues have something to say—that I do not know of another bill that we have considered in the Senate, it certainly was not the foreign relations bill that the distinguished Senator from Indiana, the chairman of the Foreign Relations Committee, has handled thus far: I do not think that bill he handled is $4.5 billion under what last year's budget was for foreign aid. We are talking about a $4 billion decrease in the 1986 program here versus the 1985 program that we are operating in right now.

I do not know of one other program, one other authorization or appropriation bill that has carried the magnitude of the type of downward scale in dollars spent for one function of Government as does the U.S. Farm Policy Act of 1985. Maybe some of my colleagues know it. But our farmers have already taken a hit, not only there but in the credit sector, falling land prices, and banks that are deteriorating because of poor loans.

I think that the Lugar amendment is going to be a very, very critical vote. I would at this time yield the floor.

Mr. GRASSLEY. Mr. President, I think all of us in this Chamber and, for sure, I know my Republican colleagues, everybody on this side of the aisle, have the same great respect for the free market that the Senator from Indiana has. But I think we ought to set straight that the last few years have not been the traditional free market operating. Basically what the Senator's amendment does is make a political decision, not an economic decision, that, for instance, in my State will lead to 20 to 30 percent of the people who are now occupied in farming no longer being farmers. That is a political decision, not an economic decision, that is being considered by this body as we consider the Senator's amendment.

There is not an incompatibility between the target price concept and the free market. There is not an incompatibility, and the history of the decade of the 1970's substantiates that. If you remember, during that period of time, we had target price protection but we also had demand and supply more in unison so that the marketplace decided the prices that farmers would get for their feedgrains and wheat.

That target price was there for basic protection. It was there for stability. And yet there was very little payout of the Federal Treasury and the forces of the free marketplace were basically working until about 1982.

Now, I want a free market; most everybody wants a free market and most everybody would be satisfied that agriculture can operate within that free market. But we have had situations within the last 6 or 7 years that has had the free market distorted or totally not working because of political decisions beyond any individual farmer's control, most of those decisions emanating right here from Washington, DC in one way or another.

Now, who would have ever thought that Paul Volcker's decision to deflate in October 1979 would have had ramifications not only in agriculture, but also a detrimental impact upon natural resources worldwide, not just in the United States and not just in agriculture, but most every natural resource, and impacting very detrimentally upon agriculture, as commodity prices have come down and as the value of land has gone down.

There is not a farmer in the United States who could have controlled or anticipated the impact of that decision. Agriculture has been impacted negatively by embargoes and, as a Republican, I am not just talking about the Cartcr grain embargo, either. We still suffer from embargoes whenever they were imposed by Presidents, Republicans or Democrats, over the last several years—lost markets forever. There are still farmers in my State that bring up the Carter grain embargo. And I can remind them very easily of embargoes by Republican Presidents that have also been harmful.

Or who would have ever thought, particularly after Ronald Reagan was elected in 1980, coming to town to make a difference on budget policy, that we would ever go to $200 billion budget deficits? Partly because there is not enough leadership from the White House on that issue, but also because both Republicans and Democrats here on the Hill have been irre-

sponsible on fiscal policy, we have ended up with a $200 billion deficit. Those are political decisions we have made that have impacted negatively upon agriculture in the form of high interest rates and in the form of the high value of the dollar limiting our exports. And that particularly impacts negatively upon agriculture probably more than any other segment of the economy.

If there are any two things that we could have done or can do to help agriculture, even more important than this agriculture farm bill that we have before us, it would be to get interest rates down and get the value of the dollar down. If you get interest rates down 2 percent, you increase farmers' income $2 billion. If you get interest rates down 2 percent for the farmer who has a 55-percent debt-to-asset ratio at $7,500 a year income last year, and you double his income this year. Lower interest rates would make a dramatic impact upon farm income.

But those negative, irresponsible political decisions here in Washington, DC, are something that our farmers could not anticipate and can do very little about, except with the power of the ballot or the power to demonstrate or the freedom to do those things.

I suppose we ought to mention things that are nonpolitical, but things beyond the control of the farmers of the United States that have impacted detrimentally. The fact that in 1981, 1982, 1984, and 1985, we happened to have very good weather worldwide, except usually in the U.S.S.R. That good weather has produced an abundance that I suppose we ought to be thankful for in view of the starvation in some places in the world. But, on the other hand, that overhang in the market, that surplus production that was not anticipated, has been beyond the control of the individual farmer, yet has hurt him.

So we all want the free market to work, but when there are political decisions in Washington and acts of nature worldwide that impact negatively upon agriculture, it seems to me that it is very legitimate that the safety net for agriculture be held very tight and not be slashed here or slashed there, as is going to be done if this amendment by the Senator from Indiana were to be adopted. Basically the purpose of a safety net is to protect segments of the economy when things are beyond their control, a legitimate function of Government. It seems as if we do it for the entitlements, the undernourished, and the unemployed. And we also do it through the most golden of safety nets on the Hill, a safety net under the defense industry where we never let major defense contractors go broke. If we can protect the most wealthy or most protected of industries in this country—the defense industry, we can surely do it for agriculture.

Agriculture is an important segment of our economy. Twenty-two percent of the gross national product is related to agriculture. That is 1 in 5 jobs. In my State 7 in 10 jobs are related to agriculture. It does not matter whether it is nationwide, 1 in 5, or in Iowa, 7 in 10.

There are a lot of people affected beyond the farmers with what we are deciding here today, particularly by this key amendment that the Senator from Indiana offers. It seems to me that one of the things that we in political life are derelict about when we talk about farm policy is we sound too often like we are just concerned about helping the 3 percent of the people in the United States who are earning their living from the dirt, from the soil, where, in fact, it is a much larger basic industry, so important to the gross national product. What we do for this basic industry has a beneficial—if what we do is beneficial and helpful—impact, and ripple effect throughout the entire economy.

What we have to do through the target price, why I support the 4-year freeze of target prices, and why I oppose Senator LUGAR's amendment is that the one thing that agriculture needs most, next to profitability, is certainty and predictability. There may not be a profit in even a 4-year freeze of target prices. But at least there is some certainty, and there is some predictability in that approach to target prices and the freeze.

Predictability is beneficial by taking the panic out of agriculture. I do not know whether you can understand the trial and tribulation that is out there, not just because there is not enough money in the pocketbook or the bank accounts are low. But the real problem out there goes beyond just the economics to social and psychological problems because of the fact that nobody knows where the bottom of the drop in farm prices or the drop in land prices is in agricultural America.

That, in and of itself, causes a lot of pain, economic as well as other kinds of pain. If, somehow, we could bring some certainty to the agricultural climate and predictability, the panic, or at least part of the panic, would go away. That would be very beneficial.

There is only one last point I would like to make. This does not address all of the issues on this point that I would like to address, but I am not going to take the time of colleagues who have been very patient while maybe all of us have talked too long. But when I see the point made by the Senator from North Carolina, or the Senator from Indiana, that this bill is overbudget—most of the overbudget points are made as they relate to the target price—most of those excess costs are out there in the third and fourth year, and not in the first or second year.

So I guess at this point I want to associate myself with a point made by the minority leader of the Agriculture Committee, Senator ZORINSKY, when he said that if there is something not right about the 4-year freeze, we can correct it.

Agriculture has taken the lead in accepting the concept of a freeze as we did in 1984—freeze target prices at their 1983 level when they would have otherwise been scheduled to go up for corn, for instance, to $3.15. So if anybody feels out there that agriculture has not led the way in a responsible budget policy in this country, then I would point that out so that you will know that we have done that.

But I think we ought not to make a decision in support of Senator LUGAR's amendment based on the fact that we are guesstimating out there a high cost for the third and fourth year when seldom, on any budget policy, does this Congress ever make a very correct judgment as to what something is going to cost even next year, let alone 3 or 4 years out.

So I suggest that my colleagues for the sake of certainty and predictability in agriculture—and reducing the panic that is out there in rural America—reject this amendment by the Senator from Indiana.

Mr. WILSON and Mr. EXON addressed the Chair.

The PRESIDING OFFICER. The Senator from California.

Mr. WILSON. Mr. President, I rise in support of the amendment offered by Senator LUGAR, of which I am pleased to be a cosponsor. The amendment is an essential effort needed to correct the most glaring flaw in the pending farm bill.

I am referring to the 4 year freeze on the level of target prices and the unacceptable impact that this approach will have on both the American taxpayer and the American farmer.

First, from the taxpayer's perspective, a 4-year target price freeze will result in an unprecedented outpouring from the U.S. Treasury in the form of increasingly large deficiency payments to producers of wheat, feed grains, cotton, and rice. According to the U.S. Department of Agriculture, the cost of this provision will approach $13 billion over the life of the Senate farm bill. Such large expenditures are irresponsible and will only exacerbate the already unacceptable size of the Federal deficit.

While our $200 billion a year deficit threatens our national well-being, it hits the American farmer especially hard. From the farmer's perspective, it is the direct cause of artificially high interest rates which increase the cost of financing the annual production

and operational expenses of a farm. In addition, the Federal deficit results in a too strong U.S. dollar that serves as a 40 percent tax on our food exports and a 40 percent subsidy on agricultural imports. Agricultural exports have fallen during the past 4 years from a high of $44 billion to a projected level of $31 billion for the current year, and American farmers face increasing competition from cheap imports at home.

If the 4-year target freeze is retained, then the Secretary will be forced to implement larger acreage reduction programs, in order to boost crop prices and control budget outlays. The result will be a corresponding increase in plantings abroad and a loss of foreign markets that have traditionally been U.S. customers.

In the face of such adverse consequences, the alternative offered by Senator LUGAR is both a reasonable and supportable one. It would freeze current target prices for 1 year, in order to maintain farm income. In each succeeding year, the amendment would give the Secretary of Agriculture the authority to reduce target prices by no more than 5 percent annually, providing a gradual transition to a more market-oriented farm policy.

Based upon January figures of the Congressional Budget Office, this amendment would save $2.4 billion in Federal expenditures. But, as the sponsor of the amendment has already noted, given more recent USDA estimates of record crop yields, the savings resulting from his 1-year target freeze proposal will exceed $7 billion.

Mr. President, I commend my distinguished colleague from Indiana for his courage, his clear vision, for his amendment, and I am pleased to join him in cosponsoring it. I urge its adoption both for the American taxpayer and the American farmer.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. EXON. Mr. President, I rise in strong opposition to the amendment offered by the Senator from Indiana.

Mr. President, have the yeas and nays been requested on this amendment?

The PRESIDING OFFICER. They have not been.

Mr. EXON. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. EXON. Mr. President, let us understand this amendment for what it is. This is the administration's program lock, stock, and barrel. The Senator has been advised that the question had come up on the floor of the Senate, and it was explained by the offerer of this administration amendment that it was supported by the Secretary of Agriculture. The Secretary of Agriculture speaks for the administration on agriculture, so let us clearly label this amendment for what it is. This is the continuation of a ruinous policy for the American family-size farmer that has been part and parcel of this administration ever since it came into office. It is about time that it be said; it is about time that it be understood.

There are those of us who recognize that there are problems out there, not only in agriculture, not only for the farmers and ranchers, but the main street businessmen in rural America.

Unfortunately, in listening to the debate, it seems to me that the only former mayor of a large city who understands agriculture is my colleague from Nebraska, the former distinguished mayor of Omaha.

When ED ZORINSKY was mayor, I think he would say he had little understanding or knowledge of agriculture. But since he has been in the Senate, where he joined, at his request—he was not assigned but he requested assignment—the Agriculture Committee, he has served there with great distinction.

I was very disappointed, frankly, to hear the remarks of the Senator from California. There were a few of us who had no real interest in a major agricultural proposal for California that the Senator from California offered a few days or a few short weeks ago. It had to do with the importation of cheap labor from Mexico to help out the farmers of California. Otherwise their crops were likely to lay unpicked in the field. But there were those of us who understand the trials and tribulations of the farmers. I do not know what the other votes were that supported the Senator from California at that time, but the reason that this Senator supported that was that I have a feeling, I have a concern, for the farmers of California, just like I have a concern for the farmers of Nebraska, Iowa, South Dakota, and Minnesota.

I think I understand their problems. I certainly understand their near-panic today with regard to the depression that we have in agriculture.

There are those who will say, "This is a profarmer amendment. This is going to bust the Federal budget."

I want to tell my colleagues in the Senate that if this amendment becomes law, if this proposal by the administration is the hallmark of our agricultural policy, we will rue the day that it was ever passed.

There are people supporting this measure who I do not think have any basic understanding at all of what is going on in rural America today.

I listened with keen interest to my distinguished friend and colleague from Iowa who understands agriculture because he lives with it each and every day.

We must defeat this amendment. I guess there has been a lot said about what we should and should not do in regards to a farm bill today. Let me summarize, if I might, and maybe we can go to a vote.

I just want to summarize by saying that the difficulties of the family size farmer today are not primarily because of mistakes that he has made. Let us look at the situation.

His export markets under this administration have been devastated since this administration came into power. What little he has been able to sell overseas he has had to give away because of the high value of the dollar because of the fiscal policy of this administration.

We hear a great deal today about the free market. There is no free market in agriculture today and as nearly as any informed person can see ahead there is not going to be a free market in the years and years to come.

Why is that? Because of the complicated features of the overvalued dollar, somewhere between 20 and 30 percent it is generally estimated. More than that, Mr. President, there is no free market today in world agriculture because of the foreign subsidies given to their food producers that make the meager attempts that we are trying to propose here to help out just a little bit pale by comparison.

I simply tell you that there is no free market, and there is no way we are going to straighten out these things unless we have a realistic farm bill. Not a giveaway farm bill. Not a farm bill that is going to save every family farmer in America today, but a farm bill that will at least give them a chance.

We talk about the unfairness today with regard to wines. We talk about the tariffs on French wines coming in to protect California wines. Maybe that is right and maybe that is wrong. But I want to say very clearly this Senator from Nebraska has, I think, a much better understanding of the needs of farmers and the dire circumstances, whether they are grain farmers or corn farmers, they are going through today.

There is no free market. This administration proposal introduced by the Senator from Indiana is the heart and soul of this administration's attitudes toward, and what they are about to do to, the American farmer.

It must be stopped.

It might be asked, "Why are you against only a 1-year extension, Senator, of the current target prices and then a reduction thereafter?"

Because I say to you that the target prices as are outlined in the bill passed out of the Senate Agriculture Committee are not enough. But they are all that we can afford right now. I simply say that if we adopt this amendment

the U.S. Senate is going to indicate its stamp of approval on this administration's policy that we are going to sell our way out of difficulty with cheap food.

That has basically been the policy of not only this administration but preceding administrations both Democrat and Republican alike.

There is no free market. We are not going to sell our way out of this difficulty until we get the value of the dollar down. Until we eliminate the foreign subsidies to their food producers, we are not going to have any kind of international marketplace in which to sell our way out of this difficulty.

I simply say, Mr. President, that unless we have a minimum—and I emphasize "minimum"—of a 4-year low—low—target prices as reported out of the Senate Agriculture Committee, we are not going to have the stability that our farmers, our ranchers, and their small business suppliers need, the time that they need to work out of the depression, and I underline depression, that we have in rural America today.

Mr. President, I only hope that when the votes are cast on this amendment, there will be a solid majority of the U.S. Senate that will rise to the occasion and say we are not going to go ahead with the passage of the Reagan administration's amendment sponsored by the Senator from Indiana.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I thank the Chair.

I have been in consultation with the distinguished ranking minority member of the committee [Mr. ZORINSKY]. We note that there are four or five Senators who yet wish to speak. I have consulted also with the distinguished Senator from Illinois [Mr. DIXON], whose amendment will be the pending business when we leave this subject. Senator ZORINSKY and I think there is a possibility that there might be a vote on Senator LUGAR'S amendment. Therefore, Mr. President, I ask unanimous consent that the time for discussion of the Lugar amendment be extended to 5 p.m.

The PRESIDING OFFICER. Is there objection?

Mr. HARKIN. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. HELMS. Very well, Mr. President.

Mr. BUMPERS. Will the Senator from North Carolina yield?

The PRESIDING OFFICER. The Senator from North Carolina has the floor.

Mr. BUMPERS. Will the Senator yield for a question?

Mr. HELMS. Mr. President, I propound again my unanimous-consent request that the discussion on the Lugar amendment continue until 5 p.m.

The PRESIDING OFFICER. Is there objection?

Mr. MELCHER. I object.

Mr. EXON. Reserving the right to object, and I shall not.

The PRESIDING OFFICER. An objection has been heard.

Mr. EXON. I would like to ask my friend from North Carolina, since it appears there will be about 35 minutes left if his request is granted, if he will enter into a time agreement that the time between now and 5 p.m. or upon acceptance of his unanimous-consent request be equally divided between the Senator from North Carolina and the Senator from Nebraska?

Mr. BUMPERS. An objection has been heard on the Senator's request.

The PRESIDING OFFICER. An objection has been heard on the unanimous-consent request of the Senator from North Carolina.

Mr. BOSCHWITZ and Mr. ANDREWS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Dakota.

Mr. ANDREWS. Mr. President, I am pleased the Chair recognized me. I hope we can have time to discuss this because this is really the guts of the farm bill.

I do not go along with what the Senator from Nebraska has said, that this is the so-called administration request. Too many of us have been pointing too many fingers around here trying to place too much blame of one kind or another for what happens on this farm bill. I think this discussion should be on a factual basis. If we go back in history, we will find out that we lost $81 million in tons of grain not shipped because of an export embargo put on by the other administration. I can point out with my colleagues a host of mistakes this administration has made. It seems there is a bipartisan effort at benign neglect of the American farmer.

The reason this amendment should be defeated, Mr. President, is not what kind of partisanship might evolve but because the American farm economy cannot stand its income being cut down in those outyears. It also ought to be stopped dead in its tracks because it is patently unfair.

At this time, we in Congress, on a bipartisan basis, have decided that entitlements should rise in each one of the outyears. We have decided that defense spending should rise in each one of the outyears. To start saying that the agricultural economy should decline in outyears is patently asinine and does not have any reason for being considered, given the problems we have today with the Farm Credit Administration.

We are being asked, Mr. President, to take a look at an infusion of some $8 billion into the Farm Credit Administration, an infusion of $8 billion that is putting the tail ahead of the dog, because what we need right now is not to fix the Farm Credit Administration, but to fix those who borrow from the Farm Credit Administration. You do not begin the transfusion until you stop the hemorrhage.

If we cannot assure the Federal Land Bank—not just the Federal Land Bank as part of the Farm Credit Administration, but also the banks and the insurance companies who make long-term loans to farmers—that gross income is not going to be cut 5 percent a year those outyears while, as I mentioned before, every other aspect of the economy continues to rise, we are never going to be able to shore up the farm credit problems in this country. So, from the standpoint, the standpoint of equity alone, this amendment should be defeated.

This committee cast a number of votes on a number of different sectors of this farm program. One of the key sectors we looked at was, can the farm economy afford to have its income cut 5 percent a year in those outyears? The decision on a bipartisan basis, was, no, it could not. I think that decision ought to stand, because if not, we are going to be funding far more to remedy the problems that will exist in the Farm Credit Administration and to remedy the problems that will exist in major and minor banks around this country and in other financial institutions than we are ever going to spend in the appropriations necessary to back up a farm bill that keeps price supports on a level playing field.

Let me emphasize once more in closing, Mr. President, that all we are doing in the bill that is before us from the Senate Agriculture Committee is keeping that safety net for farmers on a level at the same time the Senate, in a bipartisan manner, has voted to increase the safety net for entitlement recipients, to increase gradually over those outyears the funding we spend for defense and a host of other things. Fairness demands no less than a level playing field and I hope the amendment can be rejected.

Mr. HARKIN and Mr. BUMPERS addressed the Chair.

The PRESIDING OFFICER. The Senator from Arkansas is recognized.

Mr. BUMPERS. Mr. President, I want to say to my colleagues first of all that this amendment is the opening salvo, the opening shot to destroy any chance that the farmers of this country have to survive. The main thing about it is if this amendment were to be adopted, it literally cuts the heart out of the bill and it cuts the heart out of American agriculture.

Mr. President, farmers are just like everybody else. They have to have some certainty and they have to have continuity. Not one single crop in-

volved in the program we are talking about even comes close to bringing, at today's prices, enough to cover the cost of production. That is a fact, Mr. President. Not one single commodity in this group is bringing enough on the free market today—the free market which the President says we have to go to—none of the program crops will bring enough on that market even to pay for the cost of production. We are talking here about $5 to $6 billion in 1986.

A lot of farmers could care less about the Lugar amendment because they are already broke or they are going broke and whether it is a 1-year freeze or a 4-year freeze makes no difference; they are going broke anyway. But a lot of them still can live to fight another day if we give them half a chance.

In 1950 the debt-to-income ratio was 1 to 1. That is, a farmer had enough income every year to retire his entire indebtedness. Now, you think about that, Mr. President. In 1950 a farmer knew when he planted his crop that he was going to have enough income that year to retire his entire debt.

The PRESIDING OFFICER. The Senator will suspend. Under the previous order, 2 hours having passed, the Senate will resume consideration of amendment No. 916 to amendment 914, the Stevens amendment.

Mr. DIXON. Mr. President, I thought we had an understanding heretofore on the request by the distinguished chairman of the Agriculture Committee, the manager of the bill, to extend the debate until 5 o'clock.

The PRESIDING OFFICER. There was an objection by the Senator from Montana to that request.

Mr. DIXON. Is that objection still in place?

The PRESIDING OFFICER. That objection is in place.

Mr. DIXON. May I say to my friend from Montana we have friends who support our point of view who still want to be heard.

Mr. MELCHER. If the Senator will yield, if the unanimous-consent request is made to continue debate on this but not shut off debate on it, that request is fine with me.

Mr. BUMPERS. I must say the distinguished Senator from Illinois and perhaps I misunderstood the Senator's unanimous-consent request, too. At 4:30 under the previous order, we were to go back to the Stevens amendment. Was the Senator requesting that we continue debate on this until 5 o'clock?

Mr. DIXON. Yes.

Mr. HELMS. That is correct. Let me level with the Senator. If at 5 o'clock we still have people who want to discuss it, I will try again.

Mr. DIXON. Sure.

Mr. BUMPERS. I did not understand that, and I do not think the Senator from Montana understood that. If the Senator would repropound that, I do not think there would be objection to it.

Mr. HELMS. I thank my friend. Mr. President, I ask unanimous consent that the debate continue until 5 o'clock on the Lugar amendment.

The PRESIDING OFFICER. Is there objection?

Mr. BUMPERS. Mr. President, reserving the right to object—I am quite sure I will not—the Senator simply is saying that at that time we will go to the Stevens amendment and then after that is disposed of come back to the Lugar amendment?

Mr. HELMS. Unless there is another unanimous consent to continue.

Mr. BUMPERS. Right.

Mr. HELMS. Right.

Mr. BUMPERS. With that understanding, I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUMPERS. Mr. President, I was making the point that in 1950 a farmer knew, when he planted his crop, he was going to have enough income that year to pay his entire indebtedness, and today, 1985, that debt-to-income ratio is 10 to 1. That means the farmer knows that when he plants his crop, if he gets lucky, he will take in enough money to retire 10 percent of his debt. And if he is paying 10 percent interest, it means he is going to stand still. He is not going to retire anything on principal.

We are not doing the farmers any great favors with this bill. It beats doing nothing and it beats going to the so-called free market concept. But I want to reemphasize that probably 10 percent of the farmers in this country who are classified in severe financial distress probably are not going to make it regardless of what we do. And there may be another 10 percent marginal who still will not make it no matter what we do. So nobody should act as though this is some magnanimous bailout to a bunch of wastrels who brought it on themselves.

What we are doing really is minimal when you consider the magnitude of the crisis that the farmers labor under. Of the $214 billion farm debt in this country, $80 billion incidentally of which is held by the Federal Farm Credit System, $140 billion of it is on farmers whose debt-to-asset ratio is over 40 percent.

I always thought the Federal land bank was probably the most solid of all the Farm's Credit System financing institutions. And I suppose it is as solid as any. As my colleagues know, the Farm Credit System includes the bank for cooperatives, the Production Credit Associations and the Federal land bank. And all of a sudden in the last 6 months you have heard for the first time since the Depression that the whole Farm Credit System is in serious financial straits. They are talking about combining the Federal land bank and the PCA, anything to try to strengthen that system. But of the roughly $8 billion debt that the Federal Farm Credit System holds, $12 billion of it—about 15 percent—right now is considered highly questionable.

Now, you might ask yourself, are we going to appropriate $10 billion or $15 billion to bail out the Farm Credit System? I would prefer to appropriate $5 to $6 billion to try to help these farmers make a little money in the hope that they can pay their debt and take some of that $12 billion off the problem loan list. I would much prefer giving income assistance to the farmers and give them a fighting chance to pay off their farm indebtedness than to bail out the Farm Credit System. We may wind up doing both.

We have a little over 2 million farmers in this country. When I was a child growing up in rural Arkansas we had 25 million farm familes. One-fourth of all the people in this country lived on the farm. Now, it is a tribute to their ingenuity and their productivity that today a little over 2.5 percent of all the people in the country live on the land.

But I will tell you something else, Mr. President. If you torpedo the target price system, you are throwing that roughly 5 to 7 million people still on the farm now to the wolves. If you are from an urban State, I plead with you do not be provincial about this. I voted for the New York City bailout, Mr. President, and I want you to know that did not endear me to the people of my State. Happily, that turned out well and the United States made money. If I am not mistaken, New York City wound up paying the Treasury $36 million. We made $36 million off the deal, but that is not what is relevant. What is relevant is that we consider ourselves a union of 50 States. We are not an assembly of 50 individual States off doing our own thing. Why do you think we call ourselves the United States? Because when one State is in trouble, we are all in trouble. When New York City was in trouble, we were all in trouble. And if you do not happen to come from 1 of the roughly 20 to 25 primarily agricultural States, do not be parochial about this issue because I promise you that if 950 banks out of the roughly 14,000 banks in this country start folding because of their agricultural loans going sour, no State will be spared.

So if one segment of our economy is in trouble, the whole economy is in trouble. Agriculture is not in trouble—it is in a crisis.

So I plead with my colleagues: Do not say I just represent the consumers—we all represent the consumers—

because who is going to produce something to consume if we don't save our farmers?

If you vote for this amendment or anything similar to it then Brazil, an economic basket case; Argentina, an economic basket case; Canada; Australia; France or any of the countries who subsidize agriculture to the extent that they are putting every American farmer out of business, will get the message that the United States is too weak or too myopic or too ideological to keep it from happening.

If you adopt this amendment, you will see what happens to interest rates on the bonds that are issued by the Farm Credit System.

I have stood on this floor for almost 11 years, and I have watched the military appropriations bill glide through here: $150 billion, $180 billion, $200 billion, and this year $302 billion. I have watched us appropriate $26 billion, enough to finance deficiency payments for 5 years, for an MX missile which, in my opinion, 70 percent of the people in this body knew was a mistake when they voted on it.

So, what do we do? After we waste $26 billion, we come back and say maybe it was a mistake. But I watched that herd instinct flow through this body. Everybody said we have to have the MX, that we must have 100 of them, and these same people came back 3 years later and said, "No, maybe 40 is enough. It was a mistake."

The only problem with that mistake is that $25 billion has already been wasted.

We are talking about a program here of $5 to $6 billion a year which it is hoped will save around 80 percent to 90 percent of the American farmers.

Yesterday, the House Appropriations Committee killed the AMRAM weapons an air-to-air missile made by Hughes in Arizona. AMRAM has been in trouble for a long time. The only problem with killing it is that we have already spent $2 billion.

This is not a diatribe against weaponry or the Defense Department. I am simply saying that "this ain't beanbag." This is important to the heart and soul of this country.

If I stood on this floor and suggested killing Meals on Wheels, there would be cries of outrage. There would be cries of indignation, and people would say, "What kind of insensitive Senator have the people of Arkansas sent to the United States Senate?"

Well, this vote would be committing no less of an atrocity on 5 million innocent people who are about to lose everything they have worked for their entire lives. This vote goes right to the heart of the entire debate on this bill. The debate is going to intensify around here, not just on this bill but on others, as to what kind of society we want and what role Government is going to play in providing that society.

I assume that the debate will continue. There will be a 2-year-freeze amendment and so on. So I want to get all of this out of my system now, if I can, and say that I believe in a decent society. I believe in a union of States where each one is concerned about the other. I believe in a country where, when one segment of the economy is involved and is in deep trouble, we are all in trouble.

A vote against the Lugar amendment will be a small, embryonic signal that you, too, believe in a decent society and, yes, that Government has a role in making it decent.

Mr. President, I yield the floor.

Mr. HARKIN. Mr. President, I compliment my colleague, the distinguished Senator from Arkansas, for an excellent statement on just what this amendment is all about and what the effects of this amendment will be on us as a nation. He was very eloquent in his remarks, delineating how this amendment would affect us as a society and what its adoption—which I hope does not occur—would do to tear apart the fabric of our Nation. I just want to pay my respects to my good friend from Arkansas for an excellent statement.

Mr. President, I oppose the amendment offered by the distinguished Senator from Indiana. I want to take this time basically to respond to some of the contentions made by the author of the amendment, some of the reasons he enunciated when he offered the amendment, as to why this amendment was needed, to show how those arguments are just a smokescreen for what the intent is behind this amendment. I will be up front.

The intent behind this amendment, as is the intent behind the whole thrust of the administration in agriculture, is nothing more or less than to get rid of some farmers in this country. Let me rephrase that: To get rid of a lot of farmers in this country.

First of all, the author of the amendment said that we needed to get the loan rates down so that we could export more. I notice that the title of the bill, S. 1714, is "A bill to expand export markets for United States agricultural commodities," and so forth. I have to ask the author of the amendment: What good does it do us as a country, what good does it do the farmers of Indiana or of Iowa or of Nebraska or anywhere else—what good does it do us if we continue to export more and more in quantity and get less and less for it? What good does it do to continue to increase our exports if we are growing it for less than the cost of production and busting our farmers in the process?

Using this kind of logic, that somehow it is better for us as a country and better for our farmers to continue to overproduce and to sell these commodities abroad at less than the cost of production, one can then see the way clear for us as a nation. We can see the way clear to recapture once again, for example, all the automobile markets throughout the world.

If we follow the logic of the Senator from Indiana, we can take over every automobile market throughout the world. We can put Toyota out of business, Datsun out of business, and Mitsubishi out of business. The United States could become the No. 1 exporter in the world. How? Very simple.

We just have Ford Motor Co., General Motors, and Chrysler all produce their cars for $1,000 a car and sell them abroad for $1,000 a car. That is what it would be. That would be wonderful.

I tell you we could drive Toyota out of business and Datsun out of business. We would sell cars all around the world. Everyone around the world would buy an American-made car. It would only cost them $1,000.

That is what we are being asked to do for our agricultural commodities. The answer is clear. We cannot do it in automobiles because it would bust General Motors, Ford, and Chrysler long before we ever captured the export market.

The same is going to happen to our farmers. If we continue down this road, we are going to bust the farm economy of this country, throw hundreds of thousands, perhaps as many as a million farmers off the farms, and we still will not have captured any of those export markets.

There is a reason why we will not capture those export markets and there is a reason why the argument is being made that we have to reduce our loan rates and our support prices in order to export. There is a reason why that argument is phony. It is as phony as a three-dollar bill.

It is because we are the only country in the world that exports its grain through private grain companies. Every other country in the world, every single one, exports its grain through a grain board. So what they are able to do is they are able to peg the prices at which they want to sell their grain.

And I plotted this out on a graph going back over several years. No matter what our prices are, those other countries' prices will be slightly underneath ours. When our commodity prices are low, their grain boards set their prices low right underneath what ours are. When our prices go up, their grain boards peg their prices right underneath ours.

Again, this can be proven demonstrably by just plotting out on a graph.

So it is really a phony argument that we have to get our prices down in order to meet the demand in the export markets.

There is another reason why the argument is phony, that if we do not get our prices down or conversely if we keep our prices high other countries will bring land into production. Two reasons. No. 1, other countries are developing their agriculture regardless of what we do. When our prices are high they put land into production. When our prices are low they put land into production.

Other countries are developing their agricultural base actually taking our agricultural technology, our methods of agriculture, applying it in those countries and increasing their agricultural production.

And they are doing it for two reasons. First, to meet their own internal demand for food and, second, to capture a share of the export markets.

Now, you might say well, why do we not keep our prices extremely low, that way these other countries then would not bring land into production. Look at it this way: Our nearest competitor in corn is Argentina. Our nearest competitor in the world market is Argentina. My State of Iowa exports 40 percent more corn than the entire nation of Argentina. That gives you some idea of how much of a competitor they are. They cannot put enough land into production to really severely cut into our export markets.

So you take those two reasons. First, because we supply over 50 percent of the grain in world markets, and, second, because other countries use grain boards to peg their prices, then the argument turns around. The higher the prices that we have for our agricultural commodities means the more money that our farmers make. It means also the more money that farmers in Third World countries make, the more able they are to meet their debt payments

So, I would argue just conversely to what the Senator from Indiana has said, that the more our farmers receive for the products they produce the better off not only are we going to be as a nation but the better off Third World countries are going to be in terms of their own ability to feed their people and in their ability to meet their debt payments.

The second thing that the Senator from Indiana stated was that the budget does not treat farmers unfairly. That is right. The Senator said that the budget does not treat farmers unfairly.

Again, the facts belie that statement. Agriculture comprises about 2 percent of the budget but in the cuts that were made in the budget agriculture took about 5 percent of the cuts.

So agriculture has 2 percent of the budget but we took 5 percent of our cuts, 2½ times what agriculture comprises of the total budget.

So what my colleague from Iowa, Senator GRASSLEY, said earlier about this bill not really being over budget is very true. If we had taken our proportionate share of cuts as proportionate to what our share of the budget is—let us say only 2 percent of the cuts—this would be well within the budget passed by the Senate and the House of Representatives.

So really the budget does treat farmers unfairly. We took 2½ times the cuts in the budget proportionate to what the share of agriculture is. So the budget does treat farmers very unfairly.

The third thing the distinguished Senator from Indiana said was that the wrong signals were sent to overproduce and to produce more and more. On that point I agree with the distinguished Senator from Indiana. The wrong signals were sent, but I would just point out that the Senator from Indiana voted for the 1981 farm bill both here in the Senate and in the conference report, the bill that set us up for where we are today to produce more and more and more, and I said it 4 years ago, that the bill proposed in 1981 was a production only oriented program and that is what it turned out to be, produce, produce, produce, more and more surpluses, lower and lower prices.

Now, we talk about the PIK Program. The Senator from Indiana talked about the PIK Program and how it idled 50 percent of the land and worked a hardship on our agribusinesses and fertilizer people. That is true. I was not in favor of that PIK program. But look at it this way: As to the PIK Program in 1983, 50 percent of all of the money that went out in the PIK Program, and it turned out to be about $16 billion, 50 percent of it went to less than 5.5 percent of the farmers of this country.

So really what we had in the last 4 years was again this boom and bust philosophy. Produce like mad in 1981 and 1982; then you have the most massive land retirement in the history of this country and you take over the biggest part of the money paid for that and you give it to the largest and richest of the farmers in this country; and then we go back to the bust policies, 1984 and 1985, overproduce again, and now we find ourselves in a situation where we have the largest carryovers that we have had in many years.

So the Senator from Indiana talked about the large surpluses and the carryovers. That is true. But what caused it? It is not here without some cause. It is there because this administration did not use any meaningful acreage retirement programs, did not use a paid diversion program, and has not instituted meaningful conservation measures so as to get our supply in line with demand.

So we do. We have surpluses. We have more surpluses than we have had probably in about 25 years of agricultural programs. It is funny how history repeats itself.

In 1960, the two candidates for the Presidency, then Senator John Kennedy and Vice President Richard Nixon, engaged in a series of debates, and it is very interesting to read their debates on domestic policies and especially agricultural policies in 1960.

Listen to what then Senator John Kennedy had to say regarding the agricultural programs. He said,

> My judgment is that the program the Vice President put forward, which is the extension of Mr. Benson's program, will cost a billion dollars more than the present program which cost about $6 billion a year, the most expensive in history. We have spent more money on agriculture in the last 8 years than the 100 years of the Agriculture Department before that.

Does this sound familiar to anyone? Is that not what the President is saying? Is that not what the Secretary of Agriculture is saying? We have spent more money in the last 4 years than we have in the history of the agricultural programs. That is precisely the point that Senator Kennedy was making in 1960 about the Benson program.

So what did the Benson program bring us? It brought us surpluses. Boy, did it bring us surpluses.

And anybody who was around at that time remembers the Benson bins. We had those storage bins all over the countryside. I remember in my small town in Iowa, we had the Benson bins filled with corn, but nobody would buy it. It was as cheap as dirt. In fact, it was cheaper than dirt, but no buyers and huge surpluses.

Again, I will read from that debate what then Vice President Richard Nixon had to say. He was talking about the surpluses. He said:

> Now that we have the surpluses, it is our responsibility to indemnify the farmer during the period that we get rid of the farmer—or the surpluses.

A nice little slip of the tongue, but does it not remind you of what this President said a few months ago when he said that what we had to do was keep the grain and export the farmers?

So I come back to where I started, that this is nothing more or less than a deliberate attempt to get rid of some farmers, the same as what was used in the 1950's.

The PRESIDING OFFICER. The Senator will suspend. The hour of 5 o'clock having arrived, the Senate will now resume consideration of amendment No. 916 to the language to be stricken by an amendment numbered 914.

Mr. HARKIN. Mr. President, I ask unanimous consent that we put off the debate getting back to the Dixon amendment, I believe it is amendment No. 914, for 10 minutes.

The PRESIDING OFFICER. Is there objection?

Mr. HELMS. Mr. President, reserving the right to object and, of course, I will not object, I ask unanimous consent that the time for discussion of this amendment be extended for 10 minutes to accommodate the Senator from Iowa, following which the distinguished Senator from Oklahoma will be recognized.

The PRESIDING OFFICER. Is the objection to the unanimous-consent request of the Senator from North Carolina?

Mr. DIXON. Reserving the right to object, and I shall not object, I just want the record to show that it is under the same rules and understandings on the prior occasion.

Mr. HELMS. That is correct.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so order.

Mr. HELMS. I thank the Chair.

Mr. HARKIN. Mr. President, I will conclude very briefly, but I wanted to make these points. I was looking at the figures for Indiana. They have had a tremendous loss in equity there, too. From 1981, $35.6 billion, down to last year $26.4 billion. Now, that is not quite as bad as Iowa. We lost 60 percent of our equity in farmland since 1981.

But I just wanted to point out to the Senator from Indiana that the net income per acre under his amendment for next year, the net income would be $62.24 per acre and by 1989, under his amendment, the net income would be $27.89 per acre.

The Senator from Indiana stated that he had a family farm back in Indiana. I am just wondering if the Senator would be willing to rent his farm to me for $62.24 an acre next year. If so, I will rapidly run across the aisle and be glad to sign a contract with him right now. But that is what the income will be under this amendment.

The distinguished Senator from Indiana said that on his family farm they had no debt. I believe that is what he said. He said that one-third to maybe one-half of the farmers in Indiana had no debt. Well, that is fine. I am glad of that.

But is that just to whom we have to look in terms of shaping our farm programs? That is just like saying that 93 percent of our people in America are employed, so why should we worry about the unemployed? That is like saying that 2 percent of our people drive Cadillacs, so should we worry about anybody else that does not have any money?

The fact is that one-half to two-thirds of the farmers in this country do have debts, large debts. And, as my colleague from Iowa pointed out earlier, not because of their own fault, but because of programs instituted here in Congress and by this administration.

Finally, I would just say that if this amendment is adopted, the average age of farmers today, which averages around 55 to 60 years of age, will go up even more and we will have shut the door in America to any young person who wants to go into agriculture and take up farming as a career and to raise a family on a farm.

So I ask my colleagues to give an overwhelming and decisive vote "no" on the amendment offered by the Senator from Indiana.

Mr. BURDICK. Mr. President, will the Senator yield to me?

Mr. HARKIN. I am glad to yield, but I said I would only take a couple of minutes because I know the Senator from Oklahoma also wishes to speak.

Mr. BURDICK. I did not want to speak. I just wanted to ask a question.

Mr. HARKIN. Yes, I yield.

Mr. BURDICK. First of all, I wish to compliment the Senator on a fine statement here today on this amendment. Anyone that knows the nature of farming knows that it is beset with hazards and a lot of difficulties. One is the hazard of weather—rain at the wrong time, not raining at the right time; drought; and all the rest.

It seems to me that another hazard that is going to be beset upon us, if we pass this amendment, will be caused by the 1-year amendment. One year is not time enough to make long-range planning for the average farmer, or any businessman, or anybody else. I believe it would be a tragedy to have a 1-year farm bill. We have to go over a period of years. Does the Senator not agree with me that the results of this amendment would not be helpful.

Mr. HARKIN. Absolutely. As the Senator from Alabama pointed out earlier, this 1-year type of thing would cause more chaos and confusion than anything else.

Mr. BURDICK. I thank the Senator.

Mr. HARKIN. I yield the floor.

(Mr. ABDNOR assumed the chair.)

Mr. BOREN. Mr. President, I wish to congratulate my colleague from Iowa on the remarks which he just made and I wish to associate myself with them.

Let us look at the facts as they really are. Let us set aside the myths and look at the facts.

In the first place, let us put into perspective as to who is making the sacrifices in order to try to get the budget deficits down. How many parts of the budget have even been frozen, let alone been cut below the current levels?

It is a fact that if we simply extended the current farm program over the next 4 years, the current program as it is now, it would cost between $4 billion and $6.8 billion more than this bill would cost. In other words, this bill represents a reduction of what the current program would cost.

How many parts of the budget are taking that kind of reduction? Can we say the Defense budget, for example, is being cut by that same percentage?

I happen to be the one that stood on this floor when we had under consideration the so-called Gramm-Rudman proposal and made the motion and offered the amendment, which was accepted, to make sure that agriculture took its share. But it is not fair to ask a segment that is in such desperate trouble to take more than its share.

Over the last 2 days, we have voted for a 62-percent increase in merchant marine subsidies in the United States—a 62-percent increase in merchant marine subsidies. That will now average, per merchant seaman on an American-flag ship, about $160,000 each per year. Yet we are asking the American farmer to pay for it, when 50 percent of our family farmers have a cash income of $6,580 a year or less.

We all want to see these deficits brought down, but let us talk about fairness and sharing the burden. Let us wake up to the fact that all of this country is going to be impacted if we allow agriculture to collapse.

How many speeches have we heard on the Senate floor about what would happen if we had a default on the Third World debt? We have been told there would be a catastrophe that would collapse our economic system.

Let us look at the figures. The total amount owed to American banks by Third World nations is $166 billion. The farmers of the United States themselves owe $214 billion to our banks and $133 billion of that amount, according to the USDA, is in the hands of farmers who are severely leveraged at 40 percent or more and who are in danger of not being able to make that debt payment on time.

Why is it that we understand what would happen if we had a default of the Third World debt, but we do not seem to begin to understand around here the kind of crisis we are going to have if that collapse occurs in agriculture, making it impossible for that almost $140 billion of farm debt owed to American banks to be serviced?

USDA estimates that net farm income for 1985 will be 39-percent lower than it was in 1984. Yet, under this amendment we would simply continue that level—39-percent down from the year before—for 1 year and then start to reduce it 5 percent a year for the next 3 years after that.

If we want to create a catastrophe, if we want to create the kind of effect on the financial system that I talked about a minute ago, this is a blueprint to do exactly that. If we want to take the most hard-pressed sector of our economy and ask them to do more than their share, to take more than their share of cuts when other sectors of the economy are not doing nearly

as well, then we ought to pass this particular amendment.

The problem is serious now. The problems are getting more serious by the day. In my State, farmland is depleting in value at the rate of 38 percent on an annualized basis. If we cannot put some certainty back in, we are not asking for an increase. We are talking about simply freezing for 4 years at a level that is already severely stressing American agriculture. Here comes this amendment that would not even allow us to stay where we are.

We are here under tremendous stress, but it would have us face a 5-percent reduction potentially in income every year for the next 4 years. How in the world could the credit system withstand it? How could they have the credit extended to the farmers that they must have to stay in business? It is a very serious mistake. I hope my colleagues will consider that they are not only impacting American agriculture if they approve this amendment, but they are severely impacting the entire American economy, and putting it under great danger.

Mr. President, I would like to ask unanimous consent to yield briefly to the distinguished majority leader who I believe wants to make a remark. I would like to ask unanimous consent that I might be allowed to yield to him for 5 minutes, that the time before we go back to the cargo preference amendment be extended for 5 minutes, that I might then yield without losing my right to the floor, and that I might be recognized again following the remarks by the distinguished majority leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, as I understand, the Senator will then move to table the amendment?

Mr. BOREN. The majority leader is correct.

Mr. DOLE. Mr. President, let me take just a few moments. I think we are getting into the important decisionmaking time. There is little doubt in my mind that this amendment is going to fail, and it probably will get 35 or 40 votes.

I hope we will not table it and that we might be able to amend the amendment. I have a lot of ideas for amendments. I am not going to vote to table it. If it is not tabled, it will be subject to amendment. I think it will probably be tabled in any event. I do not want to quarrel too much with the speakers I have heard in my office. But on the other hand, sooner or later, we will have to come to grips with not only the farm problem but the deficit problem.

I heard the opening words of the distinguished chairman of the Foreign Relations Committee, a member of the Agriculture Committee. I think 14 out of 17 members of the Agriculture Committee voted for the budget resolution. Maybe we can have it both ways. It depends on how it is reported by the press. If the press reports that those who voted for the most money were helping the farmer, and those who voted to stay within the budget were opposed to the farmer, then I assume those who vote for the high dollar are the winners politically.

But I assume in the long run the farmers are the losers, and the taxpayers are the losers. I hope it is not going to happen on this vote. But I would like to finish the bill, hopefully this week.

I will conclude by saying that this vote will probably indicate to both the administration and to ourselves that we have a little work to do on the farm bill if we are going to keep it within bounds.

I guess the other option would be to go ahead and pass anything, go to conference, and try to work it out. If it is still way over budget, whatever figure that is, I assume the President will veto it. He does not want to veto a farm bill. So I think we may as well vote and find out where the bodies are buried.

Mr. EVANS. Mr. President, as a Senator from one of the largest wheat-producing States in the Nation, I rise in support of the amendment before us to control farm program costs and target farm income support payments to the smaller farmer.

For several months now, I have held the view that our 1985 farm bill must initiate a transition toward reduced Government support of, and involvement in, agriculture. As one of the fastest growing sectors of the Federal budget, farm programs have contributed substantially to what is perhaps the key component of the complex crisis facing American agriculture: our $200 billion deficit. By gradually reducing their cost in conjunction with an overall deficit reduction effort, farm programs could become a significant contributor to the solution. Yet the committee-reported farm bill, if unchanged, would only perpetuate policies that have helped drive American agriculture deeper and deeper into trouble.

High target prices and subsidy payments sustained over the life of this bill will do little to break the present pattern of excessive stock buildups and lower commodity prices. The potential budget costs of a 4-year target price freeze will create new pressure for more hastily-designed, ill-conceived or ineffective supply control measures. While they may provide temporary relief from overproduction on the domestic side, they slowly undermine our farm economy's health by inviting foreign expansion into our overseas markets. This is of particular concern to grain growers in Washington, who move over three-fourths of their product into world trade.

Clearly, a new direction is still needed, but we will now have to make some tough choices. Our $200 billion deficit tells us we can no longer have it both ways. We can no longer afford to channel billions into agriculture without regard to means or needs of the recipients, nor can we expect to continue covering the shortfalls of our domestic policies with export subsidies or bonuses for an indefinite period of time. It is a losing proposition any way you look at it: on the home front, we encourage overproduction with greater subsidies, and on the foreign front, we discourage real long-term commercial demand growth for our farm products by offering short-term export quick fixes. The greatest agricultural system in the world—especially the many efficient family farms and small businesses that make it work—deserves better if it is to remain competitive in world markets.

Mr. President, we must take the first step to break the vicious circle of high target prices and acreage controls in grain production. High target prices can too often induce farmers to plant commodities already in surplus in order to capture more program payments. Yet in doing this, supply problems are aggravated only further, placing greater downward pressure on prices and escalating the need for large acreage control programs to reduce unwanted stocks. And to get the big producers to participate, the subsidies must be set at levels that thwart the targeting of income payments to needy farmers. Ironically, the small family farmer we all would like to help winds up receiving the least assistance under our current system. And our deficit reduction agreements—which could ultimately provide immeasurable benefits to farmers of all sizes in terms of lower interest rates and a weaker dollar overseas—could be severely compromised if subsidy payments were to go unchecked.

Further, Mr. President, it has been suggested on several occasions that high target prices will address both the farm income and farm credit crisis for all of agriculture. Let me say first that I do not doubt for 1 minute the seriousness of this situation: The credit crisis is very real and has taken many good producers to the wall in my State. Our diverse agriculture in Washington is far from being a hobby or a sideline; it's big business, our No 1 industry. We had marketings of well over $3 billion in 1983. Over 75 percent of our farms are family-size and family-owned, and gross $200,000 per year or less.

Yet we cannot overlook the fact that in 1984, about 90 percent of all direct Government payments for the 1984

programs went to farms accounting for less than a third of all total farm marketings. And of all producers who are experiencing both 40-percent debt-to-asset ratios or more and negative cash-flow, less than half actually participated in farm programs. We should not forget that the credit problem from State to State can be as diverse and varied as agricultural production itself: It goes beyond program crops and target prices to include many other agricultural commodities, commodities that benefit from little or no Government price support or income enhancement. Our efforts to correct the credit crisis should reflect these considerations as well. We cannot reasonably expect a single farm bill to cure all the ailments in agriculture.

Mr. President, as one who is more accustomed to an urban environment, I have learned a great deal about our national agricultural system during these past few months. It has often been said that city dwellers do not always understand the problems of their rural cousins. Indeed, that may be the case for many of us in terms of understanding the workings of farm programs, and I do not pretend to possess the same level of knowledge and expertise as my able colleagues on the Senate Agriculture Committee. However, I do understand the impact of $200 billion Federal deficits and high interest rates on declining equity values and declining foreign market shares. I do understand the sensitivity of our agricultural exports to embargoes and protectionist trade policies. As I told a number of Northwest farmers back in January at the Spokane Farm Forum, the primary problems facing agriculture are far beyond the scope of this bill or any other farm bill we could possibly assemble, and we must not lose sight of the real causes of our farm crisis. The last farm bill told us more spending alone is not the answer. The action we take on this farm bill will demonstrate whether we are willing to face that reality. This amendment is a step in that direction, and I urge my colleagues to support it.

Mr. ABDNOR. Mr. President, the Lugar amendment would send a message to our struggling family farmers. Unfortunately, it is not a message of hope or opportunity. Mr. LUGAR has summarized this message as a continuation of the status quo. "Bleak, but no worse," he says.

I have to differ with my friend from Indiana. The message this amendment sends to our Nation's family farmers is "bleak and getting worse."

Passage of this amendment would tell our Nation's farmers, ranchers, and agribusinessmen that the congressional solution to the farm crisis is to maintain the status quo. The response in rural America will be one of desperation and despair. To continue the status quo is to continue a devastating farm crisis.

The end result of this amendment for rural America would be disastrous. It would literally pull the rug out from under the family farmer. This amendment would do more than place a 1-year freeze on target prices with reductions in the following years; it would also harm our rural communities which are so dependent on a vibrant, successful farm economy.

Not only would target prices be phased down, but the availability of credit for capital-dependent farmers would be phased down, too. This is because a target price reduction will result in even fewer farmers able to cash-flow, translating into even less credit available to farmers attempting to cope with low prices, high interest rates, and devalued assets.

The last thing we need to do is pass an amendment which would give further cause for the tightening of credit and devaluation of land prices.

As a farmer myself, I realize that the time may come when we need to move toward less Government support for agriculture. However, that time is not now, not in the middle of a crisis. If the rug is pulled out from under agriculture now, we will be removing all hope for a better, more profitable future for rural America.

I urge my colleagues to defeat the Lugar amendment.

Mr. MELCHER addressed the Chair.

The PRESIDING OFFICER. The Senator from Oklahoma has the floor.

Mr. MELCHER. Mr. President, will the Senator yield?

Mr. BOREN. I am happy to yield.

Mr. MELCHER. Let me just say, as I understand the remarks of the Senator from Indiana—and I ask the Senator to correct me if I am wrong—that the amendment that he proposes would be scored by CBO at about $2.5 billion saving.

Mr. LUGAR. That is correct.

Mr. MELCHER. Mr. President, this is the wrong place to take a saving in this bill. We need to have savings in this bill. We shall have the necessary reductions in the expenditures of this bill to bring it within the budget resolution. That is going to require reduction of somewhere around 7.4 to 7.6. By the time we get through adding this or that to the bill, we had better be talking about $7.8 billion. That type of an amendment in one amendment to sensibly take out of the bill that amount of money to bring it within the budget resolution will be offered. I shall be delighted to offer it. I plan to offer it.

Those kinds of savings that we can make where we selectively decide that the priorities are here for reductions rather than taking it out of the target prices is a way to do it. The target price is a mechanism whereby through the deficiency payments during these terrible times commodity producers are assured something, some safety net. The question of having it for 1 or 4 years may appear to be academic to many people. But it is not academic to their creditors. Farmers' creditors are looking at this particular provision in the bill on whether or not there is going to be cash-flow for their customers sometime in the future. It is not much. But it is something to tie to. Their creditors realize that. We cannot reduce it to 1 year. We cannot reduce it to 2 years. We have to keep it for 4 years of life of the bill in order to keep life in American agriculture as our creditors see it.

The PRESIDING OFFICER. The additional time has expired.

Mr. BOREN. Mr. President, I ask unanimous consent that we proceed to an up-or-down vote—the yeas and nays have been ordered on this amendment—before we return to the cargo preference amendment.

Mr. PRYOR. Reserving the right to object, Mr. President, and I can assure my friend from Oklahoma I do not want to object, but I wonder if it is possible to achieve an agreement here that after the disposal of the amendment by Senator LUGAR, and after the disposal of the issue of the cargo preference involving the Senator from Illinois and other Senators, we might turn our attention to the amendment which will be offered by the Senator from Montana [Senator MELCHER] relative to the deficit and to the budget problems that are contained in this bill.

Mr. DIXON. May I say to my friend, Mr. President, from Arkansas, if we dispose of this, we are making progress on the other, and I think we might take up one amendment at a time. Would the Senator from Arkansas mind if we just went along with the request of the Senator from Oklahoma to dispose of this by rollcall?

Mr. PRYOR. I am not going to object to the request of the Senator from Oklahoma. I think it would be a logical sequence after the Lugar amendment, after cargo preference, to turn or consider the amendment of the Senator from Montana.

Mr. HELMS. Mr. President, I think we had better let the normal process work, and as the distinguished Senator from Illinois said, amend it amendment by amendment.

Mr. PRYOR. I do not object.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Oklahoma? Without objection, it is so ordered.

Mr. HELMS. The Senator from Illinois had nothing about a follow-on amendment.

Mr. BOREN. My request, Mr. President, was that we move now immediately to the rollcall vote on the Lugar amendment after which time we would

return to the cargo preference; that we have the rollcall up or down on the Lugar amendment at this time.

The PRESIDING OFFICER. Is there objection? Without objection, it is agreed to.

The question is on agreeing to the amendment of the Senator from Indiana.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON announced that the Senator from Maryland [Mr. MATHIAS] is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 48, nays 51, as follows:

[Rollcall Vote No. 266 Leg.]

YEAS—48

Armstrong	Hatfield	Pell
Bradley	Hawkins	Proxmire
Chafee	Hecht	Quayle
Cochran	Heinz	Roth
Cohen	Helms	Rudman
Cranston	Humphrey	Simpson
D'Amato	Lautenberg	Specter
Dodd	Laxalt	Stafford
Dole	Lugar	Stevens
Domenici	Mattingly	Symms
East	McClure	Thurmond
Evans	McConnell	Trible
Garn	Mitchell	Wallop
Goldwater	Moynihan	Warner
Gramm	Murkowski	Weicker
Hatch	Packwood	Wilson

NAYS—51

Abdnor	Eagleton	Leahy
Andrews	Exon	Levin
Baucus	Ford	Long
Bentsen	Glenn	Matsunaga
Biden	Gore	Melcher
Bingaman	Gorton	Metzenbaum
Boren	Grassley	Nickles
Boschwitz	Harkin	Nunn
Bumpers	Hart	Pressler
Burdick	Heflin	Pryor
Byrd	Hollings	Riegle
Chiles	Inouye	Rockefeller
Danforth	Johnston	Sarbanes
DeConcini	Kassebaum	Sasser
Denton	Kasten	Simon
Dixon	Kennedy	Stennis
Durenberger	Kerry	Zorinsky

NOT VOTING—1

Mathias

So the amendment (No. 930) was rejected.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. ZORINSKY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HELMS. Mr. President, I have consulted with the distinguished Senator from Illinois and others. I believe they are still working on a compromise. Therefore, I ask unanimous consent to set aside amendment No. 914 and amendment No. 916.

The PRESIDING OFFICER. The Senate will be in order so everyone can be heard.

Is there objection?

Mr. MELCHER. Reserving the right to object, what is the request, Mr. President?

Mr. HELMS. My unanimous-consent request is to lay aside amendment No. 914 and No. 916, cargo preference. We are doing that at the suggestion of the sponsors of the amendment.

Mr. COCHRAN. Reserving the right to object, Mr. President, do I understand the request of the Senator to be that we set aside the cargo preference amendments at this point?

Mr. HELMS. Temporarily.

Mr. COCHRAN. For what purpose?

Mr. HELMS. So that Senator Pressler may call up an amendment.

Mr. COCHRAN. What is the nature, if we could be advised, of the amendment the Senator seeks to call up?

Mr. PRESSLER. My amendment is to establish a three-tier target price for feed grains and wheat. An amendment I am sure will be fairly uncontroversial. I only need 4 or 5 minutes.

Mr. COCHRAN. Mr. President, continuing to reserve the right to object, if I may, it was my understanding, after discussions with Senators closely involved in trying to work out this cargo preference amendment, we were close to an agreement; that an amendment could be offered, we were going to have an up-or-down vote on it, and that would be the only amendment allowable to the cargo preference section. And then we would vote on the compromise. It would be my hope—and I trust other Senators, too—having worked now for almost a day and a half on that issue, we could resolve it in the next 1½ hours.

Mr. DIXON. Will my friend from Mississippi yield?

Mr. COCHRAN. I do not have the floor.

The PRESIDING OFFICER. The Senator from North Carolina has the floor.

Mr. HELMS. I yield to the Senator.

Mr. DIXON. May I say to my friend from Mississippi that I have just approached the chairman of the committee, the distinguished manager of the bill, and told him that the compromise is being typed up now in final form. I believe it is in the hands of the aides of my friend from Minnesota. There have been discussions between the distinguished senior Senator from Hawaii, the distinguished senior Senator from Alaska, and, as the Senator knows, the Senator from Mississippi as well. We expect momentarily that it will be in final form. We are very close to an agreement. If we could be accommodated and take one more amendment, and dispose of it until we get to this, I think we will save hours of time around this place.

Mr. COCHRAN. Mr. President, continuing to reserve the right to object, I do not want to hold up consideration of amendments that can be taken up and disposed of quickly. What I did not want to happen, though, would be an amendment that is very controversial to be called up and we go on into the evening debating that and then let the cargo preference issue slip away from us. I think we are close to working it out and finally resolving it, and with that understanding, that we will not be long on this other amendment, I will not object to the unanimous-consent request.

The PRESIDING OFFICER. Is there objection?

Mr. MELCHER. Reserving the right to object, Mr. President, the situation is that we have been trying to untangle cargo preference all afternoon and we would like to get to a point where we could get on with amendments that have to do with bringing this bill under the budget resolution. Taking another amendment that could be offered by the Senator from South Dakota—certainly it could not be cleared up in 5, 10, or 20 minutes—will lead to other amendments. If we are going to continue to wait to unravel cargo preference, I would very much like to accommodate that but I would very much like to know at what point we can get to offering amendments on some selected cuts to bring the bill under the budget resolution.

I pose the question to the distinguished chairman of the committee and to the distinguished majority leader.

Mr. HELMS. Mr. President, I believe I still have the floor.

The PRESIDING OFFICER. The Senator from North Carolina has the floor.

Mr. HELMS. I checked with the distinguished Senator a few minutes ago, and he said his amendment was still in the typewriter and would take about 20 more minutes. What the distinguished majority leader and I and others are trying to do is to expedite consideration of this bill. Senator PRESSLER is ready. As a matter of fact, he was ready this morning.

Mr. PRESSLER. I was ready last Friday.

Mr. HELMS. So I ask for consideration of my unanimous-consent request.

The PRESIDING OFFICER. Is there objection?

Mr. MELCHER. Mr. President, reserving the right to object, will the Senator restate the unanimous-consent request?

Mr. HELMS. Yes, I will.

The unanimous-consent request is to set aside amendment No. 914 and amendment No. 916, which are the relevant amendments with respect to cargo preference, and that Senator PRESSLER be recognized to call up an amendment.

The PRESIDING OFFICER. Is there objection?

Mr. MELCHER. Mr. President, reserving the right to object, for how long is the Senator's proposal? How long is the chairman's proposal?

Mr. HELMS. For the consideration of the Pressler amendment, I say to my friend.

Mr. DOLE. Mr. President, I suggest 30 minutes, to be equally divided.

Mr. DIXON. Mr. President, reserving the right to object, the understanding is that we revert to the amendment on cargo preference, which I have at the desk, when the Pressler amendment is disposed.

Mr. HELMS. Regular order would do that.

Mr. DIXON. Yes.

The PRESIDING OFFICER. Is there objection?

Mr. HARKIN. Mr. President, reserving the right to object, what is this about 30 minutes on a side? Is that part of the unanimous-consent request?

Mr. DOLE. If the Senator from North Carolina will yield, that was only a suggestion, if there is some concern about how long the amendment is going to take. I understand that it will not take very long on the part of the Senator offering the amendment, if that would satisfy the Senator from Montana, who had a question about the time. But if there is some question, I will withdraw the suggestion.

Mr. HARKIN. Mr. President, will the Senator from North Carolina yield?

Mr. HELMS. I yield, without losing my right to the floor.

Mr. HARKIN. If the amendment by the Senator from South Dakota deals with the tiering, then there is going to be a lot of discussion on that.

Mr. PRESSLER. I can explain my amendment in about 4 or 5 minutes.

Mr. MELCHER. Mr. President, will the chairman yield?

Mr. HELMS. I yield with the understanding that I do not lose my right to the floor.

Mr. MELCHER. I suppose there would be objection on our side that within that 30 minutes there be a vote on it, because there could be other amendments to it. If the request is just to bring it up and then revert back to cargo preference after 30 minutes, I have no objection.

Mr. HELMS. I have no crystal ball. I cannot tell how long it is going to take.

Mr. MELCHER. Mr. President, reserving the right to object, I think I understand the request properly; that for the next 30 minutes we will discuss an amendment of the Senator from South Dakota. If it is not completed within that time, we will revert back to cargo preference.

Mr. HELMS. No, that is not my unanimous-consent request.

Mr. MELCHER. That is not the request?

Mr. HELMS. No.

Mr. MELCHER. I was advised by a Member on our side, who is not on the floor, that he would not want an agreement for a vote within 30 minutes.

Mr. HELMS. I think what may have confused my friend is that the majority leader suggested a 30-minute time limit for consideration of the Pressler amendment, equally divided, but that was not propounded as the unanimous-consent request.

Let us have a test on that. I offer that as a unanimous-consent request: That there be a time limitation on the Pressler amendment not to exceed 30 minutes, with the time equally divided.

Mr. MELCHER. Mr. President, I have to object, on behalf of a Member on our side who is not present at this time.

Mr. MITCHELL. Mr. President, will the Senator yield for a question?

Mr. HELMS. I yield.

Mr. MITCHELL. I should like to offer a suggestion, self-serving in nature, but it may suit the circumstances.

I have an amendment which I think is not a major amendment, on which I would be prepared to enter into a time agreement. I do not think the opponents would object to 40 minutes equally divided. That would fill in the space and permit a resolution of the other matter. If it is in the convenience of the majority leader and the manager, I would be prepared to go forward on that.

Mr. HELMS. I would like to accommodate the Senator with that, but the Senator from South Dakota has been waiting patiently for most of this day to offer the amendment, and he got sidetracked time and time again by the cargo preference. I do not think I would impose that on him.

Mr. MITCHELL. I have no desire to intrude. I have been waiting since Monday as well. I understood that we could not get an agreement to set aside the pending amendment, and I am suggesting that this amendment be taken up in the meantime. If there is an agreement with respect to the amendment of the Senator from South Dakota, I have no objection to that.

The PRESIDING OFFICER. The Senate will be in order.

Is there objection to the original request?

Mr. MELCHER. Mr. President, I thought I made the objection clear, that on behalf of a Member who is not here, we have to object.

Mr. DOLE. Object to what—the 30 minutes?

The PRESIDING OFFICER. Objection is heard.

Mr. MELCHER. Mr. President, will the Senator yield?

Mr. HELMS. I yield, provided I do not lose my right to the floor.

Let me state again what the Parliamentarian meant when he advised the Chair that the question was on the original unanimous-consent request.

It is simply to lay aside the cargo preference, and I defined those by number, and that is all the request is.

Mr. MELCHER. I have no objection to that, as long as it is not going to get a vote.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The Senator from South Dakota is recognized.

AMENDMENT NO. 929

(Purpose: To establish a three-tier target price for feed grains)

Mr. PRESSLER. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from South Dakota [Mr. PRESSLER] proposes an amendment numbered 929.

Mr. PRESSLER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 114, strike out lines 20 and 21 and insert in lieu thereof the following:

"(E) The established price for corn shall be not less than—

"(I) $3.13 per bushel for any quantity of corn not in excess of 10,000 bushels,

"(II) $2.98 per bushel for any quantity of corn in excess of 10,001 bushels, but not in excess of 20,000 bushels, and

"(III) $2.83 per bushel for any quantity of corn in excess of 20,001 bushels.

On page 88, strike out lines 18 through 23 and insert in lieu thereof the following:

"(E) The established price for wheat shall not be less than—

"(I) $4.48 per bushel for any quantity of wheat not in excess of 7,500 bushels.

"(II) $4.33 per bushel for any quantity of wheat in excess of 7,501 bushels, but not in excess of 15,000 bushels and,

"(III) $4.18 per bushel for any quantity of wheat in excess of 15,001 bushels.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. PRESSLER. I yield.

Mr. DOLE. Mr. President, I see the distinguished minority leader on the floor, and this might be a good time to indicate that we will have votes for a while this evening.

I am not certain how long this amendment will take or what we will do following that. I think the last vote will probably be an indication of where we may wind up on this bill one of these days. I am encouraged by what has happened. There is an indication to me that Members on both sides want to get a farm bill that will not be vetoed, one that will not do violence to the budget, and one that will

help the American farmer. I am somewhat encouraged by the 48 to 51 vote.

Perhaps that would be another indication that maybe it is time to sit down on both sides and try to work out a farm bill. That is a fairly close vote.

I say to the distinguished minority leader that we will probably stay until about 9 o'clock. Maybe it is time to vote on a $25,000 payment limitation. Maybe that would be a good amendment.

Mr. PRESSLER. Mr. President, the amendment I am offering would direct deficiency payments for corn and wheat to family size farmers and help to hold down the cost of these programs. Program benefits would be directed to family size farmers through a three-tiered target price system similar. The amendment is the same as the target price provision I offered in S. 250 and similar to an amendment I offered to the 1981 farm bill.

The current farm program, with its $50,000 payment limitation, still allows the majority of program benefits to go to the largest corporate farms. Almost one-half of the payments made under the target price program go to the largest 5 percent of the farmers, based on land ownership. These farmers usually need the least help. The most recent available USDA statistics illustrate this point. Farms with gross sales of over $250,000 had an average net equity of $904,446. Farmers in this category had an average annual net income of $96,889 in 1984. The same set of statistics shows that the smaller, family size farm with gross sales of between $20,000 and $100,000 had a net income of $17,602. The average income of all American families in 1984 was equal to $24,800. These statistics illustrate that we need to do a better job of directing Federal farm program benefits to family size farms.

My amendment would direct farm program benefits to family farmers and away from large corporate farms. It would set the corn target price at $3.13 per bushel for the first 10,000 bushels of production per farm. For production between the 10,000, and 20,000, the target price would be set at $2.98 per bushel. For production in excess of 20,000 bushels, the price support would be $2.83. The target price for wheat would be set at $4.48 for the initial 7,500 bushels produced. Production between 7,501 and 15,000 bushels would be supported at a rate of $4.33 per bushel. A target price of $4.18 would apply for production beyond $4.18 per bushel. Well over 70 percent of the Nation's farmers would benefit from my amendment. Another 15 to 20 percent of the farmers would receive comparable benefits from both my amendment and the committee bill. The largest producers would have a reduction in benefits. The increase in program benefits to family size farmers without increasing costs is possible because of the large share of production held by the largest operators. For example, this amendment would reduce benefits to only 10 to 15 percent of the farmers, but these farmers produce approximately 40 percent of the grain.

I have worked with the chairman of this committee and we have contacted USDA concerning the cost of the three-tiered program. USDA has estimated that the amendment would be revenue neutral for fiscal year 1986. The same number of dollars would be more effectively directed to family size farmers rather than the largest farmers who need the assistance the least.

The amendment would also reduce the incentive for farmers to produce more corn or wheat in order to benefit from target price payments. Once the farmer hits the 13,000 or 20,000 bushel level, his incentive to produce more corn and wheat would be reduced. With our huge feed grain surplus, it is important that we reduce governmental incentives for farmers to produce excessive amounts of corn.

Mr. President, in the last few days I have heard many elegant speeches on the need to provide assistance to the family farmers of America. My amendment would increase farm program benefits to the average size family farmer. Benefits would be increased for the farmers with the highest need. Since everyone seems to want to help family farmers, then I hope all of my colleagues will support this amendment.

The PRESIDING OFFICER (Mr. HUMPHREY). The Senator from North Carolina is recognized.

Mr. HELMS. Mr. President, I thank the Chair for recognizing me.

Before discussing the amendment by the distinguished Senator from South Dakota, which I support, I ask that he make me a cosponsor. I ask unanimous consent that I be listed as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I am looking at the rollcall vote just taken where the amendment of the distinguished Senator from Indiana [Mr. LUGAR] was defeated by a three-vote margin. If we can get together and come to an accommodation, I believe we can finish this farm bill in short order. I do not mean in a few hours, but in 2 or 3 days.

Now, originally, I had anticipated it was going to take a week or 10 days at a minimum, but now I am greatly encouraged because I believe that a majority of Senators must surely realize that what is needed is to bring some fiscal responsibility to the farm bill.

Now, we will be glad to work with, consult with, cooperate with Senators in trying to achieve an accommodation.

As to the amendment of the distinguished Senator from South Dakota, this amendment has been referred to as a farm bill with tiers, creating a farm bill with tiers. I think we better spell that. That is t-i-e-r-s and not t e a r s, because past farm policies, the failed policies of the past, have resulted in many tears, t-e-a-r-s, being shed by small family farmers.

Now we have been discussing this daylong about what has been done to the farmers, what can be done for the farmers, and I say again, Mr. President, that the best farm bill that we could possibly write and pass in this Chamber would be one to move toward a balanced budget, get the interest rates down 2 or 3 percent. That is the main problem that we are confronting out across America's land, among the farmers particularly the small farmers.

The analysis of the 1972, 1978, and 1982 Census of Agriculture demonstrates what many have already suspected. That census shows that small farmers are disappearing. Why?

Let us analyze just a little bit. During this period, small family farmers declined in number by almost 20 percent while the number of larger farms increased. I think it is more than a coincidence that this has happened at the very time that Congress has year after year, farm bill after farm bill, indiscriminately come forth with larger and larger subsidies to agriculture.

I have stated many times since consideration of the farm bill began last week, and I say again, that the payments, the subsidies, are not going to the small farmers in terms of percentages; they are going to the large farmers.

If we are for real around this place about the concern, interest, devotion to the small family farmer, let us prove it by getting some equity and some fairness.

These ever-growing subsidies have contributed to ever-growing average size farms, ever-increasing numbers of large farmers, chronic surpluses, low farm prices, and declining number of small farmers.

We can express our political feelings about the farmers all we want to. But the fact remains that what has happened to the small farmers has been largely a result of the failure of Congress to be fiscally responsible.

The amendment by the distinguished Senator from South Dakota is an effort to correct one of the problems, and I commend him on it. It is a good amendment. It will give small family wheat and feed grain farmers a chance to compete in an industry that is now tilted by Government policy toward larger farmers.

And I ask the Senator if that is not a correct assessment.

Mr. PRESSLER. That is a correct assessment.

Mr. HELMS. I thank the Senator.

Furthermore, the amendment would establish higher target prices for smaller producers and progressively lower target prices for the larger producers. Now, I want to know what is unfair about that.

If we mean what we say, I say to the Senator, when we express our devotion to the small family farmer, I think the Senator is on the right track and I commend him for his amendment.

On average, the weighted national wheat and feed grain target price is not changed from current law. It equates to a freeze in target prices, but redistributes the subsidies according to the size of the farm.

Now, the formula in the Senator's amendment, as I understand it—and I want him to correct me if I am wrong—truly targets smaller farmers and results in approximately a $4.38 national weighted target price. Is that what the Senator has in mind?

Mr. PRESSLER. That is correct.

Mr. HELMS. I thank the Senator.

So even though large farmers would have reductions in the target prices, small farmers would have increases and the average for the Nation's farmers would be $4.38 per bushel as opposed to the 12 cents per bushel national average increase contained in the committee bill.

Let me say for the purpose of emphasis that this represents no reduction in the national average target price. I ask the Senator if I am not correct in my understanding that it represents only a redistribution of benefits toward the smaller farmers.

Mr. PRESSLER. That is correct.

Mr. HELMS. As with wheat, the feed grain formula gives the greatest benefit to the smaller farmer. Also, as in wheat, about 80 percent of program participants will find no effective reduction in their average target prices. So that means that about 20 percent of the largest participating producers will feel some slight reduction.

Again the weighted national average target price will remain at $3.03 per bushel. This is the same as current law and the same as in the committee-adopted farm bill. The amendment only redistributes payments from the largest to the smallest producers and does not do it with a meat-ax.

Let me say, again, Mr. President, and then I will yield the floor, we have heard much about the family farmer and how we need all these farm programs in order to save the family farm, but I think now is the time to stop posturing. I think now is the time to demonstrate a genuine concern for the small family farmer and those in the middle-size bracket.

For the past 50 years, family farms have been swallowed up by other farms growing larger and larger. And much of this, I think, is due to technology and biases in State and Federal tax codes. But I am convinced that much of the structural change is due to Federal farm policies that have failed because they favor large farmers.

This Senator does not favor discrimination against large farms. They, in most cases, are most efficient and account for the reason America has such an enviable food and fiber system.

My only point is that the taxpayer should no longer be held responsible for the economic prosperity of these large agribusinesses. If farm policy is supposed to promote the small family farm, then I believe it is high time that we put some muscle behind the rhetoric.

I anticipate that the questions will be asked as to why cotton and rice were not included in this amendment. Quite frankly, it is because there are no small cotton and rice farms left except those that have been broken out of larger farms so that the large farms are not disqualified from Federal farm programs by the $50,000 payment limit.

Mr. President, it is not too late for wheat and feed grain farms.

Mr. PRESSLER. Mr. President, at some point I would like to ask for the yeas and nays.

Mr. President, I am sending a technical modification to the desk. It does not change the meaning of the amendment.

The PRESIDING OFFICER. The amendment is so modified.

The amendment (No. 929), as modified, reads as follows:

On page 114, strike out lines 20 and 21 and insert in lieu thereof the following:

"(E) The established price for corn shall be not less than—

"(I) $3.13 per bushel for any quantity of corn not in excess of 10,000 bushels,

"(II) $2.98 per bushel for any quantity of corn in excess of 10,000 bushels, but not in excess of 20,000 bushels, and

"(III) $2.83 per bushel for any quantity of corn in excess of 20,000 bushels.

On page 88, strike out lines 18 through 23 and insert in lieu thereof the following:

"(I) $4.48 per bushel for any quantity of wheat not in excess of 7,500 bushels.

"(II) $4.33 per bushel for any quantity of wheat in excess of 7,500 bushels, but not in excess of 15,000 bushels and,

"(III) $4.18 per bushel for any quantity of wheat in excess of 15,000 bushels.

The PRESIDING OFFICER. Does the Senator wish to request the yeas and nays?

Mr. PRESSLER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MELCHER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BOREN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BOREN. Mr. President, we have before us an amendment that has been offered under the guise of being an amendment to help the family farmer. In fact, I think we ought to examine this amendment very, very carefully before we jump to the conclusion that it helps the family farmer.

I have just run the figures on it and, if we take the average yield, for example, for wheat on a wheat farm, if we take the 400-acre wheat farm that is in the range of a family farm by definition in terms of its gross sales and size, the Pressler amendment would reduce family farm income for that 400-acre wheat farm by 4 percent from the figure that is in the bill. On a 600-acre wheat farm, which also would be designated a family farm, it reduces the family farm income by 5 percent. And for an 800-acre farm, again in the range of the family farm, it means a 6-percent drop in income.

Now we fought hard in the committee to try to target more of the benefits in the case of wheat to the family sized farm unit. It was a hard battle and one which we won. I think it is very important that with the few dollars, very scarce dollars, that we can allocate to the farm program, that we target them as effectively as possible to the family-sized farm unit.

Now what does this amendment do? I hope that my colleagues, who are in sympathy with the idea that we should primarily be helping the family farmer, will listen carefully and will examine the facts for themselves.

This targets the highest per bushel price on wheat, for example, to those who produce the first 7,500 bushels. They are to get $4.48 per bushel for the first 7,500 bushels. Now that is the people who are really helped under this proposal.

How many acres does it take to raise 7,500 bushels? On the average in this country, it would take 193 acres to raise 7,500 bushels. So, in other words, those that are helped under this amendment the most are not the family-sized farmers. I just told you what would happen to the 400-acre wheat farm and the 600-acre wheat farm. It is flying under false colors.

This is not the family farm amendment. This is the hobby farm amendment. We have 680,000 hobby farmers in this country, 40,000 more than there are family farmers, by the way, according to USDA definitions based upon gross sales.

We have 680,000 hobby farmers, those who just raise a little, those doc-

tors and lawyers who live in towns who love to farm on the weekends or like to live on the country estate. There are 680,000 of them. They will love this amendment because they are going to get the primary benefit from the Pressler amendment—those that are farming in the case of wheat, for example, of 193 acres or less—but the family farm, the backbone of all the farmers, there are only 34 percent of farmers that are family farmers. The rest are either hobby farmers or the giant farming operations. Those 34 percent who have the 400- and the 600- and the 800-acre wheat farms are the backbone of agriculture.

They are only 34 percent of all the farmers but they raise 90 percent or more of all of the farm production. They are the people who depend upon the farm for their income.

If the Senator from South Dakota really wants to help the family farmer as opposed to the hobby farmer, the Senate would turn this thing on its head for the first couple of thousand bushels raised on 50 or 60 acres. The Senator would put that down at the lower price of maybe $3.50 or $4; then for the next 18,000 bushels or so, put it where we have it under the bill at $4.55. Give the family farmers, those people who are depending on the income from the farm, a chance to make a living.

So I say if there is any amendment that I have seen in this Senate that is flying under false colors, it is this one. I hope all my colleagues will carefully examine it. If you want to help the hobby farmers, if you think those doctors, lawyers, who bought up that land, live in town, and love going out to their country retreat on the weekend need more help from the Farm Program, need more of the precious dollars that are needed for the survival of the family farm, then vote for this amendment.

Go home. I hope all the hobby farmers will have a parade in your honor and call out the brass bands and carry signs, "Friend of the Hobby Farmer," because that is exactly what this amendment does. It effectively targets the aid to the hobby farmers of America, and deprives the family farmers of America of a chance to make a fair income.

Look again at what we have in the bill. We have targeting there. We have $4.55 per bushel up to 20,000 bushels which is a range that would encompass the family sized farm unit. Even with that, even with that, we are only able to get farm incomes up 4 or 5 percent for that family wheat farmer—I use the wheat farmer as an example—over what we have at the current time, at a time when we are in desperate economic conditions. But the last thing we need to do—the very last thing we need to do right now—is take the precious dollars that we have to allocate to the Farm Program and target them to the hobby farmers instead of targeting them to the family farmers.

You can just do the figures for yourself. You can figure out exactly how much it takes to raise the levels of production. You can get that per bushel yield. If you doubt my figures, put the pencil to the page yourself, and you will find for the family sized farmer the Pressler amendment will be an absolute disaster.

We had an effective targeting in the Senate agriculture bill that does help that family-sized farmer. We ought to stay with that. If we want to change anything, we ought to change it by exempting the first couple of thousand bushels from the incentive price.

I would be happy to yield for a question from my colleague from Idaho.

Mr. McCLURE. First, I want to associate myself with the remarks the Senator has made. The Senator is right on target. With just a couple of exceptions or additions, I totally agree.

One is there are some small farmers that are not hobby farmers. They are people that are for one reason or another on small acreages, but the hobby farmer, the part-time farmer that is doing it as a hobby is also, generally speaking, the one who has bid up the price of land. That has made it harder for the ones who really wanted to be in full-time agriculture either to get there or to stay there. It is one of the things that has contributed to the tremendous financial crunch.

This amendment, if passed, would encourage the continuation of that trend rather than stopping it.

Mr. PRESSLER. Will the Senator yield?

Mr. BOREN. I would like to let my colleague from Idaho finish his point first.

Mr. McCLURE. A second point I think needs to be made. The Senator just touched on it. It may be one of the most effective things we can do—is to eliminate a subsidy completely for the part-time farmer. This amendment does not do it. Neither does the bill.

I think that is something we ought to look at very carefully, whether or not we really want to encourage the maintenance of submarginal part-time farming in competition with those who make their full livelihood out of farming. I do not want to squeeze the marginal farmer off, but I do not want to encourage the continuation of growth of hobby farming, and encourage people to move out from the city into the countryside by reducing their cost of operation and therefore increasing the numbers of people in the city moving to the countryside in part-time farming.

Mr. BOREN. I thank my colleague from Idaho. I think his statements are right on point. Certainly, I am not denigrating anyone who wants to live on a small tract of land. I am certainly not denigrating any marginal farmer. I think there are many of us who would like to live under those conditions, and have an opportunity to live in that fashion.

The Senator is certainly right when he said that those who are going out buying small tracts of land for a period of time will increase the cost of production for those who are really in the family farm, the backbone of agriculture. They have driven up those costs. Very often they do have other sources of income. They are unlikely to be dependent mainly on the farm for the family livelihood. Sometimes they can use those sources of income to pay much higher prices for land, equipment, and other items than the person in agriculture can afford to pay.

So by encouraging more and more people to go into hobby farming, we have hurt the family farmer really in two ways. We have increased the overall production and surpluses, we have also greatly increased the cost of production, and we have helped to put that family farmer into a cost/price squeeze that we are all familiar with.

I tried in the Agriculture Committee at the beginning to put in a threshold level so that we left out that incentive price for the first so many bushels of production. Then we targeted in that range that would encompass the family-sized farms, those with gross sales over $50,000 a year, but less than $500,000 a year which is the traditional definition of a family farm.

I was not successful in that. So the next best thing was to target it for the first 20,000 bushels, for example, in the case of wheat. That seemed to be the best we could do.

I am very, very alarmed at the effects of this amendment. I know the author may well not have intended those be the effects but it very substantially cuts the family farm income for that size operation.

I am happy to yield for a question.

Mr. PRESSLER. I thank the Senator very much for yielding.

I would like to ask him a question or two because I feel the amendment is being misrepresented. The purpose of this amendment is to help the family-sized farmer. My good friend suggested perhaps there would be a parade given by the people for me because I am helping hobby farmers.

I would suggest if there is such a parade my friend from Oklahoma would perhaps ride in the first car because what is in the bill now would treat the hobby farmer better than my amendment. Indeed, I will let the Senator ride in the front car if there is such a parade.

Mr. BOREN. I have to say to my good friend from South Dakota that I tried to follow the Senator's logic from down the path that the Senator was

leading me. Somehow I am left in the middle of a maze because it becomes very unclear how the Senator comes to that conclusion.

We are providing $4.55, for example, per bushel for that farmer that has 400 acres, 500, or 600 acres.

That would all fall into that level of production. Let us say we only have to harvest 193 acres before we drop down to $4.33. Then we only have to harvest another 193 acres. We are still well under 400 acres before we dropped to $4.18.

How in the world is the Senator helping a family-sized farmer under his amendment when the Senator is dropping the amount of that family-sized farmer? That farmer, let us say, has a 500-acre farm. When the Senator is dropping the amount we are going to pay him on all of that production over 386 acres, when the Senator is dropping that from $4.55 to $4.18, how can the Senator say he is helping a family farmer when on a 400-acre farm his amendment provides him with 4 percent less income than the bill presently does, and when on a 600-acre farm he is reducing his income by 5 percent?

I would like to hear my friend from South Dakota go before an audience of family farmers and say I have come to help you. If you have a 400-acre farm, I am lowering your income by 4 percent and on a 600-acre farm, I am lowering your income by 5 percent. I say with all due respect to my colleague from South Dakota, I think they would say, Senator, that is the kind of help we have been getting out of Washington for all too long. That is the reason so many of our farms are on the auction block.

I would just say that I think the mathematics will show that you are lowering the income for the very size farms we are wanting to help, I say to my colleague.

In the committee, I attempted to have a lower threshold price for the first 3,000 bushels, just to get rid of the special hobby farmer. I was not able to get the amendment exactly the way I wanted it. But certainly with this amendment you will give the hobby farmer the highest price of all, which is what the Senator from South Dakota is doing with his amendment.

Mr. PRESSLER. Wheat farmers with an average base of 460-acres or less would receive a higher target price than under current law. Those larger would have decreased benefits. The average wheat base today is 89 acres.

Mr. BOREN. Under the bill for a 400-acre wheat farm, they will get $4.55 for all of the bushels they produce. Under your proposal, they will get $4.48 for the first half of their production and $4.33 on the next half of their production. I understand we are teaching the new math now, but this is really the new math.

How do you take $4.48 and $4.33 and turn out to average $4.55? If you can explain that to me, I would appreciate it very much.

Mr. PRESSLER. My friend is talking about increasing under the target price. He is assuming there is not any kind of a freeze. He is making assumptions. Indeed, we will answer in detail for Oklahoma, but we do not have those figures here.

The fact is I think my friend is speaking for the large corporate farmers. There is nothing wrong with speaking for them. I speak for the family farm. Many farmers have some wheat and some corn. This is a fairly substantial farm I am talking about.

Mr. BOREN. What is the size farm the Senator would consider to be the average farm? According to the USDA, what is the average size farm? Is it not 543 acres? Is that not the average family farm? I believe it is.

Mr. PRESSLER. The average wheat base for people participating in the program is 89 acres. You can dispute other figures, but that is the true figure. The amendment benefits farmers with a wheat base of 460 acres. That is a large farm in my State since most farmers produce several crops. Maybe in your State the farms of which my friend is speaking of are much larger than that. But that is the point. This is to help the truly family size farmers.

Mr. BOREN. 20,000 bushels is about a 600-acre wheat farm. We are targeting to higher benefits.

In Oklahoma, we are increasing the average yield per acre. As we said a moment ago, it takes 193 acres to produce 7,500 bushels of wheat using the USDA average. I think the Senator can figure that. If that takes 193 acres to produce 7,500, you are talking about a 600-acre farm or a little less to produce 20,000 bushels.

Mr. PRESSLER. I am told the Senator is using a wheat farm defined on a census basis. We are talking about a wheat farm defined by the USDA on a payment basis. Indeed, there is quite a difference.

Mr. BOREN. We can figure that out. We will just take the average bushels per acre of yield on a wheat farm as defined by the USDA nationally. We can multiply that out and get the average bushels per acre. It is 38.8 bushels per acre. Just find out how many acres it takes to produce 20,000 bushels. I think you will find my figure is correct.

What you are doing here is you are targeting the benefit, which, by the way, is still low, at $4.55. You are targeting that only to the first 7,500 bushels of production which is from 193 acres.

Mr. PRESSLER. The $4.55 target price on the first 20,000 bushels will increase deficiency payments to 99 percent of those who now receive payments in Oklahoma and 98 percent nationally.

You are assuming that this body is going to substantially increase the target prices. It has been indicated that there would be a freeze. I do not necessarily disagree with higher target prices. But we are trying to work within the framework of a budget. I would hope it would be larger but I am very much afraid it will not be. Therefore, this amendment tries to target farm program benefits to family size farmers and ranchers. The levels established in the amendment are fairly substantial levels when compared to the average wheat and corn base.

If people want to raise more grain, they can do so, but they will not be provided with as great an incentive under these target prices. If we use the USDA figures, and we will have the figures shortly on Oklahoma, I believe my friend is speaking for the very few large farmers, in many cases corporate farmers who need the program benefits the least.

When you consider the fact that in many parts of the Farm Belt more than one crop is grown, we are talking about very large farms, larger than average size family farms.

Mr. BOREN. I sympathize with what my friend from South Dakota has said. I know he has tried to assist the farmers of the Nation. I noticed how he voted on just the last rollcall. I appreciate his vote. I think he voted with the farmers on the last rollcall. I think he is talking about doing the right thing.

Unfortunately, I just do not think the amendment is drafted to do that. I did not mean to denigrate the motives of my colleague from South Dakota at all, but I think he really should want to help the family farmer as opposed to the hobby farmer.

Let me go back. As I said, the average wheat base for this country is something like 89 acres. Surely, he does not believe that is the average family size farm. In a 5-acre base, you have a lot of farmers where a typical farmer might farm 6 or 7 tracts, so he adds together a little from this one and a little from that one, and so on.

You see, these figures can be taken in a very misleading fashion.

I read an article in the newspaper last week, pubished in the Washington Post, which said that 72 percent of the farmers in the country were experiencing no economic distress at all.

I looked at that and said to myself, "How could that be?" Then I looked at a USDA report that said 58 percent of all the family sized farms were experiencing severe stress. If 58 percent of the family farms are under severe stress because they have 78 percent of all the debt, how could 72 percent of the farmers be in no trouble at all? It is easy to see. Those 276,000 hobby

farmers for the most part are not under financial stress because they do not depend on the family farm for their income.

Then you can add all those figures and say when you look at those 2.3 million and add those that are maybe corporately owned and not doing as badly as the family farms, you can say that. I am afraid that is the trap my friend is falling into.

Mr. PRESSLER. Would my colleague yield?

Mr. BOREN. I urge him to put a pencil on it for a 400- or 500-acre farm and see for himself.

Yes, I yield.

Mr. PRESSLER. I thank my colleague for yielding. He knows much more about Oklahoma than I do.

Mr. BOREN. Mr. President, I have been using the national average figures, not Oklahoma figures.

Mr. PRESSLER. My friend talks of a farm with a 900-acre wheat base. I am told that only 101 or 3 1/100 of 1 percent of the people in Oklahoma receive payments that would equate to those due a 900-acre operation, less than half of 1 percent nationally.

My friend is talking about very large farms and, in most cases, corporate farms. I do not criticize him for that. Somebody has to speak for the large farms. But this amendment speaks for the family sized farms of America. I think that is an important thing.

Mr. BOREN. What is the average family sized wheat farm in the Senator's State? Would a 400-acre farm be a large, huge, monolithic farm or would he call that a family farm?

Mr. PRESSLER. The average wheat base in the United States is 89 acres.

Mr. BOREN. Would the Senator, if if he were driving in his car and saw a 400-acre wheat farm in South Dakota, would he say to himself, "My, there is a huge, gigantic farm operated by some corporate behemoth"? Or would he say, "I believe that is a family farm I see out there"?

What would he say?

Mr. PRESSLER. Not necessarily. Under my amendment, depending on how efficient and productive they were, the farmer would receive payments on a tiered basis. That farm very well would benefit from this amendment, very much so. We could debate here about census definitions and about personal definitions, but the fact of the matter is that the operator of that particular farm, if it were a South Dakota farm, would also have some corn, some alfalfa, and so forth. Such a farmer, with a 400-acre operation would benefit greatly from this amendment.

Mr. BOREN. Using the average bushel yield per acre nationally on a 400-acre wheat farm, the Senator is going to get an average of between $4.33—I go back to this question. For half the production on the 400-acre farm, he is going to get $4.33; for the other half, $4.88. So you add them together and average them to get your price on that 400 acres. Under the bill, you are going to get $4.55 for all of them. Will the Senator please explain to me how you can average $4.33 and $4.88 and come out with a higher figure per bushel for that 400-acre farm production than the $4.55 under the bill?

Mr. PRESSLER. Again, the Senator is talking about a different target price. Some of my big ranchers and farmers are going to take me to task for offering this amendment. Some of the large acreages in my State are going to be upset. Next time I have a listening meeting, I shall be roasted gently by some of my friends who are blessed with large farms. I am sure my friend from Oklahoma has several such friends. Indeed, there are a few farms and ranches in South Dakota that would not benefit from this. But the family sized farms and ranches would benefit greatly.

Mr. BOREN. Mr. President, if I may make one other comment, then I shall relinquish the floor to all my colleagues who want to speak on this. I was just handed information from the USDA's report that was published in late July. According to that report, they list 650,000 hobby farmers. They say that on the average, those 650,000 hobby farmers rely for 3 percent of their income on their earnings from agriculture. They got 3 percent of their income from agriculture.

Mr. President, I am not against hobby farmers at all, but I do not think we should be writing the farm program for the hobby farmer.

Mr. PRESSLER. If my friend will yield, how much would he give the hobby farmers under his bill?

Mr. BOREN. As I told him, when I tried to write it in the committee, for the whole first 20,000 bushels, we would give $4.55.

Mr. PRESSLER. So the hobby farmer gets more under his bill than he does under mine. When the hobby farmers have that parade for him at home he will be at the head of the parade.

Mr. BOREN. As my friend knows, he is only giving that higher price to the very first few acres of production. His benefits are targeted to those 650,000 or less who are hobby farmers. Those 650,000 get 3 percent of their income from agriculture.

The Senator said a while ago that in trying to target the benefits of the first 20,000 bushels, I was helping these huge farms. It drops off to $4 after you reach the 20,000 bushel level under the bill as now written. That is about a 600-acre farm. I do not think that is a huge corporate farm. That is a family-sized farm, as my colleague from Idaho [Mr. McCLURE] well knows.

I am not using Oklahoma figures. I am shocked and surprised that the Senator from South Dakota would think that a 400- or 500-acre or 600-acre farm was not a family-sized farm. I go back to this: The Senator can just add it up for himself. If this is a family farm amendment, why is it reducing the average income of the average family-sized farm unit by 4, 5, 6 percent or more, depending on the size of that farm? There is just no way, if we are really interested in helping.

If I could write the ideal provision, I would write it maybe at $4 for the first 2,000 bushels, then write it at $4.60 for the next 18,000 bushels. That would get rid of the hobby farmer and target it all to the family farmer. That is the way I wanted to write it, the way I first offered it in the committee. The committee did not go along with it, so we got second best and targeted the first 20,000 bushels.

What the Senator from South Dakota suggests is the worst of all. He gives the highest level to the hobby farmer and reduces it when he gets up to the family-sized level.

I go back to this: When we have a pressing need, let us target the income to those who really depend on that farm for their financial survival. Let us target it to the full-time farmer. Let us not target it to the doctor who bought a little tract of land—I think it is nice he bought a little tract of land—and he drives out from the clinic in his Mercedes, or the lawyer does. I used to be a lawyer so I have nothing against lawyers. I am glad those professions are doing well. But let us help the family farmer; let us not open the Treasury to the hobby farmer and close it to others.

Mr. President, I think the aim may well be a good one, I say to the Senator from South Dakota, but I urge him to use his pencil himself or his calculator and figure out how in the world he is helping the family farmer by reducing his average price of $4.55 on the 600 acres or less that he can produce and lowering that to a much lower figure. There is no way it can be done.

I shall be happy to yield.

AMENDMENT NO. 931

Mr. HARKIN. Mr. President, I have an amendment which I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Iowa [Mr. HARKIN] proposes an amendment numbered 931 to amendment No. 929.

In the pending amendment, strike lines 12 through 20.

Mr. HARKINS. Mr. President, the amendment that I have offered to the pending amendment would basically strike that part of the amendment of-

fered by the Senator from South Dakota that deals with wheat. I am much persuaded by the arguments of my distinguished colleague from Oklahoma [Mr. BOREN] on this issue. We debated this at great length in the Agriculture Committee. We had a vote in the Agriculture Committee to adopt Senator BOREN's amendment, which set up the tiering level for wheat at $4.55 per bushel on the first 20,000 bushels and $4 a bushel on everything over that.

I know that Senator BOREN worked long and diligently in the committee to fashion an amendment that would go to help, as he said so eloquently on the floor, those family-sized wheat farmers, not only in Oklahoma but throughout the country, and to make sure that we targeted those benefits to those family farmers.

I understand the amendment offered by the distinguished Senator from South Dakota. What it seeks to do is to take what the Senator from Oklahoma did in the committee and reduce it down to a level that—basically, what the Senator from Oklahoma pointed out I think is accurate—decreases the income which would go to those average family-sized farmers who are raising wheat.

Now, I understand why the Senator from South Dakota is doing this. I assume it is to try to reduce associated costs. Again, I would point out that the costs here are minimal and that what Senator BOREN very carefully fashioned on this bill in the Agriculture Committee was an amendment that would slightly increase the income of those family-sized farmers. If I am not mistaken it was around 5 percent.

It is not a great deal to ask to increase their income by 5 percent, but I tell you what that will do, Mr. President; that small increase in income to those wheat farmers means we will not be coming back here next month or early next year to try to bail out the Farm Credit System for $5 billion or $6 billion or $10 billion or whatever it is that they are going to be asking. That 5 percent increase in income to those family-sized wheat farmers will mean they will be able to pay their debts, to pay their bills, and that we will not have to then come in and treat the symptoms by bailing out the Farm Credit System. Rather, we can treat the causes right here and now by assuring that there is a very slight increase, 5 percent, in the income of these family-sized farmers.

And so I offer the amendment to the amendment offered by the Senator from South Dakota which would basically maintain the position that came out of the Senate Agriculture Committee, that is, a tiering for the wheat farmers as authored by the distinguished Senator from Oklahoma and adopted by the Committee. I believe it is the best. I believe it provides that small 5-percent increase in income that is needed so desperately out there, and is the fairest we can do. I am hopeful that Senators will stick with the committee position and will strike that portion of the amendment offered by the Senator from South Dakota which deals with wheat.

Now, I must in all fairness add that the Senator from Iowa will be offering an amendment after this that will bring the tiering of corn more in line with the tiering of wheat. But I am hopeful at least at this juncture that we will stay with the committee position and not vote for the wheat portion in the amendment offered by the Senator from South Dakota.

Mr. President, I yield the floor.

Mr. McCLURE. Mr. President, I rise in opposition to the amendment offered by Senator PRESSLER for the many reasons stated by the Senator from Oklahoma. And if I understand correctly, the amendment to the amendment offered by the Senator from Iowa would simply strike the language with respect to wheat. I support that amendment because I think there is misapprehension and that is the only reason I take the time of the Senate at this time to even speak on this subject, first a misapprehension of what a family farm is.

I do not know what it may be other places but I know that on average you may get acreages down because there are a lot of small acreages around our cities where people hung on to them over the years and did not leave but they got a job in town. That acreage may be 40 acres and they have 10 acres of wheat in the corner somewhere that gets into the averages and reduces them. But I know people living on the farm, depending upon the income from that farm to sustain their families, are cultivating hundreds of acres and they have to be cultivating hundreds of acres or they are not making it.

If you analyze it right now, the ones who are failing in agriculture are the ones who have stayed too small and those who have tried to grow too large. Both ends are having financial difficulties. This amendment, as I see it, would strike at the very basis of what is the stable and potentially successful area of farming at least in my State.

I do not know, I cannot tell you off the top of my head, Mr. President, what the average wheat allotment may be in my State of Idaho, but I do know some struggling farmers, family operations in which father and sons are together cultivating 2,500 to 3,000 acres of land and there are three families involved, and I suppose they can split it up and say, all right, we have 800 to 1,000 acres of land and on that they have 600 acres of wheat allotment. I think that would be ballpark for a number of family operations. So I think to deprive them of the opportunity to remain successful or to in another way say all right, we will penalize them for being successful, we will do our best to make them unsuccessful, is the wrong way for us to go.

Second, we do have, rightly or wrongly, imbedded in this bill a reduction of production. And if we really mean to reduce production by getting people to participate in the program, you cannot exclude the large farmer. We can all have a lot of fun demagoging about the massive farms, but if you put out all the farms, exclude them from the program, you might as well not have written in any reduction or limitation on production because you will get almost zero reduction. I think for both reasons, the theory of the bill that tries to limit production or reduce production and the real family farm, that middle group, not the very large and not the very small, this amendment ought to be defeated.

Mr. PRESSLER. Mr. President, I will conclude this debate by saying this amendment has been carefully crafted, I am honored to have the cosponsorship of the chairman of the Agriculture Committee. I am prepared to vote on it.

Mr. HARKIN. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER (Mr. TRIBLE). Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MELCHER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. MELCHER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Arizona [Mr. GOLDWATER] is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Mississippi [Mr. STENNIS] is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 57, nays 41, as follows:

[Rollcall Vote No. 267 Leg.]

YEAS—57

Andrews	Boren	Chiles
Armstrong	Boschwitz	Cranston
Baucus	Bradley	DeConcini
Bentsen	Bumpers	Dixon
Biden	Burdick	Dodd
Bingaman	Byrd	Dole

Durenberger	Inouye	Moynihan
Eagleton	Johnston	Nickles
Evans	Kassebaum	Nunn
Exon	Kennedy	Pell
Ford	Kerry	Pryor
Glenn	Lautenberg	Riegle
Gore	Leahy	Rockefeller
Gorton	Levin	Sarbanes
Grassley	Long	Sasser
Harkin	Matsunaga	Simon
Hart	McClure	Symms
Heflin	Melcher	Wilson
Hollings	Metzenbaum	Zorinsky

NAYS—41

Abdnor	Hecht	Proxmire
Chafee	Heinz	Quayle
Cochran	Helms	Roth
Cohen	Humphrey	Rudman
D'Amato	Kasten	Simpson
Danforth	Laxalt	Specter
Denton	Lugar	Stafford
Domenici	Mathias	Stevens
East	Mattingly	Thurmond
Garn	McConnell	Trible
Gramm	Mitchell	Wallop
Hatch	Murkowski	Warner
Hatfield	Packwood	Weicker
Hawkins	Pressler	

NOT VOTING—2

Goldwater	Stennis

So the amendment (No. 931) was agreed to.

Mr. PRESSLER. Mr. President, since that was a killer amendment, I move to table my amendment at this point and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from South Dakota.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Arizona [Mr. GOLDWATER] is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Mississippi [Mr. STENNIS] is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 96, nays 2, as follows:

[Rollcall Vote No. 268 Leg.]

YEAS—96

Abdnor	Dodd	Heinz
Andrews	Dole	Helms
Armstrong	Domenici	Hollings
Baucus	Durenberger	Humphrey
Bentsen	Eagleton	Inouye
Biden	East	Johnston

Pell	Sasser	Weicker
Pressler	Simpson	Wilson
Proxmire	Specter	Zorinsky

NAYS—2

DeConcini	Simon

NOT VOTING—2

Goldwater	Stennis

So the motion to lay on the table was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the motion to table was agreed to.

Mr. GRAMM. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. DOLE. Mr. President, I understand, and I have been advised by the distinguished minority leader that they would like to have a caucus which, as I also understand, would begin immediately. I suggest that we suggest the absence of a quorum. Perhaps Senator DIXON in a few minutes, after he has made his statement to the caucus, could come to the floor, and we could finish up the cargo preference matter.

Mr. BYRD. That would be fine.

Mr. HARKIN. Will the majority leader yield for a question? Do I understand he is referring to cargo preference and nothing else?

Mr. DOLE. It is my understanding we would like to finish that now. It depends on how long it takes. It depends on the managers of the bill. If they want to stay on it into the evening, we can do that.

Mr. HELMS. Surely you jest.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HELMS. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. I thank the Chair.

The PRESIDING OFFICER. The Senate will be in order.

Mr. HELMS. Mr. President, I understand accommodation has been reached on the cargo preference. I do not know who will be the first spokesman. Whoever it is we will recognize him.

Mr. DIXON. Mr. President, may I say to my friend, the manager of the bill, that it would probably be inaccurate to say that accommodation has been reached.

We have considerable additional support and would hope that the membership would be inclined to support our attempt to pass what we believe to be a fair compromise for all concerned. There will be some opposition to it. But we are prepared to abandon our further discussion of this issue if this particular amendment is adopted.

There is a certain procedure that will have to be followed with reference to two of the amendments now on the tree and then, as I understand it, I will offer the amendment that is the so-called compromise amendment which we hope will receive sufficient support to silence this discussion on the cargo preference question.

Mr. HELMS. The ball is in the air. Proceed.

Mr. STEVENS. Mr. President, I wonder if I could inquire from my good friend from Hawaii if he would be willing at this point to seek unanimous consent to withdraw his amendment. It is the one side of the amendment tree so that we might see if there is support in the Senate for this compromise the Senator from Illinois is prepared to offer.

Mr. INOUYE. Mr. President, If my friend will yield, I think the first step will have to be one where the Senator from Illinois will withdraw his pending amendment to my amendment.

Mr. COCHRAN. There is no pending amendment.

Mr. DIXON. It is laid down but not yet considered.

Mr. INOUYE. If that is the case, Mr. President, I ask unanimous consent that my amendment be withdrawn.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I will state that I modify my amendment to incorporate the Cochran amendment to my amendment.

The PRESIDING OFFICER. The amendment is so modified.

Mr. STEVENS. Now I call on my good friend from Illinois to offer his amendment.

AMENDMENT NO. 932

(Purpose: To provide direction in the administration of the cargo preference program.)

Mr. DIXON. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Illinois [Mr. DIXON] for himself and Mr. BOSCHWITZ, Mr. INOUYE, Mr. STEVENS, Mr. PROXMIRE, Mr. SIMON, and Mr. KASTEN propose an amendment numbered 932.

Mr. DIXON. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

After "ranges." on page 8, line 2 of the Cochran amendment as incorporated into the Stevens amendment, insert the following: "In addition, the Secretary of Transportation, in administering this subsection and section 901(b) of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1241(b)), and consistent with such subtitle and section, shall take such steps as may be necessary and practicable to preserve during calendar years 1986, 1987, 1988, and 1989 the percentage share, or metric tonnage of bagged, processed or fortified commodities, whichever is lower, experienced in calendar year 1984 as determined by the Secretary of Agriculture, of waterborne cargoes exported from Great Lake Ports pursuant to Title II of the Agricultural Trade Development Act of 1954 (7 U.S.C. 1721 et seq.)."

Mr. DIXON. Mr. President, as I have told my friends on this side and as I think my colleague, Senator BOSCHWITZ, has told his friends on the other side, this is a compromise amendment that the distinguished Senator from Alaska and the distinguished Senator from Hawaii have agreed to. The major interests involved in the subject matter here have acquiesced in it. It is not all that the Senator from Minnesota, myself, and others from the Great Lakes would want.

It is a compromise that would permit an allocation of cargo at the lowest level of the last 5 years over the next 4 years for that reason, and we are acquiescing in that. I ask consideration of the membership on this side so that if this amendment is adopted, we will not pursue any further amendments concerning the cargo preference question and we will support the product of the Senate discussions.

The PRESIDING OFFICER. Is there further debate?

Mr. HEFLIN. Mr. President, I have to oppose this amendment. Basically, what it does, if I understand it, is for 5 years it would guarantee a specified percentage of the shipment of Public Law 480 commodities to the Great Lakes. I believe 18 percent would be specified as a minimum amount that would have to be shipped from that section.

There are other ports such as those along the gulf coast where they may have in the past had something in the neighborhood of 45 to 50 percent of Public Law 480 shipments, that would be 45 to 50 percent of 100 percent of Public Law 480. Now this amendment would mean that you would have 45 or 50 percent of 82 percent.

The same thing would be true of the east coast on what percentage they have had and it would certainly be true in regard to the west coast or any ports.

So in effect you are giving a guaranteed 18 percent to the Great Lakes for 5 years.

I realize that 5 years is a temporary matter. But, nevertheless, it goes back over those 5 years.

The port of Mobile hopefully will experience a surge of additional shipments and industry and business because of the development of the Tennessee-Tombigbee waterway. Mobile does not have a history for the last 5 years and I have some fears that this formula would have an ill effect upon it.

So under the circumstances I think this is giving a preferential treatment to a certain section of the country to the detriment of the east coast, the northeast coast, the central east coast, the southern east coast, the gulf coast, the west coast, northwest coast, and the southwest coast, all of these areas.

The proposed language in the amendment would be detrimental to many inland ports. Shipments of Public Law 480 commodities would have to in effect ship to the Great Lakes, rather than going down the Mississippi or going down the new Tenn-Tom waterway or some other places.

So I think this is rather preferential treatment and I feel that it should be opposed.

Mr. STEVENS. Mr. President, this amendment will ensure that for the calendar years 1986 through 1989 insofar as is practicable the ports within the Great Lakes port range will receive the same percentage share or metric tonnage, whichever is lower, of title II cargo as they received in the calendar year 1984.

All port ranges, including the Great Lakes, would compete for the remaining cargo which would move under the compromise.

I call particular attention of the Senate that this provides that the percentage share or metric tonnage of these commodities which are specified in Senator DIXON'S amendment, whichever is lower, as was experienced in the calendar year 1984 as determined by the Secretary of Agriculture, will be the guaranteed level under this compromise.

I think it is a very fair approach. It assures the Great Lakes region that as we move into this new era they will not be harmed as far as the percentage or metric tonnage, whichever is lower.

I yield to my friend from Hawaii.

Mr. INOUYE. Mr. President, I join my distinguished colleague from Alaska because although a compromise by its very nature is never fully satisfactory to all of us, we must come to grips on this issue. I think there is some equity in this compromise. The Cochran amendment, if it becomes law, will over the next 3 years increase the cargo preference from 50 to 75 percent for title II cargo.

It should be noted that this type of cargo is carried by liners. Most American liners of recent vintage are large, deep draft, and cannot be accommodated by the locks on the Great Lakes. Therefore, 99 percent of the title II cargo on the Great Lakes goes on foreign bottoms. If we increase the cargo preference from 50 to 75, there is some cause on the part of those who live along the Great Lakes to fear that they might be denied or deprived of some of the cargo.

I believe that this arrangement is a reasonable one. We have deliberately selected the lowest percentage, and, depending on how you calculate, it could be as low as 11 percent or as high as 16 percent. This will assure the men and women who work in the docks at least some semblance of employment for the next 4 years. I hope my colleagues will go along with this fair and equitable compromise.

Mr. STEVENS. I ask for the yeas and nays on the Dixon amendment.

The PRESIDENT OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. COCHRAN addressed the Chair.

The PRESIDING OFFICER. The Senator from Mississippi.

Mr. COCHRAN. Mr. President, let me say to my colleagues that although the cosponsors of my original amendment, the Senators from Alaska and Hawaii, are now cosponsoring the Dixon amendment which was seeking to define the obligations of the administrator to allocate a certain percentage of the tonnage of the Great Lakes, I am not able to support this amendment.

I understand their support of it. And I continue to be impressed with the zeal and imagination of the Senator from Illinois, the Senator from Minnesota, and others who are urging that a special allocation of tonnage be made to the Great Lakes. But this is not a port preference bill. It is a cargo preference bill. We are seeing an effort made now to convert this legislation into a mandatory allocation of tonnage to one region of the United States—the Great Lakes. There are four regions.

It was stated very clearly in the original compromise that the administrators should preserve to the greatest extent practicable the mean historic port range share of cargoes subject to U.S.-flag transportation requirements under this section, exported from the Atlantic, the gulf, Pacific, and Great Lakes port ranges.

Mr. President, that is a fair instruction. That is an equitable way to direct the administrator to try to protect the interests of all of these port ranges.

As it turns out, just recently, representatives from the Gulf States ports, the Gulf Ports Association, were in a meeting, and this issue was being discussed about whether or not it would be appropriate to allocate certain percentages of tonnage to port ranges.

They went on record opposing any such allocation.

I want to read from a letter which I will put in the RECORD:

I respectfully urge you to reject—

This letter is addressed to me—

any efforts, to alter the current provisions of the law governing the allocation of P.L. 480 cargo. A guaranteed allocation of P.L. 480 cargo to the Great Lakes or any other coastal range is improper, and it would undoubtedly increase the cost of the entire program.

Senators should know that.

I ask unanimous consent, Mr. President, that a copy of this letter to me from William T. Duke, acting executive director of the Mississippi State Port Authority at Gulfport be included in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

MISSISSIPPI STATE
PORT AUTHORITY AT GULFPORT,
Gulfport, MS, October 21, 1985.

Hon. THAD COCHRAN,
U.S. Senate, Russell Senate Office Building, Washington, DC.

DEAR SENATOR COCHRAN: It is our understanding that another attempt by Great Lakes interests to secure guaranteed monthly allocations of Public Law 480 is being made. On two previous occasions, Great Lakes interests have attempted to carve our specific allocations of PL-480 cargo through legislative proposals and revisions to Federal regulations governing the allocations of this cargo. Both previous attempts have been unsuccessful.

The current effort underway by Great Lakes interests involves an amendment to HR-2100 creating a study commission which would recommend means "of overcoming constraints on export commodities for Great Lakes ports". This current effort is perceived as a device for ensuring guaranteed allocations of PL-480 cargo to Great Lakes ports.

I respectfully urge you to reject any efforts by special interest groups to alter the current provisions of the law governing the allocation of PL-480 cargo. A guaranteed allocation of PL-480 cargo to the Great Lakes or any other coastal range is improper, and it would undoubtedly increase the cost of the entire program. The lowest-landed-cost criteria currently utilized to determine allocations of PL-480 cargo is appropriate and the least expensive method available.

Sincerely,

WILLIAM T. DUKE,
Acting Executive Director.

Mr. COCHRAN. Senators should also realize before they vote that the Great Lakes do not just handle Public Law 480 cargo. It comprises a very small percent, about 2 percent, of the total agriculture tonnage shipped out of the Great Lakes. The conversation of my friends about how this compromise, if it is not changed as they are seeking, is going to destroy the ports I think may be overstated.

In connection with that argument, Mr. President, I ask unanimous consent that a statement entitled "Cargo Preference Policies Do Not Harm Great Lakes Ports" by the Seafarers International Union, dated September 8, 1985, be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CARGO PREFERENCE POLICIES DO NOT HARM GREAT LAKES PORTS

The participation of Great Lakes ports in the export of cargo preference commodities is an issue of regional and national significance, but has also been one clouded by misleading and erroneous information. For example, throughout the course of Congressional consideration of both the 1985 agricultural programs and the relationship between agricultural exports and U.S. cargo preference laws, it has been alleged that the requirement that a certain percentage of government-impelled agricultural commodities be transported on U.S.-flag ships has harmed Great Lakes ports. That allegation is without merit.

U.S. cargo preference statutes require that 50 percent of government-impelled agricultural exports be transported aboard American ships, thereby leaving the remaining 50 percent of these cargoes freely available to foreign-flag vessels. Thus far in 1985, less than 20 percent of the cargoes under Title II of the P.L.-480 program have been exported via Great Lakes ports aboard foreign-flag vessels. For cargoes under Titles I and III of the P.L.-480 program, the percentage which move via Great Lakes ports aboard foreign-flag vessels is even less. Therefore, the contention that because American-flag ships are unable to serve the ports of Great Lakes for the carriage of these commodities, Great Lakes ports are denied cargoes which they would otherwise secure, is simply incorrect. Indeed, for each Title of the P.L.-480 program, there are still substantial foreign-flag cargoes available to Great Lakes ports which are not subject to the 50 percent U.S.-flag requirement of the cargo preference laws, and for which Great Lakes ports can freely compete.

It should also be noted that while government-impelled agricultural cargoes are an important part of the cargo and revenue base of Great Lakes ports, they comprise an extremely small portion of the total agricultural cargoes which are shipped from Great Lakes ports. For example, in 1984, 276,000 short tons of Title II cargoes were exported via ports in the Great Lakes; in that same year, 15,218,000 tons of commercial agricultural cargoes were shipped from U.S. Great Lakes ports. Consequently, P.L.-480 Title II cargoes constituted less than 2 percent of the total tonnage of commercial agricultural cargoes which were exported from the Great Lakes.

The rhetoric surrounding this issue has been recently heightened as a result of the decision of the U.S. Department of Agriculture to artificially divert to others coasts Title II cargoes which had been originally allocated to Great Lakes ports. While USDA contends that these diversions were made necessary by cargo preference requirements, that argument is totally fallacious. USDA finds itself in the position of diverting cargo legitimately awarded to Great Lakes ports because it failed to comply with the 50 percent cargo preference requirement earlier in the year; specifically, USDA fell behind in maintaining a 50 percent U.S.-flag share of Title II cargoes because it sought to take maximum advantage of foreign-flag vessels available on the three tidewater coasts. USDA has now elected to divert cargoes away from the Great Lakes, pitting Great Lakes ports against U.S.-flag carriers where no dispute should exist. The concern of Great Lakes ports with the artificial diversion of cargoes to which they are entitled is legitimate; however, it is USDA, and not U.S.-flag vessels, which has caused this inequity.

U.S. cargo preference laws are an important and integral part of the longstanding federal policy to sustain and encourage the American merchant marine, and must be maintained. Moreover, it is important for Great Lakes interests to recognize that these policies do not harm Great Lakes ports or hinder their development. There is no reason to amend U.S. cargo preference laws in a effort to promote Great Lakes ports. Indeed, there is more than enough latitude within the existing statutes for both U.S.-flag carriers and Great Lakes ports to be sustained and strengthened. Additionally, the longer range goal of further enhancing cargo movements through Great Lakes ports can also be achieved consistent with U.S. cargo preference laws. S. 1518, enlightened legislation introduced by Senators Glenn, Dixon, and Quayle, is evidence of that potential.

SEAFARERS INTERNATIONAL UNION,
September 1985.

Mr. COCHRAN. Before I conclude, Mr. President, let me simply state that it is obvious you are going to want to support this amendment if you represent a State on the Great Lakes that uses the ports. If you represent the State of Minnesota, Wisconsin, Michigan, Illinois, Indiana, or Ohio, you will want to vote for this amendment. If you represent any other State, I suggest that you are going to be voting to increase the cost of the Public Law 480 Program, and you are voting for a mandatory allocation to one region, which has never before been done under cargo preference.

I urge Members to oppose the amendment.

Mr. SARBANES addressed the Chair.

The PRESIDING OFFICER. The Senator from Maryland.

Mr. SARBANES. Mr. President, I want to support the comments of the distinguished Senator from Mississippi. In fact, the Cochran compromise contained a direction to the administrator—I ask the chairman of the committee if this is not correct—to try to seek an allocation amongst the four regions based on the historical record. Is that not correct?

Mr. COCHRAN. Mr. President, if the Senator will yield, the Senator is correct. The exact language is a direction that the administrator preserve to the greatest extent practicable the mean historical port range share of cargoes.

Mr. SARBANES. Mr. President, if an allocation is going to be made among the four ranges, then it ought to be done with respect to all four of the port ranges on some equitable basis.

What this proposal does, as I understand it, is in effect make a specific numerical allocation for one of the four ranges, and leaves the other three then to compete for the remainder of the traffic.

Is that correct? I ask the chairman of the committee.

Mr. COCHRAN. Mr. President, if the Senator will yield, the Senator is correct. There is no language in the amendment offered by the Senator from Illinois that relates to any region other than the Great Lakes.

Mr. SARBANES. It seems to me, Mr. President, it is neither fair nor logical to do this. If we are going to start down the allocation path, then we ought to fight out that issue of allocations, and determine them amongst the ranges.

Short of doing that, it seems to me that the only reason the one range is being given this treatment is because of the indication of a willingness to keep this issue before the Senate despite the fact that on repeated votes a very clear majority of this body has rejected that approach.

I agree with the distinguished Senator and intend to oppose this amendment.

Several Senator addressed the Chair.

The PRESIDING OFFICER. The Senator from Minnesota.

Mr. BOSCHWITZ. Mr. President, let me just comment briefly, and then certainly I too want to turn to a vote. It is with interest that I listened to my friend and colleague, the Senator from Mississippi, note that there might be some increased costs to the Public Law 480 program.

Because of this particular amendment there should be some additional costs, and the entire process of increasing the share of American bottoms to 75 percent from 50 percent has enormously increased the costs of shipments of Public Law 480 commodities. I would also say to my friend from Maryland that there is not a specific allocation in this proposed amendment.

Furthermore, the historical allocations the Senator speaks about has suddenly been reduced by this underlying amendment that the Senator from Mississippi has very skillfully brought through the Senate thus far. You are now going to get 75 percent. We had a share of the 50 percent that was reduced by half, and is now only 25 percent.

Mr. SARBANES. Will the Senator yield on that point, Mr. President?

Mr. BOSCHWITZ. Yes.

Mr. SARBANES. The fact of the matter is that the Cochran compromise eliminates from the cargo preference under the court decision a significant amount of the grain trade on the blended credits, and other similar programs.

In the sense, it is an effort to compromise significantly for the agricultural interests. Those of us who have been supporting the Cochran amendment have been willing to do that.

The current situation under the law is that those shipments must also go under cargo preference. What this proposal does is eliminate them from that requirement at the same time that it raises the percentage on title II shipments from 50 to 75 percent. That is a reasonable compromise and has been supported here. But a significant number of potential shipments have been freed up from the cargo preference under the compromise.

Mr. BOSCHWITZ. The Senator is correct. It is not only title II but the entire Public Law 480 shipments that are also included in this. The other ports will receive a very good increase from this. I think the amendment is a fair one.

Mr. DOLE. Mr. President, let me indicate to my colleagues if we can wrap this up it will be the last vote this evening, if that is an incentive. Then we would lay down the dairy amendment, if possible, and be on that tomorrow afternoon. Tomorrow morning we will be on Interior appropriations. There is a farm credit hearing in the Agriculture Committee.

As soon as we have this vote it will be the last vote.

The PRESIDING OFFICER. The Senator from Washington.

Mr. GORTON. Mr. President, for 2 or 3 days, the entire time that we have been debating the cargo preference subject, the proponents attempted to occupy the high ground by stating that they want all of the money appropriated under the farm bill to go directly to farmers; that they want the lowest possible costs which will result through competition in the transportation of agricultural commodities from the United States to recipient nations.

Now that they have been unsuccessful in preventing the passage of such a compromise, they take exactly the opposite position where, for many, many years, it has been the policy of the United States that in order to preserve at least a reasonably modest merchant marine, to grant certain preferences to U.S.-flag carriers, to the United States of America's merchant marine.

They now wish to have preferences for certain ports.

The Senator from Mississippi was entirely accurate in saying what has been a debate over cargo preference for the United States on a competitive basis at least among American-flag ships now becomes the preference for certain ports within the United States. It is a paradox that the very people who have asked for competition now seek to reduce such competition as there is in the program, to raise the cost of the carriage of these agricultural goods in such fashion as to have less purchased from American farmers than would be under the very amendment which they protested because they thought it had too much money involved in the carriage of those goods themselves.

We do not need a debate on an amendment which prefers one American port to another, one American interest to another. We can quite appropriately prefer American-flag carriers. But to the maximum extent within that preference, we ought to allow competition to govern where it is those cargoes originate and where it is that they go. This is an amendment which I regret to say goes very much in the wrong direction.

SEVERAL SENATORS. Vote! Vote!

The PRESIDING OFFICER. The Senator from California.

Mr. WILSON. Mr. President, I will not repeat the very cogent arguments made by the Senators from Maryland, Mississippi, and Washington. I will simply add this fact: What we are talking about here is port preference. As the Senator from Washington has indicated, the purpose of this debate seems to be to give preference to American workers. So be it. Let us do that. But on the Great Lakes there is but a single American-flag carrier. What we will be doing by this so-called compromise amendment if it passes is to give preference to foreign flag carriers, not to American-flag carriers.

That is a mistake, Mr. President. What we are trying to do here is to be equitable, to keep the cost of the program down and, in fact, to spread employment. That is obviously why the International Seafarers Union has written to the subcommittee chairman expressing their opposition to this amendment or anything like it.

SEVERAL SENATORS. Vote! Vote!

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, I have heard expressions which indicate that various organizations involved in this discussion are opposed to this amendment. That is not my understanding. This amendment is necessary in order to assure that the Great Lakes do not suffer further decline as we change the mix of this program; 1984 was the worst year they have had. This amendment says that in this new program their percentage in tonnage cannot be reduced further except as is equitable in terms of a percentage or tonnage, whichever is lower.

I think this is a reasonable compromise in terms of meeting the needs of the agricultural community and the Great Lakes and meeting the objectives of the Senate and the repeated votes we had here before. I want to urge the Senate to approve it. It is the one way out of this dilemma we are in right now. It is only a guarantee to the

extent of a percentage of the worst year in history in terms of this area.

Does the Senator from Hawaii wish to comment?

Mr. INOUYE. Mr. President, this is not a wild idea that was brought up by the Senators from Alaska, Hawaii, Illinois, or Wisconsin. It has been the product of many hours of work. We feel that this is equitable and fair.

Mr. PROXMIRE. Mr. President, I support this compromise. It preserves the percentage share or, alternatively, the tonnage exported from the Great Lakes ports in 1984, at least for the next 4 years.

While I would have preferred a longer time period, at least the amendment assures that there will be no abrupt disruption of business to Milwaukee, Green Bay, Kenosha, Superior, and other Great Lakes ports.

Public Law 480 cargo makes up the vast majority of the business of these ports—in some cases over 90 percent.

We're not asking for a handout. Our ports are actually cheaper and compete quite well when competition is fair. All we're asking for is equity.

Don't deprive us of the cargo we need to survive. The small percentage of the total Public Law 480 program shipped by the lakes means very little to other port ranges, but it means life or death to us. I can't believe this body would want to close down our ports and put our people out of work just for the promise of a little bit more cargo, gained at our expense.

Mr. President, given these facts I believe all my colleagues should be able to support this amendment. It saves money, it saves jobs, and it saves Great Lakes ports.

The PRESIDING OFFICER. Is there further debate?

Mr. BYRD. Mr. President, I wish to ask the distinguished majority leader what the program is for the rest of the day and tomorrow, if he is able to tell us at this time.

Mr. DOLE. Mr. President, as I indicated, this would be the last vote this evening, whatever happens. Tomorrow morning, there is a very important hearing on the farm credit crisis in the Senate Agriculture Committee. We might at least start the Interior appropriations bill. We cannot get very far on that tomorrow. We are trying to see if we might proceed on that bill about 9:30 tomorrow and be back on the farm bill about 1 o'clock.

We will probably be on the farm bill until fairly late tomorrow night and most of Friday. We will not be in on Friday evening, but I would say at least until Friday at 4 o'clock.

Mr. BYRD. If the majority leader will permit me to ask another question, it is this: When this amendment is disposed of, would it be possible for Senator MELCHER to lay down his amendment tonight so that we will have it before the Senate tomorrow when we go back on this measure?

Mr. DOLE. I think there is a Hawkins amendment which must be laid down, too. I believe we can discuss that. I could not agree to that.

Mr. MELCHER. Will the Senator yield?

Mr. BYRD. Yes.

Mr. MELCHER. I might point out that what I would like to do, if possible, is to offer the amendment to reduce the spending, a comprehensive amendment to reduce the spending in the package in this bill, so that we are within the budget resolution. In getting to that, I might say, it is rather important before we start piecemealing one thing at a time, whether it is on dairy tomorrow, peanuts the next day, cotton after that, or however these amendments are brought up.

I think it is a comprehensive, overall amendment that would ordinarily have been done in the Agriculture Committee if we had not thought it was so necessary to get the bill up promptly. We never did go over it after we adopted all of the amendments to the various titles. I am anxious to get the amendment up whenever it is possible.

Mr. BYRD. Mr. President, can we have order in the Chamber?

The PRESIDING OFFICER. The Senate will be in order.

Mr. DOLE. There are other comprehensive amendments being discussed. I would not be able to agree that the distinguished Senator from Montana would be recognized after the disposition of this amendment. I do not know how this amendment is going to come out. We may still be on cargo preference, unless the amendment carries. We will be right back to cargo preference. We cannot displace that. We will just have to see who is recognized.

Mr. BYRD. Is the Senator saying that it is up to the Chair to recognize the Senator who seeks recognition?

Mr. DOLE. I do not know of any other way to do it unless we reach some agreement. I doubt that will be reached. I will be glad to discuss it with the Senator from Montana.

Mr. BYRD. The distinguished majority leader is not saying, is he, that he would not agree to the recognition by the Chair of Senator MELCHER?

Mr. DOLE. No. If I was the Chair and he was the first up, I would recognize him.

Mr. BYRD. I thank the majority leader.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to amendment No. 932. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Nevada [Mr. LAXALT] and the Senator from South Dakota [Mr. PRESSLER] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey [Mr. BRADLEY] and the Senator from Mississippi [Mr. STENNIS] are necessarily absent.

The PRESIDING OFFICER (Mr. HECHT). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 53, nays 43, as follows:

[Rollcall Vote No. 269 Leg.]

YEAS—53

Abdnor	Eagleton	Moynihan
Andrews	Ford	Murkowski
Armstrong	Garn	Nickles
Baucus	Glenn	Pell
Bingaman	Grassley	Proxmire
Boren	Harkin	Pryor
Boschwitz	Hatch	Quayle
Byrd	Heinz	Riegle
Chafee	Inouye	Rockefeller
Cranston	Kassebaum	Simon
D'Amato	Kasten	Simpson
Danforth	Levin	Specter
DeConcini	Lugar	Stafford
Dixon	Matsunaga	Stevens
Dodd	McConnell	Thurmond
Dole	Melcher	Wallop
Domenici	Metzenbaum	Weicker
Durenberger	Mitchell	

NAYS—43

Bentsen	Hart	Mattingly
Biden	Hatfield	McClure
Bumpers	Hawkins	Nunn
Burdick	Hecht	Packwood
Chiles	Heflin	Roth
Cochran	Helms	Rudman
Cohen	Hollings	Sarbanes
Denton	Humphrey	Sasser
East	Johnston	Symms
Evans	Kennedy	Trible
Exon	Kerry	Warner
Goldwater	Lautenberg	Wilson
Gore	Leahy	Zorinsky
Gorton	Long	
Gramm	Mathias	

NOT VOTING—4

Bradley	Pressler
Laxalt	Stennis

So the amendment (No. 932) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DIXON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

Mr. STEVENS. Mr. President, will the Senator yield?

Mr. DOLE. I yield without losing my right to the floor.

Mr. STEVENS. Mr. President, I wish to now bring about the adoption of the basic amendment by voice vote if that is agreeable.

We agreed there will be no more rollcall votes, but that is the basic amendment now. I know of no other amendment that is pending.

Mr. INOUYE. Get it out of the way.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. DOLE. Mr. President, as I understand, we can dispose of the underlying amendment by voice vote.

Mr. STEVENS. Yes.

Mr. DOLE. I also understand it would take unanimous consent to set that amendment aside, is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. LONG. Mr. President, it would be all right to have a voice vote if we have a rollcall vote on a motion to reconsider at some point, because I wish to be on record for the amendment. I think some of us wish to vote on the amendment as finally agreed to. It would be all right if we agree to it on a voice vote if we have a motion to lay on the table and a rollcall on the motion to lay on the table at some point tomorrow.

Mr. LEAHY. Mr. President, if the majority leader will yield for a question on that without losing his right to the floor, if Senators wish a rollcall vote on this amendment, would it be possible to set it aside for a time certain by unanimous consent, to have it come back at that time, not being subject to amendment, and take care of everyone's concern that way?

Mr. DOLE. Mr. President, I think we can take care of the concern by just acting on the amendment and not having a motion to reconsider.

Mr. LONG. That would satisfy me, Mr. President, if we could reconsider the vote on the motion to table. If Senators want to be on record they would then be recorded on the record and those who would be against could do so also.

Mr. ABDNOR. Mr. President, there is one more thing in this instance. The amendment on this type of a cargo preference I made it clear quite a few days ago that mine was a different type of cargo preference amendment that in no way includes this one, and I still intend to offer it.

I want those in the Chamber to understand that there is another cargo preference amendment of a completely different type that has no relationship to this amendment whatsoever.

Mr. STEVENS. Mr. President, will the majority leader yield?

Mr. DOLE. I am happy to yield.

Mr. STEVENS. Mr. President, if the majority leader wants to carry the vote on my pending amendment over to tomorrow and temporarily set aside for another amendment, I certainly would not object, if it will help him in the management of the Senate.

Mr. LONG. I do not think we have any objection to voting for it on a voice vote provided at some subsequent point those for it can go on record for it.

Mr. STEVENS. I understand that, and I am willing to accommodate the Senator in any way.

Mr. DOLE. I think we can dispose of the amendment and withhold any motion to reconsider.

The PRESIDING OFFICER. If there be no further debate, the question is on the amendment.

Mr. MELCHER addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. Mr. President, the cargo preference amendment is open for amendment at this time and the opportunity to offer amendments to the bill seem to be shielded.

It is very significant when we consider this farm bill that we do consider the cost on every amendment that is going to be offered, every amendment that has been offered, and every amendment that is going to be offered until the bill is completed. The question is going to be raised is it within the budget or how much it adds to the bill?

That is something that is important to all of us here in this body.

Mr. President, I have an amendment that deals with the reduction in expenditures in the bill. In other words, it cuts. It cuts $7.6 billion out of the bill. The $7.6 billion cut is a very important figure since the bill is $7.4 billion over our budget resolution.

Many Members of the Senate will be interested in various features of the bill and are going to wonder how they could in good conscience vote for a bill that exceeds our own budget resolution.

Mr. President, I take this opportunity in order to explain what I propose to do when we come to vote on whether it is a dairy program, or a cotton program, or the peanut program. The question is naturally going to be: If we accept some amendment cutting the act on the program how much do we save, how does it help us in our budget posture?

Those of us who serve on the Agriculture Committee worked long and hard for months trying to get this bill to the Chamber. It took us until the end of September. When we arrived at the end of September two things coincided.

First, we got to the end of the bill and the majority leader and the chairman, anxious to get the bill out of committee, said, "Let's finish it up this night." It was on a Thursday night.

The following morning I had to leave for my son's wedding out in Montana, and the majority leader will recall that he wished us good luck. I invited him to go along. The wedding was in Kalispell, MT.

Mr. DOLE. I got there a week late.

Mr. MELCHER. The majority leader got there a week late. He did not come to the wedding.

We had a great time, by the way, at the wedding.

The majority leader was not able to get to Kalispell, MT, until 1 week and 1 day later, and he did not get to the wedding. He got to address the regional convention of Republican women for a seven- or eight-State area, and he had a good time, also.

What I am getting back to is when we got through with the bill we did not meet again. We were voting on target prices. We were voting on the Cotton Program, the Peanut Program, and all the components of that. All of a sudden at the end of the bill we wanted the bill automatically approved then in one package and no time was taken to do the ordinary things, to go over the bill section by section and see how do we get this for sure within the budget resolution.

But we did not do that, and it has left us at a disadvantage now.

We have the chairman of the committee, my good friend from North Carolina, who is opposed to the bill. He is opposed to it. It costs too much money.

So my good friend, the chairman of the committee, the Senator from North Carolina, on every amendment that comes up that whacks something out of the bill automatically, he has a point. This bill is too high. It exceeds the budget.

So perhaps this amendment has a great deal of merit because it brings us back closer to get within the confines of the budget.

What I propose to do and what we propose to do on this side and some on the other side is to meet this head on, do what we should have done in the committee, go through it, take the cuts where they should be and add it all up so that we bring this bill back with that amount of cuts so it is within the budget resolution as it exceeds the budget resolution by $7.4 billion, as I earlier said. So the fact that I have allowed us to reduce it by $7.6 billion, I think almost everyone on the Senate floor will agree that these cuts are in order, that they are done with good, prudent judgment, and that we have left intact then the major workings of the bill and the basic programs, but we have done what must be done. We come back within the budget resolution.

Seeking recognition to offer this has been a little difficult but obviously it is a first step before we consider these other amendments. It is a first step.

The bill is now open for amendment, and I wish my amendment, when it is considered, to be considered en bloc because it takes part of the budget cuts here, part of it there, and as a matter of fact when I do offer my amendment, I ask unanimous consent that it be considered en bloc.

Mr. DOLE. I object.

Mr. MELCHER. Well, it is a proper time to face up to this and to get before us what is necessary.

AMENDMENT NO. 933

(Purpose: To limit cost-sharing payments under the conservation reserve program, to establish the time for payment of obligations under conservation reserve contracts, and to provide for the manner in which the payments under the program are to be made in cash and commodities, and for other purposes)

Mr. MELCHER. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Montana [Mr. MELCHER] proposes an amendment numbered 933.

[CONSERVATION RESERVE]

On page 328—

(1) line 1, strike out "10", and insert in lieu thereof "9";

(2) line 4, strike out "20", and insert in lieu thereof "13";

(3) line 5, strike out "and";

(4) line 6, strike out "1989", and insert in lieu thereof "1988";

(5) line 7, strike out "25", and insert in lieu thereof "17";

(6) line 8, strike out the period, and insert in lieu thereof "; and"; and

(7) after line 8, insert a new paragraph as follows:

"(4) during the 1986 through 1989 crop years, a total of not less than 25, nor more than 30, million acres.".

On page 332——

The PRESIDING OFFICER. The clerk will suspend. The amendment is not in order. It is not properly drafted, and is in the second degree.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

COCHRAN CARGO PREFERENCE AMENDMENT

Mr. EVANS. Mr. President, I will be brief. I rise in support of the amendment of the Senator from Mississippi and praise him for his leadership on this important matter. Congress, agriculture, and maritime have all debated cargo preference for several months now; indeed, for several years. The various positions on this controversial issue are all well known and understood. Differences of opinion flared again earlier this year following the district court decision on blended credit, and have diverted our attention from dealing with the pressing farm crisis, and behind that, our pressing budget crisis.

I firmly believe both agriculture and maritime are vital to our Nation's security and well-being, and wholeheartedly agree with my distinguished colleague that it is time to put this issue to rest in a manner fair to both sides. The compromise before us, while not perfect in everyone's eyes, represents just such an opportunity. It is an opportunity in that farmers and exporters will know when cargo preference does and does not apply to a given USDA program, lending consistency to our agricultural export programs. It is an opportunity for maritime in that it will be able to concentrate more on strengthening and readying our merchant marine for those events we hope will never happen. Equally important, this compromise will do away with Congress having to choose between agriculture and maritime and allow all three to address the real challenges at hand: Large Federal deficits, high interest rates, and intense foreign competition.

Mr. President, I would also add that failure to resolve this issue now may only stall the farm bill further and ultimately hurt those who must make some critical decisions in the next few months based on the direction of our 1985 farm policies. In instances where crops must be planted in the fall, farmers have already been required to make business decisions without knowing any of the new farm bill provisions.

Mr. President, what we need to be doing over the next few years is clear. We need to reduce the deficit and get interest rates and the dollar down. We need to get our farm exports moving again; we need to regain and expand our share of world markets. Removing the current unproductive relationship between agriculture and maritime is critical to this effort. And meaningful deficit reduction can produce the results that would ultimately lessen the need for subsidies to these industries. The compromise offered by Senator COCHRAN represents the most equitable way of turning this negative relationship in that direction. Failure to take this step would leave us no closer to that possibility, and would reduce the prospects for stronger, more competitive agriculture and maritime sectors that are less dependent on Federal assistance. Mr. President, I urge the adoption of this amendment.

FARM DEBT

Mr. DURENBERGER. Mr. President, today marks the fourth day of Senate debate on the 1985 farm bill and this is the fourth in a series of statements I will make on the condition of rural America. The legislation before us is not a bailout program for a handful of land barons but an economic master plan for a $1 trillion industry. And, in the final analysis, how we treat that $1 trillion industry in this farm bill will in large part determine whether the current economic recovery can be sustained.

One of the unrecognized facts about the economic recovery is the extent to which it has been financed by increased borrowing by both the private sector and the Federal Government. The revelation that the Federal deficit for the recently concluded fiscal year 1985 exceeded $200 billion came as little surprise to a public that now appears conditioned to $2 trillion national debts and $180 billion interest payments on the Federal debt as par for the course in public finance.

The public's reaction is not surprising when you consider the fact that the private sector is just as bad as the Federal Government at living within its means. Private debt jumped an astonishing $1 trillion in fiscal year 1985, pushing total debt held by the private sector to an unprecedented $7.1 trillion. And those who fail to see the similarities between the cash flow problems of highly leveraged farmers, and the cash flow problems which a highly leveraged economy will encounter when the bubble of economic recovery bursts under the strain of this rapid accumulation of debt, are not being honest with themselves.

I think it is worth pointing out that the public and private sectors' insatiable appetite for credit has been met, in large part, by the willingness of foreign investors to channel their capital into our economy. And I will not hazard a guess as to how long and to what extent foreign investment in this country will continue. But, sooner, or later, the bills have to be paid. And, if America's farmers, who have compiled year after year of productivity gains, can't pay interest and principal on $212 billion in farm debt, how will our overall economy, with a meager 2 or 3 percent a year increase in productivity, retire a $7 trillion debt? It can't and it won't.

Mr. President, we can't continue to borrow the prosperity of future generations from foreign investors any more than American farmers could count on continued inflation in farm asset values to compensate them for cash shortfalls on farm sales. And we in Congress had better recognize that. There is a lesson to be learned from the suffering of America's farmers, and it is about time the country took notice. Because the old adage—as goes agriculture, so goes the country—rings true. If the agricultural economy goes down the tube, it will take not only a lot of good farmers, but our Nation's economy down with it.

On Monday, I discussed the farm credit problem afflicting our farmers. Today, it is time to discuss the problems facing agricultural lenders.

Earlier this year the President vetoed a farm credit assistance package that had passed the House and Senate by significant margins. And, when the Speaker of the House chose not to attempt to override the President's veto, many people assumed that congressional action on farm credit would be postponed until 1986. Well, as the unfolding story of the Farm Credit Systems financial problems

clearly indicates, we have put off facing the facts of life of farm credit for too long. The authorizing committees of the House and Senate are now holding oversight hearings on the system's problems, and one can detect a sense of urgency as the committees strive to complete action before the onslaught of another winter of discontent for America's farmers and their lenders. And I hope they aren't too late.

Because, Mr. President, winter has come to the heartland. All of the signs are there—harvest is nearly complete, the nights get colder, the days grow shorter, and the creditors creep closer. It is a time of reckoning for farmers and their lenders, and if Congress fails to act immediately on farm debt restructuring, I predict every Member will rue our inaction come spring.

The simple fact of the matter is that the farm income and credit problem has gotten so bad that we are now in a position where Congress must assist farmers and lenders to keep the agricultural economy functioning. The difficulties of our farmers don't need to be repeated at this point, but I do not think we can avoid facing up to the fact that agricultural lenders—the Farmers Home Administration, the Farm Credit System, commercial lenders, and family members—are on the verge of collapse.

Mr. President, I ask unanimous consent that a table indicating the distribution of farm debt by lender be inserted in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

DISTRIBUTION OF FARM DEBT BY LENDER, JANUARY 1, 1985 [1]

Lender	Type of debt (percent): Real estate	Type of debt (percent): Nonreal estate	Total (percent)	Type of debt (million dollars): Real estate	Type of debt (million dollars): Nonreal estate	Total (millions dollars)
Commercial banks	4.8	19.1	23.9	10,179	40,551	50,730
Farm Credit System	22.8	9.0	31.8	48,444	19,006	67,450
Federal Land Banks	22.8	NA	22.8	48,444	NA	48,444
Production Credit Associations	NA	8.6	8.6	NA	18,129	18,129
Federal Intermediate Credit Banks [2]	NA	.4	.4	NA	877	877
Farmers Home Administration	4.7	7.2	11.9	9,956	15,206	25,162
Life insurance companies	5.8	NA	5.8	12,375	NA	12,375
Individuals and others [3]	14.1	8.6	22.7	29,900	18,200	48,100
Commodity Credit Corporation	NA	3.9	3.9	NA	8,312	8,312
Total	52.3	47.7	100.0	110,854	101,275	212,129

[1] Preliminary. Due to rounding, subcategories may not add to totals.
[2] Financial institutions other than PCA's that obtain funds from the FICB's.
[3] Includes Small Business Administration.

Mr. DURENBERGER. Mr. President, as the chart illustrates, farm debt is held by a group of lenders who have one major "fault" in common—they were willing to invest the capital needed to keep farmers on their farms and the fields. And, as the major commercial lenders try to cut their losses by withholding agricultural loans and pulling out of rural areas, the pressure on the remaining lenders becomes greater still. And when you consider that the Farm Credit System posted a $522 million loss in the third quarter of this year, it is hard to imagine how we will be able to fashion legislation that will get farmers out of this predicament without inflicting a great deal of personal hardship and pain on rural communities.

Mr. President, I ask unanimous consent that a Farm Credit Services news release outlining the system's 9 months financial results be inserted in the RECORD at this point.

There being no objection, the news release was ordered to be printed in the RECORD, as follows:

FARM CREDIT SERVICES, ST. PAUL, ANNOUNCES 9 MONTHS FINANCIAL RESULTS

ST. PAUL, October 24.—Farm Credit Services financial results for the period January 1–September 30, 1985, reflect the deepening depression in the farm economy.

Due to a major increase in allowance for Federal Land Bank loan losses, Farm Credit Services is reporting a net loss of $41.6 million for the first three quarters of 1985. The Federal Land Bank is reporting a year-to-date loss of $61.3 million; the Bank for Cooperatives is reporting net income of $14.9 million, and the Federal Intermediate Credit Bank is reporting net income of $4.8 million.

FCS had reported net income of $40.1 million for the first half of the year, but continued declines in land values and farm commodity prices have required the organization to increase provisions for loan losses, thereby reducing income.

Net loan volume outstanding for Farm Credit Services was $10.9 billion, a decrease of $459 million since June 30. Total capital on September 30 was $1.4 billion, conpared to $1.5 billion on June 30.

Nonaccrual loans, those loans which are earning no interest, amounted to $726.2 million as of September 30, an increase from $353.2 million at the end of the second quarter. Property from loan foreclosures and other settlements amounted to $94.5 million, compared to $67.4 million at the end of the second quarter.

The primary reason for the overall net loss for the first nine months is a Federal Land Bank provision for losses expense of $84 million during the third quarter. This results in a total Farm Credit Services allowance for losses of $173.4 million as of September 30, of which $150.8 million is for the Federal Land Bank.

The provision for loan losses during the third quarter resulted from a special credit review of the Federal Land Bank. This analysis of the Federal Land Bank loan portfolio shows that a significant number of the loans are undercollateralized, due to continued and rapid decline in farm income and land values. This does not mean that the undercollateralized portion of all the loans is uncollectible, because borrowers may have other assets to pledge against the loan or an adequate cash flow which will allow for repayment. Even though many of these loans are up to date in payment of principal and interest, USDA analysis of the agricultural economy indicates continuing deterioration of farm income and land values. Therefore, FCS expects some of these loans to generate significant losses in the future.

Other factors reducing FCS income for the first nine months are:

—Reduction in net interest income from increased non-earning assets,

—Financial assistance payments of $12.5 million during the third quarter to the Spokane and Omaha districts under financial assistance agreements developed by the 37 banks of the Farm Credit System.

—Financial assistance of $14 million from the Federal Intermediate Credit Bank of St. Paul to St. Paul district Production Credit Associations.

The Farm Credit System has analyzed agricultural economic conditions based upon economic studies conducted by USDA and the Farm Credit Administration. As a result of projected continuing deterioration in farm income and land values, the nationwide Farm Credit System may be exposed to loan losses aggregating $3 billion or more during the 1985–1987 period, for which an allowance for loan losses of $1.1 billion has been established as of September 30.

During the fourth quarter of 1985, Farm Credit Services, St. Paul will complete a detailed analysis of the loss exposure inherent in the portfolios of each of the three Farm Credit banks. Appropriate additions to the allowance for loan losses will be made in the fourth quarter of 1985 based on these analyses.

The extremely stressed financial position of Farm Credit Services, a four-state district of the national Farm Credit System, is a reflection of the prolonged depression in agriculture.

Because of this depression and projections for further deterioration in the farm economy, the Farm Credit System is seeking federal government assistance to ensure the system's continued viability and ability to continue serving agriculture competitively.

The boards of directors of the 37 Farm Credit Banks have formed a special legislative committee to develop proposals for system self-help and federal assistance. These proposals are now being discussed with the Administration and Congress.

Three officials of Farm Credit Services have been working on this proposal in Washington. They are E. Charles Miehe, who is a farmer from Belmont, Wisconsin, and vice chairman of the FCS board of directors; Burgee Amdahl, chief executive officer and president, and Larry Williams, executive vice president for finance and administration.

October 23, the Federal Farm Credit Banks Funding Corporation reported that losses for the combined 37 banks of the Farm Credit System stood at $426.3 million as of September 30.

Farm Credit Services provides credit and related financial services to farmers, ranchers, agricultural businesses and cooperatives in the Seventh Farm Credit District of Michigan, Minnesota, North Dakota and Wisconsin.

Mr. DURENBERGER. When you consider that the Farm Credit System holds 30 percent of farm debt and is reporting $522 million in losses, when you consider that the Farmers Home Administration holds 12 percent of farm debt and will be operating under a $4 billion cap on loan activities for fiscal year 1986, when you consider that commercial banks are closing their doors or pulling out of rural areas with increasing frequency, and when you consider that troubled borrowers have just about tapped out their relatives, you just can't help coming to the conclusion that the Federal Government has no choice but to come forward and provide the capital needed to restructure farm debt.

Earlier this spring I introduced legislation at the request of Communicating for Agriculture, a nonpartisan Minnesota-based farm advocacy group. The thrust of that proposal was to restructure the non-real-estate debt held by producers with a debt-to-asset ratio in the 40- to 70-percent range by stretching out the repayment period and financing it at much lower interest rates. I am convinced that, under my proposal, individual farmers with relatively high debt-to-asset ratios would be in a far better position to cash-flow their debt burden than they would in the absence of my legislation.

WHAT IS THE NATURE OF THE FARM DEBT?

Nationally, the total farm debt has increased dramatically. In 1971, total farm debt totaled around $54 billion; in 1976, around $91 billion; and in 1984, total farm debt stands at $215 billion.

Farmers as a group have a much higher debt to income ratio now than in the past. In 1950, the overall debt-to-income ratio stood as less than 1; in 1960, it doubled to 2, changed to over 3 in the early 1970's, to 8 in 1980 and to 10 in 1984. Today the average farmer is trying to support $10 of debt for every $1 of income.

But even more important, the nature of the debt has changed dramatically. Debt today has a much shorter maturity.

Much of the debt is short term with interest rates tied to current loan rates. Even real estate debt is based on variable interest rates or is based on relatively short contract purchases. Maturities on a great deal of real estate debt has moved from 20 to 25 years in the 1960's and 1970's to 10 to 15 years or less today.

CAN FARMERS WITH HEAVY DEBT LOADS BE SAVED?

For a substantial segment of the 30 percent to 40 percent of farmers who have substantial debt and who are in various stages of financial difficulty, economic survival is a serious question. To help this group there must be a restructuring of farm debt. This group, mostly full-time family farmers, were caught with too much debt at the wrong time, debt that was manageable under the prevailing economic conditions when it was incurred but became a crushing burden when conditions changed.

In the group of farmers, there are many good farmers facing bankruptcy for lack of a way to make the transition from an economy of high inflation, raising land values and low interest rates to one of low inflation, sinking land values, and high interest rates.

Many of the farmers in this group can be helped and saved with the right debt restructuring programs.

DEBT RESTRUCTURING PROPOSAL

In order for farm debtors to pay debt obligations, a major restructuring of indebtedness will be necessary.

The No. 1 feature of any debt restructuring program is to stretch out principal payments into a manageable debt repayment schedule. The second major feature must provide for a lower rate of interest, and third, for farm lending to continue, the risks must be shared.

This proposal utilizes existing FmHA programs and expertise of commercial lenders to accomplish this.

These are the Approved Lenders Program, Insured Operating Loan Program, and Limited Resource Program. This debt restructuring plan modifies slightly these existing FmHA programs to create a program of modified recovery debt credit.

The heart of my debt restructuring proposal is the utilization of FmHA's Approved Lender Program, with some minor modifications.

FMHA APPROVED LENDER PROGRAM

Under FmHA's Approved Lenders Program, a qualified commercial lender is approved in advance to process FmHA guaranteed loans. The approved lender makes the loan, services the loan, and collects the loan, thereby reducing the paperwork and time required for FmHA approval of loan guarantees. The lender is responsible for seeing that proper and adequate security is obtained and maintained. FmHA makes the final decision on farmers' eligibility, use of funds, and creditworthiness.

WHO DOES THE APPROVED LENDERS PROGRAM HELP?

In today's farm economy, there are many farmers whose debt-to-assets ratio is between 40 percent and 70 percent who are caught in a credit availability gap. These farmers are not in serious enough financial difficulty for consideration by the lender of last resort, FmHA. Yet, they do not quite meet the credit standards of private commercial lenders.

This group is a relatively stronger class of farm borrowers than normal FmHA borrowers. The problem for this class of farm borrowers is that their cash-flow is inadequate under current high interest rates and low commodity prices, though their basic personal net worth and equity remains relatively strong. The security behind the loan is strong enough to satisfy the bank lender, yet the loan is classified by bank regulators as a classified loan. For the bank, every classified loan reduces the amount of available assets against which credit can be made available, resulting in less credit being available to farm borrowers.

THE FMHA LOAN GUARANTEE PROGRAM

FmHA loan guarantees are designed to provide the credit necessary for family farmers to conduct successful operations. The loans are to be used for the purchase of farm machinery and equipment, basic livestock, annual operating expenses, and refinancing for authorized operating loan purposes. Interest rates may be fixed or variable and cannot exceed the rate common in the area. The terms of the loan may be up to 7 years on basic security. Quality loans may be guaranteed up to 90 percent while high risk loans may receive less than a 50-percent guarantee.

HOW WILL THE APPROVED LENDERS PROGRAM HELP?

Utilizing FmHA's Loan Guarantee Program, the commercial lender will have the additional security to make a bankable loan to farmers who find themselves in a credit gap. The program is not a bailout for lenders. Unless the loan meets requirements, with a reasonable chance for success FmHA will not approve it.

The program will help, first, by making credit available. Second, the banker will use the banks own—pre-FmHA approved—loan forms familiar to both the borrower and the banker, reducing FmHA's paper-handling load. Third, credit will be available on a much quicker basis, assuring that available guarantee loan funds reach eligible farmers as quickly as possible.

Fourth, the banker and borrower are familiar with each other, helping to insure that better loans will be made. Fifth, the borrower is most likely to stretch out the loan payback. A commercial lender will normally have a maximum of 5 years on the loan while under the FmHA Loan Guarantee Program, a maximum of 7 years is possible. This extra 2 years can assist the farm borrower in achieving an attainable cash-flow-payback program.

MODIFIED DEBT RECOVERY PROGRAM

I propose to utilize FmHA's Approved Lenders Program and operating loan programs to achieve a significant plan for farm debt restructuring. To achieve this will require some modification of each of these programs.

MODIFICATIONS TO THE APPROVED LENDERS AND DIRECT LOAN PROGRAMS

A basic modification to the Approved Lenders Program is to place a maximum rate to be charged on interest. Under the Approved Lenders Program, interest rates may not exceed the prevailing interest rate in the areas in which the loan is made.

Under the modified Approved Lenders Program, a maximum interest rate would be set at 2½ percent above discount rate. This would yield an interest rate of 10½ percent at December 31, 1984 rates.

Clearly, there is a need to lower interest rates in order to create a more achievable positive cash-flow debt repayment plan for many farm borrowers. In addition to the obvious advantage of lower interest rates, by lowering the maximum interest rate which a commercial lender may charge under the Approved Lenders Loan Program, the result will be to create opportunities for additional farm borrowers to take advantage of the Loan Guarantee Program. A lower maximum interest rate will encourage the lender to graduate the borrower to a regular commercial status.

The second basic change in the Approved Lenders Program would be to limit the approved lenders guarantee to a maximum of 50 percent whenever the direct lending authorities of the FmHA—Insured Loan Program and Limited Resource Program—are used by a lender to restructure a loan.

FMHA OPERATING LOAN PROGRAM

FmHA operating loans are made for both operating expenses and farm ownership. Ownership loans may carry an interest rate as low as 5½ percent and may be written up to 40 years. Operating loans may carry an interest rate as low as 7¼ percent and may be written up to 7 years. Under the Direct Loan Program, appraisals are done by the FmHA and security in the loan is named and itemized per lender.

MODIFICATIONS TO THE DIRECT LOAN PROGRAM

In order to restructure farm debt, lower interest rates and longer payback terms will be required to attain a manageable, attainable cash-flow for many farm borrowers.

The Modified Debt Recovery Program would incorporate into the Approved Lenders Program the use of FmHA operating loans in the same manner as the FmHA guaranteed loans. The pre-FmHA approved commercial lender would process the paperwork for FmHA operating loans, using the commercial lender's forms. FmHA would still have the final say-so on the loan under a shortened turnaround approval or denial. Appraisals would be done by the pre-FmHA approved commercial lender or qualified appraiser. The main change in the present FmHA Direct Operating Loan Program would be to share security on a prorated dollar value basis. This last change is important to create an environment where the financial risk is shared and one which will create far fewer complications than the present system of named security.

Mr. President, this debt restructuring proposal is no panacea. But, it would pull many farmers away from the brink of bankruptcy, and put them back in the business of supporting our Nation's economy and feeding the world.

ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business not to extend beyond the hour of 9:45 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MELCHER. Mr. President, reserving the right to object——

The PRESIDING OFFICER. The unanimous-consent agreement has been agreed to.

INTEGRAL VISTAS NO. 1

Mr. GARN. Mr. President, Secretary of the Interior Don Hodel has again manifested his good judgment and commonsense in deciding not to designate "integral vistas" in and near America's national parks.

For those who are not aware of this issue: The Environmental Protection Agency proposed in December 1980 to identify views, panoramas, and vistas that were or are an important part of the visual experience of visitors to our national parks.

This was a controversial proposal at the time and still is. Good people on both sides held strong opinions. Those who favored designating "integral vistas" felt that steps should be taken to protect some of America's most popular and treasured views from the types of activity that could obscure them with smoke plumes or haze.

Critics of the proposal feared that a program to protect integral vistas could swiftly become an activity to repress industry, agriculture, and other economic activity in the West at a time when economic growth and jobs creation are so important to our Nation.

It should be noted that the program was neither as broad nor as comprehensive as both sides feared. The proposal gave the Department of the Interior the option of identifying vistas that the States might want to protect for historic, cultural, and aesthetic reasons. This listing would provide no additional legal protection beyond that already in various parks and clean air laws.

After considering both sides, Secretary Hodel declined to designate integral vistas because,

> The guidelines would provide no additional protection—for the parks—and only create opportunity for conflict, litigation, uncertainty, and delay.

I believe this is a wise decision for several reasons.

First, it leaves to the States the discretion to make their own decisions, even though the Federal Government's actions would only have been advisory. In the words of the Deseret News in an October 11 editorial:

> If a State decides jobs created by a new industry near the park are more important than clean air, that's the State's prerogative. * * * That's as it should be.

Second, his decision avoids the development of still newer regulations by the Department on top of its existing authorities and requirements under the Federal Clean Air Act.

Third, the singling out of particular sites and vistas could have given the impression that we did not consider other situations as important. This would have broadcast the wrong message.

Fourth, identifying particular locations could have given a false sense of security, leading people to conclude that there was no need to exercise much vigilance in protecting these sites.

Fifth, the designation might have suggested some sort of hierachy of threats, with vistas ranking higher than pollution within the parks, crowding, crime, vandalism, and so forth.

If we have learned much about governing over the past generation it is that good ideas often become bad ideas when they are codified in the Code of Federal Regulations. While no one intended that integral vistas become a new and complicated program, the law books are filled with examples of efforts that did.

The Federal Government and the States already are working cooperatively to protect integral vistas and other vitally important natural values in and near our wonderful national

parks. Secretary Hodel's decision will not change this.

PORTLAND, OREGON—A NEW KIND OF CITY

Mr. HATFIELD. Mr. President, I am inspired to submit for the RECORD a very thoughtful article from the October 21, 1985, issue of the New Yorker magazine.

The piece is written by Berton Roueche, and appears appropriately in the magazine's Profiles section, where only choicest subject matter is brought to discussion.

Entitled "A New Kind of City," the article is about Portland, OR, a city which has undergone a sweeping transformation both in appearance and in spirit during this past decade. As a result, this already distinctive urban center has emerged a model of urban development, a city of even greater cultural individuality and distinction, and one whose residents and Senators are fiercely proud.

Mr. President, as a tribute both to this great American city and to Mr. Roueche's well-crafted and well-deserved recognition, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A NEW KIND OF CITY

I went out to Portland, Oregon, not long ago, and spent five mild and mostly sunny days in a leisurely walking tour of its downtown streets, its many parks, and its garden riverfront. Portland was founded in 1845 and evolved in the course of the next hundred years or so into the usual hodgepodge American city; then, beginning around 1970, it was transformed in look and spirit and became, at least in its center, a city of some individuality and distinction. There are those who see in this transformation a model of urban development, a city that has returned itself to man, to a pedestrian way of life.

Portland is a city of nearly four hundred thousand, but it is also a town. It combines the intimacy of a town with the density and the richness of a city. This is to some extent a matter of topography. Portland has little space for urban sprawl. It lies in a valley cut by the Columbia River and its big tributary, the Willamette (pronounced, visitors are quickly informed, Will-AM-ette), and it is all but surrounded by mountains: the Coast Range on the west and the Cascades (the setting of such eminences as Mt. Hood and Mt. St. Helens) on the east and north. The city itself is further affected by nature. The Willamette, flowing north toward its confluence with the Columbia, divides Portland more or less in half. Eastern Portland, a deepwater port, is industrial and blue-collar residential. Western Portland—or, more particularly, the southwest quarter—is the heart of the city: its business, its cultural, and, increasingly, its residential center. It is there that the new face of Portland—the closely controlled new building, the carefully monitored rehabilitation of worthy old buildings, the vigorous creation of open space—is more conspicuous.

I lived during my stay in Portland at the Heathman Hotel. The Heathman occupies a ten-story, faintly Italianate building (with some two hundred suitelike rooms) on Broadway Avenue—the principal street (shops, hotels, theatres, restaurants) of southwest Portland—at Salmon Street. It is a recently renovated version of the New Heathman Hotel, which was built in 1927 (to replace an earlier Heathman Hotel), and is listed in the National Register of Historic Places. It is thus an acceptable representative of the Portland renaissance. I had my daylight introduction to Portland from the eighth floor of the Heathman. It, too, was representative. It showed me, across the roof of the Arlene Schnitzer Concert Hall (a recent gentrification of the Portland Paramount Theatre, and another member of the National Register of Historic Places), a steep and thickly wooded hillside to the south called the West Hills—a barrier foothill of the Coast Range, no more than a mile away. A little later, on my way down to breakfast, I glanced out the window at the end of the hall. It gave me a different view—a broken view, through a skyline of buildings tall and low—of the Willamette shining in the morning sun. Breakfast at the Heathman provided another novelty. My waitress brought me, along with a menu, a little cordial glass containing an agreeable combination of fresh orange juice, lime juice, honey, whipped whole egg, and nutmeg. This, I found on inquiry, was an invention of Johnathan Robinette, the executive chef. "Our guests are mostly businessmen with work to do," Robinette told me. "My cordial is to wake them up, to knock off sleep. At first, it also contained some rum. But then I was advised otherwise."

The streets of southwest Portland bear a teasing resemblance in name to those of Manhattan. The streets running north and south are avenues, and most of them are numbered, beginning on the east (after Front Avenue) with First Avenue. Broadway is paralleled on the east by Sixth Avenue. A block to the west in Park Avenue. Then Ninth Avenue appears, then Tenth, after which all signs of the renaissance tend to disappear. Beckoned by a glimpse of greenery, I walked along Salmon Street to Park. I found (as in New York) a double-thoroughfare Park Avenue. But these Park Avenues flank a real park—a substantial one, nearly half a block wide and twelve blocks long. It begins at Salmon and runs—gently climbs—to the south, to the rise of the West Hills. I turned in that direction, up a path furnished with occasional benches and bordered by lawns and double rows of trees. I recognized the American elm and the sugar maple. A third tree was familiar to me, but I could not give it a name. I asked a young woman sitting on a bench with a book if she knew what it was. "Me?" she said. "Trees?" She had a lovely smile. "You've got to be kidding." A sycamore growing near the curb of the farther Park Avenue caught my eye. It was a good fifty feet tall and of considerable girth—at least four feet in diameter. It was dignified by a marble plaque. Commemorative plaques, though I didn't know it then, are commonplace in Portland. This one read, "Sycamore Tree Planted by Sylvester Farrell, 1880." But I was still curious about that unidentified tree. A man with a briefcase came by. I asked him my question. He shook his head. "I'm sorry," he said. "But I'm from out of town." The next man I approached kept going. I caught up with another briefcased businessman, a Chinese. "Oh, yes," he said. "It is ginkgo." He gave a little laugh. "It comes from China."

I walked on up the park. There was a statute in almost every block. A double-life-size Lincoln. An equestrian Theodore Roosevelt in Rough Rider costume. Three lightly clad women with water pitchers held aloft. There were beds of roses. Portland calls itself the City of Roses. The buildings that faced the park were all substantial (churches, the Portland Art Museum, the Oregon Historical Society, a Masonic temple, apartment houses), but none was overpowering. Most of the apartment buildings had the look of the twenties and thirties (carved stone and polished brass), but there were several that looked very new. The tallest was just six stories. I came to a drinking fountain. I stopped for a drink, and stayed to look and admire. It was no mere inverted tap. It was a work of functional art: a heavy bronze base, a round and fluted bronze pedestal, four outward- and upward-branching arms, four little brass basins, four sparkling jets of water. It was also, I came to know, only one of many. There are similar fountains on almost all the downtown corners, collectively the gift, on the eve of Prohibition, of a philanthropic lumberman and bon vivant named Simon Benson, and conceived, he is said to have presciently remarked, "to quench a frustrated thirst."

I followed the park, gently but steadily climbing, to its southern end. The last two or three blocks are flanked by the buildings of Portland State University and are integrated into its campus. Beyond the park, the West Hills begin, and I could make out houses clinging here and there along their wooded slopes. There was no way to go but east, and I headed there, toward the river, toward a residential complex called Portland Center. The Park Avenue park was laid out around 1876, and Portland Center continues in a contemporary mode that early appreciation of urban breathing space. It rose in the first years of the Portland renaissance on a commanding slope some twenty blocks square that had once been a neighborhood of ramshackle single-family houses. I came into the Center at its summit by way of a wide and winding pedestrian promenade.

A twenty-story condominium loomed on the left—loomed above a parking lot graced with laurel hedges and ivy-covered walls—and beyond was another condominium, a building architecturally compatible with the first but only three stories high. Beyond that were other parking lots disguised as parks, a row of three-story buildings, then another high rise. On the right was a long one-story building occupied by shops purveying the essential goods and services of city life. I passed a liquor store, a travel agency, a hair stylist, a dry cleaner, a grocery store, a brokerage office, a cafe offering espresso and cappuccino. There were flowering planters and rose beds, there were rhododendron trees, there were benches with elderly people sunning themselves and young mothers with perambulators or toddlers. There were street lights with cast-iron standards and nineteenth-century globes. There was an almost bird's-eye view of the river and one of its several bridges and the chaotic beginnings of what looked like another Portland Center. An easy flight of steps led down to a paved plaza with trees and a fountain in the form of a mountain stream cascading down a rocky chute to a shallow pool. There were big stepping stones across the pool, and a young couple was leading a little boy—squeaking with fright or excitement—across. A row of two-story apartment houses faced the plaza on

the north. The promenade continued past a ten-story condominium with shops and offices at street level. I came out into a larger plaza, with cattered groves of trees on artificial knolls and a centerpiece contemporary sculpture of painstakingly rusted metal. A young woman in a leather jacket was slouched on her spine on a bench, shaking open a battered package of cigarettes. I watched her extract what turned out to be the last cigarette, watched her crumple the pack, watched her stand and look around for a trash can. There was no trash can in sight. She sat back down and stuffed the crumpled package in her pocket.

"Yes, I know," John E. Graham said to me at a reception following a concert at the Arlene Schnitzer Concert Hall that night. Graham is general manager of the Oregon Symphony Orchestra. "That's the way these people are. This is a clean city in just about every respect. The air is clean—cleaner than most, I'd say. Our power is mostly hydroelectric power. It's generated at the Bonneville Dam or at one of the others on the Columbia. They tell me the Willamette is practically unpolluted. And, as you may know, Oregon has the oldest bottle law in the country. But the main thing, I think, is civic pride. The people care about Portland. They feel it belongs to them. Our renewal program has practically unanimous support. I was born and raised on the East Coast, and when I arrived here, seven years ago, I was stunned. I had never seen a really clean city before. Clean and orderly. I think they go together. You must have noticed how people stand and wait at traffic lights. Jaywalking is unheard of. But now I'm afraid I'm spoiled. If I come across one scrap of litter on my way to work, I almost fly into a rage."

A day or two later, while walking in a part of town less savory than Portland Center, I saw a weathered old man sitting in a doorway with a bottle in a paper bag, saw him tip it up and finish it off, saw him get creakingly up and shuffle a dozen steps to the corner and drop it in a trash can.

The tallest building in Portland is the First Interstate Bank Tower. It occupies a square block between Fourth and Fifth Avenues just below Portland Center and stands forty stories in height, with four stories below ground. There is a restaurant called the Loft on the twenty-eighth floor which has, the concierge at the Heathman told me, a view that is well worth viewing, and I went there one bright and sunny noon for lunch. The Loft in a spacious room with tall windows on the north and east, and I was given a table facing east. I sat down and looked out—looked down and away—at a scatter of office buildings, at the river and its bridges, at a mighty wall of mountains rising to a mighty, snow-topped pyramidal peak. Mt. Hood. I turned to the window on the north. Rooftops. The river.

Another wall of mountains, rising to another snow-topped peak, but a different sort of peak—a flattened, truncated peak. Mt. St. Helens. The remains of Mt. St. Helens. I sat and looked from one to the other. It was indeed a view worth viewing. It was in my experience an urban view of views. I looked around at my fellow-lunchers—four businessmen with their heads together and their jackets hung over their chair backs, a group of bantering office workers, some chattering shoppers, an ardent couple. I seemed to have the view to myself.

Portland is a city of greenery. It is blessed with a mild climate and an abundant rainfall that keep it green through much of the year. There are trees on almost every downtown street, and almost every office building has a terrace or a sunken garden bright with flower beds or ilex bushes or potted laurel trees. There are ten parks in the downtown area alone. With one notable exception, none of them is less than a square block in size, and two—the riverfront park and the Park Avenue blocks—are, of course, many times that size. The riverfront park extends along the river for nearly two miles, and it is at some places a good two blocks wide. It is, moreover, just the beginning of the Willamette River Greenway, which eventually will extend the full hundred-and-twenty-mile length of the river. The park is otherwise, and perhaps uniquely, unusual. The land it covers was once—only a few years ago—a four-lane expressway, which, in the manner of most American cities, denied the riverfront to all but the speeding motorcar. I walked its pleasant length one afternoon, and there were fishermen here and there along the seawall. It could have been a stretch of the Seine. Except that there are actually edible fish to be caught in the Willamette. "All kinds of fish," one of the fishermen told me. "But what most of us are hoping for is sturgeon. Caviar, man!"

The smallest park in Portland is called Mill Ends Park, and it is also (one would imagine) the smallest park in the world. That seems to be apodictic. Roughly circular in shape, it is two feet in diameter and covers an area of four hundred and fifty-two square inches. It is situated, I was told, at the intersection of Front Avenue and Taylor Street, and although it took me some little time to find it, my directions were entirely correct. Mill Ends Park is situated in the middle of the intersection: a tiny island of concrete surrounding a round patch of earth (sprouting daffodils when I saw it) and two ornamental cast-iron posts. A bronze plaque on Taylor Street reads, "From His Office on the Second Floor of the Old Oregon Journal, Journalist Dick Fagan (1911-1969) Periodically Gazed Down on the Busy Front Avenue Thoroughfare. It Was His Keen Imagination That Turned a Utility Pole Hole, in the Avenue Media Strip at Taylor Street, Into Mill Ends Park." Fagan wrote a column called "Mill Ends." His park, one of the humblest fruits of the Portland renaissance, was incorporated into the Portland park system in 1976.

All the Portland parks I saw have character, and most of them are interesting in nature or in origin. Emerging from the Third Avenue entrance to the Civic Auditorium (dedicated in 1968, but loosely Palladian in style), I found a park called Ira's Fountain (for a civic leader named Ira C. Keller), which is neither entirely a park nor merely a fountain. What it is is an enormous sculpture—a block-square cement sculpture in the form of a spread of waterfalls. The usual plaque relates the statistics: The lip of the falls in ninety feet wide, the highest fall is eighteen feet, and the water flows at a rate of thirteen thousand gallons per minute. The water emerges from a fountain, leaps into space, and drops to a system of pools and basins. There is a park with big trees overlooking the fountain, and another park below. In summer, children jump through the screen of falling water and play in the pools behind, and the city, I was told, provides a lifeguard to keep an eye on them. Ira's Fountain is a spectacular urban pleasance, but it could easily be dwarfed and destroyed by the usual urban environment. The Civic Auditorium, however, is just three stories high, and the other buildings that surround the park are not much higher. There are no Wall Street canyons in Portland.

Two blocks north of Ira's Fountain, I came to another green amenity. This is a three-block chain of parks, bounded on the east by Third Avenue and on the west by Fourth, which mark the governmental center of town. City Hall (circa 1895) is there, and so is the new (1983) Multnomah County Justice Center. The first of these parks is a peaceful amphitheatre of brick and lawn withdrawn behind a screen of trees and shrubs. It commemorates a former mayor, Terry D. Schrunk, who served from 1957 to 1973. It is also, like the riverfront park, an earnest of the Portland renaissance. Its site until recently was occupied by an office building; when it was decided that a park would be desirable there, the building was bought and razed. The two other parks in the chain are Lownsdale Square and Chapman Square, and they were laid out in 1852. Through much of the nineteenth century, Lownsdale Square was frequented exclusively by men. Women gathered in Chapman. They are both conventional city parks with paths and benches and shade trees. A fountain and watering trough of the period, surmounted by a great bronze statue of a bull elk (in memory of a local behemoth of pioneer days), rise from the middle of the street that separates them.

Visitors to Portland are all but required to take a meal at an eating place called the Dan & Louis Oyster Bar. Dan & Louis is one of the oldest restaurants in Portland (est. 1907), and it is situated at the northern edge of the downtown center, in the oldest part of the city. The building it occupies (and owns) was once the City Hall. I went there for lunch one day by way of a circle through the immediate neighborhood, through streets of nineteenth-century buildings of rosy brick and cast iron which had survived the middle years of the twentieth century by reason of community indifference and are now revered as Historic Landmarks.

I loitered near Skidmore Fountain, standing on cobblestones that arrived in Portland as ships' ballast. It is the city's oldest work of public art—a sculptured bronze-and-granite fountain with facilities for both human beings and horses. I inspected an elegant cast-iron building that was once the leading theatre and is now an enclave of shops and cafés. I passed the Salvation Army's Harbor Light Mission, and was offered a drink by a mixed gathering of jovial derelicts out front. Dan & Louis is across the street (Ankeny Street) from a musical café called the Chocolate Moose. I was shown to a place at a long communal table that looked capable of seating thirty. The walls were hung—were encrusted—with souvenir plates, with framed photographs and newspaper clippings, with marine artifacts. I ordered, at the command of a matronly waitress, a specialty of the house: Yaquina Bay oysters, no bigger than white grapes (from Dan & Louis's own beds), in a cocktail sauce. Then I had Columbia River silver salmon with French-fried potatoes; a salad of tiny shrimp; and iced tea. Dan & Louis does not serve alcohol. I had a dish of orange sherbet for dessert. My bill was just over eight dollars. That included tip but not tax. There is no sales tax in Oregon.

The most highly esteemed survival of nineteenth-century Portland is a three-story (with cupola) Palladian building (with Greek pediments) now known as the Pioneer Courthouse. It occupies, with its lawns

and trees and other plantings, a block between Fifth and Sixth Avenues not far from City Hall. It was built in 1868 and was the first United States courthouse in the Far West. It was rescued from mindless demolition in 1968 and restored to its full original glory in 1973. This glory is not immediately apparent. The main (Sixth Avenue) entrance and foyer have been converted into a branch post office. But beyond that the nineteenth century—the opulence of nineteenth-century public buildings—awaits. I was shown all this by a friendly, or perhaps just lonely, security guard whom I found at a desk in a corridor served by a Fifth Avenue entrance.

"Well, no," he told me. "This is a National Historic Landmark building, but I wouldn't call it a museum. It's very much in use. The two upper floors are still courtrooms. The United States Court of Appeals sits there, and the Bankruptcy Branch of the U.S. District Court. These offices along here are the offices of the various court officials. And, of course, Senator Hatfield has an office here. The panelling here is the original panelling. It's ash. Now, if you're interested, I'll show you the rest. These stairs are the original stairs—the original bannisters and all. I won't show you every courtroom. But I think you'll be interested in this one here. That woodwork is all old oak. You don't see that kind of wood anymore. The furnishings are partly original and partly of the period but acquired from other old courthouses. Those bench lamps came from Chicago. The benches for the public were found in St. Paul. The same for the hat-and-umbrella rack and the counsel tables and lectern—they came from all over. The fireplace is the original fireplace, and I guess that was all the heat they had in the old days." He looked at his watch. "I've got to get back in a minute, but I want you to see the cupola."

We climbed another staircase, curved and carved and darkly glowing, and passed another panelled courtroom. The guard opened an inconspicuous door. We climbed a flight of ladderlike stairs. We came out in an octagonal room with windows all around. "This is where they used to bring the visting dignitaries," the guard said. "It gave them a view of the whole city. You can still see the river. Mt. Hood is somewhere behind that building there. And that one there cuts off Mt. St. Helens. But the way they're doing the city over, you never know. They may be planning to restore this view. What you see down there in front is something new. They call it Pioneer Courthouse Square. That block used to be the old Portland Hotel. President Taft got stuck in a bathtub there. They razed the old hotel in 1950 and turned the block into a parking lot. They tore up the parking lot and built the square in 1983. They use it for all kinds of things—art exhibits, concerts, every sort of gathering.

I guess that's why it's paved. Public subscription helped build it. Everbody who paid fifteen dollars got his name inscribed on one of the paving bricks. There's supposed to be more than sixty thousand bricks down there. I've got one myself, if I could ever find it. I don't know what those two big rows of pillars are for. I don't know why, with all that red brick, they had to use purple and lavender tile as well. That cavelike opening at the far end is a fountain, but it's also the entrance to some municipal offices. They're underground. I don't know why the square has all those steps and all those different levels. I don't know why there aren't any trees. There's been a lot of talk about Pioneer Square. Some people think it's a little weird. But a lot of people use it, as you can see."

I took a turn around the square to see it closer up. It looked a little less weird than it had from the cupola, and very much larger. It was indeed in use. I joined a crowd and watched a man and a dog playing with a Frisbee. I passed a red-faced man praying at the top of his voice. I stopped to hear a girl guitarist who was wearing golfball earrings and what looked like a fez. I passed a dozen embracing couples. I passed a vender selling daffodils. I passed three young men in running clothes handing around a marijuana cigarette. I squatted down and deciphered a couple of bricks; Frank Fifer, Gretchen Deann Spence, Elinor Langer. I started up a wide and shallow fight of steps, and saw a man in a dark business suit standing above with an upraised open umbrella. I climbed the rest of the steps and looked again. It wasn't a man. It was a statue. That is, the man was a statue, but everything else was real. Or looked real. His shoes looked like real shoes, his suit and shirt and necktie looked genuine. So did his umbrella. Real but sprayed with some sort of preservative. There was a bronze plaque. It read, "Gift of Harry H. Schwartz, New York City, 1983."

There was a story in the Portland *Oregonian* one morning about the continuing aims and concerns of the renaissance. One of the planners quoted was Patrick Tillett, head of the planning-and-urban-design unit of the architectural firm Zimmer Gunsul Frasca Partnership. "Downtown development depends on weaning people away from their automobiles," he said. That effort would seem to be well under way. Traffic in Portland is neither heavy nor notably light. I was reminded of the traffic in midtown Manhattan on a Saturday afternoon. One reason, I was told, for this moderate flow is a recent regulation known as a "parking lid." The lid limits the number of downtown parking spaces, both metered street parking and space in parking lots and garages. There are no cruising cabs in Portland. All the cabs I saw were either parked in designated cabstands or working. Twelve midtown blocks of two major streets—Fifth and Sixth Avenues—have been redesigned and largely restricted to pedestrians, buses, and emergency vehicles. Both of them—Fifth Avenue running one way south and Sixth running one way north—have been reduced to two lanes, and the sidewalks have been proportionately widened. I paced at random a Fifth Avenue walk and got an approximate width of twenty-seven feet. The sidewalks are variously paved, and much red brick laid in different geometrical designs. There are plane and sycamore trees and stone planters and Simon Benson drinking fountains and benches at intervals, and there is a glass-roofed shelter at every bus stop. The buses are frequent, and they are free to all within an area of three hundred downtown blocks. The streets that flank Pioneer Square and the Pioneer Courthouse (Yamhill Street and Morrison Street) were torn up for several blocks at the time of my visit, and closed to traffic. I assumed that this was for the usual mysterious metropolitan reasons. That was a faulty assumption. "You haven't heard?" an acquaintance at the bar at the Heathman said to me one evening. "They're laying track. Portland has reinvented the streetcar. The route will be a loop from East Side Portland across the river and on to somewhere here on the West Side, and then circle around and return. They call it a light-rail system."

I had lunch and a bottle of Oregon wine (an Adelsheim Chardonnay) one afternoon with Steven Lowenstein, a native New Yorker and a graduate of the Yale Law School, who serves as executive assistant to Mike Lindberg, the Commissioner of Public Affairs for the Portland City Council. "My wife and I came here in 1970," he told me. "Our son was just a year old, and Portland seemed like a nice place, a safe place, for him to grow up. As it turned out, 1970 was just about the time the big excitement here began. The first stirrings. There were and are a great many people involved in the renewal program. You could say that everybody, the whole citizenry, was involved. The quality of the environment has always been important to Oregon. But the real leadership was provided by Neil Goldschmidt, who came in as mayor in 1973. As you may remember, he later served as Secretary of Transportation under Jimmy Carter. He saw, as we all do, that the automobile is the problem. We need it, but we don't want to be owned by it. He was concerned that it would be the death of downtown. As it has been in so many cities. He was afraid that the freeways would dominate the city. He was afraid that development would proceed with no concern for the people. And he thought the problem was urgent. Portland was growing fast in the seventies. Well, things began to get turned around. We began to see a new kind of city. We got rid of the freeway on this side of the river. We put through a comprehensive plan for the humanized development of downtown. All but two or three of the big buildings downtown here have come up under the new planning. We're making progress against the automobile. But, of course, that's only part of the problem. If we're going to have a downtown that is central to the area, it must have something to attract the people to it. We've concentrated on that. All our new buildings and planned with the human element in mind. We have a height limitation, and the tallest buildings must be well back from the river. We try to preserve air and space. We're proud of our new buildings, and we want them to be seen and enjoyed. When buildings are crowded together, architecture doesn't matter. We have no rules about architectural style.

Our new buildings are of all shapes and kinds and materials. The Portland Building—eclectic, multi-colored, multi-faceted—Which was designed by Michael Graves and has won all sorts of awards, is probably the only one of its kind in the world. But we do have basic rules. I mentioned height. We also control bulk, through setbacks and limits on floor area. We think blank walls at street level dehumanize a building and a neighborhood, so we require that every new building provide space at street level for retail businesses—for shops and cafes. We think public art humanizes a city, so we require that one per cent of the total cost of any public building be spent on some sort of art. Private builders tend to follow suit. We think downtown should be the cultural center of a city, and the entertainment center. When I came here, there were no more than three or four real restaurants downtown. Now we have at least thirty. We have the new Arlene Schnitzer Concert Hall, and that work going on next door to it will be our new Center for the Performing Arts. There are plans for a new theater complex just across the street. Everything is within walking distance. That was the aim of the master plan. One of its goals is "Provide for a pleasant, rich, and diverse pedes-

trian experience." Downtown used to be deserted at night. Now it's full of people—people walking around enjoying themselves. My office is in City Hall, and I live down northwest. I walk to work every morning. It takes me about half an hour. Bud Clark, our mayor, rides a bicycle to work. We have thousands of people living within walking distance of their work. People all over the country are running and jogging. We're getting them to walk.

My last meal in Portland, like my first, was breakfast. The waitress who served me was the one who had served me most morning during my stay. She brought my morning cordial, and waited for me to order. "I hope you've enjoyed yourself," she told me. "I'm afraid everything's kind of torn up here downtown. All the new building that's going on, and the streetcar line and all. I guess we're in what they call a transition. I think it's a lot like letting your hair grow out. It's going to be beautiful. You just have to accept that middle-growth period."—BERTON ROUECHE.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations and a treaty which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

EXCLUSION OF CERTAIN AGENCIES AND CLASSES OF EMPLOYEES UNDER THE PERFORMANCE MANAGEMENT AND RECOGNITION SYSTEM—MESSAGE FROM THE PRESIDENT—PM 89

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying papers; which was referred to the Committee on Governmental Affairs:

To the Congress of the United States:

Supervisors and management officials in GS-13, 14, and 15 positions throughout the Federal government are covered by the Performance Management and Recognition System as required by Chapter 54, Title 5, U.S. Code, unless otherwise excluded by law.

Upon proper application from the heads of affected agencies and upon the recommendation of the Director of the Office of Personnel Management, I have excluded, pursuant to 5 U.S.C. 5402(b)(1), three agencies, units of agencies, and classes of employees from coverage under the Performance Management and Recognition System.

In accordance with Section 205 (d) of P.L. 98-615, any agency or unit of an agency that was excluded from merit pay immediately prior to enactment of this legislation is excluded from coverage under the Performance Management and Recognition System for the 12-month period beginning on the date of enactment. However, such exclusion may be revoked at any time in accordance with 5 U.S.C 5402(b)(5). Upon request of the heads of the affected agencies and upon recommendation of the Director of the Office of Personnel Management, I have revoked the exclusion of seven agencies and units of agencies so that they may implement the Performance Management and Recognition System in fiscal year 1986.

Attached is my report describing the agencies to be excluded and the reasons therefor. I am also providing the names of those agencies for which the exclusion is revoked.

RONALD REAGAN.

THE WHITE HOUSE, *October 30, 1985.*

MESSAGES FROM THE HOUSE

ENROLLED BILL AND JOINT RESOLUTION SIGNED

At 3:09 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the Speaker has signed the following enrolled bill and joint resolution:

S. 1160. An act to authorize appropriations for military functions of the Department of Defense and to prescribe military personnel levels for the Department of Defense for fiscal year 1986, to revise and improve military compensation programs, to improve defense procurement procedures, to authorize appropriations for fiscal year 1986 for national security programs of the Department of Energy, and for other purposes; and

S.J. Res. 227. Joint resolution to commend the people and the sovereign confederation of the neutral nation of Switzerland for their contributions to freedom, international peace, and understanding on the occasion of the meeting between the leaders of the United States and the Soviet Union on November 19-20, 1985, in Geneva, Switzerland.

The enrolled bill and joint resolution were subsequently signed by the President pro tempore (Mr. THURMOND).

At 6:35 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following joint resolution, without amendment:

S.J. Res. 145. Joint resolution designating November 1985, as "National Diabetes Month."

The message also announced that the House disagrees to the amendments of the Senate to the bill (H.R. 3244) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1986, and for other purposes; it agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. LEHMAN of Florida, Mr. SABO, Mr. GRAY of Pennsylvania, Mr. CARR, Mr. DURBIN, Mr. MRAZEK, Mr. WHITTEN, Mr. COUGHLIN, Mr. CONTE, Mr. PURSELL, and Mr. WOLF as managers of the conference on the part of the House.

The message further announced that the House has passed the following bills and joint resolution, in which it requests the concurrence of the Senate:

H.R. 2713. An act to amend title 18, United States Code, to modify certain provisions pertaining to restitution, and for other purposes;

H.R. 3511. An act to amend title 18, United States Code, with respect to certain bribery and related offenses;

H.R. 3606. An act to clarify the application of section 2406 of title 10, United States Code, relating to cost and price management, and to delay the effective date of such provision; and

H.J. Res. 282. Joint resolution designating the week beginning October 27, 1985, as "National Areata Awareness Week."

MEASURES REFERRED

The following bills and joint resolution were read the first and second times by unanimous consent, and referred as indicated:

H.R. 2713. An act to amend title 18, United States Code, to modify certain provisions pertaining to restitution, and for other purposes; to the Committee on the Judiciary.

H.R. 3511. An act to amend title 18, United States Code, with respect to certain bribery and related offenses; to the Committee on the Judiciary.

H.J. Res. 282. Joint resolution designating the week beginning October 27, 1985, as "National Areata Awareness Week"; to the Committee on the Judiciary.

MEASURE PLACED ON THE CALENDAR

The following bill was read the first and second times by unanimous consent, and placed on the calendar:

H.R. 3606. An act to clarify the application of section 2406 of title 10, United States Code, relating to cost and price management, and to delay the effective date of such provision.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1940. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Examination of the Commodity Credit Corporation's Financial Statements for the Year Ended September 30, 1984"; to the

Committee on Agriculture, Nutrition, and Forestry.

EC-1941. A communication from the Under Secretary of Agriculture (International Affairs and Commodity Programs), transmitting, pursuant to law, the first quarterly commodity and country allocation table showing current programming plans for food assistance under Public Law 480 for fiscal year 1986; to the Committee on Agriculture, Nutrition, and Forestry.

EC-1942. A communication from the Deputy Assistant Secretary of the Air Force (Logistics and Communications), transmitting, pursuant to law, a report on studies being undertaken on conversion from in-house operation to commercial contract for certain activities at various installations; to the Committee on Armed Services.

EC-1943. A communication from the Director of the National Bureau of Standards, Department of Commerce, transmitting, pursuant to law, a report on the status of the implementation of recommendations of the President's private sector survey on cost control and other recommendations contained in the report entitled "Management of the United States Government—1986"; to the Committee on Commerce, Science, and Transportation.

EC-1944. A communication from the Secretary of Transportation, transmitting, pursuant to law, a proposal to codify the shipping and maritime laws administered within the Department of Transportation by the Maritime Administration and the Coast Guard; to the Committee on Commerce, Science, and Transportation.

EC-1945. A communication from the Administrator of General Services, transmitting, pursuant to law, a proposed lease prospectus for a new U.S. district court facility in Santa Ana, CA; to the Committee on Environment and Public Works.

EC-1946. A communication from the Chairman of the United States Parole Commission, Department of Justice, transmitting, pursuant to law, the annual report of the Commission under the Government in the Sunshine Act for calendar year 1983; to the Committee on Governmental Affairs.

EC-1947. A communication from the Acting Assistant Attorney General (Legislative and Intergovernmental Affairs), transmitting a draft of proposed legislation to except all positions in the Drug Enforcement Administration from the competitive service and place the incumbents of such positions in the excepted service; to the Committee on Governmental Affairs.

EC-1948. A communication from the D.C. Auditor, transmitting, pursuant to law, a report entitled "University of the District of Columbia President's Representation Fund for Fiscal Year 1985"; to the Committee on Governmental Affairs.

EC-1949. A communication from the adjutant general of the Military Order of the Purple Heart, transmitting, pursuant to law, the financial audit report of the order dated June 30, 1985; to the Committee on the Judiciary.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-507. A joint resolution adopted by the Legislature of the State of California; to the Committee on Energy and Natural Resources:

"ASSEMBLY JOINT RESOLUTION No. 27

"Whereas, The Congress of the United States passed the Emergency Petroleum Allocation Act after the Arab Oil Embargo of 1973 to protect the citizens of the United States from skyrocketing gasoline prices by denying oil companies windfall profits that might result from the exploitation of a sudden decrease in supply; and

"Whereas, Oil companies still gained billions of dollars in profits by violating the provisions of the act; and

"Whereas, Approximately $1.2 billion in overchanges has been recovered by the federal government through court judgments against oil companies which engaged in profiteering, with an estimated potential recovery of $5 to $6 billion; and

"Whereas, This situation has caused one judge to declare, "The violators of the petroleum price regulations should be made to disgorge their ill-gotten gains"; and

"Whereas, Cases are pending against Exxon, Texaco, ARCO, and other oil companies, and the share apportioned to the State of California could be as large as $500 million; and

"Whereas, These court cases and federal legislation have established the concept of "restitution" to overcharged customers either directly or through certain beneficial energy programs, and thus these funds are to be distributed to the states through the Petroleum Violation Escrow Account, which was established for this purpose; and

"Whereas, The federal administration's proposed budget for 1986 reduces the money provided states for the Low Income Energy Assistance Program and proposes to substitute each state's share of the assistance program money for its share of the Petroleum Violation Escrow Account money; and

"Whereas, This proposed policy would be in direct opposition to the concept of "restitution" and to the United States Department of Energy's own rule that the funds shall not be used to supplant any existing program; and

"Whereas, The federal government, as trustee for the account, has a fiduciary obligation to restore these funds to the beneficiaries of the trust, the injured energy consumers; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and Congress of the United States to halt all plans to utilize Petroleum Violation Escrow Account funds to supplant existing programs or to reduce the federal deficit, and instead to continue the practice of apportioning the funds to the states for restitution to energy consumers directly or through beneficial energy programs; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Represenatives, and to each Senator and Representative from California in the Congress of the United States."

POM-508. A resolution adopted by the Fourth Northern Marianas Commonwealth Legislature; to the Committee on Energy and Natural Resources.

SENATE RESOLUTION No. 4-70

"Whereas, at the request of Ronald M. Reagan, President of the United States, Vice President George Bush will meet with leaders of the Trust Territory in October; and

"Whereas, Saipan will be the location of these meetings; and

"Whereas, the Reagan administration has endorsed the NMI proposal for the second period of multi-year Covenant financial assistance to the Commonwealth; and

"Whereas, this endorsement will contribute substantially to the proposal thus benefiting greatly the people of the Northern Mariana Islands; and

"Whereas, as the newest member of the United States political family the people of the Commonwealth welcome and look forward to the visit of the Vice President of the United States; now, therefore,

"Be it resolved by the Senate of the Fourth Northern Marianas Commonwealth Legislature that the Vice President of the United States is welcomed and extended the deepest meaning of Hafa Adai upon the occasion of his visit to the Commonwealth of the Northern Mariana Islands; and

"Be it further resolved that the President of the Senate shall certify and the Senate Legislative Secretary shall attest to the adoption hereof, and a certified copy of the same shall be transmitted to Vice President Bush."

POM-509. A resolution adopted by the Council of the City of Lompoc, California urging Congress to retain the deductibility of State and local taxes in any revision of Federal income tax law; to the Committee on Finance.

POM-510. A resolution adopted by the Council of the City of Hillsborough, California urging Congress to retain the deductibility of State and local taxes in Federal income tax law; to the Committee on Finance.

POM-511. A joint resolution adopted by the Legislature of the State of California; to the Committee on Finance.

ASSEMBLY JOINT RESOLUTION No. 73

"Whereas, The issuance of nongovernmental use bonds nationwide has increased over 300 percent between 1975 and 1983; and

"Whereas, During this same period, the issuance of general obligation bonds used to finance veterans' home mortgages has increased less than 20 percent; and

"Whereas, From 1983 to the present time, the principal amount of all veterans' home mortgage general obligation bonds has actually decreased because of limitations on their tax-exempt status imposed by Title VI of the Tax Reform Act of 1984 (P.L. 98-369; 98 Stat. 901 et seq.), which restricts the issuance of these bonds to not more than 340 million dollars per year; and

"Whereas, From its inception in 1921 to 1984, the State of California has issued over seven billion dollars in general obligation bonds under the verterans' farm and home purchase program known as "Cal-Vet" and these funds have assisted California veterans in acquiring over 370,000 homes; and

"Whereas, During its entire history, the Cal-Vet program has been entirely self-sufficient with the result that there has been no cost whatsoever to the taxpayers; and

"Whereas, Approximately one million of the more than three million California veterans served during the Vietnam era and are thereby eligible for farm and home purchase assistance under the Cal-Vet program, which restricts its benefits to veterans applying within 25 years of discharge from the armed services; and

"Whereas, The present limitation of 340 million dollars in general obligation bonds plus an additional 100 million dollars in rev-

enue bonds means that only approximately 6,200 veterans per year are able to actually receive home purchase assistance under the program, a number which is considerably below the demand for Cal-Vet benefits; and

"Whereas, These veterans have served their country at great personal sacrifice in time of need, their number is continually diminishing so that their needs are immediate and for many of these veterans, the Cal-Vet program represents their only realistic opportunity to acquire a home of their own; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and Congress of the United States to exclude veterans' mortgage subsidy bonds from any restrictions on the issuance by the states of nongovernmental use bonds, so that Cal-Vet bonds and other similar bonds retain their tax-exempt status to make them attractive as reasonable investments in order that these vital veteran housing assistance programs may continue to fulfill their domonstrated need; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-512. A resolution adopted by the Council of the City of Anoka, Minnesota, urging Congress to continue their efforts to halt the persecution of the Baha' minority in Iran; to the Committee on Foreign Relations.

POM-513. A joint resolution adopted by the Legislature of the State of California; to the Committee on Foreign Relations.

"Whereas, Since the wanton murder of Major Arthur D. Nicholson, Jr., United States Army, on Sunday, March 24, 1985, an appropriate response to the Union of Soviet Socialist Republics has been of major importance; and

"Whereas, The Free World in general, and the United States in particular, cannot permit this heinous act to pass without our severest criticism and condemnation; and

"Whereas, As citizens of the United States, enjoying freedom unparalleled in the world, freedom that is unfortunately neither recognized nor appreciated by many, we cannot passively sit by while the memory of this wicked act fades from the minds of the freedom loving peoples of the world; and

"Whereas, These acts by the Soviet Union cannot be permitted to continue—first it was Korean Air Lines 007—next it was Major Arthur D. Nicholson, Jr.—and we must ask: Where will the next act of violence take place?; and

"Whereas, Renaming "Check Point Charlie," which links West Berlin with East Berlin, as the "Major Arthur D. Nicholson, Jr., Gate," would be a fitting reminder of the need for constant international vigilance of this international peril, and would constitute a memorial to Major Nicholson; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, That the President and the Congress be memorialized to rename "Check Point Charlie" as the "Major Arthur D. Nicholson, Jr., Gate" in memory of the supreme sacrifice that Major Nicholson gave for the good of humankind, and as a reminder that all citizens of the world must be vigilant against future Soviet violence and aggression; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-514. A joint resolution adopted by the Legislature of the State of California; to the Committee on Rules and Administration:

"ASSEMBLY JOINT RESOLUTION No. 77

"Whereas, Haym Salomon was an American patriot of Polish and Jewish background and a member of the Sons of Liberty; and

"Whereas, Haym Salomon was a revolutionary patriot who was instrumental in raising the money needed to finance the American War of Independence; and

"Whereas, Haym Salomon contributed his own resources and skill as a financier and broker to the cause of liberty during the American War of Independence and the early years of the United States; and

"Whereas, After the American War of Independence was over, Haym Salomon died insolvent from an illness he contracted during the conflict while imprisoned by the British for his patriotic activities; and

"Whereas, Haym Salomon contributed much of his own resources to the United States, an amount which will never be precisely known due to the loss and destruction of records during the War of 1812; and

"Whereas, Haym Salomon has long been recognized as the symbol of the American Jewish participation in, and contribution to, the American War of Independence; and

"Whereas, Despite Haym Salomon's great and selfless service to the cause of liberty, no national monument or statue has ever been erected in his honor; and

"Whereas, It is only fitting and proper to honor Haym Salomon through the placement of a statue of him in the United States Capitol Building or on the Capitol grounds and the erection of a monument to him on federal land within the District of Columbia; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to enact legislation which would permit the placement of a privately funded statue of Haym Salomon in the United States Capitol Building or on the Capitol grounds and to permit the erection of a privately funded monument to Haym Salomon on federal land within the District of Columbia; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatves, and to each Senator and Representative from California in the Congress of the United States."

POM-515. A resolution adopted by the Council of the City of Berea, Ohio, supporting efforts to amend the Fair Labor Standards Act to provide relief from the present provisions of the Act as related to municipalities; to the Committee on Labor and Human Resources.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. ROTH, from the Committee on Governmental Affairs, with an amendment in the nature of a substitute:

S. 1527: A bill to amend title 5, United States Code, to establish a new retirement and disability plan for Federal employees, postal employees, and Members of Congress, and for other purposes (Rept. No. 99-166).

By Mr. ROTH, from the Committee on Governmental Affairs, with amendments and an amendment to the title:

H.R. 2672: A bill to redesignate the New York International and Bulk Mail Center in Jersey City, New Jersey, as the "New Jersey International and Bulk Mail Center," and to honor the memory of a former postal employee by dedicating a portion of a street at the New York International and Bulk Mail Center in Jersey City, New Jersey, as "Michael McDermott Place."

By Mr. ROTH, from the Committee on Governmental Affairs, without amendment:

S. Res. 247: An original resolution waiving section 303(a) of the Congressional Budget Act of 1974 with respect to S. 1527 as reported by the Committee on Governmental Affairs, referred to the Committee on the Budget.

S. Res. 248: An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1527; referred to the Committee on the Budget.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. BRADLEY (for himself and Mr. D'AMATO):

S. 1807. A bill consenting to a modification in the Delaware River Basin Compact relating to the rate of interest on bonds issued by the Delaware River Basin Commission; to the Committee on the Judiciary.

By Mr. WALLOP:

S. 1808. A bill to amend the Internal Revenue Code of 1954 to exempt from taxation corporations or trusts which acquire and manage real property for certain exempt organizations, and for other purposes; to the Committee on Finance.

By Mr. DOLE (by request):

S. 1809. A bill to amend the Tariff Schedules of the United States to permit the importation of furskins from the Union of Soviet Socialist Republics; to the Committee on Finance.

By Mr. SYMMS (for himself, Mr. NICKLES, Mr. HECHT, and Mr. MCCLURE):

S. 1810. A bill to require United States representatives to international financial institutions to oppose assistance by such institutions for the production of agricultural commodities in competition with United States produced agricultural commodities, and for other purposes; to the Committee on Foreign Relations.

By Mr. CHAFEE:

S. 1811. A bill to temporarily suspend the duty on frozen cranberries; to the Committee on Finance.

By Mr. LEAHY:

S. 1812. A bill to provide for the establishment of a voluntary milk adjustment program.

By Mr. CHAFEE (for himself and Mr. SARBANES):

S. 1813. A bill to amend and extend the Atlantic Striped Bass Conservation Act, and for other purposes; to the Committee on Environment and Public Works.

By Mr. NUNN (for himself, Mr. MATTINGLY, Mr. GOLDWATER, Mr. CHILES, Mr. HOLLINGS, Mr. STENNIS, Mr. PRYOR, Mr. BENTSEN, Mr. BOREN, Mr. HEFLIN, Mr. ZORINSKY, Mr. LAXALT, Mr. DURENBERGER, Mr. CHAFEE, Mr. INOUYE, Mr. HELMS, Mr. BUMPERS, Mr. BOSCHWITZ, Mr. HATFIELD, Mr. DIXON, and Mr. LEVIN):

S.J. Res. 229. Joint resolution designating the week of January 13 through January 19, 1986, as "National Productivity Improvement Week"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. ROTH from the Committee on Governmental Affairs:

S. Res. 247. An original resolution waiving section 303(a) of the Congressional Budget Act of 1974 with respect to S. 1527 as reported by the Committee on Governmental Affairs; to the Committee on the Budget.

S. Res. 248. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1527; to the Committee on the Budget.

By Mr. D'AMATO:

S. Res. 249. Resolution to honor the achievements of Antonio Meucci; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BRADLEY (for himself and Mr. D'AMATO):

S. 1807. A bill consenting to a modification in the Delaware River Basin compact relating to the rate of interest on bonds issued by the Delaware River Basin Commission; to the Committee on the Judiciary.

MODIFICATION IN THE DELAWARE RIVER BASIN COMPACT

Mr. BRADLEY. Mr. President, it is with great pleasure that I send the following bill to the desk on behalf of myself and the distinguished Senator from New York, Mr. D'AMATO. The purpose of this legislation is to give the Delaware River Basin Commission the ability to raise revenues to finance important water projects to ensure adequate water supplies in the region. Specifically, the compact will allow the DRBC to charge precompact water users for new water storage projects—which have been deemed vital to assure adequate water supplies during dry and drought periods.

Mr. President, in 1961, the Delaware River Basis compact was formed by the four basin States of Delaware, New Jersey, New York, Pennsylvania, and the United States. In the case of this compact, Congress did not merely ratify an agreement among States, but joined the U.S. Government as an equal party. The purpose of the compact was to establish a forum or agency in which the five parties could jointly exercise their sovereign powers in water resource management for the common interest of all people in the region who use our water and related land resources.

One of the essential water resource considerations is how to ensure the availability of and safe water supplies—for both exisiting and future users. There remains today and for decades to come more than enough water to meet present and future needs in the basin—but to do so requires management agencies to muster the financial, political, and public support to meet those needs.

In the past few years, it has become obvious that there is a need to upgrade water resource facilities in the basin. In particular, the Delaware River Basin Commission has recommended additional storage at two reservoirs in Pennsylvania. These projects are designed to augment water supply and improve water quality, salinity protection, and flood control. The time has come to move ahead with the construction of these water supply projects as unanimously agreed to by the Governors of the four basin States and the mayor of New York City.

Mr. President, the combined non-Federal cost of the two projects is in the $150 million range. The legislation I am introducing today would allow the Delaware River Basin Commission to establish a fair and equitable system to raise revenue to support these water projects. Mr. President, this legislation does not ask the Federal Government to pay for these water projects. Instead, it allows the Delaware River Basin Commission to charge users of the water for these projects. The present compact allows the commission to charge only postcompact users for new water storage projects. This bill would modify the compact so that precompact users could also be charged. The cost of these projects would be minimal; a family of four would experience a rise in their water utility bill of just 5 cents a month.

The drought conditions experienced in the Delaware basin during 1980–81 and again since August 1984, before Hurricane Gloria, underscore the necessity for these two vital water storage projects. The modification of the compact provided in this legislation will greatly assist us in furnishing that needed storage. Mr. President, the days of relying upon major subsidies by the Federal Treasury have ended. With this resolution the users of the Delaware River Basin, under a fair and equitable arranagement, will be able to share the cost of developing our basic water needs.

Mr. D'AMATO. Mr. President, I rise today in support of the legislation to amend section 15.1(b) of the Delaware River Basin Commission compact. I commend my colleague, Senator BRADLEY, for his leadership on this issue.

This legislation will give the commission the revenue base it needs to support the non-Federal share of vital reservoir storage projects.

Mr. President, it is no secret that New York has experienced serious water shortages recently, and I believe that we must make a high priority of taking long-term preventative measures to ease these shortages. The Delaware River Basin Commission was established to confront this type of challenge, and I am here today to emphasize my support for their efforts to develop, conserve, and protect the ground and surface water resources throughout the Delaware River Basin.

When the Congress ratified the compact which established the commission in 1961, it specifically prohibited the commission from imposing any charges for water withdrawals of diversions from the basin if such withdrawals or diversions could lawfully have been made without charge on the effective date of the compact. However, it is clear that conditions within the basin have substantially changed since enactment of the compact in 1961, and that the cost of providing a safe and secure supply of water cannot be effectively financed and repaid solely by the class of postcompact water users now subject to charges.

The legislation I am cosponsoring today is unanimously supported by the Governors of the four basin States and the mayor of New York City. I urge the Senate to act quickly to approve this vital legislation.

Thank you, Mr. President.

By Mr. WALLOP:

S. 1808. A bill to amend the Internal Revenue Code of 1954 to exempt from taxation corporations or trusts which acquire and manage real property for certain exempt organizations, and for other purposes; to the Committee on Finance.

REAL PROPERTY MANAGEMENT BY CERTAIN NONPROFIT ORGANIZATIONS

● Mr. WALLOP. Mr. President, I rise today before the Senate to introduce a bill designed to help alleviate the financial uncertainty faced by many nonprofit organizations.

This legislation is designed to allow pension funds, Government retirement funds, and organizations exempt under section 501(c)(3) of the Internal Revenue Code to pool their resources along with other small entities in

order to invest in real estate. Private foundations, charities, and colleges with small endowments will benefit markedly from the provisions of the bill, yet the U.S. Treasury will experience no revenue loss because of it.

As a result of the recent piecemeal changes in tax laws regarding real estate investment by tax-exempt groups, opportunities currently available only to the largest of them are not within reach of the smaller ones. Pension trusts, government plans, and educational institutions are allowed, because of amendments to the code made in 1980 and 1984, to invest in leveraged real estate without being held liable for taxes on the income produced thereby, but the smaller organizations such as private foundations and charities are not able to take advantage of this.

My bill will provide the means whereby tax-exempt entities are able not only to debt-finance real estate transactions, but to combine their funds with other like groups to diversify their relatively limited dollars into investments which would have been too costly for them to consider on their own. This legislation also enables charities which invest to obtain corporate limited liability, and to retain extensive control over the management of their investments because the bill limits investors to 35 and requires that a majority in interest be allowed to replace the investment manager.

Mr. President, we know that the eradication of our Government's debt mandates across-the-board belt tightening. This reality makes investment freedom more important than ever for tax-exempt organizations. The legislation I introduce today would correct inequities and expand the opportunities to these organizations to invest in real property by creating a new corporate investment entity free of current restrictions, and to retain control over their investments in the new vehicle through mandatory safeguards included in the bill.●

By Mr. DOLE (by request):

S. 1809. A bill to amend the Tariff Schedules of the United States to permit the importation of furskins from the Union of Soviet Socialist Republics; to the Committee on Finance.

IMPORTATION OF SOVIET FURSKINS

Mr. DOLE. Mr. President, at the request of the President, I introduce a bill today which would remove the 34-year-old prohibition against the importation of seven types of furskins from the Soviet Union.

The bill is a result of negotiations in May 1985 between United States Secretary of Commerce Baldrige and Soviet Foreign Minister Patolichev, and is reflective of the President's policy to seek a more constructive trade relationship with the Soviets. It is designed to implement commitments made at the trade talks and to improve trade opportunities between United States and Soviet firms.

Elimination of the current import ban will have minimal effect on the domestic furskin industry, as the United States produces only one of the seven embargoed furs, mink, in a significant quantity. Moreover, more than 80 percent of our domestic mink production is exported and therefore has long competed with Soviet furs in the world market. All Soviet furs imported into the United States would, of course, continue to be subject to the higher rates of duty which apply to countries not entitled to our most favorable tariff treatment.

I ask unanimous consent that the text of the bill be printed in the RECORD together with the letter of transmittal from the Secretary of Commerce.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. FURSKINS.

The headnotes to subpart B of part 5 of schedule 1 of the Tariff Schedules of the United States are amended by striking out headnote 4.

SEC. 2. EFFECTIVE DATE.

The amendment made by this Act shall apply to articles entered, or withdrawn from warehouse, for consumption after the date that is 15 days after the date of enactment of this Act.

SECRETARY OF COMMERCE
Washington, DC, June 28, 1985.

Hon. GEORGE BUSH,
President of the Senate,
Washington, DC.

DEAR MR. PRESIDENT: At the conclusion of a meeting of the Joint U.S.-U.S.S.R. Commercial Commission in May, I announced that the Administration intended to propose legislation that would eliminate a 34-year old ban on the importation from the Soviet Union of seven types of furskins. I took this action in order to further the President's policy of seeking a more constructive working relationship with the Soviet Union, and to reciprocate a commitment by Soviet Foregn Trade Minister Patolichev to improve the market access and business prospects for American firms in the Soviet Union.

Accordingly, I am enclosing six copies of a draft bill—"To amend the Tariff Schedules of the United States to permit the importation of furskins from the Union of Soviet Socialist Republics, and for other purposes." Together with a statement of purpose and need.

We have been advised by the Office of Management and Budget that there is no objection to the submission of this legislation to the Congress, and that enactment of this legislation would be in accord with the program of the President.

Sincerely,

MALCOLM BALDRIGE,
Secretary of Commerce.

By Mr. SYMMS (for himself, Mr. NICKLES, Mr. HECHT, and Mr. MCCLURE):

S. 1810. A bill to require U.S. representatives to international financial institutions to oppose assistance by such institutions for the production of agricultural commodities in competition with U.S.-produced agricultural commodities, and for other purposes; to the Committee on Foreign Relations.

FOREIGN AGRICULTURAL INVESTMENT REFORM (FAIR) ACT

● Mr. SYMMS. Mr. President, today I am introducing a bill to prevent the use of taxpayers dollars to finance our agricultural export competition overseas. This bill, entitled the Foreign Agricultural Investment Reform [FAIR] Act, has already been attached to S. 1714, the Agriculture, Food, Trade, and Conservation Act of 1985.

There are several reasons why I feel the bill should also be introduced in free-standing form. First, it will invite the full consideration of the Senate committee process. Second, seeing as Congressmen BOULTER and CRAIG are introducing identical legislation in the House of Representatives today, it provides an opportunity for our colleagues in that body to show their support for the legislation.

And lastly, the farm bill which we are now considering has yet many hurdles to overcome before becoming law. The FAIR provision may not survive a conference with the House, or the President may veto the farm bill all together. The problems which FAIR addresses are too immediate to be lost in this way.●

By Mr. CHAFEE:

S. 1811. A bill to temporarily suspend the duty on frozen cranberries; to the Committee on Finance.

SUSPENSION OF DUTY ON FROZEN CRANBERRIES

● Mr. CHAFEE. Mr. President, the bill I introduce today would suspend for 5 years the existing 6-percent duty on imported frozen cranberries. This bill will eliminate the anomaly in current tariff rates which assess no duty on imported fresh cranberries, but impose a 6-percent duty on the same frozen cranberries.

The existing duty on imported frozen cranberries creates a logistical problem for cranberry producers on both sides of the border. In order to avoid an increase in the shipping costs, cranberry growers must ship their fresh cranberries immediately over the border or be subject to the increased duties. This financial pressure undermines the ability of producers to make logical decisions as to where freezers should be constructed for storage of cranberries.

This duty suspension is in the best interest of the industry and of consumers who pay the ultimate cost and would allow the industry flexibility in its development and marketing.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1811

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. TEMPORARY SUSPENSION OF DUTY ON FROZEN CRANBERRIES.

Subpart B of part 1 of the Appendix to the Tariff Schedules of the United States is amended by inserting in numerical sequence the following new item:

"903.63	Cranberries, frozen (provided for in item 146.71)	Free	No change	On or before 9/30/90"

SEC. 2. EFFECTIVE DATE.

The amendment made by this Act shall apply to articles entered, or withdrawn from warehouse, for consumption after the date that is 15 days after the date of enactment of this Act.●

By Mr. LEAHY:

S. 1812. A bill to provide for the establishment of a voluntary milk adjustment program; to the Committee on Agriculture, Nutrition, and Forestry.

ESTABLISHMENT OF VOLUNTARY MILK ADJUSTMENT PROGRAM

● Mr. LEAHY. Mr. President, I rise today to introduce S. 1812, a bill which would reduce Government costs for the purchase of surplus dairy products. Mr. President, the dairy farmers of this country share this body's desire to reduce the deficit which threatens our economy. They know that the Government cannot continue to expend extraordinary amounts for farm programs.

The American farm economy is now producing record amounts of products, much of which have no home within the normal market framework. Dairy is not unique. The amount of dairy cattle now on farms has increased 3 percent from the same period last year. This bill would provide for a reduction in the number of cattle, thereby reducing the amount of dairy products produced by this Nation's dairy farmers. Government costs for surplus products would decrease if this bill were approved. Finally, dairy producers wishing to exit the industry in an orderly manner would be encouraged to do so under this legislation. I urge my colleagues to review this proposal.●

By Mr. CHAFEE (for himself and Mr. SARBANES):

S. 1813. A bill to amend and extend the Atlantic Striped Bass Conservation Act, and for other purposes; to the Committee on Environment and Public Works.

EXTENSION AND AMENDMENT OF ATLANTIC STRIPED BASS CONSERVATION ACT

Mr. CHAFEE. Mr. President, it was nearly 1 year ago that Congress enacted the Atlantic Striped Bass Conservation Act. Without further action by Congress, the law will expire in April. To keep this important law in effect and to strengthen and improve it, I am pleased to introduce a bill to amend and extend the Atlantic Striped Bass Conservation Act.

Many of our coastal fish have undergone a precipitious decline during the last decade. More efficient commercial fishing methods, increased recreational fishing, lower production, and polluted habitat are some of the factors responsible for this decline. Without question, we need to improve the conservation and management of all migratory fish. The best example of this problem, perhaps more accurately referred to as "the worst example," is the striped bass situation.

In addition to the historical significance of the striped bass, the striper is today prized as a delectable tablefish as well as a gamefish. This magnificent creature has deservedly been called the aquatic equivalent of the American bald eagle. The possible loss of the striper has alarmed fishermen, scientists, and people concerned about the environment generally.

Last year, I introduced a bill that went well beyond the law we finally passed. That bill would have established an immediate Federal moratorium on the taking of striped bass and a system for effective interstate control of all migratory fish species and their habitat. I continue to believe that controls on fishing are only part of the answer. Habitat preservation and control of environmental contaminants may be even more important.

Nevertheless, effective interstate controls on fishing are needed. This is true for migratory fish generally and for striped bass in particular. Proposals to institute Federal control of migratory fish usually become embroiled in controversy. No one objects to Federal control of migratory birds such as ducks, so why do people use claims of States' rights to object to Federal control of migratory fish such as stiped bass.

This problem goes beyond striped bass but our immediate concern is the striper and the fact that the law we passed last year, and the threat of a Federal moratorium to force State compliance with the Atlantic States Marine Fisheries Commission's interstate management plan for striped bass, is about to expire.

Last year's law called upon the Departments of the Interior and Commerce to evaluate the adequacy and effectiveness of the Commission's 1981 plan for striped bass, including the 1983 amendment calling for a 55-percent reduction in fishing mortality. That report was transmitted to Congress in May of this year and confirmed what many of us already suspected: The plan's call for a 55-percent reduction in fishing mortality will result in more stripers but it will not be enough to assure survival of the species.

The law also directed the Commission to report on how well the plan is being implemented by the various States and authorized the Federal Government to impose a moratorium on the taking of striped bass in any State that is not in compliance with the interstate plan. These provisions provide the guts of the law.

It is encouraging that the Commission recognized the shortcomings of the plan and adopted yet another amendment to the plan in June. A copy of that amendment, known as amendment No. 3, is attached to my statement. This may do the trick. It is designed to ensure that 95 percent of all female stripers hatched in the Chesapeake Bay in 1982 have a chance to reproduce at least once before being caught.

Mr. President, the individual States have taken great strides since last year. In my own State of Rhode Island, two regulations were passed by the State council to comply with the 55-percent reduction called for in the interstate plan. Since July, all bass catches have been limited to fish 24 inches and longer and earlier this month a ban on netting striped bass went into effect. There has been a great deal of attention paid to this problem and a lot of action over the past several months. Everyone should take great pride in what has been accomplished. But the question remains: Have we done enough to save the fish for future generations of fishermen and striper enthusiasts.

Commercial fishermen, consumers, and sport fishermen will all benefit in the long run if this magnificant species is saved. Hopefully, the measures we have taken to date are having a positive effect. That would account for the reports of increased sightings by numerous fishermen. However, we must be careful not to overreact and roll the clock back too soon. More remains to be done. To assure long-term survival of the striper we must not be lulled into a false sense of early success.

The bill I am introducing today will establish June 1987 as the outside date by which each Atlantic coastal State must come into compliance with the Commission's recently adopted amendment No. 3. It will extend last year's law authorizing the imposition of a Federal moratorium in those States that do not comply with the interstate plan. This bill will also strengthen the role of the Federal Government in evaluating the actions and findings of the Atlantic States Marine Fisheries Commission with respect to striped bass. A section-by-section analysis of the bill is attached to this statement.

These amendments are based upon information presented at a hearing I held last July. It is my intention to move quickly on this bill and to have legislation enacted prior to the April 1986 expiration of the current law.

Mr. President, I ask unanimous consent that the attached copies of amendment No. 3 to the plan, a section-by-section analysis and the text of my bill be printed in the RECORD.

There being no objection the material was ordered to be printed in the RECORD, as follows:

S. 1813

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DEFINITIONS.

Paragraphs (3) and (4) of section 3 of the Atlantic Striped Bass Conservation Act (16 U.S.C. 1851 note) are amended to read as follows:

"(3) The term 'coastal waters' means—

"(A) for each coastal State referred to in paragraph (4)(A)—

"(i) all waters, whether salt or fresh, of the coastal State shoreward of the baseline from which the territorial sea of the United States is measured; and

"(ii) the waters of the coastal State seaward from the baseline referred to in clause (i) to the inner boundary of the exclusive economic zone;

"(B) for the District of Columbia, those waters within its jurisdiction; and

"(C) for the Potomac River Fisheries Commission, those waters of the Potomac River within the boundaries established by the Potomac River Compact of 1958.

"(4) The term 'coastal State' means

"(A) Pennsylvania and each State of the United States bordering on the Atlantic Ocean north of the State of South Carolina;

"(B) the District of Columbia; and

"(C) the Potomac River Fisheries Commission established by the Potomac River Compact of 1958.".

SEC. 2. COMMISSION FUNCTIONS.

(a) Section 4(a) of the Atlantic Striped Bass Conservation Act (16 U.S.C. 1851 note) is amended by—

(1) inserting "(1)" immediately before "The Commission shall decide";

(2) striking "June 1985" and inserting in lieu thereof "June 1987";

(3) striking the period at the end thereof and inserting the following "and shall, not later than July 30, 1987, submit to the Secretaries a report setting forth the measures that each coastal State has taken to fully implement the Plan in its coastal waters."; and

(4) adding the following new paragraph—

"(2) The Commission shall decide during June 1986 whether each coastal State is taking all measures necessary to fully implement Amendment 3 to the Plan in its coastal waters by a date not later than June 1, 1987. The Commission shall immediately notify the Secretaries of each negative determination made by it under the preceding sentence and shall, not later than July 30, 1986, submit to the Secretaries a report setting forth the measures that each coastal State is taking to fully implement the Plan in its coastal waters.".

(b) Section 4(d) of the Atlantic Striped Bass Conservation Act (16 U.S.C. 1851 note) is amended to read as follows:

"(d) SECRETARIAL ACTION.—The Secretaries shall determine, either jointly or individually after consultation with each other, whether each coastal State is in compliance with the Plan and, if a coastal State is not in compliance, the Secretaries shall declare, either jointly or individually after consultation with each other, a moratorium on fishing for Atlantic striped bass within the coastal waters of that coastal State. The determinations referred to in the preceding sentence shall be made not later than 30 days after receiving notice from the Commission (1) under subsection (a)(1) that a coastal State has not taken the action described in that paragraph; or (2) under subsection (a)(2) that a coastal State is not taking the actions described in that paragraph; or (3) under subsection (c) of the results of the monitoring under subsection (b); or not later than 30 days after the date upon which reports from the Commission under paragraphs (1) or (2) of subsection (a) are to be submitted.".

SEC. 3. MORATORIUM PERIOD

Section 5(a)(2) of the Atlantic Striped Bass Conservation Act (16 U.S.C. 1851 note) is amended by striking "the Commission notifies the Secretary that that State" and inserting in lieu thereof "the Secretaries determine that the coastal State in question".

SEC. 4. AUTHORIZATION OF APPROPRIATIONS.

Section 7 of the Atlantic Striped Bass Conservation Act (16 U.S.C. 1851 note) is amended by striking "fiscal year 1986" and inserting in lieu thereof "fiscal years 1986, 1987, 1988 and 1989".

SEC. 5. EFFECTIVE PERIOD.

Section 9 of the Atlantic Striped Bass Conservation Act (16 U.S.C. 1851 note) is amended by striking "and shall cease to have force and effect 18 months after the date of enactment of this Act".

AMENDMENT TO THE ATLANTIC STATES MARINE FISHERIES COMMISSION'S INTERSTATE FISHERY MANAGEMENT PLAN FOR THE STRIPED BASS

In order to meet the goal of the original 1981 Striped Bass Management Plan, which is to maintain a spawning stock, minimize the possibility of recruitment failure and to insure rebuilding of the severely depleted Chesapeake spawning stock, an additional third amendment is approved.

This measure is designed to supplement the management measures already in place through the 1981 Plan and its amendments. In the event this amendment is repealed or superseded, the 1981 Plan and previously adopted amendments will remain in effect until and unless the Commission acts to modify or replace them.

The ISFMP for Striped Bass is hereby amended as follows. The effective date of this amendment is July 1, 1985.

Objective 1. That the states reduce fishing mortality on the 1982 year class females, and females of all subsequent year classes of Chesapeake Bay stocks, to zero until 95% of the females of these year classes have an opportunity to reproduce at least once. This objective is intended to apply to the fishery until the 3-year running average of Maryland young-of-year index attains 8.0. Management measures which will accomplish this objective include combinations of the following which insure that no fishing mortality occurs on the target year classes:

(a) Total closures of striped bass fisheries. Where a state has closed its fishery, neighboring states and jurisdictions whose waters border on or are tributary to those which are closed should take complementary actions to insure the enforceability of such closures.

(b) Establishment of minimum size limits below which 95% of females have spawned at least once.

(c) Establishment of minimum size limits in combination with seasonal closures which insure that sub-adult females are not taken in open fisheries.

(d) Elimination of any allowable bycatch below minimum lengths.

Such measures need to be made effective prior to the time at which 1982 year class females become exploitable under a given jurisdiction's regulations.

Objective 2. That the Striped Bass Board support restoration efforts in the Delaware River system including the Delaware Bay and that a moratorium on striped bass fishing in the Delaware Bay system be implemented upon the onset of restoration efforts.

SUMMARY OF AMENDMENTS TO ATLANTIC STRIPED BASS CONSERVATION ACT

Section 1. Amends definitions of "coastal waters" and "coastal State" to include the District of Columbia and the Potomac River Fisheries Commission.

Section 2(a). Directs the Commission to decide in June 1987 whether each coastal State has fully implemented the Plan, including Amendment 3 to the Plan. Negative findings must be transmitted to the Secretaries immediately. By July 30, 1987, the Commission must file a report on each coastal State's implementation of the Plan.

During June 1986, the Commission must decide whether each coastal State is taking all measures necessary to be in compliance with Amendment 3 to the Plan by June 1, 1987. Negative findings must be transmitted to the Secretaries immediately. By July 30, 1986, the Commission must file a report on each coastal State's progress toward implementation of the Plan.

Section 2(b). After considering the findings and reports filed in a timely manner by the Commission, the Secretaries of the Interior and Commerce shall determine, either jointly or individually after consultation with each other, whether each coastal State is in compliance with the Plan. The first determination shall be made in August 1986 and shall consider whether each coastal State is taking all measures necessary to fully implement Amendment 3 to the Plan by June 1, 1987. The second determination shall be made in August 1987 and shall consider whether each coastal State is in full compliance with the Plan. Subsequent determination shall be made on a biannual basis and shall consider whether each coastal State is adequately enforcing the Plan.

Upon determining that a particular coastal State is not in compliance with the Plan or is not adequately enforcing the Plan, the Secretaries shall declare, either jointly or individually after consultation with each other, the Commission and the affected State, a moratorium on fishing for striped bass in that State's coastal waters. The moratorium shall last until the State takes corrective action.

Section 3. Amends the definition of "moratorium period" to shift responsibility for determining the end of such period from the Commission to the Secretaries.

Section 4. Extends the current authorization of appropriations through fiscal year 1989.

Section 5. Removes the 18 month sunset provision in current law.

By Mr. NUNN (for himself, Mr. MATTINGLY, Mr. GOLDWATER, Mr. CHILES, Mr. HOLLINGS, Mr. STENNIS, Mr. PRYOR, Mr. BENTSEN, Mr. BOREN, Mr. HEFLIN, Mr. ZORINSKY, Mr. LAXALT, Mr. DURENBERGER, Mr. CHAFEE, Mr. INOUYE, Mr. HELMS, Mr. BUMPERS, Mr. BOSCHWITZ, Mr. HATFIELD, Mr. DIXON, and Mr. LEVIN):

S.J. Res. 229. Joint resolution designating the week of January 13 through 19, 1986, as "National Productivity Improvement Week"; to the Committee on the Judiciary.

NATIONAL PRODUCTIVITY IMPROVEMENT WEEK

● Mr. NUNN. Mr. President, for several years it has been my pleasure to introduce a Senate joint resolution designating a week as "National Productivity Improvement Week." I am once again pleased to offer the joint resolution designating January 13 through 19, 1986, as "National Productivity Improvement Week."

American productivity brought this Nation to the economic leadership of the world. While America still leads in productivity, other nations are closing the gap. Since the seventies, the rate of productivity improvement of other countries—especially Japan—has exceeded that of the United States. Many economists predict that the United States will eventually lose its productivity leadership unless improvements are made in U.S. productivity. Therefore, it is very important that we continue efforts to promote productivity improvement and awareness.

When productivity here isn't doing as well as abroad, then the United States faces a major problem: An imbalance of trade. Now well in excess of $100 billion, the U.S. trade deficit looms as a threat to the standard of living in this country. As Dr. Allen S. Puckett, head of Hughes Aircraft Corp., so succinctly put it: "We can't continue to buy products we didn't make with dollars we didn't earn."

Just as ominous as the trade deficit is the threat of high inflation—and here again we can focus on productivity as a deciding force. Why is this so? Because inflation has a snowball effect. Our economy has become accustomed to at least some inflation, and by now paychecks often are arbitrarily increased from time to time based solely on the so-called cost-of-living index. Remember, whenever a company incurs this kind of expense without a corresponding increase in productivity, it has to be made up somewhere. And of course you know where it's made up—with higher price tags on the goods and services offered.

Then we're off on another round of the dangerous inflation cycle. Obviously, this danger dovetails right into the trade deficit problem when higher prices of U.S. goods make less expensive foreign-produced goods more attractive to the American consumer.

Besides price considerations, of course, is the comparison of quality. Quality should be an integral part of any productivity program. The two together add up to the excellence which brought our Nation to the forefront in world economy in the first place.

Industrial engineers and others working with these professionals are spreading the word about the importance of productivity improvement. They're encouraging organizations of all sizes to take immediate steps to set up meaningful productivity programs.

In business, in industry and in Government, management can help by carefully reviewing their organization's method of doing business. For example, workflow needs study to determine what wasted time or materials can be eliminated. Just as importantly, management needs to review its workforce relationships. Employees are motivated by being made part of the productivity planning team, yet many organizations fail to take advantage of this fact.

Those anywhere on the labor ladder must do their part to foster a strong team effort on the job. An attitude of cooperation in itself goes a long way toward productivity improvement. This has been proved time and again—a company with positive attitudes of management and labor working together almost always becomes a creative and successful entry into the marketplace.

For several years, it has been my pleasure to introduce this joint resolution on behalf of the Institute of Industrial Engineers. The American Institute of Industrial Engineers has been very successful in their public information campaign in promoting a better understanding of the critical aspects of productivity improvement. Throughout the month of January, the Institute will conduct its seventh annual productivity awareness campaign as a public information service. "Productivity Plus Quality Equals Excellence" is the theme for the 1986 campaign.

I hope that my Senate colleagues will join me in cosponsoring this joint resolution designating January 13 through 19, 1986 as "National Productivity Improvement Week." I urge the Senate to act expeditiously on this joint resolution.●

ADDITIONAL COSPONSORS

S. 85

At the request of Mr. DECONCINI, the name of the Senator from Massachusetts [Mr. KERRY] was added as a cosponsor of S. 85, a bill to amend title 38, United States Code, to revise the formula for the payment of dependency and indemnity compensation [DIC] to the surviving spouses of veterans who die on active duty or from service-connected disability.

S. 524

At the request of Mr. ARMSTRONG, the name of the Senator from Kansas [Mr. DOLE] was added as a cosponsor of S. 524, a bill to recognize the organization known as the Retired Enlisted Association, Inc.

S. 558

At the request of Mr. MOYNIHAN, the name of the Senator from Texas [Mr. BENTSEN] was added as a cosponsor of S. 558, a bill to amend the Internal Revenue Code of 1954 to permanently exclude educational assistance programs from gross income, and for other purposes.

S. 571

At the request of Mr. D'AMATO, the name of the Senator from Utah [Mr. HATCH] was added as a cosponsor of S. 571, a bill to amend subchapter II of chapter 53 of title 31, United States Code, relating to currency reports.

S. 853

At the request of Mr. PRYOR, the name of the Senator from Connecticut [Mr. DODD] was added as a cosponsor of S. 853, a bill to amend the Trade Act of 1974 to allow watches to be designated as eligible articles for purposes of the generalized system of preferences.

S. 1104

At the request of Mr. WEICKER, the name of the Senator from Vermont [Mr. LEAHY] was added as a cosponsor of S. 1104, a bill to revise the provisions of the Public Health Service Act relating to health planning.

S. 1181

At the request of Mr. HATCH, the names of the Senator from South Carolina [Mr. THURMOND], and the Senator from Massachusetts [Mr. KERRY] were added as cosponsors of S. 1181, a bill to establish a program for the provision of home and community-based services to elderly individuals.

S. 1363

At the request of Mr. KENNEDY, the name of the Senator from Michigan [Mr. RIEGLE] was added as a cosponsor of S. 1363, a bill to prohibit the use of the mails to send dangerous martial arts weapons.

S. 1591

At the request of Mr. LEVIN, the name of the Senator from Pennsylvania [Mr. SPECTER] was added as a cosponsor of S. 1591, a bill to recognize the organization known as the American Philatelic Society.

S. 1624

At the request of Mr. DECONCINI, the name of the Senator from Virginia [Mr. TRIBLE] was added as a cosponsor of S. 1624, a bill to make ineligible for certain agricultural program benefits persons who are convicted under Federal or State law of planting, cultiva-

tion, growing, or harvesting of controlled substances.

S. 1742

At the request of Mr. TRIBLE, the name of the Senator from Arizona [Mr. DECONCINI] was added as a cosponsor of S. 1742, a bill to improve the enforcement of the restrictions against imported pornography.

S. 1778

At the request of Mr. BENTSEN, the names of the Senator from North Dakota [Mr. ANDREWS], and the Senator from South Carolina [Mr. THURMOND] were added as cosponsors of S. 1778, a bill to deny most-favored-nation trade treatment to any country that provides support for acts of terrorism.

S. 1806

At the request of Mr. BOREN, the name of the Senator from Mississippi [Mr. STENNIS] was added as a cosponsor of S. 1806, a bill to amend the Federal Election Campaign Act of 1971 to change certain contribution limits for congressional elections and to amend the Communications Act of 1934 regarding the broadcasting of certain material regarding candidates for Federal elective office, and for other purposes.

SENATE JOINT RESOLUTION 74

At the request of Mr. THURMOND, the name of the Senator from New Mexico [Mr. DOMENICI] was added as a cosponsor of Senate Joint Resolution 74, a joint resolution to provide for the designation of the month of February 1986 as "National Black (Afro-American) History Month."

SENATE JOINT RESOLUTION 134

At the request of Mr. BIDEN, the name of the Senator from Oklahoma [Mr. NICKLES] was added as a cosponsor of Senate Joint Resolution 134, a joint resolution to designate "National Safety in the Workplace Week."

SENATE JOINT RESOLUTION 203

At the request of Mr. HATCH, the name of the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from Florida [Mrs. HAWKINS], the Senator from Hawaii [Mr. MATSUNAGA], the Senator from Vermont [Mr. STAFFORD], and the Senator from Ohio [Mr. GLENN] were added as cosponsors of Senate Joint Resolution 203, a joint resolution to designate November 6, 1985, as "Ignacy Jan Paderewski Day."

SENATE JOINT RESOLUTION 219

At the request of Mr. HATCH, the names of the Senator from Mississippi [Mr. COCHRAN], the Senator from Kansas [Mr. DOLE], the Senator from Oregon [Mr. HATFIELD], the Senator from Pennsylvania [Mr. HEINZ], the Senator from Idaho [Mr. MCCLURE], the Senator from Alaska [Mr. STEVENS], the Senator from South Carolina [Mr. THURMOND], the Senator from Vermont [Mr. STAFFORD], the Senator from Indiana [Mr. QUAYLE], the Senator from Florida [Mrs. HAWKINS], the Senator from Connecticut [Mr. WEICKER], the Senator from New Jersey [Mr. BRADLEY], the Senator from California [Mr. CRANSTON], the Senator from Arizona [Mr. DECONCINI], the Senator from South Carolina [Mr. HOLLINGS], the Senator from New York [Mr. MOYNIHAN], the Senator from Mississippi [Mr. STENNIS], the Senator from Ohio [Mr. METZENBAUM], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Rhode Island [Mr. PELL], the Senator from Hawaii [Mr. MATSUNAGA], the Senator from Connecticut [Mr. DODD], the Senator from Illinois [Mr. SIMON], the Senator from Massachusetts [Mr. KERRY], and the Senator from Michigan [Mr. LEVIN] were added as cosponsors of Senate Joint Resolution 219, a joint resolution to designate the week of November 3, 1985, through November 9, 1985, as "National Humanities Week, 1985."

SENATE JOINT RESOLUTION 224

At the request of Mr. EAGLETON, the names of the Senator from Georgia [Mr. MATTINGLY], the Senator from Nevada [Mr. LAXALT], the Senator from Connecticut [Mr. WEICKER], the Senator from Vermont [Mr. STAFFORD], the Senator from Minnesota [Mr. DURENBERGER], the Senator from Florida [Mrs. HAWKINS], the Senator from Pennsylvania [Mr. HEINZ], the Senator from Texas [Mr. GRAMM], the Senator from Iowa [Mr. GRASSLEY], the Senator from Indiana [Mr. QUAYLE], the Senator from Michigan [Mr. LEVIN], and the Senator from Utah [Mr. GARN] were added as cosponsors of Senate Joint Resolution 224, a joint resolution to designate November 30, 1985 as "National Mark Twain Day."

SENATE JOINT RESOLUTION 226

At the request of Mr. RIEGLE, the names of the Senator from Illinois [Mr. SIMON], the Senator from North Dakota [Mr. ANDREWS], the Senator from Rhode Island [Mr. CHAFEE], the Senator from Louisiana [Mr. JOHNSTON], the Senator from Arkansas [Mr. BUMPERS], the Senator from Hawaii [Mr. INOUYE], the Senator from Massachusetts [Mr. KERRY], the Senator from Minnesota [Mr. DURENBERGER], the Senator from Hawaii [Mr. MATSUNAGA], and the Senator from New Jersey [Mr. BRADLEY] were added as cosponsors of Senate Joint Resolution 226, a joint resolution to designate the week of April 6, 1986, through April 12, 1986, as "World Health Week," and to designate April 7, 1986, as "World Health Day."

SENATE RESOLUTION 247—ORIGINAL RESOLUTION REPORTED WAIVING CONGRESSIONAL BUDGET ACT

Mr. ROTH, from the Committee on Governmental Affairs, reported the following original resolution; which was referred to the Committee on the Budget:

S. RES. 247

Resolved, That, pursuant to section 303(c) of the Congressional Budget Act of 1974, section 303(a) of that Act be waived with respect to the consideration of S. 1527, the Federal Retirement Reform Act of 1985, a bill to provide supplemental retirement benefits for employees of the federal civilian service who are covered by Social Security as mandated by the Social Security Amendments of 1983.

S. 1527 would violate section 303(a) of the Congressional Budget Act of 1974 because the bill provides new spending authority as described in 401(c)(2)(C) of that Act to become effective during fiscal year 1987, before the first concurrent resolution on the budget for fiscal year 1987 has been agreed to.

The budget authority provided in S. 1527 authorizes contributions from the employee and the employing agency to the pension system to fund future retirement benefits and authorizes the payment of entitlement benefits to individuals qualifying for such benefits under the provisions of S. 1527.

SENATE RESOLUTION 248—ORIGINAL RESOLUTION REPORTED WAIVING CONGRESSIONAL BUDGET ACT

Mr. ROTH, from the Committee on Governmental Affairs, reported the following original resolution; which was referred to the Committee on the Budget:

S. RES. 248

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 1527, the Federal Retirement Reform Act of 1985, a bill to provide supplemental retirement benefits for employees of the federal civilian service who are covered by Social Security as mandated by the Social Security Amendments of 1983.

S. 1527 would violate section 402(a) of the Congressional Budget Act of 1974 because it authoritizes the enactment of new budget authority for fiscal year 1986 and was reported after the July 8, 1985 deadline. The delay in reporting S. 1527 was occasioned by the complexities of developing legislation that meets the retirement needs of civilian employees while restraining the growth in pension expenditures.

The waiver of 402(a) is necessary to permit timely consideration of the legislation prior to the expiration of the interim retirement plan on December 31, 1985.

SENATE RESOLUTION 249—HONORING THE ACHIEVEMENTS OF ANTONIO MEUCCI

Mr. D'AMATO submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 249

Whereas the invention of the telephone has revolutionized the modern world, not only in terms of productivity and technological advancement, but also in human terms of bringing nations together and reinforcing the concept of global communication and awareness;

Whereas there exists substantial evidence that this revolutionary creation was first developed by Antonio Meucci, a native of Florence, Italy, and a long-time resident of the United States of America;

Whereas in approximately 1856, Antonio Meucci was the first to experiment with a telephonic device by incorporating a vibrating metallic diaphragm and magnetic coil capable of transmitting the spoken word;

Whereas such device technically comprises what is now designated as a telephone;

Whereas Antonio Meucci was granted a caveat or provisional patent for the telephonic device in 1871 in the United States;

Whereas although the monumental achievement of Antonio Meucci has received recognition in Italy and other countries throughout the world, such recognition has not occurred in the United States of America, where the later years of the life of Antonio Meucci were spent contributing to American scientific progress;

Whereas Antonio Meucci died on October 18, 1889, in the United States on Staten Island in New York, unrecognized for this monumental intellectual achievement;

Whereas millions of people of Italian heritage in the United States, and throughout the world, desire to have recognized the important role of Antonio Meucci in the development of the telephone; and

Whereas the enduring friendship of the United States and Italy allows both to share in the pride of the achievements of the citizens of each: Now, therefore, be it

Resolved, That it is the sense of the Senate that the people of the United States acknowledge the role of Antonio Meucci in the development of the telephone, an achievement rightfully reflected in the pride of individuals of Italian heritage, and that an official delegation of the Senate present this resolution in ceremonies in Washington, D.C. to the Honorable Rinaldo Petrignani, the Ambassador to the United States from the Republic of Italy.

● Mr. D'AMATO. Mr. President, I rise today with great pride to honor the genius of inventor Antonio Meucci. The resolution I am offering affirms the instrumental role Antonio Meucci played in the development of the telephone.

Antonio Meucci, a native of Florence, Italy, settled in Clifton on Staten Island, NY, in 1845, soon after arriving in the United States. Meucci aided Giuseppe Garibaldi, the Italian patriot and general, when he sojourned on Staten Island, and he was closely associated with him from 1850 to 1853. Together they engaged in a number of business enterprises, including a candle factory on Staten Island. A long and endearing friendship and respect for one another developed from this brief association. Garibaldi often referred to Meucci in his letters as his "dearest boss."

Throughout his life, Antonio Meucci liked to call himself a "mechanic electrician;" world history, however, has come to remember him as a pioneer experimenter in telephony. In 1849, with little financial support, Meucci began work on the transmission of speech by electricity. The telephonic device developed by Antonio Meucci incorporated a vibrating metallic diaphragm and a magnet electrified by a coil wrapped it. With the vibrating diaphragm altering the current of the magnet, a diaphragm at the other end of the wire was able to receive the alternations of the current. This device was capable of transmitting the spoken word. In 1871, the U.S. Government granted Antonio Meucci a caveat, or provisional patent, for his telephonic device. During this period, from 1849 to 1871, Meucci created some 30 models of his telephonic instrument.

From 1871 to 1880, Antonio Meucci worked at several other inventions and applied for a number of caveats and patents, including a patent for effervescent drinks, a caveat for refining mineral oil, a patent for a lactometer, a patent for a hygrometer, a patent for ornamental candles, a patent for the prevention of noise on elevated railroads, and, in 1880, patents for electric wire and for an undersea telephone, both of which were still pending at the time of his death.

After 1880 he worked on only two more inventions: One for a new process for making postage and revenue stamps, the patent on which was rejected, and for plastic paste, the patent on which was granted. All of these applications and patents were paid by, and assigned to, third parties: Meucci received little or nothing for them.

In 1880, American businessmen began to take interest in Antonio Meucci's telephone device. On September 22, 1883, Meucci assigned his claims to the Globe Telephone Co. The Globe Co. petitioned the U.S. Government to bring suit against the American Bell Telephone Co. and Prof. Alexander Graham Bell, who was granted a patent for his telephone in 1876. The American Bell Telephone Co. in turn brought suit against the Globe Co. and Meucci for infringements of its patent.

On July 19, 1887, the circuit court of the United States, southern district of New York, entered a judgment against Antonio Meucci in an opinion stating that, "proofs fail to show that he—Meucci—had reached any practical result beyond that of conveying speech mechanically by means of a wire telephone." This was an error. The magnets used in the Meucci experiments were indeed electrified by a battery. The decision was based in large part on flawed evidence and ultimately failed to demonstrate the significant role of Antonio Meucci in the development of the telephcne. The decision upheld that Alexander Graham Bell invented the telephone in 1876. The case was appealed, but Meucci had died by the time the case came up for a hearing in 1891.

The Meucci "speaking telegraph," as he liked to call his invention, is indeed the forerunner of the present-day Bell telephone. But, due to the legal and technical circumstances that ultimately prevailed, Antonio Meucci died in the United States unrecognized for his monumental intellectual achievement in the development of the telephone.

Antonio Meucci died on October 18, 1889. All the New York newspapers devoted considerable space to his passing. The New York Herald printed the following on October 19:

He died in the full belief of the priority of his claim as inventor of the telephone, which he declared must be recognized sooner or later.

Mr. President, I believe it is now time that we in the United States, as millions throughout the world have done already, recognize the achievement of Antonio Meucci. The resolution I am introducing today simply states it is the sense of the Senate that the American people acknowledge the important role of Antonio Meucci in the development of the telephone. I do this in the spirit of friendship that endures between the United States and Italy, which allows us to share in the pride of the achievements of the citizens of each. I therefore ask my colleagues to join me as cosponsors of this tribute to the genius of Antonio Meucci.●

AMENDMENTS SUBMITTED

AGRICULTURE, FOOD, TRADE, AND CONSERVATION ACT

DIXON AMENDMENT NO. 926

Mr. DIXON proposed an amendment to amendment No. 916 to the bill (S. 1714) to expand export markets for United States agricultural commodities, provide price and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, continue food assistance to low-income households, and for other purposes; as follows:

At the end of the pending amendment No. 916, insert the following new section and renumber succeeding sections accordingly:

"SEC. . The requirement for United States-flag transportation imposed by subsection (a) herein shall be subject to the same terms and conditions as provided in section 901(b) of the Merchant Marine Act, 1936, as amended (46 U.S.C. subsection 1241(b)) provided that agricultural commodities or the products thereof shall be shipped at the lowest landed cost (as provided in part 1496 of Title 7 of the Code of Federal Regulations)."

DIXON AMENDMENT NO. 927

Mr. DIXON proposed an amendment to amendment No. 916 proposed by Mr. INOUYE, as amended, to the bill S. 1714, supra; as follows:

At the end of the pending amendment, insert the following new sections and renumber succeeding sections accordingly:

TITLE II—COST EFFICIENCY IN THE SHIPMENT OF UNITED STATES GOVERNMENT CARGOES

FINDINGS

SEC. . The Congress finds that—

(1) it is in the best interests of the United States to maintain a strong merchant marine fleet for the efficient transport of United States Government cargo;

(2) it is in the best interests of the United States to ensure fair and reasonable participation for all four port ranges in the movement of United States Government impelled cargo; and

(3) such cargo should be shipped in the most efficient manner, at the lowest cost to the United States Government, which is not inconsistent with the provisions of section 901(b) of the Merchant Marine Act of 1936 (46 U.S.C. 1241(b)), the joint resolution entitled "Joint Resolution Requiring agricultural or other products to be shipped in vessels of the United States where the Reconstruction Finance Corporation or any other instrumentality of the Government finances the exporting of such products", approved March 26, 1934 (46 U.S.C. 1241-1), section 603 of the Foreign Assistance Act of 1961 (22 U.S.C. 2353), and section 2631 of title 10, United States Code (commonly known as the cargo preference laws).

DEFINITIONS

SEC. . For purposes of this title—

(1) the term "least cost to the United States" means the lowest expense to the United States Government determined by calculating the total cost of a commodity and all related transport costs, including but not limited to inland freight, ocean freight, wharfage, dockage, terminal transfer, stevedoring charges, freight forwarding, customs brokers, and freight differential charges; and

(2) the term "lowest landed cost" means—

(A) in the case of export cargo, all costs associated with the procurement and transportation of cargo from the United States to the port of entry abroad; and

(B) in the case of import cargo, the cost of transporting the cargo from the originating port abroad to the point of final destination in the United States.

SHIPMENT OF UNITED STATES GOVERNMENT CARGO AT LOWEST COST

SEC. . (a) Any agency of the United States that ships, generates, finances, or otherwise impels United States Government cargo shall ship such cargo at the lowest cost to the United States. Such cargo shall be shipped at—

(1) the least cost to the United States if such cargo is—

(A) an agricultural commodity that—

(i) the sale and exportation of which is fully paid by the Commodity Credit Corporation; and

(ii) is exported under an agreement with a foreign nation pursuant to title I of the Agricultural Trade Development and Assistance Act of 1954;

(B)(i) shipped, generated, financed, or otherwise impelled by the Department of Defense; and

(ii) is not cargo shipped at the lowest landed cost pursuant to paragraph (2)(B);

(C) a commodity shipped pursuant to an agreement financed by the Export-Import Bank of the United States;

(D) a commodity shipped pursuant to chapter 4 of part II of the Foreign Assistance Act of 1961 pursuant to an agreement financed under the Commodity Import Program, or any other export generating program administered by the Agency for International Development; or

(E) any other United States Government cargo, except a cargo shipped at the lowest landed cost pursuant to paragraph (2); and

(2) the lowest landed cost to the United States if such cargo is—

(A) an agricultural commodity that—

(i) the sale or donation of which, including freight and associated expenses, is financed by the Commodity Credit Corporation; and

(ii) is exported as assistance or a donation pursuant to title II of the Agricultural Trade Development and Assistance Act of 1954; or

(B) shipped, generated, financed, or otherwise impelled by the Department of Defense and such Department pays all expenses associated with such cargo.

(b) Nothing in the provisions of subsection (a) shall be construed to supercede, or applied inconsistently with the provisions of—

(1) section 901(b) of the Merchant Marine Act of 1936 (46 U.S.C. 1241(b));

(2) the joint resolution entitled "Joint Resolution Requiring agricultural or other products to be shipped in vessels of the United States where the Reconstruction Finance Corporation or any other instrumentality of the Government finances the exporting of such products", approved March 26, 1934 (46 U.S.C. 1241-1);

(3) section 2631 of title 10, United States Code; or

(4) section 603 of the Foreign Assistance Act of 1961 (22 U.S.C. 2353).

PROMPT PAYMENT TO UNITED STATES SHIPPING INTEREST FOR THE SHIPMENT OF UNITED STATES GOVERNMENT CARGO

SEC. . (a) Any agency of the United States that contracts with a foreign entity for the sale or tranfer of United States Government cargo shall include as a term of such contract a provision for—

(1) the prompt payment within thirty days of any cost incurred by a United States shipping interest; and

(2) a late charge or interest penalty based on the principal amount owed, if such prompt payment provision is breached.

(b) If a foreign entity breaches a prompt payment provision of such contract made pursuant to subsection (a)(1), the affected United States shipping interest may petition the Federal agency that negotiated the contract to take action regarding payment. If such foreign entity has not made such payment within thirty days after the filing of the petition, the agency, in cooperation with the affected shipping interest, shall file suit in the appropriate Federal district court for the recovery of such payment and the late charge or interest penalty for late payment.

(c)(1) If the prompt payment provision included as a term of a contract pursuant to subsection (a)(1) provides that a Federal agency shall make such payment to a United States shipping interest and such agency breaches such provision, such shipping interest aggrieved by nonpayment may—

(A) file a petition for such payment and the amount of the late charge or interest penalty included in such contract pursuant to subsection (a)(2); and

(B) after thirty days from the date of filing of a petition under subparagraph (A), file suit in the appropriate Federal district court for recovery of such payment and the late charge or interest penalty.

(2) If the district court determines that the United States agency is liable in any suit filed pursuant to subparagraph (B) of paragraph (1), the court may award to the shipping interest an amount equal to three times the late charge or interest penalty in addition to the principal amount owed and the late charge or interest penalty.

(d) For the purposes of this section the term—

(1) 'foreign entity" means any foreign nation, agent of a foreign nation, or foreign person; and

(2) "United States shipping interest" means any person or business concern of the United States involved in the transport of such cargo, including but not limited to port authorities, stevedoring companies, producers and processors, ship owners, and inland freight companies.

EFFICIENT USE OF THE UNITED STATES MERCHANT MARINE FLEET

SEC. . (a) Any Federal agency shipping United States Government cargo shall solicit bids from any ship operator for the transport of United States Government cargo over a route which is not serviced by such ship operator if—

(1)(A) there is no ship operator using United States-flag vessels that services such route; or

(B) any ship operator using United States-flag vessels that services such route is unable or unwilling to transport such cargo;

(2) such cargo would be transported in United States-flag vessels; and

(3) the transport of such cargo shall result in the lowest cost to the United States pursuant to section 203.

(b) Notwithstanding any other provision of law, any United States-flag vessel constructed in the United States may transport United States Government cargo on any route if such transport—

(1) is the first voyage of such vessel; and

(2) shall result in the lowest cost to the United States pursuant to section 203.

REPORT TO CONGRESS

SEC. . Within twenty-four months after the date of enactment of this Act, the General Accounting Office shall review the compliance of all Federal agencies with the provisions of this title and report the findings and recommendations from such review to Congress.

TITLE III—THE GREAT LAKES AND SAINT LAWRENCE SEAWAY ADVISORY COUNCIL

FINDINGS

SEC. . The Congress finds that it is in the long-term economic interests of the Nation to develop a coordinated economic revitalization strategy for shipping activities on the Great Lakes, the connecting channels, and the Saint Lawrence Seaway (commonly known as the fourth seacoast of the United States) in order to increase exports from the Great Lakes region and favorably affect the United States balance of trade.

COUNCIL ESTABLISHED

SEC. . (a) There is hereby established a council to be known as the Great Lakes Saint Lawrence Seaway Advisory Council (hereinafter referred to as the "Council").

(b) The Council shall be composed of twelve members which shall include—

(1) the Secretary of Commerce, or his designee, who shall chair the Council;

(2) the Secretary of Transportation, or his designee;

(3) the Secretary of Agriculture, or his designee;
(4) the Assistant Secretary of the Army for Civil Works;
(5) the Administrator of the Saint Lawrence Seaway Development Corporation or his designee;
(6) the Administrator of the environmental Protection Agency, or his designee;
(7) the Chairman of the Council of Great Lakes Governors; and
(8) five members of the transportation industry, appointed by the Chairman from nominations by the industry of whom—
(A) two shall represent ports on the Great Lakes, of whom—
(i) one shall represent ports on Lakes Michigan and Superior; and
(ii) one shall represent ports on Lakes Huron, Erie, and Ontario and connecting channels;
(B) one shall represent operators of ocean going United States-flag vessels;
(C) one shall represent operators of ocean going foreign-flag vessels; and
(D) one shall represent maritime unions active on the Great Lakes.
(c) Members of the Council shall serve until the expiration of the Council.
(d) Seven members of the Council shall constitute a quorum but a lesser number may hold hearings.
(e) The Council shall meet at the call of the Chairman or a majority of its members.

FUNCTIONS OF THE COUNCIL

SEC. . (a) The Council shall make a complete study of the means to develop and implement a comprehensive economic strategy to improve the capacity of the Great Lakes region to market and transport commodities in a timely manner and to maximize the efficiency and benefits of market products produced in the Great Lakes region and products shipped through the Great Lakes Saint Lawrence Seaway system. The strategy shall include—
(1) methods to improve and promote both bulk and general cargo overseas trade through Great Lakes ports;
(2) methods to accelerate the movement of grains and other agricultural commodities through the Great Lakes;
(3) methods, materials, and programs to promote trade from the Great Lakes region and through Great Lakes ports, particularly with European, Mediterranean, African, Caribbean, Central American, and South American nations;
(4) methods to increase the overseas routing of cargoes owned, financed, and sponsored by the Government of the United States through Great Lakes ports; and
(5) methods to encourage United States-flag vessels to engage in international trade from the Great Lakes.
(b) In developing the strategy, the Council shall conduct and consider the results of—
(1) an analysis of the constraints on overseas shipments of agricultural products through the Seaway resulting from marketing problems caused by—
(A) a late harvest season;
(B) the need for additional storage capacity;
(C) the loss of grain shipment from Great Lakes ports due to diversion by rail to Canadian or United States tidewater ports; and
(D) other constraints identified by agricultural interests;
(2) an analysis of—
(A) the types and quantities of export cargoes produced in the Midwest and North Central region that are owned, financed, and sponsored by the Government of the United States;
(B) the contraints on the shipment of such cargoes through the Great Lakes and Saint Lawrence Seaway system; and
(C) administrative and statutory changes that could achieve increased shipments of such cargoes through Great Lakes ports; and
(3) an analysis of—
(A) the effectiveness of ongoing promotional programs by Federal, regional, State, and local agencies directed at attracting shippers to the Great Lakes and Saint Lawrence Seaway system; and
(B) recommendations on types of promotional programs to enhance the image and awareness of the Great Lakes and Saint Lawrence Seaway system by importers and exporters in the United States and overseas.
(c) No later than September 30, 1987, the Council shall transmit to the President and to each House of the Congress a report stating the strategy developed under this section and the results of each analysis conducted under this section. Such report shall contain a detailed statement of the findings and conclusions of the Council together with its recommendations for such legislative and administrative actions as it considers appropriate to carry out such strategy and to assure maximum economic benefits to the Great Lakes region.
(d) The Council shall cease to exist one-hundred and eighty days after submitting its report pursuant to subsection (c).

POWERS AND ADMINISTRATIVE PROVISIONS

SEC. . (a) The Council may, for the purpose of carrying out the provisions of this title, hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence, as the Council considers appropriate.
(b) Subject to such rules as may be adopted by the Council, the Chairman, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to the provisions of chapter 51 of subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, is authorized—
(1) to appoint and fix the compensation of such staff personnel as he deems necessary, including an executive director who may be compensated at a rate not in excess of that provided for level V of the Executive Schedule in title 5, United States Code, and
(2) to procure the services of experts and consultants in accordance with section 3109 of title 5, United States Code.
(c) Each department, agency, and instrumentality of the executive branch of the Federal Government, including independent agencies, is authorized and directed to furnish to the Council, upon request made by the Chairman, such information as the Council deems necessary to carry out its functions.
(d) Upon request of the Council, the head of any Federal agency is authorized to detail, on a reimbursable basis, any of the personnel of such agency to the Council to assist the Council in carrying out its duties.
(e) The Administrator of General Services shall provide to the Council on a reimbursable basis such administrative support services as the Council may request.
(f) The Council may use the United States mail in the same manner and under the same conditions as other departments and agencies of the United States.
(g) Any member or agent of the Council may, if so authorized by the Council, take any action which the Council is authorized to take by this section.

COMPENSATION OF MEMBERS

SEC. . Members of the Council shall serve without compensation, but shall be reimbursed for travel or transportation expenses under subchapter I of chapter 57 of title 5, United States Code, while away from home or a regular place of business and engaged in the actual performance of duties vested in the Council.

AUTHORIZATION OF APPROPRIATIONS

SEC. . There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this title.

DIXON AMENDMENT NO. 928

Mr. DIXON proposed an amendment to amendment No. 916 to the bill (S. 1714) supra; as follows:

At the end of the pending amendment, insert the following new section:
"Sec. . Section 901 of the Merchant Marine Act, 1936 (46 U.S.C. 1241) is amended by inserting the following after the first sentence in subsection (b):
"No United States flag-commercial vessel shall be deemed to be available for the transportation of cargoes subject to this section and the Joint Resolution of March 26, 1934 (48 Stat. 500, 46 U.S.C. 1241-1) unless such vessel—
"(A) is able to provide full commercial insurability;
"(B) is available for loading within 10 days of the specified loading date; and
"(C) is suitable, in terms of vessel type, size, and ability to discharge cargo, to transport the specific cargo to be shipped.".

PRESSLER (AND HELMS) AMENDMENT NO. 929

(Ordered to lie on the table.)

Mr. PRESSLER (for himself and Mr. HELMS) submitted an amendment, which was subsequently modified, intended to be proposed by him to the bill (S. 1714) supra; as follows:

On page 114, strike out lines 20 and 21 and insert in lieu thereof the folowing:
"(E) The established price for corn shall be not less than—
"(I) $3.13 per bushel for any quantity of corn not in excess of 10,000 bushels,
"(II) $2.98 per bushel for any quantity of corn in excess of 10,000 bushels, but not in excess of 20,000 bushels, and
"(III) $2.83 per bushel for any quantity of corn in excess of 20,000 bushels.
On page 88, strike out lines 18 through 23 and insert in lieu thereof the folowing:
"(I) $4.48 per bushel for any quantity of wheat not in excess of 7,500 bushels.
"(II) $4.33 per bushel for any quantity of wheat in excess of 7,500 bushels, but not in excess of 15,000 bushels and,
"(III) $4.18 per bushel for any quantity of wheat in excess of 15,000 bushels.

LUGAR AMENDMENT NO. 930

Mr. LUGAR proposed an amendment to the bill S. 1714, supra; as follows:

On page 88, strike out lines 18 through 23 and insert in lieu thereof the following:
"(i) in the case of the 1986 crop, $4.38 per bushel; and

"(ii) in the case of each of the 1987 through 1989 crops, such level as the Secretary determines to be appropriate taking into consideration the total supply of wheat, total program costs, and such other factors as the Secretary determines to be appropriate, except that the established price for a crop determined under this clause may not be reduced by more than 5 percent from the level determined for the preceding crop.

On page 114, strike out lines 20 and 21 and insert in lieu thereof the following:

"(E) The established price for corn shall not be less than—

"(i) in the case of the 1986 crop, $3.03 per bushel; and

"(ii) in the case of each of the 1987 through 1989 crops, such level as the Secretary determines to be appropriate taking into consideration the total supply of corn, total program costs, and such other factors as the Secretary determines to be appropriate, except that the established price for a crop determined under this clause may not be reduced by more than 5 percent from the level determined for the preceding crop.

On page 138, strike out lines 16 and 17 and insert in lieu thereof the following:

"(5) The established price for upland cotton shall not be less than—

"(A) in the case of the 1986 crop, $0.81 per pound; and

"(B) in the case of each of the 1987 through 1989 crops, such level as the Secretary determines to be appropriate taking into consideration the total supply of upland cotton, total program costs, and such other factors as the Secretary determines to be appropriate, except that the established price for a crop determined under this subparagraph may not be reduced by more than 5 percent from the level determined for the preceding crop.

On page 165, strike out lines 1 and 2 and insert in lieu thereof the following:

"(5) The established price for rice shall not be less than—

"(A) in the case of the 1986 crop, $11.90 per hundredweight; and

"(B) In the case of each of the 1987 through 1989 crops, such level as the Secretary determines to be appropriate taking into consideration the total supply of rice, total program costs, and such other factors as the Secretary determines to be appropriate, except that the established price for a crop determined under this subparagraph may not be reduced by more than 5 percent from the level determined for the preceding crop.

HARKIN AMENDMENT NO. 931

Mr. HARKIN proposed an amendment to amendment No. 930 proposed by Mr. PRESSLER [and Mr. HELMS], and subsequently modified, to the bill S. 1714, supra; as follows:

In the pending amendment, strike lines 12 through 20.

DIXON (AND OTHERS) AMENDMENT NO. 932

Mr. DIXON (for himself, Mr. BOSCHWITZ, Mr. INOUYE, Mr. STEVENS, Mr. PROXMIRE, Mr. SIMON, and Mr. KASTEN) proposed an amendment to amendment No. 914 proposed by Mr. COCHRAN to the bill S. 1714, supra; as follows:

After "ranges." on page 8, line 2 of the COCHRAN amendment, as incorporated into the Stevens amendment:

"In addition, the Secretary of Transportation, in administering this subsection and section 901(b) of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1241(b)), and consistent with such subtitle and section, shall take such steps as may be necessary and practicable to preserve during calendar years 1986, 1987, 1988, and 1989 the percentage share, or metric tonnage of bagged, processed or fortified commodities, whichever is lower, experienced in calendar year 1984 as determined by the Secretary of Agriculture, of waterborne cargoes exported from Great Lake Ports pursuant to Title II of the Agricultural Trade Development Act of 1954 (7 U.S.C. 1721 et seq.)."

MELCHER AMENDMENT NO. 933

Mr. MELCHER proposed an amendment to the bill (S. 1714) supra; as follows:

CONSERVATION RESERVE

On page 328—

(1) line 1, strike out "10", and insert in lieu thereof "9";

(2) line 4, strike out "20", and insert in lieu thereof "13";

(3) line 5, strike out "and";

(4) line 6, strike out "1989", and insert in lieu thereof "1988";

(5) line 7, strike out "25", and insert in lieu thereof "17";

(6) line 8, strike out the period, and insert in lieu thereof "; and"; and

(7) after line 8, insert a new paragraph as follows:

"(4) during the 1986 through 1989 crop years, a total of not less than 25, nor more than 30, million acres.".

On page 332, after "share" in line 11, insert "not more than 50 percent of".

On page 334, after line 13, insert a new paragraph as follows:

"(3) The Secretary shall provide payment of obligations incurred by the Secretary under a contract as follows:

"(A) any cost-sharing obligation shall be paid as soon as possible after the obligation is incurred; and

"(B) any annual rental payment obligation shall be paid as soon as practicable after October 1 of each calendar year, or, at the discretion of the Secretary, at any time prior to such date during the year for which the obligation is incurred.".

On page 334, strike out lines 14 through 18, and insert in lieu thereof the following:

"(d)(1) Notwithstanding any other provision of law, the annual rental payment under a contract entered into under this subtitle shall be made—

"(A) for the first year in which the contract is in effect, in cash; and

"(B) for any subsequent year in which the contract is in effect (i) in in-kind commodities in such amounts as are agreed on and specified in the contract, except that such payment shall be made in cash to the extent that such commodities are not available under paragraph (2)."

FARMER OWNED RESERVE

On page 219—

(1) line 7, strike out everything beginning with "(a)" through the period at the end of line 19;

(2) line 20, renumber subsection (b) as subsection (a); and

(3) line 22, renumber subsection (c) as subsection (b).

On page 220, line 15, renumber section (d) as subsection (c).

DEFICIENCY PAYMENTS—PLANTED ACREAGE

On page 85—

(1) after line 20, insert a new sentence as follows:

"In no event may payments be made under this paragraph for any crop on a greater acreage than the acreage actually planted to wheat."; and

(2) after line 23, strike out everything through line 25, page 87.

On page 88—

(1) line 1, strike out "(E)", and insert in lieu thereof "(D)";

(2) line 9, strike out "(F)", and insert in lieu thereof "(E)";

(3) line 16, strike out "(G)", and insert in lieu thereof "(F)"; and

(4) line 24, strike out "(H)", and insert in lieu thereof "(G)".

On page 89, strike out lines 4 through 7.

On page 112, after line 2, insert a new sentence as follows:

"In no event may payments be made under this paragraph for any crop on a greater acreage than the acreage actually planted to feed grains."

On page 112, strike out everything after line 2 through line 11, page 114.

On page 114—

(1) line 12, strike out "(D)", and insert in lieu thereof "(C)";

(2) line 20, strike out "(E)", and insert in lieu thereof "(D)";

(3) line 22, strike out "(F)", and insert in lieu thereof "(E)".

On page 115—

(1) line 1, strike out "(G)", and insert in lieu thereof "(F)"; and

(2) strike out lines 6 through 9.

DEFICIENCY PAYMENTS—SEASON AVERAGE

On page 88, line 5, strike out "the first 5 months of".

On page 114, line 16, strike out "the first 5 months of".

On page 164, line 22, strike out "the first 5 months of".

On page 228—

(1) line 3, strike out "upland cotton,";

(2) strike out lines 6 through 12, and insert in lieu thereof the following:

"SEC. 107C. (a)(1) If the Secretary determines that deficiency payments will likely be made for any of the 1986 through 1989 crops of wheat, feed grains, or rice under this Act, the Secretary shall make available advance deficiency payments to producers who agree to participate in such program.";

(3) line 17, strike out everything beginning with "producer" through the "program" in line 18, and insert in lieu thereof the following: "end of the fifth month of the marketing year for the crop".

(4) line 19, strike out everything beginning with "Such" through "exceed" in line 22, and insert in lieu thereof the following: "Any payment made under this section shall be equal to"; and

(5) line 24, strike out "estimated".

On page 229, line 3, strike out everything beginning with "50" through the "Secretary" in line 5, and insert in lieu thereof the following: "90 percent of the projected payment rate as determined by the Secretary on the basis of the national weighted average market price received by producers during the first 5 months of the marketing year for crop".

TARGETED EXPORTS

On page 13, line 24, after the subsection (a) designation, insert "(1)".

On page 14—

(1) line 1, renumber paragraph (1) as subparagraph (A);

(2) line 6, renumber paragraph (2) as subparagraph (B); and

(3) after line 10, insert a new paragraph as follows:

"(2) In addition to the funds or commodities of the Commodity Credit Corporation used by the Secretary under paragraph (1), at least (A) 100 million bushels wheat, (B) 100 million bushels of corn, (C) 10 million hundredweight of rice, and (D) 75,000 bales of cotton owned or controlled by the Commodity Credit Corporation shall be used by the Secretary for such export activities to regain for the United States export markets for these commodities that have been lost because of practices described in subsection (b) or because of adverse economic conditions in the importing country that have resulted in decreased purchases of agriculture products from the United States.

On page 12, line 18, before the semicolon, add the following: ", of which not less than one-third of such funds provided each year for the financing of transactions under this section shall be made available for financing that consists of the provision of direct credit."

On page 372, line 16, strike out "25" and insert in lieu thereof "20".

PAID DIVERSION

On page 92, strike everything after line 2 through line 16, page 94.

On page 95, strike everything after line 20 through line 4, page 100, and insert in lieu thereof the following:

"(f)(1) Notwithstanding any other provision of this section, the Secretary shall provide for any crop of wheat for which marketing quotas are not in effect an acreage limitation program described in paragraph (2) and an acreage diversion program described in paragraph (3). As a condition of eligibility for loans, purchases, and payment for any crop of feed grains, the producers on a farm must comply with the terms and conditions of such program.

"(2)(A) Under an acreage limitation program provided for in paragraph (1), the limitation on the acreage planted to wheat shall be achieved by applying a uniform reduction of 22 percent to the acreage base for each wheat-producing farm.

"(B) Producers who knowingly produce wheat in excess of the permitted wheat acreage for the farm shall be ineligible for wheat loans, purchases, and payments with respect to that farm.

"(C)(i) For the purpose of determining any reduction required to be made for any year as the result of a limitation under this paragraph, the acreage base for any farm shall be the average acreage planted to wheat for harvest in the 5 crop years immediately preceding the year for which the determination is made.

"(ii) For the purpose of clause (i), acreage planted to wheat for harvest shall include—

"(I) any reduced acreage, set-aside acreage, and diverted acreage; and

"(II) any acreage that producers were prevented from planting to wheat or other nonconserving crops in lieu of wheat because of drought, flood, or other natural disaster, or other condition beyond the control of the producers.

"(iii) The Secretary may make adjustments to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base.

"(iv) In no event may the total of all crop acreage bases for any farm exceed the total acreage of cropland on the farm.

"(D)(i) A number of acres on the farm determined by dividing—

"(I) the product obtained by multiplying the number of acres required to be withdrawn from the production of wheat times the number of acres actually planted to such commodity; by

"(II) the number of acres authorized to be planted to such commodity under the limitation established by the Secretary,

shall be devoted to conservation uses, in accordance with regulations issued by the Secretary.

"(ii) The number of acres so determined is hereafter in this subsection referred to as 'reduced acreage'.

"(3) Under an acreage diversion program provided for in paragraph (1), the Secretary shall make crop retirement and conservation payments to any producer of any crop of wheat whose acreage planted to wheat for harvest on the farm for each such crop is reduced so that it does not exceed the wheat acreage base for the farm less an amount equivalent to 10 percent of the wheat acreage base in addition to the reduction required under paragraph (2), and who devotes to approved conservation uses an acreage of cropland equivalent to the reduction required from the wheat acreage base under this paragraph. Such payments shall be made in an amount computed by multiplying (i) the diversion payment rate, by (ii) the farm program payment yield for the crop, by (iii) the additional acreage diverted under this paragraph. The diversion payment rate for the 1986 through 1989 crops of wheat shall be established by the Secretary at not less than $2.70 per bushel.".

FEED GRAINS

On page 118, strike everything after line 3 through line 12, page 120.

On page 121, strike everything after line 15 through line 25, page 125, and insert in lieu thereof the following:

"(f)(1) Notwithstanding any other provision of this section, the Secretary shall provide for each crop of feed grains an acreage limitation program described in paragraph (2) and an acreage diversion program described in paragraph (3). As a condition of eligibility for loans, purchases, and payments on any of the 1986 through 1989 crops of feed grains, the producers on a farm must comply with the terms and conditions of such program.

"(2)(A) Under an acreage limitation program provided for in paragraph (1), the limitation on the acreage planted to feed grains shall be achieved by applying a uniform reduction of 17 percent to the acreage base for each feed grain-producing farm.

"(B) Producers who knowingly produce feed grains in excess of the permitted feed grain acreage for the farm shall be ineligible for feed grain loans, purchases, and payments with respect to that farm.

"(C) The Secretary may provide that no producer of malting barley shall be required as a condition of eligibility for feed grain loans, purchases, and payments to comply with any acreage limitation under this paragraph if such producer has previously produced a malting variety of barley, plants barley only of an acceptable malting variety for harvest, and meets such other conditions as the Secretary may prescribe.

"(D)(i) For the purpose of determining any reduction required to be made for any year as the result of a limitation under this paragraph, the acreage base for any farm shall be the average acreage planted to feed grains for harvest in the 5 crop years immediately preceding the year for which the determination is made.

"(ii) For the purpose of clause (i), acreage planted to feed grains for harvest shall include—

"(I) any reduced acreage, set-aside acreage, and diverted acreage; and

"(II) any acreage that producers were prevented from planting to feed grains or other nonconserving crops in lieu of feed grains because of drought, flood, or other natural disaster, or other condition beyond the control of the producers.

"(iii) The Secretary may make adjustments to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base.

"(iv) In no event may the total of all crop acreage bases for any farm exceed the total acreage of cropland on the farm.

"(E)(i) A number of acres on the farm determined by dividing—

"(I) the product obtained by multiplying the number of acres required to be withdrawn from the production of feed grains times the number of acres actually planted to such commodity; by

"(II) the number of acres authorized to be planted to such commodity under the limitation established by the Secretary,

shall be devoted to conservation uses, in accordance with regulations issued by the Secretary.

"(ii) The number of acres so determined is hereafter in this subsection referred to as 'reduced acreage'.

"(F) The individual farm program acreage shall be the acreage planted on the farm to feed grains for harvest within the permitted feed grain acreage for the farm as established under this paragraph.

"(3) Under an acreage diversion program provided for in paragraph (1), the Secretary shall make crop retirement and conservation payments to any producer of any crop of feed grains whose acreage planted to feed grains for harvest on the farm for each such crop is reduced so that it does not exceed the feed grain acreage base for the farm less an amount equivalent to 10 percent of the feed grain acreage base in addition to the reduction required under paragraph (2), and who devotes to approved conservation uses an acreage of cropland equivalent to the reduction required from the feed grain acreage base under this paragraph. Such payments shall be made in an amount computed by multiplying (i) the diversion payment rate, by (ii) the farm program payment yield for the crop, by (iii) the additional acreage diverted under this paragraph. The diversion payment rate for the 1986 through 1989 crops of feed grains shall be established by the Secretary at not less than $1.25 per bushel."

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON THE JUDICIARY

Mr. COCHRAN. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Wednesday, October 30, in order to receive testimony concerning the following nominations:

U.S. CIRCUIT JUDGE

James L. Buckley, of Connecticut, to be U.S. circuit judge for the District of Columbia circuit;

David R. Thompson, of California, to be U.S. circuit judge for the ninth circuit;

Bobby Ray Baldock, of New Mexico, to be U.S. circuit judge for the 10th circuit;

U.S. DISTRICT JUDGE

Robert E. Cowen, of New Jersey, to be U.S. district judge for the district of New Jersey;

Edward R. Korman, of New York, to be U.S. district judge for the eastern district of New York;

William J. Zloch, of Florida, to be U.S. district judge for the southern district of Florida;

Jane R. Roth, of Delaware, to be U.S. district judge for the district of Delaware.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS

Mr. COCHRAN. Mr. President, I ask unanimous consent that the Committee on Environment and Public Works be authorized to meet during the session of the Senate on Wednesday, October 30, 1985, in order to conduct a hearing on high level waste.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON STRATEGIC AND THEATER NUCLEAR FORCES

Mr. COCHRAN. Mr. President, I ask unanimous consent that the Strategic Subcommittee of the Committee on Armed Services be authorized to meet during the session of the Senate on Wednesday, October 30, to hold a hearing on strategic defense initiative.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. COCHRAN. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Wednesday, October 30, 1985, in closed executive session, in order to conduct a hearing on intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

FORMER SENATOR PERCY ADDRESSES ARMS CONTROL

● Mr. SIMON. Mr. President, in the 1984 election, the people of Illinois gave me the opportunity to serve in the U.S. Senate instead of Charles Percy.

But I have great respect for him, and there are many areas where he has contributed a great deal.

Recently, the Christian Science Monitor ran an article by Charles Percy on the whole question of nuclear arms control and treaty ratification that makes eminent good sense.

I urge my colleagues in the House and Senate to read the remarks of the former chairman of the Senate Foreign Relations Committee.

I hope this body will follow the leadership that he suggests we should provide. And I hope the administration will do the same.

I ask unanimous consent that Mr. Percy's article be inserted in the RECORD.

The article follows:

[From the Christian Science Monitor, Sept. 21, 1985]

A MISSED OPPORTUNITY IN ARMS CONTROL

(By Charles H. Percy)

Nuclear arms control is *the* paramount issue of our times. The recent anniversary of the bombing of Hiroshima and the forthcoming Reagan-Gorbachev summit have focused world attention on the issue again. Unfortunately, both the United States and the Soviet Union are wasting this opportunity to bring new life to real arms control.

After two rounds of arms talks in Geneva, and despite the efforts of an outstanding US team of negotiators, agreement is nowhere in sight. But the complexity of issues to be addressed almost assures a protracted negotiating process.

Rather it is the political climate that is troubling. Each side seems more willing to point the finger of blame at the other than to take the steps to make arms control work. This is as true for the Geneva negotiations as it is for the proposals on nuclear testing, offered on the eve of the Hiroshima anniversary. In making these well-publicized offers, each side knew beforehand that its proposal would be unacceptable to the other.

But there is an opportunity in the nuclear testing area where immediate progress can be made. Action here can help propel the process in Geneva.

There are two treaties that are negotiated, signed, and ready for immediate ratification: the Threshold Test Ban Treaty (TTB), signed by President Nixon in 1974, and the Peaceful Nuclear Explosions (PNE) accord, signed by President Ford in 1976. These accords make a modest but useful contribution to mutual security. The TTB prohibits nuclear weapons tests above 150 kilotons; the PNE applies the same restrictions to nuclear explosions used in civilian projects.

The Soviets have an active PNE program, using nuclear devices in everything from extinguishing gas fires and building underground natural gas storage cavities to mining operations. Because of the radioactivity problems and the effectiveness of modern American-made chemical explosives, the US abandoned the use of PNEs. Thus, while the TTB affects both the US and the USSR, the weight of the PNE treaty rests squarely on Moscow.

Moreover, the bulk of benefits in these treaties favors the US. The TTB provides for an exchange of nuclear testing data and, in the PNE accord, the Soviets have for the first time agreed to on-site inspections.

Success at the Geneva talks may hinge on verification. The precedents set in the PNE and TTB could give US negotiators the leverage required to move the Soviets in the right direction. Equally important, the Soviets have expressed concern about the US as a dependable negotiating partner and have cited the failure to ratify these treaties as a major example. The Soviets are unlikely to make required concessions in Geneva if they doubt compromise will lead to concrete results.

Given the potential payoffs, why have these accords remained in limbo for nearly a decade? One reason is the all-too-common "not invented here" attitude which each administration brings to office. President Carter allowed these Nixon-Ford treaties to languish out of preference for a total ban on testing. The Reagan administration wants a better treaty, claiming the TTB/PNE verification regime is not good enough to prevent Moscow from cheating.

Without ratification of these treaties there has been no exchange of data or consultations that would help resolve verification uncertainties. Meanwhile, the US has opted for a second-rate alternative by committing itself to abide by these accords, without reaping their benefits.

Some resist ratification because they want the US to have the option to test high-yield weapons. Others fear that these accords could compromise the reliability of the weapons arsenal. The first argument misses the point. It is the Soviet Union which has traditionally relied upon high-yield weapons, not the US, and public opinion here will likely resist the testing of monster weapons in the future. Clearly, this treaty constraint has a greater impact in Moscow.

Former Defense Secretary James Schlesinger and former Joint Chiefs Chairman David Jones addressed the reliability question in testimony before the Foreign Relations Committee several years ago. Mr. Schlesinger asserted that weapons reliability can be assured under the 150 kiloton threshold. General Jones stated that the treaties were compatible with our weapons plans.

President Reagan should act now. The first step is to ask the Senate Foreign Relations Committee to advise consent. Agreement on enhanced verification measures for these treaties should then be placed high on the November summit's agenda. By doing this, we can generate new hope for the Geneva talks.●

DENIAL OF MOWAT VISA

● Mr. SIMON. Mr. President, when I introduced the amendment to the immigration bill to prevent the use of temporary visas for political purposes, I tried to find an editorial I had seen in the Chicago Tribune about our denial of a visa to Canadian author Farley Mowat.

I have since discovered that editorial, and I wish to now insert it in the RECORD.

We are a country that ought to be big enough and brave enough and sensible enough to permit those that disagree with us to come into our country.

I ask that the editorial be inserted in the RECORD, and I urge my colleagues to read it.

The article follows:

THE AUTHOR AND THE AIRHEADS

Said Canadian author Farley Mowat: "I'm beginning to think there are some people in your State Department that don't have any sense of humor." The last two words are unnecessary. The immigration officials who barred Mr. Mowat from the United States must have undergone a brain bypass.

Late Friday, officials said Mr. Mowat could enter the U.S., but by then the damage had been done.

Mr. Mowat is a naturalist whose books have an enthusiastic following in Canada and the U.S. "Never Cry Wolf," the story of his months in the Arctic getting acquainted with a family of wolves, was made into a highly regarded movie. On Tuesday, he was about to board a plane for Los Angeles when U.S. Immigration and Naturalization Service officials stopped him; it seems his name was on their "lookout book," a list of inadmissible aliens.

The probable reason it's there is that Mr. Mowat has publicly opposed the stationing of U.S. atomic weapons on Canadian soil, and used vivid language in doing so. He once threatened to steal an atom bomb, drop it into a lake and fire shotguns at any American aircraft that came after it.

Is it possible the INS took this seriously? Maybe so; it isn't explaining its reasons for excluding him because the law says it doesn't have to.

Mr. Mowat is a bluntly independent writer who has spent much of his life battling bureaucrats. The INS has given him and every other Canadian a fat target; they and the rest of the U.S. government can expect to be savagely lampooned. the airheads responsible for the exclusion order deserve it. But do we deserve them?●

ANNIVERSARY OF THE CREATION OF THE HUDSON CENTER ON EDUCATION AND EMPLOYMENT POLICY

● Mr. QUAYLE. Mr. President, I would like to announce the first year anniversary of the Hudson Institute's Center on Education and Employment Policy, which is located in Indianapolis, IN.

A year ago, I had the pleasure of accepting the position of chairman of the board of counselors for the center. The board of counselors is cochaired by my friend, Governor of Virginia, Charles S. Robb, who has made an invaluable contribution to the center.

The Center on Education and Employment Policy studies the interrelationships of employment and education and their impact on productivity in our Nation. Two of our most crucial policy debates in America relate to the education and training of workers. Today, American workers can be expected to change jobs or careers at least three time in their working lives. As chairman of the Senate Subcommittee on Employment and Productivity, it has become increasingly clear to me that continuing education and training is going to be one of the fastest growing service areas in the next few decades. Yet, until recently, very few people have looked at education and training as complimentary. The Hudson Center on Education and Employment Policy, funded totally with private funds, is designed to do just that.

The center is fortunate to be associated with and draw upon the resources of the Hudson Institute, which is widely respected for its work on national security, economic issues, and future studies. The center is governed by a board of counselors, consisting of top CEO's, economists, labor analysts, and educators. All of the work that is done by the center is public and is made available to educators, business and community leaders, and legislators, to help them address our manpower needs of the future.

Recently, the Hudson Center on Education and Employment Policy conducted a 2-day seminar of "Preparing Youth for the Job Market." This seminar was attended by approximately 40 school superintendents, senior corporate executives, directors of personnel and training, and senior policy analysts from around the United States. The primary goals of the seminary were to identify the education, employability, and deportment skills that are most important in preparation for the job market of the future; to develop programmatic recomendations that encourage the teaching and learning of these "employability and deportability skills; and to identify education, employment, and training systems that most effectively prepare youth for tomorrow's job market." This seminar was aimed at addressing the needs of urban youth, particularly. The results of this seminar are being shared with representatives of State and local governments, corporate leaders, and educators, who can implement the ideas and truly make a difference in the current education and training system.

Mr. President, the Hudson Center on Education and Employment Policy is continually looking for new ways to involve the community and to make life better for those young Americans who face a changing job market. The center, as well as the Hudson Institute, is filled with dedicated personnel, who realize that they can make a difference by improving our future. The first year of the Center for Education and Employment Policy has been a wonderful success, and I am certain that the center has many productive and valuable years ahead.

BUDGET BALANCING ACT

● Mr. SIMON. Mr. President, I have always believed in pay-as-you-go government. But our deficits graphically show that we continue to drift further and further from that goal. Our fiscal woes have been aggravated by steadily growing interest payments—our third largest Federal spending item after Social Security and defense. I am cosponsoring a balanced budget amendment to the Constitution. It is something that in theory we do not need, but in practice we do. In the meantime, Senators GRAMM, RUDMAN, and HOLLINGS have proposed balancing the budget by statute. I voted for their bill but questions about how it will work or even if it will work persist. In a column I write for newspapers in my State I have attempted to answer some of these questions and explain my vote.

I ask that the article be printed in the RECORD.

The article follows:

A BUDGET BALANCING ACT

(A weekly column by U.S. Senator Paul Simon of Illinois)

There is considerable confusion about a measure that the Senate passed, for which I voted, that sets up a series of targets for steady movement toward a balanced budget.

Frequently referred to as the Gramm-Rudman-Hollings bill, it is a matter of controversy. And much of what I have read about it in the major newspapers of the nation has not been accurate.

Here are some basic questions:

Why did you vote for it?

We simply have to get hold of the growing deficit. The gross interest payments by the federal government this year will be $181 billion. The only more expensive items for the federal government are Social Security and defense.

We will soon be in a situation where every four of five years the interest payments of the federal government will double. Obviously, you cannot keep that up long without inviting fiscal chaos. The growing federal debt threatens everything in which we believe.

Will it work?

The proposal calls for a gradually reduced deficit until the year 1991 when we would have a balanced budget. If congress does not meet the targets, the President is required to make across-the-board cuts in all items to meet the goal; Social Security and interest are an exception to that rule.

The weakness of the proposal is that anytime Congress and the President decide to waive the new goals, they can. The pressure will grow to do that. So the answer to this question of whether it will work is that I don't know, but it's worth a try.

But doesn't it give the President too much authority?

Absolutely not. It is based on the Congressional budget, one of the few items the President does not have the authority to veto. From the budget will come the appropriations that Congress will vote. If, for example, we would be 2 percent below the target, the President's responsibility is to cut all appropriations by 2 percent, across the board. The President has no discretion in this. His is purely a mechanical function, not a judgment function.

If we move toward balancing the budget, where will we cut? Will it mean tax increases?

There may be modest cuts in a number of programs, but the major reduction in budget growth should come in defense. We can slow down the growth in defense spending without hurting the military preparedness of the nation. But that will not be enough to balance the budget.

In recent weeks David Stockman called for a $100 billion tax increase. That should not be necessary. But closing tax loopholes and reducing some exemptions will move us in the right direction. There are now approximately $420 billion worth of exemptions. If that is reduced by 10 percent, there would be a $42 billion increase in revenue. Everytime you reduce spending and increase

revenue you reduce the amount needed for interest, and you reduce the interest rate.

There are defects in the Gramm-Rudman-Hollings bill, and I hope the House-Senate conferees can straighten them out. But it is at least an earnest attempt to deal with the problem. I see few of those who are critics coming up with better answers.●

TRIBUTE TO THE LATE JOSEPH DONOVAN

● Mr. DURENBERGER. Mr. President, I rise to pay my respects to a distinguished Minnesotan who passed away this week, former Secretary of State Joe Donovan. While we were members of opposing parties, I always admired Joe for his hard work, courage and decades of service to the people of Minnesota.

I got to know Joe Donovan when he served as Secretary of State during the administration of Gov. Harold LeVander of my party, to whom I was executive assistant. I like the saying that the next best thing to having a principled friend is having a principled adversary. I greatly enjoyed my interactions with him during those years and continue to benefit from what he taught me.

I ask that an article from the Minneapolis Star and Tribune about the life of this exemplary public servant be included in the RECORD.

The article follows:

EX-SECRETARY OF STATE JOSEPH DONOVAN DIES AT AGE 92 IN HASTINGS

(By Larry Oakes)

(I felt that anything that was morally wrong could not be politically right.—Joseph Donovan on his refusal to back the forces seeking to oust Gov. Karl Relvaag in 1966.)

Joseph L. Donovan, who defied old age by beginning a 16-year career as Minnesota secretary of state at age 61, died Monday. He was 92.

Donovan, who had been ill for about a month, died at Regina Memorial Hospital in Hastings. He had been living in the Regina Nursing Home since June.

"He died as he lived—a fighter right up to the end," said his daughter, Mary Kay McDonald of St. Paul. Donovan, a diabetic, who was recovering from gallbladder surgery two weeks ago, she said. "He was a perfectionist. He anguished over a lot of things in his life, and he just didn't want to go," she said.

Before entering public life, Donovan lived in Duluth and worked 35 years in private industry and in various federal positions, including that of census-taker. In 1954 the DFL Party chose him at the last minute as its candidate for secretary of state. Its first choice, Koscie Marsh, lost the party endorsement after publicly supporting parimutuel betting.

Donovan was a logical choice to run against the widow of Mike Holm, a legendary name in Minnesota politics, said Gerald Heaney, a judge on the Eighth U.S. Circuit Court of Appeals and former DFL Party activist. Not only was Donovan a loyal DFLer who opposed betting, but he also had a good Irish name, to boot—and Irishmen were winning elections, Heaney said Monday.

"Plus he turned out to be a darned good campaigner. He worked hard and was a good speaker," Heaney said. "Wherever he went, he made friends."

Donovan said years later in an interview, "Nobody expected I would win." Publicly he played an underdog who entered the 1954 race at the last minute and didn't expect to win. Privately he thought otherwise, Heaney said.

"His attitude was, 'Some of those guys down in the Twin Cities think I'm just a filler, but I'm going to win.' "

Both Donovan and his party won big victories in 1954. The DFL swept many offices and gained a majority in the Minnesota House for the first time.

"Orville Freeman was elected governor (Miles) Lord got attorney general, Joe (Donovan) won secretary of state and I became lieutenant governor," former Gov. Karl Rolvaag said Monday.

"He always was a stalwart, loyal and very dear friend," Rolvaag said of Donovan, adding that they corresponded even after Donovan entered the nursing home, They wrote on a personal level, not mentioning politics much, Rolvaag said.

Donovan backed Rolvaag in Rolvaag's historic battle at the DFL state endorsing convention with Lt. Gov. A.M. (Sandy) Keith in 1966. The party chose Keith after 20 ballots, but Rolvaag ran for reelection anyway and easily won the Sept. 13 primary. He then lost the general election to Republican Harold LeVander.

"Joe was intensely loyal. He felt Karl had earned the right to stand for reelection," said Heaney. "he was not anti-Sandy Keith."

Donovan took an unpopular—and losing—stand against the taconite amendment to the state Constitution, which benefited companies mining the Iron Range.

"He was his own man," said Heaney.

"He felt it was wrong to put a special preference for any industry into the Constitution."

Donovan retired in 1971 with a reputation as an elder statesman who always had something to say, a talent he used well during campaigns.

"He was a fount of stories and homilies," said Bob Goff, who was secretary to Rolvaag and active in the DFL.

When he retired at 77, Donovan told an interviewer, "Sometimes the wisest thing to do is to quit when you are ahead. I wouldn't want anyone to take me by the hand when I am 80 or 81 and say, 'Well Joe, I'm sorry, you made a mistake. You went into the ladies' room instead of the men's.' "

"He kept all these sayings on 3-by-5 cards," said Goff.

Donovan's wife, Mary, died in October 1982. They had been married 59 years when he quipped at a public gathering: "Mary says she hopes that I live to be 99 and she lives to be 100 so she can have one year of peace and quiet."

Survivors include his daughter, five grandchildren and two great-grand-children.

Funeral services are scheduled for 10 a.m. Thursday at St. Leo's Catholic Church in St. Paul. A wake is scheduled from 3 to 9 p.m. Wednesday at O'Halloran & Murphy Funeral Home, 575 Snelling Ave. S., St. Paul.●

DESPAIR AMONG YOUNG INDIANS

● Mr. SIMON. Mr. President, although Illinois is named for Indians, we have only a small urban Indian population in Chicago and very few Indians in our State, relative to many other States.

We have no reservations and often not much interest in the problems which Indians face.

I was pleased to pick up the State Journal-Register of Springfield, IL, and note an editorial calling for more attention to the problems which the Native Americans face.

I ask that the editorial be printed in the RECORD at this point, and I urge my colleagues in the House and Senate to read the editorial.

The editorial follows:

REASON FOR DESPAIR AMONG YOUNG INDIANS

Eight young Indians have hanged themselves in the last two months on the Wind River Reservation in central Wyoming. Despair, deepened by alcohol, has taken a tragic toll in the Arapaho and Shoshone tribes.

The dead are all young men or male teenagers. The series of suicides began Aug. 12. The latest victim was found hanging Sept. 28.

There is reason for despair and self-destructive behavior on the reservations all across the country. The 1.5 million surviving American Indians are beyond question the most disadvantaged of all minority groups in the nation.

They are proud. They are stoic. They hold their problems inside themselves, especially the males, who often feel that they have lost their manhood. Too often the result is alcohol-related death.

The problems are overwhelming. The unemployment rate on the reservations is 49 percent. Infant mortality is high. Life expectancy is short. Poverty is more acute than in any other group. Reservation Indians often live in conditions of deprivation and squalor. No wonder the rate of alcohol-related death among them is five or six times that in the general population. Almost every family has someone with an alcohol problem.

There must be concern and understanding and help from the larger society. That doesn't mean simply throwing federal money at the reservations. It means individual and voluntary effort, as much as anything. It means an end to prejudice and discrimination against Indians. The signs that said, "We do not serve Indians" have been taken down but the anti-Indian feelings remain, not so well hidden in many people.

The Indian population has tripled, from its low point of 500,000. The American Indians aren't going to die out, no matter how difficult their situation becomes. That's the hopeful news. But every Indian baby faces a hard road, now that the buffalo's gone.

Self-reliance and self-government must be encouraged on the reservations. Dependence on government handouts must be discouraged. But federal responsibility and concern for the Indians' health and welfare must continue. There must be a balancing. Indian pride and Indian values msut be fostered. But material needs also must be met, in a way that does not destroy Indian independence.

How do we preserve the Stone Age culture and tradition of a people while integrating them into the civilization of the Nuclear Age? With difficulty, but with great care and great respect.

If we fail, the problem will become worse. There will be suicide and shame and remorse. We cannot ignore conditions on the reservations. Lingering neglect would be even more cruel than Wounded Knee.●

THE SORROWS OF ARMENIA

● Mr. SIMON. Mr. President, this Nation rightly and properly acknowledges the devastation of the Holocaust. Within the memories of all of us in this body is that unbelievable scourge on part of humanity.

There is another group that has also suffered greatly, and that took place before most of us can remember it. That is the 1915 slaughter of the Armenians.

The New York Times recently ran an editorial on "The Sorrows of Armenia."

Some suggest we should not bring up the unpleasantnesses of history. I believe we have to bring them up if we are not to repeat them. We must know how depraved humanity can sometimes get. And when we bring these things up, we are not attacking the Turks or the Germans or any other group because the lesson is not that some other group is terrible but that we must watch ourselves, to always be sensitive to the possibility that demagogues can arouse passions, and in moments of passion we can do some things that history will not treat kindly.

I urge my colleagues to read the New York Times editorial, and I ask consent that it be printed in the RECORD here.

The article follows:

THE SORROWS OF ARMENIA

Americans with their scant sense of history must be mystified by the resurgence of Armenians' anger about an atrocity that occurred 70 years ago. Impermissibly, that anger has recently been invoked by terrorists to justify the murder of Turkish diplomats. But fittingly, it also moved Armenians the world over to memorial observances last week. They plead that Turkey at least acknowledge the massacres of their ancestors and that the State Department remove the word "alleged" from its references to the 1915 slaughter.

Turkey's indignant rejoinder has been that acknowledging any official guilt for such remote events would only reward terrorism. But that is not a cogent reason.

What did happen in 1915? Armenians assert that two million of their forebears were killed or driven into exile by the Ottoman regime in an attempt to liquidate a long-persecuted Christian minority. They cite firsthand accounts by American and German diplomats, contemporary press reports, the regime's own records and the testimony of survivors.

They are disputed by Turks on every point. Turks maintain that an advancing Russian Army was inciting rebellion among Armenians, requiring their resettlement. Turkish diplomats single out as objective the scholarly history of Sanford and Ezel Kural Shaw, who give this appraisal:

"Armenians claim that as many as 2 million were massacred, but no counts of the dead were ever taken, and the actual total can only be inferred. These claims are based on the supposition that the prewar Armenian population of the Empire was 2.5 million. According to the Ottoman census of 1914, however, it was at most 1.3 million. Half of these people lived in the areas affected by the deportation, but . . . it appears that about 400,000 people were actually transported in 1915-16. In addition, some 700,000 Armenians fled to the Caucasus, western Europe and the United States. As 100,000 remained in Turkey after the war, one can conclude that about 300,000 died if one accepts the Ottoman census reports, or 1.3 million if the Armenian figures are utilized."

So scholars trusted by Turks put the minimum toll at 300,000. Why then should the State Department call the massacres "alleged"? The official excuse that the numbers are in dispute is obviously not the reason. Turkey is an important ally. Indeed, Defense Secretary Weinberger has even pleaded with Congress not to strain relations by designating April 24 as a day of remembrance for Armenian victims. Armenia's sorrows deserve better than that.●

NATIONAL PHILANTHROPY DAY

● Mr. D'AMATO. Mr. President, it is with great pride that I rise today to join my colleagues in cosponsoring Senate Joint Resolution 207, legislation to designate November 1, 1985, as "National Philanthropy Day." This day will be set aside to honor that segment of our society employed to handle those needs of the American people which are greater than that which can be handled by Government alone.

Our Nation's philanthropic organizations greatly enhance the quality of life for all Americans. These institutions are dedicated to freeing Americans from hunger, from want, from fear, and from oppression, and to working directly to provide us with access to quality education, art, and music. For their tireless efforts, every one of us owes a great debt of honor to our churches, synagogues, hospitals, colleges, universities, and youth groups, and a myriad of community service providers who care for our elderly, our young, our sick, and our poor.

Our Nation's philanthropic community includes roughly 800,000 organizations and 10 million employees and volunteers. Since 1981, more than 30 million Americans have contributed in excess of $70 million in private support to these organizations. Without private sector involvement in the humanitarian needs of this country, the American people would be saddled with an even larger Federal deficit. Without this private sector support, the Federal Government would have no other choice but to raise Federal spending to help care for the needy.

This is why I have joined as an original cosponsor of S. 361, legislation to make permanent the deduction for charitable contributions by nonitemizers now scheduled to sunset on December 31, 1986. I believe this legislation, introduced by my distinguished colleague, the senior Senator from New York, is crucial to ensure the continued viability of our philanthropic organizations. S. 361 is very timely because the Treasury tax reform proposal would repeal this deduction for charitable contributions made by nonitemizers. S. 361 is currently being considered by the Senate Committee on Finance.

In the 98th Congress, I cosponsored S. 1579, legislation to provide an increase in the tax-deductible mileage rate of passenger automobiles used in charitable endeavors. This bill was incorporated in the 1984 Tax Reform Act, that is now law.

Praise for our Nation's philanthropic community is long overdue. It has been strong in the past, and it must remain strong in the future. As the Federal Government acts to control budget deficits, these private and volunteer organizations will be asked to take on an even greater responsibility to help feed, clothe, house, and care for Americans in need. Now, more than ever, it is appropriate to honor these vital institutions, which are the foundation of our Nation's social services.

AMERICAN LIVER FOUNDATION NATIONAL LIVER AWARENESS MONTH

● Mr. D'AMATO. Mr. President, I rise today in support of American Liver Foundation National Liver Awareness Month, Senate Joint Resolution 202, introduced by my distinguished colleague from Utah. I am pleased to cosponsor this legislation which will alert all Americans to the need for improved treatment for liver diseases, increased efforts on prevention, and for support of research efforts to find cures.

The liver is the largest gland in the human body, and one of the most complex of all human organs. When the liver is damaged or stricken with disease, the life-sustaining chemical balance of the human body is jeopardized. Liver diseases are the fourth national leading cause of death in the United States for individuals between the ages of 15 and 65—affecting 25 million Americans—and are responsible for over 50,000 deaths each year. Thus, improved treatment for the more than 100 known liver diseases is critical.

Generating public support for increased research into the causes and treatments of liver diseases is necessary to supplement the work currently being done at the National Institutes of Health. The American Liver Foundation was established in 1976 by members of the American Association

for the Study of Liver Diseases to address the need for generating public support for liver research and for promoting a better understanding of liver diseases among the public, patients, and health professionals. This foundation is the major national voluntary organization dedicated to finding cures and preventions for liver diseases.

Mr. President, this resolution is vital, not only to educate the American people about the liver, its diseases, and the need to find cures, but also to inform everyone that pure and simple self-discipline can save countless lives through the prevention of unnecessary liver damage.

For many liver diseases, the only known treatment is liver transplant, but an adequate supply of donors is severely lacking. This situation has cost the lives of many children and infants whose livers have failed them. Many of the more serious liver diseases can be prevented if the public were better educated about the importance of the liver, its bodily function, and the serious damage that can be caused by drugs and alcohol.

One of the most serious liver diseases is cirrhosis, which is most commonly caused by alcoholism. Cirrhosis occurs when scar tissue replaces healthy liver cells, which blocks the flow of blood and decreases the ability of the liver to perform its vital blood-cleaning functions. This disease ranks as sixth among the leading causes of death in the United States, and alcoholism is mostly to blame.

One thing is obvious—the existence of massive alcohol problems within America today. There are an estimated 10 million adult problem drinkers, and an additional 3 million between the ages of 14 and 17. A broad spectrum of our society has demonstrated an intense concern over the impact alcoholism has upon the family and upon their communities. I wish to extend this concern to the alcoholic who may be joepardizing his or her life through liver damage.

In August, I introduced the Comprehensive Drug Law Enforcement, Prevention, and Treatment Act, S. 1583, which, among other things, will make funding available to the Secretary of Health and Human Services to assist public and private nonprofit entities in providing drug and alcohol abuse prevention and clinical training programs, and drug and alcohol abuse treatment services.

Alcoholism is among the major threats to the health of the liver. Other causes include viruses, environmental pollutants, and congenital abnormalities. It is important for every one of us to be made aware of their potentially hazardous effects upon the liver. I hope that Americans will use the month of November to educate themselves on the need to better understand the liver, its diseases, and their preventions and cures.●

LOW-POWER TELEVISION STATIONS

● Mr. D'AMATO. Mr. President, I rise today in support of legislation, S. 1526, to amend title 17, United States Code, with respect to secondary transmission of low-power television broadcast stations [LPTV].

This legislation, introduced by my distinguished colleague from Maryland, clarifies the definition of the local service area of a primary transmitter in the case of a low-power television station, a new service authorized in 1982 by the Federal Communications Commission, designed to provide local TV service to markets currently underserved by conventional television.

Current copyright law does not include low-power television stations when defining this area. Thus, local cable television systems consider a local LPTV signal a "distant" signal for copyright purposes, even if the LPTV station is in the local market area.

When an LPTV signal is considered "distant," the cable station is subjected to a heavy royalty fee, making LPTV undesirable and noncompetitive. The resulting inability of LPTV to compete causes underserved communities to receive little, if any, local programming.

LPTV serves markets currently underserved by conventional television. Therefore, many rural communities in the United States suffer from LPTV's failure to provide service.

Amending the Copyright Act of 1976 would allow thousands of new LPTV stations to begin local TV broadcasting, benefiting small communities which cannot support conventional TV stations.

S. 1526 does not affect any other copyright interests and greatly benefits underserved communities by providing television service. This legislation addresses a minor, yet worthy, oversight. I hope my colleagues will join me in supporting the promotion of low-power television stations.●

ORDER OF BUSINESS

Mr. MELCHER. Mr. President, will the majority leader yield?

Mr. President, do I have the floor?

Mr. DOLE. Mr. President, I have the floor.

Mr. MELCHER. Mr. President, will the majority leader yield?

Mr. DOLE. I yield for a question.

Mr. MELCHER. Mr. President, is it the intention to——

Mr. DOLE. Go out.

Mr. MELCHER. Come back on the bill at the same point we are right now?

[Laughter.]

Mr. DOLE. The Senator is correct. The intention is to go out because I think we have reached a little impasse here.

We will not get back on the bill until probably about 1 o'clock because we have that important hearing in the Agriculture Committee tomorrow. I know all Members will want to be there.

So we are going to start the Interior appropriation bill. I want to indicate that I am very encouraged that the Senator from Montana wants to reduce spending. That comes as a surprise. I need to have overnight to think about it.

[Laughter.]

Mr. MELCHER. Mr. President, will the majority leader yield further?

Mr. DOLE. I yield for a question.

Mr. MELCHER. Yes. For a question.

The hearing that we have tomorrow is extremely important. I merely wanted to ask the majority leader whether, after he has gotten over his surprise——

Mr. DOLE. Shock.

Mr. MELCHER. And cogitated overnight, he would be agreeable for me to be recognized to offer the amendment; $7.6 billion, after all, is a very significant cut.

Mr. DOLE. Mr. President, I do not want to indicate that could not be possible. I think we ought to wait and see what develops.

I think as I have indicated to the Senator there are a number of people who have been working on packages, and it may be that we can put all of these together in one big package.

Mr. MELCHER. Will the majority leader yield further?

The cargo preference people, of course, would like to get it done with. I understand that.

I just wonder whether the majority leader and the chairman of the full committee would try to work with me to be first recognized after we dispose of cargo preference. I have no reason to want to hold up cargo preference. I would just like to get up this budget-cutting amendment immediately after, if that were possible.

Mr. HELMS. Will the Senator yield?

Mr. DOLE. I am glad to yield.

Mr. HELMS. As I understand it, this year JOHN MELCHER is proposing an amendment to cut Federal spending. It is also the year of Halley's Comet. Two phenomena in 1 year.

Let me correct something the Senator said. Before the final vote on reporting the farm bill, I offered an amendment package to bring this bill into conformity with the budget which will require $9 billion in savings, not the $7.4 billion that Senator MELCHER apparently suggested.

Incidentally, I asked the Senator for a copy of his amendment 2 or 3 hours

ago and I still have not received one. I do not know what is in it.

Senator MELCHER voted against my package to balance the farm bill. I think he said otherwise or indicated otherwise. I just wanted to have the record straight. I thank the majority leader.

Mr. MELCHER. Will the majority leader yield? I do not want the able chairman to be under any misapprehension.

Mr. DOLE. Yes.

Mr. MELCHER. I thank the majority leader.

It is very true. I probably misled this body in saying that the distinguished chairman did not offer a package. What was not timed to be done on that final day, if the chairman will recall, was to go beyond into another day and let the committee consider a variety of proposals.

For instance, by vote we abolished the farmer-owned reserve. Now we find out, and we would have if we had analyzed it, by abolishing the farmer-owned granaries, we added a quarter billion dollars over the 3 years to the cost. I know we did not want to do that.

We had some idea that in the program for the conservation reserve we would try to get 10 million acres the first year. When we have now looked at how long it has taken and if we had properly analyzed it again at the end of that bill, we would have recognized we were not going to get 10 million acres into the conservation reserve during that first year. We are already into this fiscal year and we will have some weeks before this bill gets to final action.

So while the distinguished chairman presented a package that he wanted in cuts, it was rejected by the committee but the committee did not have the time to go and analyze the whole package and see where we were in order to be able to agree on a series of amendments.

The amendment is now available. It has just been made available. There are a number of items in it. I do not think the distinguished chairman or the distinguished majority leader will object to any of these cuts.

Mr. DOLE. Mr. President, I have looked over the cuts. They are mostly not cuts but they are figures——

Mr. MELCHER. They are CBO figures.

Mr. DOLE. They are much like the House bill savings, that they are not real. I think we might want to debate that at a later time.

RECESS UNTIL TOMORROW AT 9:15 A.M.

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until 9:15 a.m., Thursday, October 31, 1985.

Mr. BYRD. I object.

Mr. DOLE. We are going to have to have a rollcall here. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I move the Senate stand in recess until 9:15 a.m., Thursday, October 31, 1985.

The motion was agreed to; and the Senate, at 9:48 p.m., recessed until Thursday, October 31, 1985, at 9:15 a.m.

NOMINATIONS

Executive nominations received by the Senate October 30, 1985:

DEPARTMENT OF THE TREASURY

Francis Anthony Keating II, Of Oklahoma, to be an Assistant Secretary of the Treasury, vice John M. Walker, Jr.

NATIONAL COUNCIL ON THE HANDICAPPED

Nanette Fabray MacDougall, of California, to be a member of the National Council on the Handicapped for a term expiring September 17, 1987, reappointment.

IN THE AIR FORCE

The following Air National Guard of the United States officers for promotion in the Reserve of the Air Force under the provisions of section 593(a) Title 10 of the United States Code, as amended:

LINE OF THE AIR FORCE

To be lieutenant colonel

Maj. Paul W. Arnett, xxx-xx-xxxx
Maj. Mark E. Carns, Jr., xxx-x...
Maj. Samuel A. Coleman, xxx-x...
Maj. Phillip J. Eddy, xxx-xx-xxxx
Maj. Richard L. Fechter, xxx-xx-xx...
Maj. Francis C. Fernandes, xxx-xx-xxxx
Maj. James E. George, xxx-xx-xx...
Maj. William W. Hagemeyer, xxx-xx-xxxx
Maj. John W. Haynes, xxx-xx-xx...
Maj. Charles E. Houghton III, xxx-... xxx-...
Maj. Philip E. Junker, xxx-xx-xx...
Maj. Theodore J. Logan, xxx-xx-xxxx
Maj. Carl A. Lorenzen, xxx-xx-xxxx
Maj. Carmi D. McDougal, xxx-xx-xxxx
Maj. Curtis J. Pansch, xxx-xx-xxxx
Maj. Gary L. Picklesimer, xxx-xx-xxxx
Maj. Morris L. Rasmussen, xxx-x...
Maj. James P. Ryan, xxx-xx-xxxx
Maj. Anthony H. Scheuller, xxx-xx-xxxx
Maj. Clarence Tauzin, Jr., xxx-xx-xx...
Maj. Leslie H. Webster, xxx-x...

LEGAL

To be lieutenant colonel

Maj. Charles E. Bruneau, Jr., xxx-xx-xxxx
Maj. Robert D. Kuhnle, xxx-xx-xxxx

CHAPLAIN

To be lieutenant colonel

Maj. Dwight C. Brown, Jr., xxx-xx-xxxx
Maj. Charles W. Hough, xxx-xx-xxxx

MEDICAL CORPS

To be lieutenant colonel

Maj. Ernest J. Jones, xxx-xx-xxxx

DENTAL CORPS

To be lieutenant colonel

Maj. Roger H. Harkins, xxx-xx-xxxx

EXTENSIONS OF REMARKS

THE IMPORTANCE OF MEXICO

HON. ROBERT GARCIA
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. GARCIA. Mr. Speaker, Dennis Volman of the Christian Science Monitor is writing a four part series on Mexico this week. I am submitting for the RECORD the first of those articles which was published in the October 28 edition of the Monitor.

Mexico is a complex nation with complex problems. I believe that the future of our policy toward Latin America depends a great deal on our relationship with Mexico. I hope my colleagues will find Mr. Volman's article as enlightening as I did.

[From the Christian Science Monitor, Oct. 30, 1985]

MEXICO—THE ULTIMATE DOMINO?

(By Dennis Volman)

TUXTLA GUTIÉRREZ, MEXICO.—Earlier this year, the main square of Tuxtla, Gutiérrez, the capital of the southern state of Chiapas, was taken over by schoolteachers on strike.

At night the square became a campground. Behind a strikingly modern cathedral men and women wrapped in serapes for warmth huddled together on multicolored blankets.

Groups clustered around guitarists, singing Mexican folk songs. An occasional campfire made it look like some sort of Mexican Scouts' jamboree in an unorthodox setting.

An edge of tension, a hint of potential violence, hung over the scene. Townspeople lined police barricades—some shouting their solidarity with the strikers, others expressing outrage that their children were not getting an education.

Yet the strike was resolved peacefully. The teachers, whatever their potential for stoking radicalism and social unrest in poverty-stricken Chiapas, are allied to the ruling elite. Indeed, their union was organized by the Institutional Revolutionary Party (PRI, from its Mexican name), which has governed Mexico for more than 50 years.

This co-option of potential opposition characterizes Mexico, at least for the moment, and helps explain why the country has avoided massive social upheaval despite its serious economic crisis and longstanding problem of social inequality.

As one Western diplomat who is a longtime resident of Mexico puts it, "The Mexicans will, as they always have done, continue to muddle through. They have extremely serious problems and might have sporadic violence—but the system is solid. It has worked at co-opting all forms of opposition for 50 years, and there is no indication that it won't adapt to the problems of the day."

Most Mexicans would agree with this analysis.

Mexico is a nation in which a severe economic crisis has sharpened great social differences between the rich and the poor. It is faced with a population boom that would be difficult to handle in the best of times, a country in which social confrontation seems almost inevitable.

Almost miraculously the system seems to carry on regardless. Most people are like the teachers in Chiapas—part of the established political system in one way or another. In spite of tremendous pressures, most Mexicans of all social strata think that the system will probably continue to work for the next five or 10 years, although it's longer-term survival is unclear.

Mexico's current economic crisis began in 1982–83 when the price of oil (Mexico's main export) dropped severely and real wages fell 23 percent in a 12-month period. The economy was just beginning to recover at the start of 1985, but the price of oil fell by midyear, and inflation accelerated again. This has plunged the economy into a crisis, although not as severe as the one of 1982–83. On top of this, Mexico was rocked by earthquakes in September costing at least $5 billion in damages.

For several years most politically articulate Mexicans listened to, and discounted predictions of American doomsayers that the Mexican political and social structure would crack under the strain of the country's great financial crisis of 1982–83. It was the most serious economic situation Mexico has had to face since its 1910 revolution. Members of the Reagan administration were among the prophets of doom.

Today, despite new economic setbacks, a second Mexican revolution has not yet occurred. If anything, the bulk of the Mexican population has distinguished itself by its remarkable passivity at a time of great hardship.

When most Mexicans discuss what they universally call "the system," they look at its future in terms of economic and distribution problems. They seldom view threats to the system as being the possibility of left-wing subversion, working its way up through Central America.

The "domino theory" so popular among many Reagan administration officials and other North Americans finds no echo here. The theory holds that if the left-wing insurrection that triumphed in Nicaragua sweeps through the rest of Central America, it will eventually bring down Mexico, and even imperil the United States.

For instance, most Mexicans do not think a guerrilla takeover in Guatemala would be the main factor in determining their country's future. At most, Mexicans see the key factor in such a hypothetical takeover as creating a refugee problem and causing political ripples in the poor southern border province of Chiapas.

In short, US and Mexican analysts say that upheavals to the south would affect the whole country. They do not, however, say that these would decide Mexico's fate.

"In general, Mexico's continued political stability depends mainly upon what happens within Mexico," says Susan Kauffman Purcell, director of Latin American studies at the Council on Foreign Relations in New York. "The stronger Mexico is, the less chance that anything that might happen in Central America will affect it. On the other hand, if Mexico is going through a series of severe internal economic and political problems, a difficult situation to the south does not help."

Some analysts are more concerned about the potential political polarization and destabilizing effect on their country of any direct US military intervention in Central America. They believe any such intervention would touch off years of guerrilla warfare in the region.

Meanwhile, a broad consensus in Mexico holds that the system set up by PRI in the 1920s, which claims to carry forward the work of the 1910 revolution, is in no danger of sudden collapse. There is little fear of immediate catastrophe such as mass uprisings or military coups. Almost all of the diplomats, academics, politicians, businessmen, and average Mexicans interviewed for this series agree that a more or less modified PRI will continue to rule Mexico for at least another five or 10 years.

Beyond that period, few such Mexican or foreign analysts are ready to venture any guesses. What they fear most is a steady deterioration of the economic situation and a potential unraveling of the system of broad-based political alliances with which the PRI has governed since 1928. If that happens, the party, in order to maintain its power, might retreat into authoritarianism.

PRI's system of alliances was built up after the revoluton. The military chiefs who emerged with power after the civil conflict tried to mediate between the main social classes. They made concessions to landowners, to the business sector, to peasants, and to workers. These sectors were incorporated institutionally into the PRI.

Many critics of the PRI charge that, although this system of alliances has worked in governing the country, it also stopped the government from building a coherent economic model. It is difficult, critics say, for the PRI to embark on a more conservative economic policy without alienating peasants and workers, or a more liberal course without offending the business component of the party.

Many US and Mexican analysts are concerned that Mexico has reached a dead end in its efforts to provide a decent life for its rapidly expanding population. (Mexico's growth rate is 2.6 percent a year. This year's population is 79.7 million. It is estimated that in the year 2000 it will be 112.8 million.) If this problem is not resolved during the coming decade, many say, the system will unravel.

If Mexico is to provide a semblance of a decent life for most of its people, it must have a climate of international economic prosperity and major structural reforms, say these analysts. It will be impossible to carry out such reforms for the next few years because of political reasons.

According to Carlos Tello, an academic who served as planning and budget minister in the administration of President José López Portillo, Mexico's greatest needs are an agricultural sector that can feed the growing numbers of people and an industrial sector that can produce goods cheaply for them.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member of the Senate on the floor.

Boldface type indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

Critics on both the right and the left of Mexico's political spectrum, liberal academics as well as thoughtful businessmen, say Mexico's economy is caught between an inefficient state-owned enterprise and an unproductive private sector. The large state-owned sector (i.e., oil) is plagued by lack of planning, bureaucracy, and corruption. The private sector holds back from making investments, because it both mistrusts the government and has grown used to making quick profits from speculative ventures rather than productive projects.

At the same time, the deep structural changes necessary to make the Mexican political-economic system work for most of the country's people are viewed as politically impossible. Such reforms would either be viewed as radical and deeply alienate the Mexican private sector and the Reagan administration or viewed as conservative and estrange the peasants and workers who constitute PRI's popular base.

But an extreme change toward a completely private-sector-oriented, "Reaganomics" type of economy—desired by many businessmen—would be largely unacceptable to PRI's popular base. Finally, any move that tended to diminish the power of the PRI bureaucracy would arouse great opposition within the party's own ranks.

Meanwhile, Mexico's population leads an increasingly difficult life. The sufferers are not only the very poor but also those who are reasonably well off—compared with much of the third world, although considered poor by U.S. standards.

"Francisco" (he was forthcoming about everything except his last name) is a young taxi driver with three children. Dark-skinned and squat in build, he clearly shows his Aztec ancestry.

Francisco rents his cab, which means that he is better off than millions of Mexicans who are unemployed or who earn minimum wage. But he is not among the minority who own a substantial amount of property.

Five years ago, before the economic crisis began, Francisco worked 10 hours a day and ate meat every day if he so chose. Now, 12 to 14 hours a day of driving in Mexico City will buy meat three days a week.

Higher up in the social scale, people well established in the middle class have also undergone changes for the worse in their standard of living. These changes have made them increasingly dissatisfied with the PRI—a feeling greatly heightened by what they view as the rampant corruption and economic mismanagement of previous administrations.

Lorenzo Meyer, a Mexican academic at a major think tank, says the growing disenchantment among the middle classes will be the PRI's most serious political challenge in the next few years. The PRI can survive if the middle classes are politically apathetic. But if these people see a political party on the horizon that presents them with a strong alternative—which at present they do not—they could start actively opposing the PRI. This could pose serious problems for the ruling party.

Most Mexcians are economizing, but for the least fortunate Mexicans, a drop in their income can result in dire misfortune, such as the death of a child.

Although there are no clear figures, social workers and doctors who deal with the poorest of the poor report a disturbing rise over the last two or three years in infant mortality and malnutrition, which had previously been declining for decades. Mexico's infant-mortality rate, which in 1982 was 53 per thousand births (respectable but not excellent even by third-world standards), has risen steadily since the economic crisis began in 1982–83.

Despite the mounting economic hardships, most Mexicans still back the ruling party, but listlessly and rather cynically. They increasingly support the PRI because of tradition and see little alternative in the minority opposition parties, say political analysts.

Many Mexicans, too, are cynical about President Miguel de la Madrid Hurtado's efforts to eradicate the government corruption that became a public scandal under his predecessor, José López Portillo. They seem to believe that Presidnt de la Madrid and his immediate circle are probably honest personally and are making some effort to control corruption within the party and government. But they are losing hopes of real reform.

"In the last year or so I have wanted to change parties [and leave the PRI], but all the parties are alike," says a young woman previously active in PRI affairs. "They're all looking for power. Once they have the power, they don't give a hoot about the rest of the country."

The acid test of corruption, and perhaps the determinant of the present administration's political future, will come within the next year with the rebuilding of Mexico City after the devastating September earthquakes proceeds. If the government is perceived as handling the situation corruptly or inefficiently, the results could be very grave for Mr. de la Madrid.

PRI officials say their party is the only one that is truly national. The largest opposition political party, PAN (the National Action Party) received only a small percentage in July's midterm election.

"PAN is just a right-wing interest group allied with business interests in the north, and the left-wing parties are mainly a group of squabbling intellectuals with little mass support," says the government official.

Many Mexicans concede that, whatever PRI's defects, social progress has been made under the party's leadership. As one upper-class woman who works as a social worker and supports the ruling party puts it, "In roughly 65 years, literacy rates have gone up from 18 percent to 87 percent. Life expectancy has risen from 44 years to 63 years."

Not even the most enthusiastic PRI officials and party supporters, however, are inclined to rest on their laurels. They know they will have very little to offer Mexicans for the next few years. What they are most interested in is surviving the crisis.

They must also face the entry into the job market of Mexico's baby boom of the late '50s, '60s, and early '70s. Mexico's population has increased from 19.8 million in 1940 to 79.7 million today.

This would be a challenge even in a time of relative economic prosperity. It swamps the PRI's traditional system of distributing material benefits to various sectors of Mexican society.

"The PRI has always kept the different sectors of its power base happy by giving out pieces of the pie," says Carlos Frederico Paredes, a former Salvadorean vice-minister of planning who lived in Mexico as an academic for several years. "But the pie has shrunk, so there is less to distribute. Right now, in an effort to stimulate the economy, the government is giving the largest slices to business, and the workers are having to make do. This can't go on for a long time without the system having to change. Economic scarcity which lasts for a long time means new political arrangements."

If this assessment is correct, over the next 10 years the PRI will either have to reform, giving more political space to opposition groups and dissent and overhauling itself internally, or it is likely to retreat into authoritarianism, most observers say.

Historically, most Latin American governments have taken the second, authoritarian, alternative. Most Mexicans hope the PRI will choose the first—reform. Either way, events farther south in Central America are unlikely to play a dominant part in Mexico's decision.

INTELLIGENCE

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, October 30, 1985, into the CONGRESSIONAL RECORD:

INTELLIGENCE

In the arsenals of governments, no weapon exceeds intelligence in importance. Being secret, it is also the least understood. The questions and answers that follow may help in understanding what intelligence is all about.

1. What is intelligence?

Intelligence is generally considered the secret collection of information not publicly available, analysis of the information, and supplying it to policymakers. The main tasks of intelligence are to assess present actions of governments or groups, such as terrorists, and to determine their intentions.

2. Who uses intelligence?

Although top officials—the President, the Secretary of State, the Secretary of Defense and the Joint Chiefs of Staff—use intelligence, most of it also goes to many lower level officials, much of it to support military plans, operations and weapons systems development.

3. How is the intelligence community organized?

The intelligence community is not rigidly organized. It includes: the Central Intelligence Agency, which is responsible for human intelligence collection and analysis; the National Security Agency, which collects foreign communications intelligence; the Defense Intelligence Agency, which analyzes intelligence gathered by other agencies for the Secretary of Defense and the Joint Chiefs of Staff; the FBI, the domestic counterintelligence agency; the intelligence departments of the armed services; and other agencies, units and groups. There is no single head of all U.S. intelligence activity, although the Director of Central Intelligence is our preeminent intelligence official.

4. What do we ask intelligence to do?

Our government needs an enormous amount of information to protect our national security and carry out U.S. foreign policy. After World War II, most of our intelligence activity concerned the Soviet Union, the Peoples' Republic of China, and North Korea. Today, intelligence also includes international terrorism, narcotics trade, third world debt, Soviet grain purchases and other topics. The stability and intentions of almost every government in

the world interest us. Intelligence can help avert a crisis, as in the Soviet attempt to install missiles in Cuba. It can help verify arms control agreement compliance.

5. What are covert actions?

Covert actions are secret attempts to influence people, events and nations in support of U.S. foreign policy. They are not meant to be attributed to the U.S. and should aid, rather than replace, foreign policy. Covert actions include: propaganda, for example, keeping the world informed of Soviet misdeeds; political action, such as our support of anti-communist parties in the West after World War II; and paramilitary operations like the war in Laos during the 1960s. Unless the President directs otherwise, the CIA conducts these operations. Covert actions allow us to support foreign political leaders without exposing them to charges of being U.S. pawns. They allow us to compete with the Soviets in the Third World without creating open confrontations. They also give the President an option besides diplomacy and military force to implement foreign policy. Drawbacks of covert actions include the risk of embarrassment and criticism of the U.S., if disclosed, and diverting the CIA from its main task of intelligence collection and analysis.

6. What is Congress' role in overseeing covert actions?

The President informs Congress of each covert action. He does not need congressional approval. If Congress dislikes an action, its only recourse is to deny funding, as it did with Nicaragua. The Congress reviews the authority, goals, means and timetable of covert actions on a regular basis.

7. How good is our intelligence?

Our intelligence is generally good, but it could be improved. We do not have enough information about the Soviet Union. Our estimates of Soviet oil production in 1977 were wrong, and estimates of Soviet military spending have been inconsistent. Our lack of understanding of political dynamics in the Soviet Union hampers our ability to react to Soviet behavior. We know too little about the Middle East and Central America, and about terrorism. U.S. intelligence has had notable successes. Our information in Vietnam was consistently accurate. We have learned a great deal about Soviet military capabilities. U.S. intelligence described the real impact of sanctions on the Soviet gas pipeline.

8. How can we improve our intelligence?

We should give it higher priority. Countries that believe their existence depends on it have good intelligence. We should also depoliticize intelligence. Intelligence is often used to make policy look good rather than to develop policy. We should separate analysis from policy, although effective analysts need to be aware of the policy. Dissenting views can be stifled by the search for consensus, so we should encourage competing intelligence estimates. Through the budget process, congressional oversight can improve intelligence, chiefly by asking the right question: Does the right person get information on time? Does funding a request mean the eventual acceptance of others? Is a system cost effective? Does the budget support arms control monitoring? Congress must apply common sense to intelligence activity that affects our foreign policy.

9. How important is intelligence?

Good intelligence is essential to our security. We must cast aside romantic ideas about spy thrillers and get down to the hard, detailed work of improving intelligence so that we have the best available information for making decisions.

PORTUGAL'S DEMOCRACY

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. COELHO. Mr. Speaker, as the Christian Science Monitor editorialized recently, the "results of Portugal's newest election are an affirmation of democracy and a vote for continuity."

As a Portuguese American, I am proud of the election results. Portugal's experience with democracy is only 11 years old, and severe economic hardships confront the Portuguese people; still, they went to the polls and expressed confidence in their free society and democratic form of Government. I am sure that all Americans join me in supporting the new Government of this important Western ally.

Mr. Speaker, this is a critical time for Portugal. Recently admitted to the European Economic Community for the first time, Portugal faces austere economic times and great challenges ahead. Efforts to begin an economic recovery will only be enhanced by a stable, democratic coalition in Lisbon.

I met recently with the new American Ambassador to Portugal, Frank Shakespeare, and I am confident that he will represent our interests well but also the mutual interests of our two great countries.

I would like to insert the Monitor article for the RECORD.

PORTUGAL DEMOCRACY AFFIRMED

Results of Portugal's newest election are an affirmation of democracy and a vote for continuity. The political center gained strength, at the expense of right and left: The nation's democracy, 11 years old and until recently given to wild swings of public mood, is becoming more stable.

This growing centrism and stability should be heartening to Western Europe and the United States. Portugal officially joins the European Community in January; both Europe and the US have been seeking to tie Portugal, like Spain, more closely to democratic Europe. Only a decade ago Europe was gravely concerned that Spain and Portugal would turn sharply to the left, a change of direction that occurred only briefly in Portugal. Sunday's election is a swing back from socialism toward the center.

When President Reagan was in Lisbon five months ago the Socialists, under outgoing Prime Minister Mario Soares, were expected to do well in this vote, but they lost much parliamentary strength. As the leading vote-getter, the Social Democratic Party has the first try at forming a new government.

In a democracy it is difficult for political leaders to impose austerity, as Soares did. As this election illustrated, socialist parties find the task particularly daunting, inasmuch as it undermines the reformist thrust of their entire programs.

Yet a need for austerity remains. Presumably the new government will continue it, at the risk of voter disapproval come the next election. Creditor nations and banks ought to show Portugal the understanding that is being voiced about Latin American debtors; easier repayment terms should be offered.

Or they might permit Portugal to have an off-and-on austerity program, alternating brief periods of relaxation with longer times of stringency. This approach might enable the government to control the economy while retaining popular support.

DEFAULTS THREATEN STUDENT LOANS

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. COURTER. Mr. Speaker, worthwhile Federal student loan programs have come under attack lately, primarily because of the high levels of defaults on loan repayments. Representative DEAN GALLO has pointed out that much of the problem with defaults is due to an ineffective distribution of the responsibility for collection.

I highly recommend that my colleagues read the enclosed article by Representative GALLO, which provides a realistic, workable approach to improving our dismal collection record. This approach certainly warrants further study in the House Education and Labor Committee. The article follows:

[From the New York Times, Oct. 27, 1985]

DEFAULTS THREATEN STUDENT LOANS

(By Dean A. Gallo)

Federal student-loan programs have revolutionized our national system of higher education. Young, talented people who equate a quality education with success, but whose parents lack the financial means to send them to college, are now able to further their schooling with the help of federally guaranteed loans.

However, as Congress considers reauthorization of the Higher Education Act of 1965, we are faced with a new set of challenging and difficult questions.

The current Federal student-loan programs—specifically, the National Direct Student Loan program (N.D.S.L.) and the Guaranteed Student Loan program (G.S.L.)—have encountered unwanted side effects following a generation of rapid growth in aid to higher education.

The rising cost of a college education has put many current students in a difficult position. They face burdensome levels of debt when they leave school, and increasing numbers have defaulted on loans.

Rising defaults on past loans threaten the future of the Federal loan programs for a new generation of young people, who need our help more now than at any time in the past, precisely because of the rising cost of a college education.

Losses from student-loan defaults now top $1 billion, a figure that has doubled in the last four years. The Secretary of Education has indicated that this figure could go as high as $3 billion in the near future.

This situation has developed because of the common misconception that no one loses if a student defaults. In fact, you and I—the taxpayers—lose.

Yet, in spite of this rising debt, we cannot lose sight of the importance of these programs to our future simply because current loan repayments have not been adequate.

Every year, Congress provides an ever-increasing amount of money to make or guar-

antee loans to students by banks, schools and other authorized leaders.

To understand this cycle of rising Federal outlays for student loans, one must recognize that the current system has numerous participants: students, parents, schools, banks, other authorized lenders, state guarantee agencies, the Federal Government and, finally, the taxpayer.

The problem of defaults lies in the fact that the responsibility for monitoring and collecting these loans is not divided equally or effectively among the beneficiaries and participants.

Both the Federal and state governments have already acted to increase collections from former students by garnisheeing the wages of government employees who have outstanding loans and by withholding tax refund checks.

However, further action is necessary to prevent loans from going into default in the first place.

Under the prevailing system, Federal loan programs provide students, schools and lenders with a fallback position. Simply put, the Federal Government will cover all or most of the cost for any losses due to student default.

This is a key provision of the program because it encourages schools and private lenders to provide loans to students who would not otherwise have the collateral to borrow money. As with other Federal loan programs, these loans are also subsidized to keep the interest rates below market rates.

The principle behind the student-aid programs is sound, but the current way it is administered leaves questions that need to be addressed by Congress.

I am convinced that the best way to make the system more accountable is to recognize schools and lenders that have developed good track records in the two student loan programs and to remove those with consistently bad records from the list of eligible providers.

Without penalties for high default rates, our current Federal loan programs encourage schools and private lenders to make loans to students without proper counseling or adequate monitoring. Loan defaults can simply be passed on to the Federal government for repayment.

This is already a guiding principle behind the National Direct Student Loan progam, which is administered by the participating schools.

Under this program, the Federal Government helps schools set up revolving funds to be used for student loans. The Federal contribution is equal to 90 percent of the entire fund, and each year the Government makes additional contributions to these funds.

N.D.S.L. regulations prohibit any additional Federal funds from being contributed to schools with default rates in excess of 25 percent. Also, contributions are reduced for those schools with default rates between 10 and 25 percent.

However, the larger of the two aid projects—the Guaranteed Student Loan program—has no similar restraint on its primary lending institutions.

To take this additional step, I have introduced a bill that makes the N.D.S.L. regulations permanent and applies similar restrains to the G.S.L. program. The measure would require removal from the G.S.L. program of lenders who received fault reimbursement from the Federal Government for more than 25 percent of their total loan portfolio.

By placing a ceiling on the amount of defaults that institutions can turn over to the Federal Government without penalty, this bill makes it clear that lenders must make effective and productive efforts to encourage repayments before resorting to Washington for repayment.

Lenders and schools also should provide adequate financial counseling for students applying for federally insured loans and monitor the progress of loans throughout the period of repayment.

Many options are available to people facing the propsect that they will not be able to meet the repayment schedule of their loans. Defaulting on a student loan should be a last resort when all other options have been exhausted.

Ultimately, reducing student defaults is a crucial step in insuring that the two loan programs will be maintained at sufficient levels to assist low- and moderate-income students in furthering their educations.

EUROPEAN EXPECTATIONS OF THE SUMMIT

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. GARCIA. Mr. Speaker, the October 29 edition of the Christian Science Monitor had an article about European concerns over the upcoming summit between President Reagan and First Secretary Gorbachev.

The article mentions, among other things, three concerns that Western Europe has regarding the relationship between the West and the Soviets. They are: First, detente; second, nuclear deterrence; and third, the desire for a fair agreement with the Soviets. I believe the Monitor article offers an important analysis of Western European perceptions of the upcoming summit, and I submit it to the RECORD for my colleagues' perusal.

[From the Christian Science Monitor, Oct. 29, 1985]

WEST EUROPEAN LEADERS CONCERNED ABOUT US PRE-SUMMIT STANCE

(By Louis Wiznitzer)

PARIS.—Publicly, West European leaders back President Ronald Reagan as he prepares to meet Soviet leader Mikhail Gorbachev in Geneva next month.

Privately, they voice concern that the summit meeting will be unsuccessful.

Despite soothing words to the contrary spoken to them last week by United States officials in Washington, New York, and Brussels, European leaders still have the impression that the Reagan administration is deeply divided with regard to its approach to arms negotiations with the Soviets. These leaders fear these divisions have made Washington reluctant to grapple with the subject.

Deep, philosophical cracks between US and West European positions regarding the Soviet Union are surfacing again, which do not lend themselves to papering over.

"In a nutshell, Western Europe remains committed to a) detente, b) nuclear deterrence, and c) to striking a deal with the Soviet Union, provided it is fair and does not leave the Soviets with a stronger hand, militarily, than the West," says one West European diplomat who has followed preparations to the summit meeting closely.

But in Washington, this diplomat says, the same goals are not evident. He says there are some who are opposed to any deal with the Soviet Union, whatever its terms. Some US officials remain committed to President Reagan's space-based defense program, the Strategic Defense Initiative (SDI, or "star wars"), because they see it as a way either to provide the United States with military superiority over the Soviet Union or to drag it into an arms race which could sink its economy.

A number of West Europeans officials, willing to speak on condition that they not be identified, claim that Mr. Gorbachev is going to Geneva with a clear strategy and a willingness to compromise. But Mr. Reagan seems to be without a strategy, heading a split delegation of advisers, and more eager to score propaganda points than to seek an agreement on arms control, these sources say.

"Ronald Reagan's speech in New York last week was for home consumption," says one West German diplomat. "Having been caught off guard by Mikhail Gorbachev's recent initiatives on arms reduction, he tried to change the subject and modify the rules of the game, by linking the talks on arms control to progress on regional issues."

While people in Western Europe strongly disapprove of Soviet occupation of Afghanistan, they are more concerned with the danger of nuclear war than with the political fate of Nicaragua or Cambodia, says this source.

He goes on to say that "the peace movement was successfully contained by the British, Dutch, German, and Italian governments in recent years. Now it may be reignited with Reagan, instead of [former Soviet Foreign Minister Andrei] Gromyko, engaging in 'nyet' policies."

A British diplomat says, "Gorbachev's recent proposals are a mixed bag. They need a lot of sorting out. But they contain many interesting goods.

"A reduction of 50 percent of its nuclear arsenal, a 60 percent ceiling on its heavy missiles as part of its strategic weapons, and a commitment to not deploy new SS-20 missiles in Asia cannot simply be dismissed as bluff or propaganda. If Reagan appears to be intransigent, no smoke-screening devices will deceive West European public opinion for long," this diplomat says.

"Whether the Reagan administration is dead set against putting 'star wars' on the bargaining table or is divided about the issue, and is therefore obliged to skip it, is beside the point," says a French official. "Lambasting the Soviets in public will not do the trick.

"If the Americans turn out to be inflexible, or are perceived as such, if they don't match Soviet concessions with some of their own, this will create a lot of uneasyness among West Europeans," this diplomat says.

There is consensus in Bonn, Paris, and London that a historic opportunity to reduce East-West tensions and the danger of war may be at hand. They want Reagan to make a strong effort to find out whether Gorbachev's proposals are serious, and whether he is willing to show more restraint in foreign policy than his predecessors.

THE FUTURE IN EL SALVADOR

HON. BOB EDGAR
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. EDGAR. Mr. Speaker, the conclusion of the kidnaping crisis in El Salvador last week marks a new stage in the conflict between the Government and the rebel forces.

It has become obvious, as David Newell wrote in this week's issue of Newsweek, that "In snatching the President's daughter, the guerrillas held hostage a whole country and proved that, far from defeated, they can wage a long war."

It seems obvious now that neither side can decisively win in El Salvador; all each can do is continue the carnage and raise the death toll. Last June, when the American marines were killed in San Salvador, I rose on the House floor to call for both sides to end the war and negotiate a settlement. I still believe that this is the only way to stop the killing.

There is strong rhetoric on both sides of the conflict. The following letter was delivered by the FMLN to congressional leaders this summer. Once the rhetoric is put aside, it shows that the guerillas also believe that the war is at a stalemate and that Congress must intervene to achieve peace.

Mr. Speaker, I do not pretend to have the key to a solution that will end the violence in El Salvador. But we must continue to seek a solution, and follow up on any initiatives by either side. In addition, we must seek to further involve the Catholic Church in the peace process, given its respected position, influence, and participation in earlier mediation efforts.

The letter follows:

MORAZAN, EL SALVADOR,
July 1985.

DEAR ————: Interference by the Administration of President Ronald Reagan in the internal affairs of El Salvador has already reached the level of direct intervention in the armed conflict. The involvement of United States war materiel, military advisers and economic resources in this conflict is approaching the level of an undeclared war by the Reagan Administration.

This involvement takes concrete forms. For example:

(a) Development and coordination of counterinsurgency plans;

(b) Training of government armed forces both inside and outside El Salvador;

(c) Supplying arms, ammunition, aircraft and artillery;

(d) A large number of military advisers, who already represent a very high percentage of the army's officer corps and who have de facto taken on the tactical and strategic direction of the Salvadoran Armed Forces;

(e) The presence of U.S. advisers in or over areas of conflict. For example:

Major Queen in Operation Roblar I, Guazapa, June 1985;

Colonel James Steele in Operation Torola IV, Morazan, October 1984;

Proven participation of a U.S. adviser in an operation of troop transportation by helicopter, in which Commander Nidia Diaz of the FMLN was captured (San Vicente, April 1985);

The recovery of a helicopter downed in combat (Morazan, June 1985), using a "Chinook" U.S. Army helicopter flown by U.S. military personnel out of their military base in Palmerola, Honduras.

The growing intervention by the U.S. Administration is clearly an act of aggression. It has brought all manner of tragic consequences, not only due to the air war, but also because of the direct involvement of the U.S. advisers in this war which has taken the lives of more than 50,000 civilians and produced more than one million refugees and displaced persons (1/5 of the total population). This constitutes a high level of destruction of the country and its resources.

It is evident that nothing has been capable of stopping the FMLN. U.S. intervention in El Salvador has only increased the suffering of our people and the destruction of our country.

In order to maintain this level of intervention, President Reagan has distorted the truth to Congress and the American people, promoting a false image of the Duarte government.

In El Salvador, true agrarian reform does not exist. The little that was accomplished is now paralyzed and corrupted. Duarte's agrarian policies have brought about bankruptcy and indebtedness among rural farmers. Phase II of the agrarian reform was never implemented, and the basic structure of economic power has remained intact.

The government is promoting economic policies which only favor the dominant sectors, thereby subjecting the working majority of the people to the stifling effects of spiraling inflation, wage freezes, unemployment and economic chaos.

There is corruption at all levels. The investment of millions of U.S. dollars has heightened the contrasts of social inequality. Corruption among high army officers and government officials is uncontrollable. The corruption is similar to that which existed among the local allies of the United States during the Vietnam war.

The judicial system is inoperative and corrupt. Not one political crime (murder of Monsignor Oscar Arnulfo Romero, U.S. agrarian reform advisers, etc.), or mass crime (massacres at El Mozote, Las Hojas, etc.) has been solved. There are hundreds of political prisoners, and thousands of "disappearances" and political assassinations take place with impunity.

There is systematic repression against grassroots organizations: arrests and assassinations of trade unionists, workers and students; military blockades of workplaces; terror against the rural population, and so forth.

The Duarte government lacks popular support. There are growing signs of popular discontent (demonstrations, strikes).

Grassroots sectors and organizations, who supposedly made up the social base of the Duarte program, stand today in open opposition to the government. The recent electoral victory of Duarte's party proves nothing in El Salvador. Colonels Sanchez Hernandez and Molina, as well as General Romero, also reached the presidency by way of supposedly democratic elections, and yet brought bloodshed and war to our country.

Furthermore, no election authorizes anyone to bomb and displace unarmed civilians as Duarte authorizes daily. It is timely to remember that Mr. Ngo Dinh Diem became president of South Vietnam without any popular support, and the results are well-known.

Injustice and popular discontent will persist as long as these conditions persist, and the war will continue to be fueled by the very causes which gave rise to it.

With regard to the military situation, it can be proven that reality stands in stark contrast to the analyses and projections of the Administration.

In a short time, the war will have spread to the entire national territory. This runs contrary to the strategic plans of the U.S. advisers who are attempting to confine the war to one or two separate areas within El Salvador.

The number of casualties among the ranks of the government army is growing daily in the course of their patrols and operations planned by the U.S. advisers. The U.S. Embassy in El Salvador is well aware that the casualty figures listed by General Vides Casanova in his monthly report to the Legislative Assembly (July 1985) are manipulated and falsified.

The air war is a crime against the civilian population, yet ineffective against our military forces.

The FMLN is able to render inoperative any economic or political program imposed behind the backs of the majority. Duarte's army is unable to thwart our policy of eroding the economic, political and military base of the government.

We are prepared to wage a long war of attrition, even against an eventual intervention by foreign troops.

President Reagan has lied repeatedly in his attempts to place the issue of U.S. intervention in El Salvador within the context of an East-West confrontation. This is absurd. An analysis of El Salvador's geographic situation will demonstrate that it is impossible to sustain the FMLN from other countries. The United States has taken control of both oceans (Pacific and Atlantic); it has military bases and military control of all land borders. In order to be sustained by foreign logistical support equalling even one percent of the current U.S. support for the Duarte government, the FMLN would require such quantities of boats, airplanes and trucks that it would be impossible to hide them.

Our forces and our resources come from inside the country—they are based on popular support. The origins of the conflict lie in the deep and intolerable inequality and social injustice, and the suppression of civil and human rights of the Salvadoran people.

In this context of social injustice, repression and intervention, Jose Napoleon Duarte is trying to use dialogue as a political component of the military plan drawn up by the U.S. advisers, and not as a true alternative for a negotiated political solution to the conflict.

This reasoning attempts to achieve at the negotiating table the goal which has not been achieved on the battlefield. They are using dialogue to attempt to force us to surrender, although they are unable to win the war nor take away our weapons in combat.

For Duarte, the dialogue process is but an instrument to achieve bipartisan consensus in the U.S. Congress in order to maintain U.S. economic and military aid, thereby prolonging the war in the search for an illusory and impossible military victory. He expressed this very clearly in his speech to the U.S. Chamber of Commerce (June 1985).

It is within this context that we must understand the present controversy regarding the continuation of the dialogue process: the issue is will it take place secretly and in another country, or publicly inside the country.

The first option signifies that dialogue would be utilized to win approval of U.S.

51-059 O-87-41 (Pt. 21)

aid, which would mean the prolongation and deepening of the war. Secret talks would eliminate public pressures to carry out the agreements reached, thus allowing Duarte to maintain the false image of a negotiator before the American people and Congress. If the dialogue is conducted openly, commitments and conclusions must be agreed upon in full sight of the Salvadoran people and international public opinion.

Confronted with these alternatives, Duarte has interrupted the dialogue process.

There are clearly two possible courses of action:

(a) An end to intervention in El Salvador by the U.S. Administration and the initiation of a process leading to a negotiated political settlement.

(b) A continuation of the policy of aggression and intervention against our people and the unleashing of a greater war: a regionalization of the conflict, dragging the youth of El Salvador, the United States and of other countries into a holocaust without any true and objective perspective of military victory for the United States.

You know as well as we do that a war of this type is not won on the basis of arms superiority, but rather on the basis of popular support. There is no doubt that intervention by U.S. troops in our country would deepen the nationalist character of this war of the entire people in defense of their lives and their sovereignty.

In an attempt to justify the U.S. role in El Salvador to the American people, the Reagan administration has come up with a supposed third alternative which lacks any true basis: to obtain our surrender through threats, pressures and more intervention. This vision is unreal. Our confrontation with intervention strengthens our love for our homeland, as well as our principles and our nationalism. We will never surrender. This third alternative will merely serve as an excuse for future escalations of intervention.

We would like to express to you, members of the Congress of the United States of America, and to the American people as a whole, that there are historical and geographic links that unite us, which can contribute to progress, brotherhood and mutual cooperation and respect. We would like to maintain and strengthen these ties, but it must be understood that today we are exercising our irrevocable right to legitimate self-defense against aggression by the administration of President Reagan.

We therefore propose that Congress, as a contribution toward peace, take steps and present initiatives which will allow for an end to the process of intervention in El Salvador. Only in this way can a just and lasting solution be achieved, one which will allow us to exercise our right to self-determination and which will free the American people from another tragic war.

We are convinced that the U.S. Congress can initiate this process toward peace with the same authority that it exercises today in supplying the military aid which maintains, prolongs and aggravates the war. It is well-known that he who can decide to wage war can decide to make peace.

THE MEDICARE FAIR HOSPITAL INSURANCE DEDUCTIBLE ACT OF 1985

HON. THOMAS J. TAUKE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. TAUKE. Mr. Speaker, I wish to commend the chairman of the Aging Committee, Congressman ROYBAL, for his leadership in introducing the Medicare Fair Hospital Insurance Deductible Act of 1985. I am pleased to join Chairman ROYBAL as an original cosponsor of this much-needed legislation.

The Medicare Fair Hospital Insurance Deductible Act of 1985 will spare Medicare beneficiaries a staggering 23-percent increase, from $400 to about $492 next year, in the deductible they must pay for Medicare hospital coverage. Our Nation's elderly cannot afford the shock of a 23-percent increase in their out-of-pocket expenses, especially since their Social Security checks will increase only 3.1 percent next year.

This enormous increase in the deductible is bitterly ironic, for it may be traced to the success of Federal efforts to restrain Medicare outlays. Under current Medicare law, the deductible reflects the average cost per day of hospitalization. New treatment technologies and procedures, the use of outpatient clinics and other nonacute care settings, admissions review programs, and the switch from a reimbursement system which paid hospitals for each service provided to the beneficiary to a prospective payment system which pays hospitals a set rate for the care of a category of illness (diagnosis-related groups) have combined to shorten Medicare beneficiaries' length of stay in the hospital and to make the typical in-hospital patient one who is sicker and in need of more intensive services. Higher per-patient-care costs divided by fewer patient days gives us this 23-percent leap in the deductible.

The Fair Hospital Deductible Act of 1985 makes a very reasonable change in how the hospital deductible is calculated. The act limits the increase in the deductible to the lesser of the Social Security cost-of-living adjustment or the increase in Medicare DRG reimbursement.

In addition, this measure reduces the coinsurance payment that beneficiaries must pay for the 21st through the 100th day of skilled nursing care from one-eighth of the hospital deductible to one-twelfth of the deductible and increases by 5 days the number of days for which Medicare covers the entire cost of skilled nursing care (currently the 1st through the 20th day). This modest additional protection against rising out-of-pocket costs is needed because the prospective payment system's strong cost-containment incentives are resulting in patients being released from hospitals sooner than they were under the old cost-based reimbursement system and often in need of longer periods of skilled care.

Many of the elderly (about 70 percent) could also see increases in the premiums they pay for private "Medigap" insurance to cover such costs as deductibles. As deductibles rise dramatically, triggering increases in other areas, such as skilled nursing care coinsurance payments, it is reasonable to assume that private health insurance premiums will also rise.

To ensure that these changes do not undermine the financial viability of the Medicare trust fund or contribute to the deficit, the Fair Hospital Deductible Act provides for an 8-cent per pack increase in the cigarette tax above its level in fiscal year 1986 and indexes this tax to inflation, earmarking the increase for Medicare. The 8 cents will more than cover the cost of the changes proposed in the Medicare Fair Hospital Deductible Act of 1985 (estimated at $3.7 billion over 3 years) by raising $4.8 billion, providing a $1 billion plus revenue transfusion to the Federal budget.

I am no fan of tax increases as the means to reduce the deficit or ensure the financial viability of Federal programs. But a cigarette excise tax earmarked for the Medicare trust fund is a valid exception to this principle. The Fair Hospital Deductible Act is consistent with legislation I have introduced, H.R. 1594, to increase the cigarette tax to 32 cents per pack, with 24 cents of the increase earmarked for Medicare.

Smoking-related mortality rates and the costs to Medicare and Medicaid of treating those with smoking-related diseases justify the use of the cigarette excise tax for Medicare. According to the Office of Technology Assessment, in 1982, 139,000 persons died from smoking-related cancers. About 123,000 died from cardiovascular disease associated with smoking, and 52,000 died from chronic lung disease associated with smoking.

In 1985, the Office of Technology estimates that the U.S. health care system will spend between $12 and $35 billion to treat smoking-related illnesses, with Medicare costs ranging from $1.7 to $5.4 billion and Medicaid costs from $0.3 to $1.1 billion.

I urge my colleagues to join me in cosponsoring this reasonable proposal to protect the elderly from staggering increases in out-of-pocket health care costs ironically resulting from the effectiveness of cost-containment efforts.

TAX REFORM

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. GINGRICH. Mr. Speaker, currently the House Ways and Means Committee is attempting to reform our Tax Code. And I believe that the American public wants tax reform. But the Ways and Means Committee seems content to give them tax tinkering instead. I believe this half-hearted attempt at tax reform will only destroy the desire for real tax reform. Even if the desire for tax reform is not destroyed, the current proposals will have such a negative impact on investment and growth in our

economy that Congress will be forced to write another tax bill next year. I would like to have the following article from Business Week placed in the RECORD. I believe that it deserves the careful consideration of my colleagues in the House.

The article follows:

[From Business Week, Oct. 21, 1985]

THE TAX-REFORM MONSTER THAT'S COMING TO LIFE

(By Paul Craig Roberts)

The recent tax-reform proposal from Chairman Dan Rostenkowski (D-Ill.) of the House Ways & Means Committee can be added to the lengthening list of policy defeats for the Reagan Administration. Unless President Reagan soon realizes that his Treasury Dept. tax-reform team has painted him into a corner, he will find himself on the political stump selling reforms that will reestablish the anti-growth environment of the 1970's.

Rostenkowski's plan is firmly grounded in the "fairness" rhetoric emanating from the second Reagan Administration. Fairness, in its political context, means collecting more taxes from upper-income taxpayers in order to lower taxes for others. Since the campaign for fairness must contend with the supply-side preference for lower tax rates, tax reform is using higher taxes on capital to carry out this income transfer.

The plan makes this starkly clear: It resurrects the lengthy and less accelerated tax depreciation that existed prior to the 1981 Reagan tax cut. It drops the provision that indexes depreciation deductions to protect them from inflation. And it repeals the investment tax credit. Not content with such increases in the cost of capital, Rostenkowski would expand the minimum tax and impose a penalty on businesses that invest in anything that carries preferential tax treatment which is virtually everything. For many companies, the result of the proposed minimum tax would be to nullify the reduction in the corporate tax rate to 35% and produce effective corporate tax rates higher than the existing 46% rate.

In addition, the minimum tax would mean that companies with different preferences would pay different tax rates. Thus, there would be no equal treatment, and the fairness claimed for it would vanish. The overall effect is to reduce business saving substantially, and to increase the cost of capital, worsening the competitive position of U.S. companies in world markets.

"NEW POPULISM"

The basis for these changes originates in the new team at Treasury. Secretary James A. Baker III and his deputy, Richard G. Darman, were determined to prove that they could outdo their predecessor, Donald T. Regan and maneuver a tax-reform package through Congress. They concocted a notion of realigning the political parties on the basis of the "new populism." Carried away with the politics of tax reform, they neglected the economics and sold the President a tax-reform package that would lose $50 billion annually in revenues for the first several years.

This discovery led to a hastily contrived, retroactive "recapture" tax, which would force businesses to pay $57 billion in taxes on depreciation taken during 1981 through 1985, and to a proposal to curtail severly the pension plans used by many small businesses—a blatantly anti-saving measure that would increase dependence on Social Security. This patch-up job, coupled with the proposal's revenue loss, demonstrated an incompetence that is sorely taxing the country's patience with tax reform.

Panicked by the damage it had inflicted on the Administration's main economic initiative for the second term, the new Treasury team struck again—with predictable results. Unwilling to negotiate with the Republican sponsors of the Kemp-Kasten tax-reform bill, they stumbled on the idea of dealing with the other party. In August, Darman told a White House meeting that the Administration had to have a tax-reform bill, even though it required giving Rostenkowski "all the running room he needs." A deal was struck, and the initiative was turned over to Rostenkowski.

NAIVE APPROACH

The Treasury team naively assumed that the "pro-family, populist" $1,000 increase in personal exemption, targeted to traditional one-earner, home-owning families, was safe. But in Rostenkowski's plan, half of this increase is provided in the form of a larger standard deduction. In other words, to benefit from the full $1,000 increase, the taxpayer cannot be a homeowner who itemizes deductions. Clearly, Rostenkowski is using his running room to punch holes in the President's conservative support for tax reform.

The economic cost of Rostenkowski's plan would be extraordinary. Despite the lower tax-rate structure, the cost of capital would rise to a higher level than prevailed in the 1970s. That period saw a collapse in the growth of the capital-labor ratio and a precipitous decline in the growth of labor productivity, which, despite a weakening dollar, undermined the competitive position of U.S. goods in markets at home and abroad. Rostenkowski's tax-reform package would raise the cost of capital by 15%, enough to offset by a factor of three the 5% reduction achieved in Reagan's first term.

Many Republican senators (and House Democrats) have misgivings about the unfolding tax-reform package. But they are caught between Rostenkowski and the President's rhetoric about spokesmen for vested interested standing in the way of the people's tax rform. If policymakers do not soon make the connection between taxation and competitiveness, Ronald Reagan is going to preside over a tax-reform plan that cuts people's taxes but throws them out of work.

CONGRESSIONAL SALUTE TO THE HONORABLE JOHN A. TENCZA OF NEW JERSEY, SCOUTMASTER, TROOP 2, AHEKA COUNCIL, BOY SCOUTS OF AMERICA, UPON 50 YEARS OF OUTSTANDING SERVICE IN SCOUTING

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. ROE. Mr. Speaker, on Saturday, November 2, the residents of Passaic, my congressional district and State of New Jersey will join with the officers and members of the Passaic Boys Club and Boy Scouts of America in testimony to an outstanding scoutmaster, distinguished citizen, and good friend, the Honorable John A. Tencza of New Jersey, whose exemplary service to our young people in scouting will provide an opportunity to express tribute to his lifetime of good works. I know that you and our colleagues here in the Congress will want to join with me in extending our warmest greetings and felicitations to John, his good wife Marian, daugher Kathleen and husband David J. Seasock, son John C. and wife Mary Beth, and grandchildren Scott, Robin, and Heather Seasock, Andrew and Allison Tencza as we celebrate this milestone of achievement in their family endeavors.

Mr. Speaker, Troop 2 of Aheka Council, which is sponsored by Passaic Boys' Club, Inc. and Troop 2 Alumni, is one of our Nation's most prestigious affiliates of the Boy Scouts of America. We are all familiar with the noble traditions of the Boy Scouts of America and their outstanding public service to the people of our Nation in helping our young men to achieve leadership qualities of self-reliance, character building, sportsmanship, fair play, and eagerness to serve others. Their deeply committed endeavors based on their motto, "Our Best Today for a Better Tomorrow" have helped to develop lasting qualities of dedication, leadership, honesty, and integrity in millions of young Americans throughout our country. Their programs for community service, citizenship, outdoor, career, fitness, and social activities continue to promote concern for others, service to one's community, and loyalty to one's country.

John A. Tencza has by his example and lifetime of dedication to these same true American ideals personified exemplary leadership in his outstanding responsible service to our people which has truly enriched our community, State and Nation.

Mr. Speaker, John Tencza was born in Passaic, NJ, on June 22, 1918, son of Andrew and Anna Tencza. He was educated in the elementary schools of the city of Passaic and the Borough of Wallington. He is a graduate of Essex County Vocational School where he majored in industrial electrical engineering. In his professional career pursuits, he devoted 42 years and 9 months as an electrician with Western Electric Co., Kearny, NJ, and, upon his retirement from the company on June 30, 1983, was honorably retired and given life membership in Telephone Pioneers of America.

Mr. Tencza is a licensed electrical contractor in the State of New Jersey and owns and operates Rainbow Electrical Service. He is a splendid family man, community leader, and longstanding member of SS. Peter and Paul Polish National Catholic Church, Passaic, NJ. In 1958, upon the request of the parish priest, he filmed the "Laying in State" of the Most Reverend Bishop Joseph Kardas, bishop of the Western Diocese of the Polish National Catholic Church.

Our honoree began his Scouting career in Troop 2 in early months of 1934 and throughout his 50 years of Scouting has served as not only a Scout, junior assistant scoutmaster, 1940 to 1941; assistant scoutmaster, 1941 to 1956; and scoutmaster, 1956

to present); but as the man behind the scenes, who has been: chief cook and bottlewasher, chauffeur, an architect designing a plan to strengthen the character of a boy to become a man, a builder laying the foundation for a good citizen of tomorrow, a teacher of nature and practical skills, and a counselor in times of stress.

He received his Tenderfoot Badge in Scouting on March 10, 1934, his second class rank in November 1935, first class rank in June 1937, and star rank in June 1938. He also earned many highly coveted merit badges in Scouting including first aid, photography, bookbinding, cooking, citizenship, electricIty, handicraft, metal, swimming, bird study, lifesaving, basketwork, and athletics. Among his many scouting awards we applaud his achieving the Jockey Hollow Trail Award, 1964; the 50-Mile Hiker Award, 1956; the Paul Bunyan Award; the Key Man Award; and the Philmont "We Made It" Award in 1956.

He also completed many training programs attending various Boy Scout councils to complete the requirements for the Scouter's Award. He received his Scoutmaster's Key in November 1958. On March 13, 1952, he was presented with an inscribed gold watch by the members of Troop 2 for his outstanding service to the troop. At Troop 2's 50th anniversary dinner in 1966, he was awarded a gift certificate for 32 years of service and 10 years as Scoutmaster of Troop 2. Perfect Attendance Bar Awards decorate his scoutmaster's uniform.

In his extracurricular activities during the past half century, we are particularly proud of his compassion, dedication and untiring efforts in service to the needs of our people—young and adults alike. In the early 1940's he was program supervisor for the Boys' Club which included such noteworthy responsibilities as director of the volunteer leaders of the Passaic Boys' Club for boys between the ages of 10 and 18, craftwork organization and direction including construction of Army models, solid and scale models, band iron projects, copper and tin articles, mechanical drawing, stencil making, art, plastics, and woodwork. His responsibilities also included supervision of the library, homework study room, print shop and a scouting program for Troop 2 of the Aheka Council.

In 1954 he joined the dedicated men of our public safety corps as a fireman with the Wallington Volunteer Fire Department, Hose Company No. 1. He is well trained in safeguarding and protecting the people and property of our community attaining many courses to achieve proficiency in combatting the perils of fire including educational courses at the New Jersey State Fire College, Division of New Jersey State Safety Council, Barringer High School, Newark, NJ; New York Volunteer Firemen's Association fire training courses including basic, intermediate and advanced training in firemanship. He was treasurer of the Volunteer Firemen's Association (1954–61), vice president (1956) and president (1957) of Hose Company No. 1. He was a lieutenant of Hose Company No. 1, in 1962 and a captain in 1963. He was also awarded life membership in the New Jersey State Fire Association on May 19, 1968.

While president of Hose Company No. 1, he was instrumental in instituting the Firemen's Memorial Building Fund to raise money for building an addition to the firehouse, Memorial Hall. It is interesting to note that he contributed his electrician's expertise and wired the entire hall almost single handedly. His innovative skills designed and built a new automatic switch box which provided uniform signals for fire calls and emergency calls which replaced archaic manual signals at the firehouse.

Through his inauguration of visitation programs for schoolchildren providing an educational experience on the operation of the fire department, as part of a "Know Your Town" unit, special programs were instituted for a number of years during Fire Prevention Week in October to teach fire prevention techniques.

John was also a member of the New Jersey State Exempt Firemen's Association. He served as a delegate to the New Jersey and New York Volunteer Firemen Association's annual convention and was a delegate to the New Jersey State Firemen Association's annual convention. He also serves as a delegate to the Wallington Firemen's Relief Association.

Mr. Speaker, there is much that can be said of John Tencza and his lifetime of achievements in service to people. He has truly earned the highest respect and esteem of all of us for the quality of his leadership and highest standards of excellence in carrying on all of his good works. On November 2 he will be particularly cited by his colleagues and friends on his participation in scouting during the past half century. The fulfillment of the purpose, goals and objectives of the Boy Scouts of America could not be achieved without the leadership of people like John Tencza and the strong team effort of volunteer and professional leaders of our communities who participate unselfishly and willingly of their busy schedules in passing these sterling traditions along to our youth of America.

As we celebrate John's 50 years of Scouting, we express appreciation for the untiring, unselfish, herculean efforts of a highly compassionate individual. We do indeed salute an outstanding individual, esteemed scoutmaster and great American—the Honorable John A. Tencza, Scoutmaster, Troop 2, Aheka Council of the Boy Scouts of America.

AFRICA'S PRESSING PROBLEM

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. GARCIA. Mr. Speaker, the October 28 edition of the Christian Science Monitor ran an editorial on one of Africa's most pressing problems: controlling its population.

Nearly all of Africa's economic problems can be tied, to some extent, to its soaring birthrate. In addition, it is not a problem that is confined to sub-Saharan Africa. Egypt, too, has population pressures. I submit the Monitor's clear-headed assessment of a most distressing problem confronting Africa, as well as its suggestions as to what might be done to alleviate this problem, for the RECORD.

[From the Christian Science Monitor, Oct. 28, 1985]

CONTROLLING AFRICA'S POPULATION

Today's photographs from much of sub-Saharan Africa are a welcome contrast to those of a year ago. The world's massive food donations have eased hunger. Rains have come. Fields are greening, and crops, in small quantities, are growing. The long process of agricultural rebuilding has begun.

The challenge to Africa and the rest of the world is to follow the success in meeting short-term nutritional needs with similar aid in meeting long-term requirements for self-sufficiency.

Some requirements are often noted. Affluent nations should provide expertise and money for development projects: Many smaller ones will have far more effect than a few massive programs. African nations should root out corruption, improve efficiency, and reorder priorities.

One of the continent's needs is too little noted: population control. African birthrates are the world's highest. Alone among the world's continents, Africa has seen its per capita food production and income decrease in recent years, largely because population has soared. Almost one-fourth of sub-Saharan Africans now are judged to be insufficiently nourished; yet the continent's current birthrate, if unchecked, would double the population in about 20 years.

More fundamental even than agricultural or government reform is checking this soaring birthrate, a task to be shared by developed nations, international agencies, and the African countries.

The first step is being taken. In several African countries there now exist the beginnings of political recognition of the need to reduce population growth, after years of indifference or denial of a problem. Nigeria is soon expected to announce a plan to control population growth: Zambia is considered likely to follow suit. Several other nations may, as well.

The next step—a big one—is actually getting population control programs under way. They have begun in two nations, Botswana and Zimbabwe. Elsewhere they generally have yet to start.

Achieving success in these programs requires leadership, relatively modest funds, and program assistance from developed nations; in recent years the United States has taken a leading role, although it has been backing away during the Reagan administration under pressure from abortion opponents at home.

No population control program in Africa would succeed if imposed by outside nations. International agencies should administer such programs. They would engender far less suspicion, and much more support, than Western, predominantly white, countries.

Finally, strong local motivation is required from top leaders of African governments and also in the countryside. That is the job of host nations.

Controlling population in Africa, as in any other part of the world, will not be easy. But it can be done, and the stakes are too high not to act.

DEATH PENALTY GUIDELINES FOR MILITARY CASES

HON. BILL McCOLLUM
OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. MCCOLLUM. Mr. Speaker, I know that you recall the amendment I offered to the Department of Defense authorization bill creating a constitutionally valid death penalty for espionage cases involving military personnel. A study of this matter lead me to discover that there are 13 death penalty statutes in the Uniform Code of Military Justice [UCMJ] that are not supported by legislatively created procedures that are constitutionally valid under Supreme Court guidelines. Today I am introducing legislation that will supplement these criminal statutes with the procedures required by the Supreme Court.

Under this legislation, a conviction of one of the offenses for which the death penalty can be imposed will result in a sentence of death only if the members of the court-martial consider all of the mitigating and aggravating factors as required by the Supreme Court. The Court mandates juries to concentrate on specific factors relating to the sentence of death in effort to ensure more consistent and fair results. *Furman* v. *Georgia*, 408 U.S. 238 (1972).

The subsequent Supreme Court decisions surrounding the constitutionality of various State death penalty statutes resulted in a pattern of general rules. First, the sentencers' attention should be drawn to particular circumstances, and this can be done by reference to aggravating and mitigating factors. The discretion of the sentencer must be controlled by clear and convincing standards, and the sentencer must have all relevant evidence provided under the rules of evidence. The Court requires an established standard of review and prohibits a mandatory sentence of death. All mitigating factors must be presented. These holdings have enabled the Federal and State enactment of constitutional guidelines for the death penalty.

The legislation I am introducing today is founded on all of these specific Supreme Court mandates. This bill requires the members of the court-martial to find at least one aggravating factor. The members must then determine whether the aggravating factors sufficiently outweighs any mitigating factors found to exist or, if none exist, whether the factors themselves are sufficient to justify a sentence of death. If the aggravating factors are sufficient, death is to be imposed. If not, another sentence, as provided by the Manual for Courts-Martial, must be determined.

The bill does not limit what mitigating factors might be brought to the attention of the members of the court-martial, but it does set forth some mitigating factors that should be considered.

This legislation is based on the current text of the Manual for Courts-Martial. By regulation, the President has set forth death penalty procedures from which the text of this bill is taken. The Court of Military Appeals [CMA] ruled in 1983 that the death penalty under the UCMJ was unconstitutional without specific guidelines for members of the court-martial to consider mitigating and aggravating circumstances. *United States* v. *Mathews*, 16 M.J. 354 (CMA, 1983). The CMA also ruled that constitutionally valid guidelines could be promulgated either by Congress or by the President under the Manual for Courts-Martial. Subsequently, the guidelines on which this bill is based were issued by the President in Executive Order 12473. A death penalty sentence has been rendered under these regulations twice. These cases are only in the infancy of their appeal process. Thus, it will be years before we know for sure whether the use of regulatory procedures in the UCMJ is constitutional in these test cases.

By introducing this bill, I do not intend to make any negative inference regarding the constitutionality of these regulations. In fact, I support them and sincerely hope that the Supreme Court, when given the opportunity will uphold the power of the President to issue these important procedures. My motivation is simply one of impatience. I do not think it is in this nation's interest or in the interest of our military to wait for a decade of appeals to know the status of the military death penalty laws when Congress has the ability to speak to the issue immediately. I know that this is a politically sensitive issue that many would prefer not to face. But I believe it morally imperative that we address the serious risks that caused the Congress to enact these death penalty statutes in the first place. The bill I am introducing today will make these statutes operative.

The text of my proposed legislation introduced today follows:

H.R. 3652

A bill to amend chapter 47 of title 10, United States Code (the Uniform Code of Military Justice), to establish procedures for the adjudication by courts-martial of sentences of capital punishment

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. PROCEDURES FOR ADJUDICATION OF CAPITAL PUNISHMENT BY COURTS-MARTIAL.

(a) NEW UCMJ ARTICLE.—(1)(A) Chapter 47 of title 10, United States Code (the Uniform Code of Military Justice), is amended by inserting after section 852 (article 52) the following new section (article):

"§ 852a. Art. 52a. Procedures for adjudging capital punishment

"(a) No person may be sentenced by a court-martial to suffer death except as provided in this section (article).

"(b) No person may be sentenced by a court-martial to suffer death unless convicted by the concurrence of all the members of the court-martial present at the time the vote is taken of an offense in this chapter expressly made punishable by death.

"(c) If the trial counsel at a court-martial of an offense under this chapter expressly made punishable by death intends to prove at the trial any aggravating factor set out in subsection (e), the trial counsel shall provide the accused before arraignment with written notice of each such aggravating factor the trial counsel intends to prove. However, failure to provide such notice of an aggravating factor set out in subsection (e) before arraignment shall not bar later notice and proof of that aggravating factor unless the accused demonstrates—

"(1) that the failure resulted in specific prejudice to the accused; and

"(2) that a continuance or recess is not an adequate remedy for such failure.

"(d)(1) A person may not be sentenced to death by a court-martial unless—

"(A) the members of the court-martial unanimously find at least one of the aggravating factors set out in subsection (e);

"(B) notice of that aggravating factor was provided in accordance with subsection (c); and

"(C) each member of the court-marital concurs in finding that any extenuating or mitigating circumstances are substantially outweighed by aggravating circumstances, including the aggravating factors set out in subsection (e).

"(2) Findings by the members of a court-martial under paragraph (1) may be based on—

"(A) evidence introduced on the issue of guilt or innocence;

"(B) evidence introduced during the sentencing proceedings; or

"(C) all such evidence.

"(3) The accused shall be given broad latitude to present matters in extenuation and mitigation.

"(e)(1) A sentence of death may be adjudged by a court-martial only if the members of the court-martial unanimously find, beyond a reasonable doubt, one or more of the following aggravating factors:

"(A) That the offense was committed before or in the presence of the enemy (except that this subparagraph does not apply in the case of an offense under section 918 or 920 of this title (article 118 or 120)).

"(B) That, in committing the offense, the accused intended—

"(i) to cause a grave risk of substantial damage to the national security; or

"(ii) to cause a grave risk of substantial damage to a mission, system, or function of the United States, but only if substantial damage to the national security of the United States would have resulted had the intended damage been effected.

"(C) That the offense caused substantial damage to the national security of the United States, whether or not the accused intended such damage (except that this subparagraph does not apply in the case of an offense under section 918 or 920 of this title (article 118 or 120).

"(D) That the accused knowingly created to grave risk of death to one or more persons in addition to the victim of the offense (except that this factor does not apply in the case of an offense under section 920 of this title (article 120)).

"(E) That the accused committed the offense with the intent to avoid hazardous duty.

"(F) That, only in the case of an offense under section 918 or 920 of this title (article 118 or 120), the offense was committed in time of war in territory in which—

"(i) the United States or an ally of the United States was then an occupying power; or

"(ii) the armed forces of the United States were then engaged in active hostilities.

"(G) That, only in the case of an offense under section 918(1) of this title (article 118(1)), any of the following is applicable:

"(i) The accused was serving a sentence of confinement for 30 years or more or for life at the time of the offense.

"(ii) The offense was committed while the accused—

"(I) was engaged in the commission or attempted commission of robbery, rape, aggravated arson, sodomy, burglary, kidnapping, mutiny, sedition, or piracy of an aircraft or vessel; or

"(II) was engaged in flight or attempted flight after the commission or attempted commission of any such offense.

"(iii) The offense was committed for the purpose of receiving money or a thing of value.

"(iv) The accused procured another by means of compulsion, coercion, or a promise of an advantage, a service, or a thing of value to commit the offense.

"(v) The offense was committed with the intent to avoid or to prevent lawful apprehension or effect an escape from custody or confinement.

"(vi) The victim of the offense was—

"(I) the President, the President-elect, the Vice President (or, if there was no Vice President, the officer next in the order of succession to the office of President), the Vice President-elect, or an individual who is acting as President under the Constitution and laws of the United States;

"(II) a Member of Congress (including a Delegate to, or Resident Commissioner in, the Congress) or Member-of-Congress elect;

"(III) a justice or judge of the United States;

"(IV) a chief of state or head of government (or the political equivalent) of a foreign nation; or

"(V) a foreign official (as such term is defined in section 1116(b)(3)(A) of title 18), if the official was in the United States or on military property of the U.S. on official business at the time of the offense.

"(vii) The accused at the time of the offense knew that the victim was any of the followng in the execution of such person's office:

"(I) A commissioned, warrant, noncommissioned, or petty officer of the armed forces.

"(II) A member of a law enforcement or security activity or agency, including correctional custody personnel.

"(III) A firefighter.

"(viii) The offense was committed with intent to obstruct justice.

"(ix) The offense was preceded by the intentional infliction of substantial physical harm or prolonged, substantial mental or physical pain and suffering to the victim.

"(x) The accused has been found guilty in the same case of another offense under section 918 of this title (article 118).

"(H) That, only in the case of an offense under section 918(4) of this title (article 118(4)), the accused was the actual perpetrator of the killing.

"(I) That, only in the case of an offense under section 920 of this title (article 120)—

"(i) the victim was under the age of 12; or

"(ii) the accused maimed or attempted to kill the victim.

"(J) That, only the case of an offense under the law of war, a sentence of death is authorized under the law of war for the offense.

"(K) That, only in the case of an offense under section 904 or 906a of this title (article 104 or 106a), the accused has previously been convicted of another offense involving espionage or treason for which either a sentence of death or a sentence of life imprisonment was authorized by statute.

"(L) That the offense involved such other factors as may be prescribed by the President by regulation, to the extent that such factors concern the national security or otherwise involve a function of the armed forces related to the conduct of hostilities.

"(2) In this subsection, 'national security' means the national defense and foreign relations of the United States and specifically includes—

"(A) a military or defense advantage over any foreign nation or group of nations;

"(B) a favorable foreign relations position; or

"(C) a defense posture capable of successfully resisting hostile or destructive action from within or without.

"(f) The military judge, in the presence of the accused and counsel, shall instruct the members of the court-martial on—

"(1) such aggravating factors set forth in subsection (e) as may be in issue in the case;

"(2) the requirements and procedures under this section; and

"(3) the requirement to consider all evidence in extenuation and mitigation before they may adjudge a sentence of death.

"(g)(1) In closed session, before voting on a sentence—

"(A) the members of the court-martial shall vote by secret written ballot separately on each aggravating factor set out in subsection (e) on which they have been instructed; and

"(B) if one or more of the aggravating factors set forth in subsection (e) is found to exist, the members shall then vote by secret written ballot on whether the aggravating circumstances (including any aggravating factors set out in subsection (e)) substantially outweigh any extenuating or mitigating circumstances or, in the absence of any extenuating or mitigating circumstances, whether the aggravating circumstances are themselves sufficient to justify a sentence of death.

"(2) A sentence of death may not be adjudged unless each member of the court-martial concurs—

"(A) that, with respect to at least one aggravating factor, the existence of such factor has been proved beyond a reasonable doubt; and

"(B) that the aggravating circumstances (including any aggravating factors set out in subsection (e)) substantially outweigh any extenuating or mitigating circumstances or, in the absence of any extenuating or mitigating circumstances, that the aggravating circumstances are themselves sufficient to justify a sentence of death.

"(3) The members of the court-martial shall vote on a sentence under section 852 of this title (article 52).

"(h) If a sentence of death is adjudged, the president of the court-martial shall announce which aggravating factors under subsection (e) were unanimously found by the members.

"(i) Subsections (c) through (h) do not apply with respect to the sentence for an offense under section 106 of this title (article 106).".

(B) The table of sections at the beginning of subchapter VII of such chapter is amended by inserting after the item relating to section 852 (article 52) the following new item:

"852a. Art. 52a. Procedures for adjudging capital punishment.".

(2) Section 852(b)(1) of such title (article 52(b)(1)) is amended by inserting "as provided in section 852a of this title (article 52a)" after "taken".

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall take effect on the 90th day after the date of the enactment of this Act and shall apply to charges first preferred on or after that date.

A GOOD COMPROMISE ON GARCIA DECISION

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. PORTER. Mr. Speaker, I want to strongly endorse H.R. 3530, the Fair Labor Standards Amendments of 1985. This is a good bipartisan compromise bill which effectively deals with the myriad problems created by the Supreme Court decision in Garcia versus San Antonio Metropolitan Transit Authority.

I realize that there are those on both sides of this issue who may have problems with certain elements of this bill, but such is the nature of compromise on such a difficult matter. This measure offers solutions to the issues of compensatory time off and retroactive liability of State and local governments which are evenhanded and fair. It will help avert a major legal and administrative nightmare for local governments, and at the same time will allow greater freedom and flexibility for public employees.

Had Congress not taken this action in response to Garcia, an onerous financial burden would have been placed on State and local governments at a time when Federal assistance to localities is waning. Labor Secretary Brock estimated that the decision would cost State and local governments as much as $4 billion annually in unbudgeted liability. The direct result would have been higher taxes and reduced services in most areas.

I commend all of those who worked so hard to put this legislation together: In particular, the chairman of the Education and Labor Committee, GUS HAWKINS, and the chairman of the Labor Standards Subcommittee, AUSTIN MURPHY, who moved H.R. 3530 in a timely fashion; and my colleague from Texas, STEVE BARTLETT, whose tireless efforts were instrumental in forging a compromise bill. I am pleased that I was able to play a role in the resolution of this issue.

THE FAIR FURNITURE TRADE ACT OF 1985

HON. HOWARD COBLE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. COBLE. Mr. Speaker, today I am introducing the Fair Furniture Trade Act of 1985, and I am pleased that 33 of my col-

leagues join me as original cosponsors of this important legislation.

Furniture manufacturing is a basic American industry and one which is found in all 50 States. However, the importation of wood and upholstered furniture increased 284 percent from 1979 to 1984—from $312 million to $1.198 billion. U.S. exports during the same period actually declined from $312 million to $210 million.

One significant part of the furniture industry's international trade problem is Canada: as of January 1, 1985, nonmetal residential furniture shipped from the United States to Canada faced a 16.3-percent duty. Canadian furniture entering the United States faced duties as low as 3.1 percent. This tariff inequity, when coupled with the strong dollar, has resulted in a 125-percent increase in Canadian imports to the United States between 1980 and 1984. Further, there was a furniture trade deficit of almost $250 million in 1984 between the United States and Canada.

Those of us offering this legislation are making a bipartisan effort to provide for free trade with Canada on furniture products.

Our bill would resolve this inequity by allowing a 1-year period for the United States and Canada to negotiate an end to the tariff differential. If negotiations proved unsuccessful, then the U.S. tariffs would be increased in a series of steps until they are equivalent with the Canadian duties.

I emphasize that the Fair Furniture Trade Act is not protectionist legislation. The American furniture industry must have the opportunity to compete on even terms with a major trading partner—Canada.

Recently, Canadian Prime Minister Brian Mulroney announced a willingness to seek "the broadest possible package of mutually beneficial reductions in tariff and nontariff barriers" between the United States and Canada. This legislation is completely consistent with these goals of the Canadian Government, as it seeks to reduce unnecessary trade impediments. Together, these initiatives should strengthen the special relationship which we have always held with our neighbor to the north.

PERSONAL EXPLANATION

HON. WILLIAM F. CLINGER, JR.

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. CLINGER. Mr. Speaker, on October 29, 1985, I was absent from the floor of the House of Representatives as I was back in the 23d Congressional District on official business. Had I been present, I would have voted in the following fashion:

Rollcall No. 373: H.R. 3606—Defense Cost and Price Management, the House voted to suspend the rules and pass the measure to clarify the application of section 2406 of title 10, United States Code, relating to cost and price management, and to delay the effective date of such provision, "yea";

Rollcall No. 374: House Concurrent Resolution 201—Education for Handicapped Children, the House voted to suspend the rules and pass the concurrent resolution, amended, to commemorate the accomplishments of Public Law 94-142, the Education for All Handicapped Children Act, on the 10th anniversary of its enactment, "yea";

Rollcall No. 375: S. 1160—Defense Department authorizations—the House agreed to the rule (H. Res. 299) waiving certain points of order against the conference report, "no"; and

Rollcall No. 376: H.R. 2942—Legislative branch appropriations—the House agreed to the conference report on the measure making appropriations for the legislative branch for the fiscal year ending September 30, 1986, "yea."

PUTTING CANCER RISKS IN PERSPECTIVE

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. RITTER. Mr. Speaker, for the past 6 years, I have been working to increase the science base to the regulatory process and to put health and safety risks to humans in proper perspective. This could be furthered by using analysis known as risk assessment. By using risk assessment, limited regulatory money and remediation effort can be put where they do the most good.

With this in mind, the following article from the Allentown Morning Call a newspaper published in Pennsylvania's 15th District which I represent, expresses a commonsense approach to understanding the various risks each of us face in our daily lives. I trust you will find it of interest.

CANCER PREVENTION MUST FOCUS ON MOST EFFECTIVE METHODS

(By Elizabeth M. Whelan)

I am frequently asked about the dangers of the many carcinogens in our environment and why the regulatory agencies are not moving faster to eliminate them. As one critic asked, is it because our government believes "a little bit of cancer is OK?"

Concern about cancer is understandable. It is the second-leading cause of death: About 480,000 Americans will die this year from some form of malignancy. But contrary to what some media reports have claimed, during the last few decades of rapid industrialization there has been no general increase in cancer rates. Indeed, only two important changes in cancer mortality have been observed: a spectacular increase in lung cancer (almost exclusively attributed to cigarette smoking) and an equally impressive decline in mortality from stomach cancer, most likely due to improved means of preserving food.

Yet cancer remains a major health problem and its prevention must be high on our list of priorities. But we want to concentrate our preventive efforts on things that will work.

That brings us to the role that food additives, pesticides and contaminants in the general environment play in human cancer.

The state-of-the-art review of this subject, which was published June 1981 in the Journal of the National Cancer Institute, confirms that while there has been a relatively small number of cancer deaths caused by high exposure to chemicals in occupational settings, "chemicals," such as EDB (ethylene dibromide) and red dye No. 3, in our general environment play no known role in the causes of human cancer.

Yet while science may not have proven that various manufactured chemicals cause cancer, some people are afraid that they do because many of these chemicals cause the disease in animals. But should we eliminate exposure to every last trace of anything that causes cancer in animals? That would be quite a job because the more we test naturally occurring chemicals in food, the more carcinogens we find.

For example, a naturally occurring constituent of nutmeg, cinnamon and black pepper causes liver cancer in rodents. Tannins, which occur naturally in coffee, tea, red wines and many other foods, causes cancer in rodents. Some of the most popular types of mushrooms contain substantial amounts of compounds in the hydrazine family of chemicals, and many of those are potent carcinogens in animal tests. Aflatoxins, a group of chemicals produced by natural molds that grow on peanuts, corn and other grains, are potent carcinogens in animals.

What is important is not whether a chemical causes cancer in lab animals, but how strong a causative agent it is, how many different types of animals respond negatively to it, how much we are exposed to it—and how vital a role that chemical plays in our lives. If an additive induced cancer very quickly in many types of animals, in addition to mice, and we consumed lots of it, prudence would probably dictate that we use a safer alternative, or at least reduce our consumption of it.

Judgment calls are made by regulators all the time with a full understanding that extremely low levels of toxins or carcinogens pose no known hazard. The Food and Drug Administration acknowledges that it is impractical to eliminate all the traces of naturally occurring aflatoxins—strong animal carcinogens—from peanuts. But prudence led the FDA to set strict but reasonable limits as to how much aflatoxins are allowed in our food. We should be equally reasonable about accepting exposures to innocuous trace levels of manufactured chemicals known to be animal carcinogens.

Even conceding that nature is not benign, why add to the natural load of carcinogens? If you are going to take action against chemicals that cause cancer in animals, their source should be irrelevant. Thus you would have to ban pepper, nutmeg and cinnamon as well, which is clearly ridiculous since these condiments pose no known hazard to human health.

The more we learn about the omnipresence of nature's carcinogens, the more we realize that banning a chemical such as EDB on the basis of "just in care" is like removing a grain of sand from a beach—a beach that posed no known hazard in the first place. If every detectable trace of all carcinogens were removed from the environment, there wouldn't be much of anything left. Detection techniques are not so sensitive that we are approaching the time when we can find trace amounts of anything in everything.

One might argue that there are no risks associated with banning a chemical, so why not do it? But there are very real risks. If we keep banning pesticides that cause cancer in

animals, we are going to have less food at higher cost. The food that remains will be vulnerable to the type of insect contamination that can make us very sick. Given that our public health dollars and time are limited, any effort focused on non-risks diverts us from dealing with known cancer risks.

Forget the hypothetical risks and concentrate on the known ones. If you don't smoke, use alcohol in moderation, eat a balanced, moderate diet, avoid excessive exposure to sunlight, obey occupational guidelines if you work in a chemical setting, and avoid promiscuous sexual activity, you will have done everything in your control to reduce your risks of cancer. I am not in favor of "a little bit of cancer." I am, however, in favor of a little of common sense.

CUDAHY'S 25TH ANNIVERSARY

HON. MATTHEW G. MARTINEZ

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. MARTINEZ. Mr. Speaker, I rise today to salute the citizens of Cudahy, CA, as that city prepares to celebrate its 25th anniversary. Located 6 miles south of downtown Los Angeles, Cudahy was incorporated on November 10, 1960. Cudahy will mark its 25th anniversary with a parade on Saturday, November 9, and a civic banquet on Sunday, November 10.

The city, whose theme is "Progressive Cudahy Shows the Way" has indeed been progressing in recent years. Significant commercial redevelopment is continuing along Atlantic Avenue, and a senior-citizens housing projects is under construction. The city recently built the Leo Turner Community Center in the Clara Street Park. The City's third major park, Lugo Park, will be dedicated on November 9 in conjunction with the 25th anniversary celebration. The park is named in honor of the Lugo family, which in the 18th century settled the area that was to become Cudahy.

I congratulate the citizens of Cudahy on the occasion of the city's 25th anniversary. I am confident that progressive Cudahy will continue to show the way in the future.

OFFSHORE OIL DEVELOPMENT

HON. JOHN T. MYERS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. MYERS of Indiana. Mr. Speaker, once again there is talk in Congress about banning offshore oil development. This time the focus is on the Pacific Ocean off California where local residents—and many of their congressional representatives—think the sight of a drilling platform is something less than beautiful.

But when I think of oil development off California, I think first about Indiana. Precious little oil and gas comes out of Indiana ground, but our factories farms, cars, and homes use up to 120 million barrels of oil and 420 billion cubic feet of natural gas each year.

We cannot continue to play our productive role in the U.S. economy and ensure our families' basic necessities without that energy. That is why, with oil imports back on the rise and foreign supplies as unstable as ever, we cannot tolerate the thought of locking up half our supply of new oil because it happens to be lying under water off our shore.

Moreover, some 11,000 Hoosiers stand ready to make the steel, diesel generators, and other equipment that is part of an offshore rig. They have a particular interest in offshore drilling.

However, banning oil development off the California shore also makes me think of the whole United States. Not only do we need the reliability of home-produced energy, but we need to untangle our relations with countries around the globe, particularly in the Middle East.

What do we spend each year in naval and other defenses to keep the "peace" in the Middle East and to keep the sea lanes open for oil shipments? To what extent is our national security still dangerously dependent on energy supplies we cannot control?

Finally, banning oil development offshore makes me think of the whole world, and our role in promoting world peace. Regardless of what President Reagan negotiates with the Soviets on strategic defenses and nuclear weapons, peace will never be merely the absence of weapons and war. True peace is human development which is only possible with resource development.

To put it simply, the world is divided between the haves and the have-nots. Poorer nations that are struggling to survive on scarce natural resources look with disgust upon a resource-rich nation like the United States that consumes far more than its share of world energy resources while it hoards its own supplies. Those poorer nations who lack the energy required to feed, clothe, and shelter their own people cannot understand how we can lock up our oil offshore, putting that much more pressure on the world supply.

It is not really to prevent spills; more oil is spilled unloading foreign tankers than is ever lost from offshore drilling. It is not to protect the fish habitat; fish seem to enjoy the new reefs. It boils down to the fact that some people have invested lots of money in homes and hotels overlooking the ocean and they do not want their view spoiled by a drilling platform on the horizon.

That is why, for those of us who genuinely want peace, national security, and economic stability in our own States, the offshore drilling moratoria are unthinkable.

HON. PETER W. RODINO, JR., HONORED BY THE U.S. COURT OF INTERNATIONAL TRADE

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. FISH. Mr. Speaker, I wish to bring to the attention of the House the signal honor that was recently bestowed upon our colleague, the Honorable PETER W. RODINO, JR. of New Jersey, by the U.S. Court of International Trade. At a judicial conference held on October 23 at the World Trade Center in New York City, Chief Jusitice Warren E. Burger presented the Court's Distinguished Service Award to the chairman of our Committee on the Judiciary for his "outstanding contributions to the administration of justice in international trade law." The Chief Justice observed that throughout his more than 30 years in Congress "on every important matter, when the needs of the judicial branch of our Government were at stake, PETER RODINO has been fighting for the court system and for justice."

In his introductory remarks to the conference, which was attended by over 450 lawyers and public officials, Chief Judge Edward D. Re of the International Trade Court took particular note of Mr. RODINO's role, as the principal sponsor of the Customs Court Act of 1980, in clarifying and extending the jurisdiction and powers of his court. The chief judge also recognized Mr. RODINO's wider contribution to the law and to the Nation and quoted our distinguished colleague's recent declaration that "Congress has developed a system of courts which is the most comprehensive in the world. These courts provide the strongest judicial safeguards of individual rights in existence today."

DUBOIS CAMPUS OF PENN STATE CELEBRATES 50TH ANNIVERSARY

HON. WILLIAM F. CLINGER, JR.

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. CLINGER. Mr. Speaker, congratulations are in order to the DuBois Campus of the Pennsylvania State University which is celebrating its 50th anniversary this year. The DuBois Undergraduate Center has been an active and important part of the city of DuBois, reaching out into the surrounding rural, small town, forested six-county area. The faculty and staff have taught, advised, counseled, and encouraged generations of students and have enjoyed a reputation for academic quality not only among area educators, but even nationally. Its alumni have become integral, productive contributors to their communities, State, and Nation.

The DuBois Campus of Penn State University is the land and buildings of community leaders who invested in the future through the young people of the area. It is also the extension of a university that had a land grant mission to provide higher education for the sons and daughters of the Commonwealth of Pennsylvania. All these things make up the DuBois Campus and its first 50 years. The next 50 years will bring marvelous technological wonders and new opportunities and the DuBois Campus will

be there to make sure that its students have access to all that the future holds.

HOSTAGE CRISIS REACHES 604 DAYS

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. O'BRIEN. Mr. Speaker, today marks the 604th day Americans have been held hostage in Lebanon.

A U.S. foreign service officer, William Buckley, was kidnaped in Beirut on March 16, 1984, 604 days ago today.

Father Lawrence Jenco, the head of Catholic Relief Services in Beirut, has been held hostage for 296 days.

Terry Anderson, the Associated Press Beirut bureau chief, was taken hostage 228 days ago.

The director of the American University hospital in Beirut, David Jacobsen, was kidnaped 156 days ago.

Thomas Sutherland, the dean of the American University agriculture schooi, was taken hostage 143 days ago.

Today also marks the 331st day since the disappearance of Peter Kilburn, the American University librarian.

Mr. Speaker, the American hostage crisis in Lebanon is nearly 20 months long, more than 5 months longer than the Iran hostage crisis 5 years ago.

GRAMM-RUDMAN PROPOSAL

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. WAXMAN. Mr. Speaker, I submit for the RECORD the following letters on the effects the Gramm-Rudman proposal would have on persons of great need. As the Association for Retarded Citizens, United Cerebral Palsy Associations National Society for Children and Adults with Austism, National Association of Community Health Centers, and Easter Seals poignantly point out, this proposal hangs the price tag of a balanced budget around the necks of the poor, the weak, and the sick.

The Gramm-Rudman proposal is legislation at its most cynical. It is contemptuous of the Constitution, negligent of fundamental economic precepts, and deceptive about its impact. As little as one-third of the budget would bear the brunt of the so-called "across-the-board" cuts. I urge my colleagues to consider the explosive consequences of this pernicious legislation.

OCTOBER 18, 1985.

DEAR MEMBER OF CONGRESS: The Association for Retarded Citizens of the United States, representing our nation's six million citizens with mental retardation, having preliminarily analyzed the potential effects of the Gramm-Rudman proposal, must express our grave concern to you. Our 160,000 members from all states, composed primarily of families with individuals with retardation, envision most, if not all, of the major Federal programs serving persons with mental retardation, suffering drastic reductions over the next five years. They fear that they will have nowhere to turn when our budget is balanced but the programs serving their sons/daughters are gone or significantly reduced, programs which provide housing assistance, special education, vocational rehabilitation, job training and income maintenance for children or adults with retardation.

These programs are not just little side benefits to enhance life styles. They are, in fact in many cases, the only opportunity for families to stay together, to avoid unwarranted and unwanted institutionalization, and to provide individuals with the training opportunities necessary to become independent citizens. So many of our members have said to me "Why must my son or daughter, who struggles daily with his/her retardation, bear the brunt of these budget cuts. We have accomplished so much, but why must it be taken away?" It is not easy to find a reply.

On behalf of all our members, I strongly urge you to exempt programs serving citizens with mental retardation and other disabilities from the budget cuts required by Gramm-Rudman. Further, we urge you to retain control of these vital programs and not to turn them over to this or future Administrations. Lastly, we urge you to find alternatives other than cutting human services programs over and over again in order to balance our budget.

The ARC/US realizes you will be facing extremely hard choices and difficult decisions in the coming days and weeks. We ask you to consider the effect of your decision on the lives of citizens with mental retardation and their families.

Sincerely,

DEE EVERITT,
President,
ARC/U.S.

GOVERNMENTAL ACTIVITIES OFFICE,
October 17, 1985.

DEAR CONGRESSMAN: On behalf of the United Cerebral Palsy Associations, Inc., consisting of over 230 affiliates in 45 states, I want to express our outrage at the passage of the Gramm/Rudman amendment.

UCPA is a national organization concerned with needs of persons with cerebral palsy and their families. If the Gramm/Rudman amendment is enacted, the programs and services on which they depend will become virtually extinct.

UCPA has two major concerns with this Amendment. First, it would allow the executive branch of Government to make sweeping changes in programs that serve persons with disabilities with no input from those who would be drastically affected by these changes. Over the years, Congress has listened to the concerns of UCPA and other disability groups. We hope that you will listen again and realize that it is critical for persons with disabilities, their families and advocates to continue to have input into changes which will directly affect their lives.

Second, while we understand the need to balance the federal budget, we believe that the Gramm/Rudman Amendment would almost eliminate programs which currently provide education, training, medical assistance, housing, and other services that allow people with disabilities to live with dignity in their communities. We do not believe it is the intent of Congress to destroy the progress this population has made.

We urge you to consider the serious consequences of this amendment and exempt programs serving persons with disabilities from its devastating consequences. Persons with cerebral palsy, and their families can accept no less.

Sincerely,

MICHAEL W. MORRIS,
Director.
KATHLEEN M. ROY,
Policy Associate.

NATIONAL SOCIETY FOR CHILDREN AND ADULTS WITH AUTISM,
October 18, 1985.

DEAR MEMBER OF CONGRESS: The impact of the Gramm-Rudman balanced budget amendment, which passed the Senate on October 10, will be devastating to persons with autism and other handicaps. Programs critical to their survival such as special education, vocational rehabilitation, maternal and child health, and social services across the board will suffer enormous cuts, thereby leaving the most vulnerable of our population without critical programs and services.

Gramm-Rudman should be amended to exempt from cutbacks those programs which are vital to the lives of persons with disabilities. As it is presently constituted, Gramm-Rudman will force most budgetary cuts to come out of programs that assist the needy. Entitlement programs such as Supplemental Security Income and Medicaid would be most vulnerable as would discretionary programs such as the Education for the Handicapped Act and the Developmental Disabilities Act.

We cannot emphasize strongly enough how vital these programs are to our population. Fairness and justice require that programs serving the handicapped be exempted from a process that does not presently consider the possibility of raising additional revenues.

In creating a new shift in the power of the purse from the legislative to the executive branch, alternative deficit reductions and other alternatives such as revenue enhancements have not been explored.

NSAC calls upon you to lead the nation by bringing back into balance fairness and justice for those most deprived in this land—the disabled and the poor.

On behalf of the autistic population that NSAC represents and the other 36 million disabled persons in this country, we earnestly seek your immediate attention to this situation. This is no time to push back the programs that have broken through the darkness of ignorance, abuse and neglect. After many decades of struggle by millions of Americans, the handicapped have begun to share some part of the American dream. Please be counted among those who will keep the light pouring through for these millions of deserving Americans.

Sincerely,

ROY MORGAN,
Executive Director.
VICTORIA RASKIN,
Government Affairs Director.

NATIONAL ASSOCIATION OF COMMUNITY HEALTH CENTERS, INC.,
Washington, DC, October 15, 1985.

DEAR MEMBER OF CONGRESS: The National Association of Community Health Centers (NACHC) urges you to oppose adamantly the Gramm-Rudman amendment. This approach to deficit reduction will be greatly detrimental to those with the greatest need

in our society, i.e., those who suffered from past budget cuts.

Since 1981, the Community Health Center and Migrant Health Center (CHC/MHC) program has been reduced by nearly $100 million below what it would mean to maintain the 1981 service level for the poor. This reduction means that health centers have been trying to accommodate 1,538,461 people more than they can afford to accommodate. Any further cuts or reduction in the CHC/MHC program would mean severe loss in service to poor people who need health care. Please do not support any amendment that would mean more suffering for the poor.

If any legislation is to be adopted, we believe it must exempt means-tested entitlements and low-income discretionary programs. The Gramm-Rudman amendment, H.J. Res. 372, exempts Social Security and as must as 40 percent of the defense budget. It automatically allocates, by formula, the reductions necessary to meet specified deficit targets. This program therefore focuses deficit reductions on means-tested entitlements and programs for health, education and other supports on which the poor depend. Since 1981, $56 billion has been cut from human resource programs, including $34 billion from those targeted specifically to poor people. It would be most unfair and unjust to protect defense subcontractors and middle- and upper-income Social Security recipients from cuts, while the poor and others with special needs are affected.

During the budget debate this year, the principle that low-income programs should bear no further reductions was accepted by bipartisan majorities in both Houses. The NACHC believes the same commitment should be extended in consideration of any deficit reduction measure.

We share your concern about the uncontrollable deficit. Nevertheless, a measure which automatically places the burden on low-income programs is unfair.

We urge you therefore to exempt fully, either from the Gramm-Rudman amendment or any alternative proposal to balance the federal budget, any program which is considered to be a means-tested entitlement or low-income discretionary program.

Also, Congress must maintain its authority and responsibility to set budget and spending priorities. Therefore, we must not yield to the Gramm-Rudman amendment or any other proposal that would relinquish this authority. We urge you therefore to read carefully the Gramm-Rudman and oppose it to the fullest.

We will be very happy to provide you with further information should you request it.

Sincerely,

THOMAS J. VAN COVERDEN,
Executive Director.

OFFICE OF GOVERNMENTAL AFFAIRS,
October 18, 1985.

DEAR MEMBER OF CONGRESS: I am writing with respect to the Gramm-Rudman amendment which was recently adopted by the Senate as part of the emergency measure to increase the nation's debt ceiling. The National Easter Seal Society is concerned that this balanced budget legislation could have very negative ramifications for people with disabilities.

The National Easter Seal Society is one of the largest providers of direct services to individuals with disabilities in the United States. In 1984, Easter Seal Societies nationwide served over one million people. In addition to our role as a service provider, we are also advocates on behalf of persons with disabilities on a myriad of public policy issues considered by the Congress.

Generally speaking, Easter Seal staff, volunteers and the people we serve share the concern of the Congress about the sizeable deficits incurred annually by the federal government. Obviously, there has been considerable debate during the past few years about the perils of deficit spending and various measures intended to address the problem.

We believe, however, that Congress risks making a serious mistake by acting precipitously on the Gramm-Rudman proposal. No hearings have been held on the measure. Consequently, organizations representing the millions of people who rely on federally-funded human service programs have not had an opportunity to voice their views on the potential impact of this proposal.

We believe that Congress should fulfill its Constitutional and moral duty to evaluate each program on a case-by-case basis and reduce spending for those programs that are deemed inefficient and ineffective. An across-the-board approach, such as the one contemplated by the Gramm-Rudman amendment, simply doesn't make sense, especially when a large part of the budget is being exempted from the proposed spending reductions.

Under the Gramm-Rudman "Balanced Budget and Emergency Deficit Control Act", spending for programs serving people with disabilities would be cut drastically. Such cuts would adversely affect millions of Americans who depend on these programs to achieve and maintain their dignity and independence.

We urge you to consider our views during deliberations on this issue.

Sincerely,

JOSEPH D. ROMER,
Director of Governmental Affairs.

DEPARTMENT OF DEFENSE APPROPRIATION BILL, 1986

HON. GEORGE C. WORTLEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. WORTLEY. Mr. Speaker, the report language of the Department of Defense appropriation bill contains a statement in support of the $25 million provided in the Defense authorization bill to reduce the backlog of security clearance investigations. It also expresses support for the proposal that the Defense Investigative Service charge for performing investigations in order to help reduce unnecessary requests for security clearances.

Both actions are positive. But they are not enough.

Two events currently in the news highlight the failings of current systems in protecting vital security information. The first is the Walker spy case. The second is the discovery of classified material in DOD furniture sent to a Federal prison for repair. The first incident illustrates problems with our security clearance and reinvestigation procedures, and the second indicates problems with the way classified material is handled.

In the case of the classified material, various officials seem to be busy passing the buck or explaining away the lapse in security. This raises two questions: If the information wasn't that sensitive, why was it classified, and if it was sensitive, why wasn't it handled with more care? What guarantee do we have that more sensitive material is handled with any more care?

The point is that both our classification and security clearance systems need to be thoroughly reviewed so that we can get a comprehensive view of how the systems actually work, or don't work; how each affects the performance of the other, and what needs to be done to have a more coherent and dependable means of protecting our national security information from espionage and carelessness.

The wide-ranging and complex nature of this problem requires a comprehensive approach. I urge my colleagues to support H.R. 3626, a bill I have introduced to establish a National Commission on Classified Information and Security Clearance Procedures.

JIM COURTER ON THE REAL YUGOSLAVIA

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. KEMP. Mr. Speaker, ocassionally an event occurs that opens a window on reality and allows us to glimpse the true nature of a political regime. The decision of Abul Abbas, the suspected mastermind behind that hijacking of the *Achille Lauro*, to use Yugoslavia as a "safe house" is such an event.

Western impressions of Yugoslavia are rather cloudy. For the most part, we tend to see the Yugoslavia that struck an purportedly independent line from Moscow, the Yugoslavia that gave us picturesque scenes from the winter Olympics at Sarajevo.

But as our colleague JIM COURTER writes in the Wall Street Journal, there is another side to Yugoslavia. When it comes to aiding and abetting international terrorists, "Yugoslavia is among the worst offenders." In Congressman COURTER'S words, "Yugoslavia has encouraged, armed and directly assisted PLO terrorists for many years, and has done that as a matter of declared state policy."

We need to ask why. Those who assert that Yugoslavia is free of Soviet control need to explain how a military officer corps trained in the Soviet Union can be truly independent. Similarly, we know that the Soviet Union is the chief patron of international terrorism. We need to ask what Yugoslavia's support role in terrorist activities indicates about the orientation of Yugoslavia's regime.

Mr. Speaker, I insert JIM COURTER'S thought provoking article for printing in the CONGRESSIONAL RECORD:

[From the Wall Street Journal, Oct. 23, 1985]

WHY ABBAS CHOSE YUGOSLAVIA

(By Jim Courter)

Only one day separated Prime Minister Bettino Craxi's insistence that Italy, not the U.S., must be allowed to prosecute the Achille Lauro hijackers from the moment Italy freed the suspected mastermind of the crime. The day after U.S. jets intercepted the Egyptian airliner on which he was a passenger, Mohammed Abbas Zaida, or Abul Abbas, believed by the State Department to be "one of the most notorious Palestinian terrorists . . . involved in savage attacks on civilians," flew to Belgrade—and freedom—on a Yugoslav airliner. Italian authorities handled the boarding at Rome's Leonardo da Vinci Airport and even arranged disguises for Mr. Abbas and Mani Ali Hassan, a senior aide of Yasser Arafat. In flight, Mr. Abbas remarked mildly to another passenger that he would be in the Yugoslav capital "for two or three days . . . for a brief rest."

His confidence was not misplaced. For Mr. Abbas, the ordeal was over. Associated Press reporters on the ground in Belgrade say the two Palestinians were allowed to bypass customs, were greeted by other officials of the Palestine Liberation Organization, and were then driven from the airport in a limousine bearing the license plate of the PLO Embassy. Meanwhile, the American officials who had waged a short, spirited battle to gain Italian extradition of Mr. Abbas to the U.S. began preparing new warrants to present to the Yugoslav government.

But it will be some time before Mr. Abbas sees the insides of any courtroom. As a member of the PLO executive council and chief of the subgroup named the Palestine Liberation Front, he will more likely be feted in than extradited from the countries of his choosing. Yugoslavia is among the worst offenders. During the past decade innumerable terrorists, Palestinian and pro-Palestinian, have rested, traveled through or undergone guerrilla training there. They come because the Yugoslav government approves of them. Urgent extradition requests by other countries, particularly West Germany, are turned aside. Indeed, one must perhaps go back to 1975 to find the Yugoslavs moving decisively and publicly against international terrorists, and in that instance the three Germans they had seized (on Interpol warrants) were neo-Nazis.

The dignified reception that Belgrade permitted Mr. Abbas is strikingly reminiscent of that once accorded the infamous "Carlos." On Sept. 6, 1976, this Moscow-trained Europen commander of Palestinian and other terrorists touched down in Belgrade on a flight from Algiers. He had five companions, two of them Germans; they apearently intended to participate in an international terrorist summit that Belgrade was then hosting, according to later reports. Though West German police were waiting for him at the airport, and Yugoslav authorities were already in possession of papers from Bonn requesting his seizure and extradition, Yugoslav agents guided Carlos to an airport VIP lounge and then into the city. Four days later he was allowed to depart on a Yugoslav airliner for Damascus and Baghdad.

A similar incident occurred in 1978 when four of West Germany's most wanted Red Army Faction members were picked up in Zagreb, but then released, despite Bonn's requests for extradition. Libya, Algeria and Iraq had all expressed willingness to receive them. Little wonder that West German counterintelligence later complained that it gets next to no cooperation from the authorities in Belgrade.

Yugoslav ties with the PLO are nothing new. In 1973, Marshal Tito and Soviet Premier Aleksei Kosygin ended a week of meetings with a communique that declared their "solidarity with the just struggles of the Arab peoples with Israel." In 1978 the Yugoslavs were reported to have built several training camps for Palestinians near their Bulgarian border. By the following year, if not well before, PLO arsenals in the Middle East included a variety of Yugoslav-made weaponry. Yugoslavia also accepted PLO guerrillas evacuated from Lebanon in late 1983.

Mr. Arafat's close deputy, a notorious chief of the Palestinians' European terrorist operations named Salah Khalaf (Abu Iyad), was received by the Yugoslav minister of defense in February 1981. PLO representatives have held many more meetings with top officials of the Yugoslav government and armed services both in Belgrade and in Lebanon.

There is distressingly little one can say to those astonished by the Italian release of Mr. Abbas before time allowed a full investigation of his alleged role in the murder of Leon Klinghoffer. The scandal recalls the Greek release of an accomplice to the recent TWA 847 hijacking, the French release of a Black September leader named Abu Daoud in 1977, and the still incomprehensible American participation in the 1982 boat lift that saved so many terrorists, including Mr. Arafat and his Eastern bloc aides, from the Israeli army in southern Lebanon.

But there is something to be said about the destination Mr. Abbas chose when allowed to leave Italy. Quiet, "nonaligned" Yugoslavia has encouraged, armed and directly assisted PLO terrorists for many years, and has done that as a matter of declared state policy.

Mr. Abbas seems to understand that. So should we.

FAIR LABOR STANDARDS AMENDMENTS OF 1985

HON. WEBB FRANKLIN

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. FRANKLIN. Mr. Speaker, on Monday the House suspended the rules and passed H.R. 3530, the Fair Labor Standards Amendments of 1985. I want to congratulate Mr. MURPHY for his out-standing work on this legislation and express my support of it.

As you know, the Supreme Court's decision in Garcia against San Antonio Metropolitan Transit Authority held that the Fair Labor Standards Act is applicable to State and local governments. Unfortunately, this well-intentioned decision will bar the popular practice of granting compensatory time off for overtime work and impose financial hardships on local governments.

Congressman MURPHY'S compromise measure corrects these problems. H.R. 3530 restores the choice of using comp time by allowing public employees the option of compensatory time in lieu of overtime pay at a rate of time and a half. The bill also takes steps to avert an administrative nightmare.

Mr. Speaker, as I share the interests of State and local workers and the governments which they serve, I wholeheartedly endorse this important legislation.

CONGRESS AND THE INTELLIGENCE COMMUNITY

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. HAMILTON. Mr. Speaker, on October 28 I had the pleasure of addressing a group of senior professional officers of the National Security Agency. This is "Security Week" at the NSA. Our intelligence community is certainly deserving of recognition for its diligent and patriotic work.

My remarks follow:

I want to thank General Odom for inviting me to speak to you today as you begin Security Week at the National Security Agency.

I am grateful for the opportunity to commend you, civilian and military alike, for the fine work you do. I know of no group within the U.S. intelligence community more dedicated or more professional, and the intelligence you produce is highly valued by all of us who consume it at all levels lof our government.

Security is essential to intelligence. Lately, we have learned that former U.S. intelligence officers provided classified information to the Soviet Union. Such reports make us uneasy, and should prompt us to redouble our efforts to enhance the security of our work product.

Any leak of sensitive secrets is a grave matter, and heightened concern over security is justified. As you know better than most of us, the extent in which our intelligence gathering operations have been affected by recent events may be exaggerated. While many still hold a vision of our intelligence taken from a James Bond film, my own view is that our intelligence operations are much less dependent upon a worldwide network of secret agents, and much more dependent on the type of skills and dedication that you bring to the task.

Most of our useful intelligence estimates are provided by professionals like those of you here at NSA—operating the highly sophisticated technologies that monitor political, economic and social developments occurring each day around the globe. The information you provide is vital for the maintenance of our national security, and for the formation of a sound foreign policy. It is necessary to maintain the highest standards of security in this important work, and I applaud your Agency's selection of security for special emphasis this week.

Keeping intelligence secure from disclosure is both difficult and necessary. For intelligence to be of any value, it must be disseminated beyond those who collect it and evaluate it. The further intelligence is disseminated the more likely it is to be disclosed. The inescapable dilemma of intelligence is that it must be used, and at the same time, it must be kept secret.

Security has become even more difficult in recent years, as the number of actors privy to intelligence secrets has ballooned.

Within the Executive branch, there has been rapid growth in the number and size of agencies that consume intelligence. Congress, itself a major consumer of such information, has expanded its role in U.S. foreign policy and in intelligence.

Let me begin my comments about the role of Congress in intelligence with a few observations about the role of Congress in Foreign policy. Then I will deal more specifically with the role of Congress in intelligence. There is widespread confusion about Congress' role in foreign policy. You at NSA might indeed wonder why Congress has become so actively interested in foreign policy and how we perceive our role.

THE ROLE OF CONGRESS IN FOREIGN POLICY

The great constitutional scholar, Edwin Corin, suggested that the United States Constitution is an invitation for the President and the Congress to struggle for the privilege of directing American Foreign Policy.

Not everybody has agreed with this statement. When asked how foreign policy was made in the United States, the President Harry S. Truman remarked, "I make foreign policy." In his times, President Truman was probably right.

Today, most members of Congress would not agree with President Truman. They would acknowledge that the President should play the principle role in foreign policy-making. However, they also believe that Congress should play a strong and independent role.

There are several aspects of the current debate on which the President and the Congress can agree:

First, the power of the President, despite the role played by Congress is formidable. Under the Constitution, the President is Commander-in-Chief of the armed forces. This constitutional charge, the unity of the Executive branch, its control of information, and other factors have tended, over the years, to give the President an unassailable preeminence in foreign policy-making.

Second, notwithstanding the key role of the President, most of the foreign policy powers enumerated in the Constitution are with Congress. In general, Congress is instructed to provide for the common defense and to declare war. It also has great power because of its vast, but not total control over the purse;

Third, the important role of Congress in the foreign policy process is recognized here and abroad. Lobbyists for foreign policy issues stream to Capitol Hill. In public meetings across America, constituents plead with their Congressmen about issues on foreign policy. Visiting heads of government are no longer content to see only the President and his advisors. They insist on coming to Capitol Hill to talk with members of Congress. Ambassadors stationed in Washington parade the halls of Congress daily.

Competition between the Executive and Legislative branches however, need not—should not—have a winner and a loser. Debate, tension, and review can lead to decisions and actions which stand a better chance of serving the interests and reflecting the values of the American people. Total cooperation between the two branches should not be regarded as the essential condition of sound foreign policy.

The concern of Congress should be to strike a balance between responsible criticism, based on measured oversight of the Executive branch, and responsible cooperation, stimulated by strengthened procedures of consultation with the Executive branch.

Let me try to give you a quick assessment of Congress' role in foreign policy.

The Congress has several weaknesses in its foreign policy role:

Diplomacy requires speed. Congress moves too slowly.

Diplomacy requires flexibility, tact, and nuance. Congress acts bluntly. It votes yea or nay and may insult other nations in its debates. Congress' power of the purse can be wielded only very imprecisely. We grant the aid, or we take it away.

Diplomacy requires secrecy. Congress leaks.

Diplomacy requires a long view of the national interest. Congress is influenced by short-term interests and its members are overly concerned with re-election.

Diplomacy requires expertise. Congress is often ignorant of foreign affairs, changes its membership frequently, and Members are frequently too burdened with a heavy schedule to examine issues in any detail.

Diplomacy requires sustained interest. Congress' approach to foreign policy is usually sporadic, eclectic and tends to focus immediate issues and "flash points."

Diplomacy requires attention to complex and interrelated problems on many levels. Congress tends to concentrate on narrow defined issues or see just one aspect of a broad problem.

Diplomacy requires a strong leadership. Power is diffused in the Congress.

Congress also brings many strengths to the foreign policy-making process:

Congress is a deliberative body, and deliberation may prevent error. Congress can act quickly when it must.

Congress, given its separate but co-equal stataus, can often bring flexibility to diplomacy. A contact with Congress is official, but it is not a contact with the government.

Congress plays a valuable educational role.

Individual Members of Congress have developed skill in foreign affairs, and they have competent staffs to help them. The committee system serve to focus congressional debate.

Parochial Congress is also more accessible and representative, giving individuals and special interests a voice in foreign policy.

Congress can help lead in the sense that its approval makes the President much stronger. Public debate gives legitimacy to policy.

Congress' strengths in foreign policy-making should not be minimized. Its assertiveness in foreign policy should be viewed positively.

The accessibility and representativeness of Congress are deep wells of strength. They guarantee that the people will have input into foreign policy-making.

Representativeness is especially important because the Executive Branch cannot effectively pursue any policy for an extended period without support from the American people. Congressional support is the primary expression of the people's approval. A President is not likely to gain the support of the American people if he cannot gain the support of the Congress.

Effective prior consultation, better information and education on the issues, and a deep respect for the shared powers over foreign policy provided in the Constitution are the best ways to "lubricate" the foreign policy process. With these assets, there will emerge a coherent strategy significantly strengthened by Congressional participation.

The separation of powers produces a healthy and creative tension between the Executive and Legislative branches. The process of making foreign policy will never be tidy and clear-cut, with each step in the process clearly delineated. The diversity and complexity of foreign policy are such that there will never be complete accord.

Our expectations should not be extravagant, given the nature of the process. But the alternative to making the foreign policy system work better is confusion in a complicated, dangerous world, and that is unacceptable.

The foreign policy-making process provided in our Constitution works—if we understand it, and use it with prudence and discretion.

THE ROLE OF CONGRESS IN INTELLIGENCE

Let me now give you a brief assessment of Congress' role in Intelligence. As compared to the Executive branch agencies involved in intelligence, like NSA, that role is relatively minor, but not unimportant, and its significance continues to expand. As Congress has become more active in foreign affairs, its information needs and oversight responsibilities have also expanded, thus bringing it into ever closer contact with the intelligence community.

The Congress has two Intelligence Committees, one in the House and the other in the Senate. The Committees are small with just fifteen members on the Senate Select Committee on Intelligence, and sixteen on the House Permanent Select Committee on Intelligence. Just twenty people make up the professional staff of the House Committee, with a larger, but still small staff of thirty-five persons in the Senate. The Majority and Minority Leaders from both the House and Senate are ex-officio members of their respective Intelligence Committees.

I'll speak primarily to the role of the House Intelligence Committee, but the role of its counterpart in the Senate is quite similar.

The sixteen Members of the House Intelligence Committee oversee the activities of the entire Intelligence Community, plus the tactical intelligence and related activities of the military services. They authorize the budgets for the various intelligence agencies; they monitor intelligence activities to ensure that they are in keeping with laws, executive orders and guidelines; and they make evaluations as to the effectiveness of intelligence activities.

The principal way the Committee performs its oversight function is through the budget review process.

Each year, the President sends to Congress his budget request for the coming fiscal year. The portion of that budget that deals with the Intelligence Community—NSA, CIA, DIA, the FBI's counter-intelligence program, the military services and so forth—come to the Intelligence Committee for action.

Within the Committee, the Program and Budget Authorization Subcommittee is the first to consider the President's funding proposals.

This year, the Subcommittee held some sixty hours of hearings on the budget. In preparation for those hearings, Members and staff examine volumes of material supplied by the intelligence agencies in support of their budget requests. During the actual hearings, testimony is heard from the heads of each intelligence agency, again in support of funding requests.

The Subcommittee also submits written "questions for the record" to the intelligence agencies. Once responses have been

received and reviewed, the Subcommittee writes—or marks up, as we say in Congress—a budget authorization bill.

That bill is then sent to the full Committee, and finally to the full House, both of which have an opportunity to debate, amend and vote on the bill.

Because the programs of the Intelligence Community and related budget figures are classified, the Intelligence Authorization Bill as it appears on the House floor contains little information. A classified annex to the bill containing actual authorizations is made available to every Member of the House through the offices of the Intelligence Committee, but rarely more than a half dozen take the time to review the annex. In most cases, House members trust the recommendations and judgments of their colleagues on the Intelligence Committee.

This review process helps ensure that the costs of the intelligence product are justified by its usefulness, and that necessary progams receive adequate funding. It is an onerous and time-consuming procedure, but one that over time has proven beneficial to the Intelligence Community. Since the two Intelligence Committees were organized less than a decade ago, they have been supportive of significant increases in funding for the NSA and related agencies.

The intelligence committees of the Congress also oversee the CIA's covert action program.

By law, every time the President instructs the CIA to carry out a covert action that he has deemed important to the national security, he must inform the two intelligence committees. By covert action, we mean clandestine efforts to influence people, events and nations in support of American foreign policy. The House Committee has a hearing to review each new covert action approved by the President, and it reviews all on-going covert actions.

While the President must notify the Intelligence Committees in advance of any proposed covert operation, he does not have to receive their approval in order to carry it out. By law, he can proceed even against the objections of one or both committees. The only constraint the committees can exercise over a covert action is to deny funds for it.

Only once, in the case covert activity proposed for Nicaragua, has funding for such an operation been denied. Generally, CIA activities enjoy strong bi-partisan support in the House Intelligence Committee.

PROBLEMS WITH CONGRESSIONAL OVERSIGHT

There are several problems associated with the role of Congress in intelligence matters.

First, Congressional consideration of intelligence matters is slow. The careful examination of all intelligence operations—the review of each funding request and covert action—is a cumbersome process. Intelligence operations frequently require speed and directness of action, characteristics not normally associated with slow-moving, deliberative Congress.

Second, the attention span of Congress is quite short. We in Congress, including those of us on the intelligence oversight committees, are all politicians. As such, as are interested in what interests our constitutents. Whatever is in the news of the day gets our attention—coups, hijackings, or major diplomatic events; that which is not in the news or in the minds of our constituents is crowded out by the rush of events.

Congressional interest in intelligence focuses on the extraordinary events, and even then it cannot be sustained for long in so large and fragmented a body, and in such a fast moving world. As you well know, intelligence requires constant attention to political, economic, and strategic developments around the world—in times of quiet, as well as crisis. Congress is not good at that.

A third problem is leaks. The Intelligence Community, quite naturally, is concerned about providing sensitive classified information to Members, even those on the Intelligence Committee, for fear that information will leak to the press.

The press *is* a formidable adversary to those who want to keep secrets. Given the guarantees in our Constitution, many members of the press believe that they should be granted access to virtually any piece of information. In an effort to obtain that information, the press uses able, persistent and skillful investigative reporters.

Members are aware that they must exercise caution around the press when dealing with classified information. However, many Members know the reporters quite well and deal with them on matters of public interest frequently.

The record of the Congressicnal intelligence committees in keeping intelligence secure has been quite good, so far as I know. I am not aware of a single, proven leak from either committee. I do know that they have retained the most sensitive information over a period of years without leaks. When leaks occur, as they unfortunately do, I do not assume that they came from the Congress, but neither do I assume that they did not come from the Congress. We in the intelligence committees are very sensitive about the possibility of leaks. We want to avoid them and we are always open to suggestions for how to improve our security. The size of the committees is kept small, their members are chosen by the Congressional leadership with great care, and only senior members with reputations for discretion and judgment are chosen to serve. The procedures of the committee in handling and storing material and receiving sensitive telephone calls are carefully worked out.

The numbers of people with access to sensitive information in the Executive branch is far greater, and the press is no less diligent in seeking to obtain information from such individuals.

None of us should have an exaggerated sense of what can be kept secret, in the day of an able and persistent press.

ADVANTAGES OF THE CONGRESSIONAL ROLE IN INTELLIGENCE

May I next suggest to you that the Congressional committees in intelligence can, in several significant ways, strengthen our nation's intelligence, a goal we all share.

First, the House and Senate Intelligence Committees provide the only check on the intelligence agencies outside the Executive Branch. The bureaucracy tends to tilt with the President, as it should, and is hesitant to stand up against him.

Congress brings an independent viewpoint to bear on the intelligence process. This check on Executive Branch policy is enhanced when the Committee act, as they usually do, in a strong bipartisan manner. Only once, in the case of the controversy over the Nicaragua convert action, did opinion split along partisan lines.

Congressional oversight of intelligence is all the more important because of the lack of informed public accountability. Unlike all other Congressional review, oversight of the intelligence community occurs behind closed doors, and without the benefit of the contributions and perspectives of outside groups knowledgeable about intelligence activities. Such knowledge rests only with the intelligence committees, who must act as surrogates for their respective bodies. They—and they alone—have full information. Their responsibility in security must be through.

Second, Congress has a proven record of initiating reforms that have strengthened our intelligence systems.

It was the House Intelligence Committee, for example, which began the rebuilding of CIA clandestine overseas personnel corps after it had been reduced considerably in strength.

The two Intelligence Committees have been in the forefront urging improvements in our counterintelligence capabilities.

Congress has also placed some important limits on activities of intelligence entities. The Foreign Intelligence Surveillance Act of 1978 prohibits the Intelligence Community from wiretapping in the United States without a warrant. Congress has passed legislation prohibiting the use of funds for intelligence or intelligence-related activities unless those activities have been specifically authorized.

Third, Congress has the ability to ask the right questions about our intelligence operations.

Where Administration officials might be more concerned with how one data collection process fits into the U.S. military force structure, or how it contributes to analysis on country X, Congress is more concerned with whether programs are worth the money and time expended on them, and asks very different questions:

Does the right person get the right information in the right time frame?

Have we locked ourselves into a budgetary spiral, whereby the funding of one request means the automatic acceptance of others?

Is a particular system cost-effective?

Is the information being sought necessary for effective intelligence? Or is it merely "nice-to-have?"

Does a particlar budget proposal support arms control monitoring?

Congress' very remoteness from the day-to-say operations of intelligence agencies enables it to retain an objective and critical eye when reviewing them. Congress must attempt to apply the leavening effect of common sense judgments to the complex decisions required of the intelligence community. It does not have the expertise that you and others in the community have, but it should have enough sense of the purpose and organization of the community to ask the larger questions.

SUGGESTIONS FOR IMPROVEMENT OF INTELLIGENCE

Let me offer a few observations about the general quality of intelligence and a few suggestions for how it might be improved.

Congress believes the United States has an excellent intelligence service. Those of you who work in intelligence serve with diligence, skill and patriotism. You have a difficult task, and policymakers continue to ask you to do more. Our information needs are increasingly complex, and yet we do not always provide you with additional resources to meet our requests.

Despite these constraints, the product that emerges from the intelligence community is, in general, excellent.

As good as our intelligence is, Congress believes, as I am confident you do, too, that it

can be better. Let me highlight a few ways that it might be improved:

First, intelligence must continue to be given highest priority. Our intelligence is better, if we believe that our national security depends on it. In recent history, our intelligence was at its best during World War II.

Second, de-politicize the intelligence process. Among policymakers, intelligence is often seen as a tool to make policy look good, rather than as a tool of making good policy. Intelligence should not be viewed as a means of bolstering policy; it should be used to develop it.

In order to de-politicize the intelligence process:

We must make analysts feel that politically discordant estimates are welcome;

We should insist that the top official in intelligence have the highest professional skills in intelligence.

Third, we should work to separate analysis from policy formation. This does not mean that analysts should be unaware of policy. Analysis and policy must be linked for each to be effective. But the needs of policy cannot determine the conclusions of analysis. Intelligence should drive policy, not vice versa.

Finally, we must encourage a competition of views in policy making. Dissenting opinions can be smothered in a process which values consensus too highly. Such a process usually produces policy that represents the least common denominator in the views of policy makers, whereas it should produce policy most directly serving U.S. interests.

In order to obtain dissenting views, we should encourage competing estimates from different agencies, improve channels of dissent, and set up some mechanism to play devil's advocate in the process of policy formation. We might also stimulate competition by seeking the input of experts outside the intelligence community at some point in the policy making process.

CONCLUSION

Congress has a major role to play in initiating reforms of our intelligence operations.

Congress can stimulate broad public support for placing a higher priority on intelligence.

Congress can assure that the intelligence agencies are provided with sufficient funds to accomplish their appointed tasks.

Congress can take the lead, through legislative initiatives, in depoliticizing the intelligence process and stimulating greater competition of views among those who produce our intelligence.

A great nation like the United States simply cannot survive without a good intelligence service.

Those of us in government must cast aside our romantic notions and unrealistic expectations about intelligence and get down to the hard, detailed business of improving our intelligence system.

Along with you, we in the Congress can be instrumental in completing the still unfinished agenda for intelligence reform. We want to work with you, not as adversaries, but as partners to ensure that our intelligence community provide the best available unbiased information to help policy makers formulate a sound foreign policy to protect the United States.

Let me close with the words of Sir William Stephenson, the man called "Intrepid," and the head of British intelligence during World War II:

"Among the increasingly intricate arsenals across the world, intelligence is an essential weapon, perhaps the most important. But it is, being secret, the most dangerous. Safeguards to prevent its abuse must be devised, revised, and rigidly applied. But, as in all enterprises, the character and wisdom of those to whom it is entrusted will be decisive. In the integrity of that guardianship lies the hope of free people to endure and prevail."

TRIBUTE TO ROGER DUFOUR

HON. AUSTIN J. MURPHY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. MURPHY. Mr. Speaker, I would like to bring to the attention of all of my colleagues the retirement of a real public servant, Roger Dufour, who has served 27 consecutive years as a councilman from Uniontown, PA.

Mr. Dufour began dedicating himself to the people of Uniontown in 1959 when he was elected to fill an unexpired term as the councilman in charge of the department of parks and public property. He has been reelected everytime since 1959 and he is currently the councilman in charge of public safety.

In June of 1980, Mr. Dufour was honored by the Pennsylvania League of Cities at their 81st Annual Convention for having served over 21 years of consecutive service as an elected city official, the longest term on record in the Commonwealth of Pennsylvania. This distinction holds true today.

The father of four, Mr. Dufour was employed 46 years with the West Penn Power Co. and retired as a general foreman in 1969. Unable to sit still in his retirement, Roger would then spend an additional 16 years with the Bortz Corp. as a trouble shooter.

Mr. Dufour's commitment to his community can be best demonstrated by the impressive list of organizations which are proud to call him a member: Laurel Lodge No. 651—Free and Accepted Masons, the Syria Temple of Pittsburgh, the B.P.O. Elks 370, and the Rotary International. In 1980, Roger was chosen as the Paul Harris Fellow by the Rotary International.

Mr. Dufour is best known, respected, and loved by the 14,510 people of Uniontown, as an elected official who took his job and his responsibility seriously. He was always there to solve a problem; his dedication, patience, and endurance knew no bounds. There is no doubt that he will be missed as a councilman from Uniontown, but he will remain, assuredly, one of the city's most outstanding citizens.

A TRIBUTE TO JAMES W. ROUSE

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. DYSON. Mr. Speaker, I would like to share with my colleagues a high honor to be bestowed upon a fine American citizen and fellow Marylander, Mr. James W. Rouse. On November 2, Mr. Rouse, a nationally renowned urban planner, will receive the University of Maryland Alumni Association's Distinguished Alumnus Award for 1985.

Born in Easton, MD in 1914, Mr. Rouse was graduated from the University of Maryland Law School in 1937. Shortly after admission to the Maryland Bar, Mr. Rouse founded a real estate and development corporation bearing his own name—a company Mr. Rouse headed until his retirement early last year.

It was only a short time following the Japanese attack on Pearl Harbor that Mr. Rouse answered the call to military service. As a lieutenant in the Naval Reserve, Mr. Rouse served his country with distinction on the staff of the commander, Air Force Pacific fleet.

Never content to rest upon the laurels of past achievement, Mr. Rouse now devotes much of his time and energy to the Enterprise Foundation, a charitable corporation which supports nonprofit housing groups in cities throughout the country, bringing the hope of safe and livable housing to untold thousands of poor families. As the foundation's chairman and chief executive officer, Mr. Rouse oversees a project that is as noble in its purpose as it is broad in its scope.

So, Mr. Speaker, it is with great pride and pleasure that I offer these few words of praise. I salute Mr. Rouse for all that he has done to improve the quality of life in our great Nation, and congratulate him for his many outstanding career accomplishments.

THE DeCONCINI-MOAKLEY BILL

HON. BERKLEY BEDELL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. BEDELL. Mr. Speaker, as you know, on January 30 our colleague from Massachusetts, Congressman MOAKLEY, introduced H.R. 822, calling for a study on the situation of displaced Salvadorans residing in the United States. I am proud to be one of the 126 cosponsors of this important resolution.

No one here needs to be informed of the horrifying violence that has overtaken El Salvador. Amnesty International estimated that as a result of the dangerous conditions there, nearly 1 million people, or 20 percent of the total population, have been externally or internally displaced. More than 500,000 people have remained in Central America, yet the other half-million have settled in the United States, and require our attention.

The Refugee Act of 1980 states that aliens can be granted asylum on the grounds of "persecution or a well-founded fear of persecution." This act has certainly been applied in the case of Iranian refugees as 60 percent of those who applied for asylum were accepted. Our Government, however, has refused to grant asylum to 97 percent

of all El Salvadorans who have requested such status. While we do have a program that provides temporary asylum for refugees from nations suffering under war and oppression, El Salvador is not included. The double standard must end.

The DeConcini-Moakley bill provides for the impartial General Accounting Office to study and report to Congress on the living conditions and security of these displaced Salvadorans. The bill would permit a stay of detention for endangered Salvadorans thereby protecting them from the potentially life-threatening consequences of a return to El Salvador. The existence of extraordinary violence and persecution necessitates the special treatment of these refugees. I strongly believe that as a result of these circumstances, suspensions of deportation must be granted.

Thank you for your consideration of this important matter. I join with Congressman MOAKLEY in asking your cooperation to ensure the expeditious passage of this bill when it appears before the Judiciary Committee's Subcommittee on Immigration Refugees and International Law. Thank you.

TRIBUTE TO SEYMOUR KATZ OF QUEENS, NY

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. ACKERMAN. Mr. Speaker, I rise today to honor a national and local leader in the American Jewish community: Mr. Seymour Katz of Hillcrest Manor in Queens County, NY. Mr. Katz is being honored by United Jewish Appeal-Federation at its Queens Inaugural Dinner on November 3, 1985.

Seymour Katz has committed himself to a strong Jewish future by donating his time and energy to the causes of education for children in the United States, justice for Jews in the Soviet Union, and support for the State of Israel. He has held a number of important national offices within the United Synagogue of America, serving on its board of directors and chairing its Soviet Jewry Committee. In addition, he was recently elected as international vice president of the World Council of Synagogues.

As a New York State leader, Seymour Katz has chaired the United Synagogue Regional Youth Commission and the Isreal Affairs Committee, and now heads the Regional Soviet Jewry Committee.

While Mr. Katz has been an important National and State leader, the contributions that I find particularly impressive have been those that directly benefit his home community of Queens. He was a founder of Israel Center of Hillcrest Manor, is a member of the board of directors of the Solomon Schechter School of Queens, and was president of the Queens Council on Soviet Jewry for 3 years before becoming its honorary president. He was recently appointed to serve on the board of directors of the Queens Jewish Community Council.

Seymour Katz has been honored by organizations including the Jewish Theological Seminary and the UJA, and he is certainly deserving of these honors. His dedication to the Jewish Community of Queens, and of all America, have made an important impact on the quality of Jewish life in America; his hard work on behalf of Jews trapped in the Soviet Union has been tremendous. I am proud to call him my friend.

Mr. Speaker, I call upon all my colleagues in the U.S. House of Representatives to join me now in congratulating Seymour Katz on this auspicious occasion, and to wish him success as he continues to strive for the causes that have been so important to him, and to so many of us.

CONGRESSMAN TONY COELHO—LEGISLATOR OF THE YEAR

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. HOYER. Mr. Speaker, on October 17 of this year my friend and colleague, Congressman TONY COEHLO, was chosen as the "Legislator of the Year," by the California Governor's Committee for Employment of the Handicapped.

TONY could not be present that night but I would like to share with you the speech by Mr. Paul Koenig, the president of the Epilepsy Foundation of America, who accepted the award on TONY's behalf.

The speech follows:

TONY COELHO—LEGISLATOR OF THE YEAR

As a Californian and as President of the Epilepsy Foundation of America, I am delighted to have this opportunity to join you in saluting Congressman Tony Coelho as Legislator of the Year. Tony has asked me to tell you how sorry he is that he is not able to be with you himself and to express his gratitude for this honor.

Tony Coelho, in his public and his personal life, is a role model to people with epilepsy—and to all of us. The courage he demonstrated by being the first member of Congress to acknowledge having epilepsy has strengthened the determination of others faced with that difficult decision. And the tremendous fortitude he has demonstrated in not just overcoming a handicap, but in turning adversity into advantage, has been a shining inspiration.

As a public servant, he is an eager and effective advocate for legislation to meet the needs of people with epilepsy and other disabilities. As the influence of his leadership role in the House of Representatives has grown, he has used it to champion those causes. Tony has spent countless hours giving individual advice and assistance to people with epilepsy. And his Congressional colleagues will tell you that wherever he travels, he makes time in a busy schedule to visit local EFA affiliates and meet with people with epilepsy and their families.

Tony Coelho has made it his special goal to expand employment opportunities for people with epilepsy. That might not seem like such a problem if you know that medical advances have enabled most people who have the disorder to attain seizure control. After all, if most people with epilepsy will never have a seizure on the job, what's the problem?

Well, employment is a major problem for people with epilepsy. When the Congressionally-mandated national Commission for the Control of Epilepsy and Its Consequences held public hearings throughout the country, unemployment and underemployment were constantly cited as major barriers to independence for people with the condition.

A Department of Labor report revealed that, among all handicaps, employers were least willing to hire people with epilepsy. Within the last ten years unemployment among persons with epilepsy has at times been as high as 25%. The final report of the Epilepsy Commission found the number of unemployed people with this disorder to be twice the national average.

Possibly a greater problem than unemployment and one which is more difficult to measure, is the number of people with epilepsy who are underemployed—working in low-paying, menial positions with little opportunity for advancement or change simply because they can find nothing else. What an immense waste of human potential!

In addition to the stigma typically associated with epilepsy, there is, of course, a percentage of people with the disorder who must adjust to having uncontrolled seizures. For them finding, keeping and advancing in good jobs presents special challenges.

Even those who experience only a few seizures each year encounter real problems. Epilepsy disqualifies many people for drivers licenses, making travel to and from work difficult or impossible and completely closing the door to some jobs. Nearly all workers who have epilepsy need to be prepared to deal with the negative reactions of coworkers if and when seizures occur—reactions such as stares, overprotectiveness, avoidance or derision. Workers who experience convulsive or tonic-clonic seizures may be subjected to inappropriate first aid. Workers who experience temporary lapses of consciousness, absence seizures, may find themselves accused of daydreaming. Workers who exhibit disoriented behavior during complex partial seizures may be incorrectly assumed to be substance abusers.

Tony Coelho knows intimately the struggles involved in overcoming the many challenges epilepsy can present. His personal and professional accomplishments would be considered very impressive by any standards, even if we didn't know the obstacles that Tony, like thousands of other people with epilepsy, has had to conquer in order to achieve so much. As a Congressional leader, Tony has demonstrated tremendous commitment and effectiveness as a spokesman for the interests of people with epilepsy. Some might conclude that, with so much influence in the legislative arena, he has done more than enough for the cause. But Tony isn't satisfied!

To the good fortune of so many, Tony has made it his personal mission to help others who share his disorder realize their full potential and experience through personal success. As a Vice President of the Epilepsy Foundation of America, Tony has made it his special goal to increase financial support for the Foundation's employment services programs. Last year, Tony was honored at a dinner in Washington which was attended

by just about "everyone who is anyone" on the political scene. The event raised over $500,000 which has been earmarked by Tony for EFA's employment programs. This year he established the Foundation's "Tony Coelho Jobs Fund." The dollars raised by Tony have already made possible the publication and dissemination of an array of educational materials for employers. And, later this month, Tony will announce, at EFA's National Conference in Baltimore, that 4 new training sites for people with epilepsy will be established—all financed through his fundraising efforts.

Let me tell you a little bit about the Epilepsy Foundation's employment services. EFA has two major employment programs for people with epilepsy—TAPS (Training and Placement Service) and STEPS (Skills Training and Employment Preparation Service).

TAPS works both to alleviate misconceptions among employers and to better prepare job applicants who have epilepsy to meet employers in a knowledgeable, confident and articulate fashion. The success of the program can be attributed to its unique and practical approach.

The resources and assistance which TAPS provides to job applicants with epilepsy are designed to encourage individual initiative and self reliance. A philosophy of "shared responsibility" permeates the project and results in greater personal investment by program participants as well as more successful placements. That is, people get better jobs and keep them longer. Service schemes vary somewhat from site to site according to local resources and needs. However, they all evolve from a core of key components aimed at helping people find, land, and keep and advance in good jobs. Participants direct their own job searches, report on their progress at weekly or biweekly job club meetings and exchange job leads and feedback with their peers—while benefiting from the resources and guidance which TAPS professionals provide.

Services to employers complement services to job applicants with epilepsy. TAPS reaches out to hundreds of employers around the country through letters, public service announcements, speaking engagements and personal visits. In exchange for the free educational and consultative services available through TAPS, informal employer networks work closely with project staff, providing job information, technical assistance and business perspectives. Advisory Committees, composed primarily of employers, volunteer valuable time and expertise on a regular basis. Advisory Committee members promote TAPS informally, offer ongoing feedback, assist with the development of new materials and organize workshops and seminars on epilepsy and employment.

TAPS' success can be attributed not only to the project's well-refined services, but also to a highly skilled and compassionate staff capable of balancing generous measures of creativity and common sense in their work. The staff's sensitivity to and knowledge of community resources other than TAPS, and a willingness to work with these resources, ensure timely and effective response to participants' varied needs.

As I mentioned earlier, in 1986 four new EFA Training and Placement Service offices will be established by the Tony Coelho Jobs Fund. The Foundation expects these "TAPS" offices to achieve the same high standards of performance that the ten-year-old Department of Labor funded program is known for. To date, this program has placed more than 7,000 people with epilepsy in jobs and job training programs; while educating, building and utilizing an active network of enthusiastic employers all across the United States. The new TAPS offices will bring TAPS services to brand new territories. They will reach out to hundreds more job applicants who have epilepsy—and the people for whom they work—and will achieve at least 300 placements in 1986 alone.

A growing concern for people more severely disabled by their epilepsy prompted the Epilepsy Foundation of America to seek funding for a companion program to TAPS, designed to meet the special needs of this population. In 1984 the Skills Training and Employment Preparation Service (STEPS) began operations in Cleveland, Ohio, with funding from the Administration on Developmental Disabilities. This demonstration project combines TAPS' successful approaches to placement with intensive group work, individualized job development, transitional and supported work opportunities and personal on-site follow-up visits by skilled staff. Through STEPS, people previously labeled "unemployable" are working successfully and living independently for the first time.

Epilepsy doesn't have to be a barrier to employment. But too often, it is. Not because people with epilepsy cannot work. They do, very successfully, in all kinds of jobs. The problem is, not everyone knows that. And uninformed employers base their hiring decisions on what they think, what they've heard or what they're afraid to ask about. As a result, they either fail to hire qualified job candidates who have epilepsy or place them in positions way below their capabilities—all because they understand so little about the disorder. Job applicants themselves typically respond to repeated rejections by losing confidence, esteem and very often the motivation to look for work. For many, it becomes a hopeless, never ending cycle.

If a prospective employee's seizure disorder is carefully evaluated on an individual basis, taking into account the frequency, nature, type and other factors associated with the seizure, he or she can become an effective and valued employee. Seizures need not, in themselves, be barriers to employment, and the principles of reasonable accommodation can work to the mutual benefit of the job-seeker and the employer.

Tony Coelho understands that. And he dreams of the day that all people with epilepsy and all potential employers understand it too. He has dedicated himself, as an individual and as a legislator, to that dream—and he's making it come true. That is why I am so deeply pleased that Tony Coelho asked me to represent him in accepting your award designating him "Legislator of the Year."

THE ADMINISTRATION'S POLICY TOWARD CENTRAL AMERICA

HON. HENRY B. GONZALEZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. GONZALEZ. Mr. Speaker, I have risen on close to 50 occasions this year to speak out against the administration's misguided and militaristic policies toward Central America. During this time, the administration has only hardened its stance and escalated the level of destructive conflict in El Salvador, Nicaragua, Guatemala, and Honduras. But the President is out of touch with the will of the American people, and I have heard from many, many individuals throughout the United States who not only disagree with the President, but who are organizing their own efforts to counteract the administration's policies. The Salvadoran refugee sanctuary movement is such an example, and this movement grows larger and stronger each and every day in spite of the attempts of the Justice Department to undermine this latter day underground railroad.

Earlier this month, I received a letter from one of my constituents that expresses the sentiments of so many others from whom I've heard over the past year. This sensitive and insightful letter was written by a young man, only 17 years old, who is able to see what the administration cannot—that the conflicts in Central America arise out of deep poverty and human degradation. This young man sees so clearly what the President cannot—he sees that a military approach only breeds a military response, and thus creates more revolutionary action and raises the already staggering toll of human life.

I would like to share this letter with my colleagues.

The letter follows:

To: Congressman HENRY B. GONZALEZ.

From: Joseph M. Wert, San Antonio, Texas.

Sir, there are many problems in our world that must be addressed, but none more important that the fulfillment of our responsibilities as the leaders of the "Free World." One of the most critical problems before us today is the continuing economic and political turmoil that rocks Central American countries and threatens to bring communist backed governments into power there. The U.S. backed right-wing governments of Central America are guilty of the same infractions against human and civil rights that we charge the communist powers of the world with.

Our vast industrial complex, over the years, has invested millions of dollars in agricultural and manufacturing endeavours designs, not to better the lives of the people, but to take advantage of the abundant supply of cheap and uncontesting laborers. In doing this, they have created a sharp class difference where a few elite control the economic resources of their country while the majority are impoverished laborers with little to survive on, let alone to hope for. In these near feudalistic societies, the communists find no trouble in stirring the passions of the people and kindling the fires of revolution.

In response to this problem, the Reagan Administration has consistently answered such situations with military force. This does nothing more than provide a repressive regime with the power to suppress even further, encourage more revolutionary action and raise the already staggering toll of human life cut short by greed and neglect!

What I propose in the following text, as a start, will be quite difficult to enact because it will require the changing of mens' hearts and minds and the development of a great deal of moral courage that will provide the

people we try to help with the strength to over come the many barriers that will block this road to peace.

I. ECONOMIC REFORMS

Much of the land in Central America is owned by a small minority of elite people. The land must be distributed with the understanding by the owners, that the U.S. will compensate them for the land.

Then those people who want the land will enter into contract with the U.S. and over a period of years, will pay back a reasonable percentage of the total cost of the land. This is done to instill a sense of ownership into the farmers and as he profits from his labor, he will realize that it's his land and no one can take it from him! This leg of my reform plan will provide the groundwork for a free enterprise system and the democratic government that will follow.

II. SOCIAL AND POLITICAL REFORM

The first and most important part of this reform is the establishment of a constitution. Without laws that are applied universally, leaving no man unanswerable to them, the threat of dictatorship is always too close.

"Give a man a fish, he'll eat for a day, Teach a man to fish, he'll eat for a lifetime."

These are powerful words from a wise and just man, they set the tone for this part of my reform plan. Though many would debate it, education is the cornerstone of democracy. It made us free. We must make a dedicated effort to provide every conceivable material needed to educate every age group in these Central American countries. From teachers to the very buildings that they would teach from, we must provide vocational and academic training so that the people will understand the world around them and know how to use it to their benefit.

Other things have to be taken into account in the reconstruction of a poverty stricken country. One thing is for certain, you can not preach the goods of a certain political system to a man whose stomach is sticking to his backbone and family lies near death because of a bad harvest. The logistical needs of the people have to be taken care of while they are educated and until they have become self-sufficient. The communists have used these same basic needs to win the trust of the people with the promise of freedom and food only to revoke them when they had achieved power in the country. The evil in this is quite clear; to prey upon the desperate needs of helpless people, yet the governments we support deny these basic needs to the people and provides the field of resentment and hatred in which these evil seeds are sown, to be irrigated with human blood and tears. We must send food, clothing and materials, personnel and equipment to construct housing units. Throughout all of this we must continue to develop a sense of self reliance in the people so that they do not grow to dependent on our assistance. We must also stimulate the growth of industries and through this hopefully raise the standard of living to a more than tolerable level.

One other aspect of assistance that I would like to touch on is the medical needs of the people. So many die from complication of common illnesses, that the only way to deal with such a problem is to mount a large scale medical operation that would include for the most part the importation of several completely equipped hospitals and the necessary staff to man them. This combined with the equipment and materials needed to construct the proper sanitational facilities for all housing will eliminate many of the waste and disease control problems while allowing immediate treatment for those already stricken.

These are just a few of the many ideas I have to try and solve the problems of Central America. I wish I could go into greater length and will be happy to at a later date but I hope that what I have proposed so far will help you and your peers to seek peaceful answers to the violent question posed by Central America. Yes, these are expensive ideas, but aren't weapons expensive too? The thing about weapons is that you don't stop paying for them when they get there. Weapons designed to be employed against another man will continue to extract a price in blood and failure. We've seen it in Cuba and Nicaragua, do we need to see it again in El Salvador or Mexico? The communists are currently winning a war of lies and deceit in Central America. They are winning the hearts of desperate men, pushed to desperate means, not knowing they will end up in the same situation that they are trying to escape from. If we are to win this war we must answer the lies with truth and a commitment to disapproving the lies through firm unmistakable action. Until some action is taken, other than violent, I must voice my approval of the sanctuary movement and whole hearted support of those who shelter these refugees in direct disobedience of the law regarding the subject. In my opinion, they are doing nothing more than running for their very lives from a war we could easily have prevented and just as easily could stop.

I would like to close this letter with two requests. First, I ask that you consider what I have presented in this letter and secondly, I like to have your personal opinion on the subject of Central America and the Reagan Administration's policies in this area.

As a coming of age voter (turning 18 in December) I look forward to being an active voice in the government of my country and a loyal supporter of your work for the people of district 20. I wish you luck and peace in the future.

Sincerely,

JOSEPH M. WERT,
San Antonio, TX.

LYNN WILLIAMS' "ROAD TO INDUSTRIAL REBIRTH"

HON. PETER H. KOSTMAYER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. KOSTMAYER. Mr. Speaker, there are those who suggest that plant closings and job losses in the American steel industry are necessary byproducts of what the economist Joseph Schumpeter called the "process of creative destruction." I disagree. They are the result of uncreative disinvestment strategies by those who have been more interested in short-term corporate profits than long-term steel productivity.

Rather than creatively investing in more efficient technologies, American steel corporations for two decades have been shifting their capital assets to nonsteel investments because of greater short-term returns on investment. While Japan was adopting the latest basic oxygen furnace technology, the United States steel industry was making investments in hotels chains. As a consequence, the American steel industry today is having to close its outmoded facilities, and is concentrating only on the remaining profitable plants and product lines. In my own district, United States Steel has projected that by the end of the decade it will shut down the aging Fairless Works open hearths and will import semifinished slabs for the plant's "finishing end."

For workers and their families and communities, the consequences of this uncreative disinvestment are evident. We know that steelworkers who lose their jobs because of a plant closing are still earning 46 percent less in their new jobs several years after the plant shutdown. We know that steelworkers and their families suffer serious physical and health problems when their employers suddenly shut down operations. And we know that the community as a whole experiences a loss in tax revenues and a resultant deterioration in its social infrastructure, which adversely affects productivity in other firms within the community.

I recommend to my colleagues the following essay by Mr. Lynn R. Williams, the president of the United Steelworkers of America. As Mr. Williams points out, industrial change should not occur by a process of destruction because "the cost of that destruction, in terms of human misery and wasted talent, is one the Nation cannot afford." Instead, the path of "creative construction" should be followed, whereby "labor, management, financial institutions and Government work together to solve issues that are too large for business or labor to grapple with independently."

Mr. Speaker, Mr. Williams' remarks follow:

[From the New York Times, Sept. 2, 1985]

THE ROAD TO INDUSTRIAL REBIRTH

(By Lynn R. Williams)

PITTSBURGH, PA.—As everyone knows, foreign competition and technology are fundamentally changing the American economy. As an instrument of progress, change is welcome. But change becomes a problem when it occurs as a series of shocks, causing massive dislocation. It is this form of change we have experienced in America's steel industry and in the broad basic manufacturing sector of the economy.

Some people adjust easily to change, and others don't. Take capital and labor. Capital enjoys mobility; labor doesn't. The investor can move his capital without leaving his telephone. He can shift it from mature industries to growth industries, from low-tech to high-tech. An investor can hedge his bets and maintain a diversified portfolio.

How simple economic change would be if the worker could do the same—if he or she could move from an industry in recession to an expanding one, from an obsolete technology to the leading edge.

But for the worker who's invested 10 or 20 years in a steel mill or other manufacturing plant the skills of one career are not easily transferred to another. The worker's entire investment is destroyed overnight and he has to start all over again, not from scratch,

but from a deep hole. He has a family to take care of and mortgage payments to meet.

The issue is not change but whether change will occur constructively, restoring our industries to health while caring for the needs of those who have been wounded. In the steel industry alone, 236,000 workers have lost their jobs since 1979. These are not just statistics; these are men and women left without a future. These are entire communities disintegrating.

The shocks have been intensified by unsound public policies: the failure to enforce trade laws, leaving the domestic market open to a flood of imports from government-subsidized producers; monetary and fiscal policies that have created a trillion-dollar national debt, high real interest rates, and an overvalued currency, and shrunken profits for companies competing in the international arena.

What's needed now is a cooperative arrangement whereby labor, management, financial institutions and government work together to solve issues that are too large for business or labor to grapple with independently. Our agenda should include:

Efforts to establish a level playing field in international trade, neutralizing foreign government subsidies and restrictive trade practices.

Tax incentives and government guarantees on loans by banks and financial institutions to companies committed to investing in modernization of plants and equipment.

Effective job retraining and relocation programs in those areas where restructuring means loss of jobs.

Equally important, we need dynamic management that is willing to innovate, to apply new technologies, new purchasing and marketing strategies and new organizational structures. We need, too, a modern labor union—one that will develop a healthy dialogue with management based on a full understanding of the realities of the business world.

This is the approach my union is taking. We have worked with management to develop new organizational structures to increase productivity. And we have been willing to make sacrifices. When necessary, steelworkers have accepted cuts in wages and benefits. We've exchanged wages for stock. We're interested in having a voice in our industry's future.

America will be the winner if management and labor continue to talk. If management seeks to turn back the clock—replacing collective bargaining with dictation, negotiation with confrontation—America will be the loser.

There are those who look at the jobs we've lost and dismiss the loss as a necessary byproduct of what the economist Joseph Schumpeter called "creative destruction." But the cost of that destruction, in terms of human misery and wasted talent, is one the nation cannot afford.

The alternative path is one of "creative construction." This path will lead to industrial rebirth, and it must be traveled together by labor, management, financial institutions and government. At the end lie greater productivity, greater prosperity and greater security.

A MEMORIUM TO BLAIR LEE III

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. DYSON. Mr. Speaker, I rise today to honor the memory of a great American and fellow Marylander, Blair Lee III.

Blair Lee's life, and the legacy he leaves behind, is a rich testament to the power of conviction. Forever the optimist, Mr. Lee tackled the challenges of public service with passion and probity—giving his all to the people and the State he so dearly loved.

I will always remember Blair as a kind and generous man, who, guided by his conscience, set an example of sound judgment and sure leadership for which all of us in Maryland can be proud.

Among Mr. Lee's many lasting contributions to Maryland, perhaps none is more important than in the field of education. Through Mr. Lee's diligent efforts, great improvements were made in the formula for distributing State funds, bringing equity and excellence to Maryland's public school system. Moreover, as a member of the University of Maryland's Board of Regents, Blair Lee was instrumental in enhancing the quality and stature of higher education in Maryland.

Typical of his lifelong commitment to the principle of equality of opportunity, Mr. Lee, while serving as Governor of Maryland, took the historic step of appointing both the first black and the first woman to sit on Maryland's highest court, the court of appeals. Here, as in so many other of his endeavors, Blair Lee acted not out of a sense of self interest, but rather out of an unwavering devotion to justice.

So, Mr. Speaker, it is with a sense of heartfelt pride that I reflect upon the life of a truly great American, Blair Lee III. A giving public servant and fine family man, Blair Lee's memory will long endure. And for those of us whose lives he touched, he will be greatly missed.

TIMELY SHOW OF STRENGTH

HON. DAVID DREIER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. DREIER of California. Mr. Speaker, on October 10, President Reagan succeeded in capturing the hijackers of the *Achille Lauro*. At the same time, the President took a significant step toward restoring international confidence in America's ability to defend the citizens of the free world.

Along this very line, the San Gabriel Valley Tribune reprinted a pertinent essay from the Northern Territory News in Australia recognizing American's leadership role. I commend this article to my colleagues as a statement of our country's commitment to stand up to international terrorism and defend the democratic liberties we hold so dear.

[Reprinted from Northern Territory News, Australia]

TIMELY SHOW OF STRENGTH

The American stance on the four hijackers of the Italian cruiser, Achille Lauro, is as belated as it is welcome.

The Egyptian plane ferrying the hijackers to an Arab sanctuary was forced to land at a NATO base in Sicily by American jet fighters. The terrorists will now face trial for murder, either in Italy or in the United States.

It was high time Americans did show some backbone in their dealings with terrorists. A lot of talk and no action does not deter the kind of lunatics who murder peaceful passengers on a Mediterranean cruise.

But a taste of their own medicine may. So far President Reagan and his advisers have shown extreme reluctance to use the power under their command. The mightiest nation on earth has often been made to look impotent or foolish or both in the face of extreme provocation by a ragbag of international murdering gunmen.

America has been mesmerized by its failure in Vietnam and has failed to realize that it has a very clear responsibility to act decisively in support of its own interests and the interests of its citizens.

As a result of this failure Americans everywhere are at risk of attack by anyone with a grudge against the United States.

And it is never easy to define precisely what the nature of the grudge is. It ranges from "imperialism" to "capitalist oppression" to "support for Israel" or any number of "causes" that have become fashionable over the years.

Anything will do as long as it humiliates America and embarrasses its allies.

Sometimes, sadly, the Americans themselves have given the distinct impression that they have lost the necessary confidence and faith in their own convictions and in what their nation represents.

For too long it has listened to those who claim that wealth is guilt and freedom a sin.

But the United States represents liberty, prosperity and democracy, and the rest of the world would do well to remember that, without the Americans, we would all be living under the loathesome boot of totalitarian dictatorships, be they communist or fascist.

Indeed many of the underdeveloped countries that seem to delight baiting America in the councils of the world survive only because of American handouts and American subsidies.

For these and other reasons many people in the free world will have reacted with a sigh of relief at this show of strength. About time.

HONEY MILLER—A LEADER IN QUEENS

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. ACKERMAN. Mr. Speaker, I rise today in tribute to a very special woman, Mrs. Honey Miller, of Queens, NY, who is being honored for her extraordinary charitable and political contributions by the Eastern Queens Women's Democratic Club this Saturday, November 2, 1985.

Honey Miller has been a political leader in eastern Queens for two decades. She has been district leader for 14 years, and has served as an assistant to the Queens Borough president. Her inspiring activism has led her to a variety of roles, including a term as the downstate chairperson of the Women's Democratic State Committee. She has led Eastern Queens Democrats in many tough battles.

Mr. Speaker, Honey Miller's contributions to the Queens community has gone far beyond political partisanship. She has served as president of the Douglaston chapters of Cancer Care and the B'nai B'rith, and took part in a campaign to locate missing children. She has also been actively involved with local civic issues, fighting for a new nieghborhood library and better city services. By speaking up when others were silent and by working when others had given up a cause, Honey Miller has earned the appreciation of all of us.

I have always been amazed at the effect that a few dedicated men and women can have in a community. Honey Miller is one such woman. Whether it is a cause that we can all join—like the life-and-death struggle with cancer—or a personal commitment to the political and civic activities in her community, Honey Miller's contributions have stood out as a mark against which we can all be measured. I am proud to call her my friend.

Mr. Speaker, I call on all my colleagues in the U.S. Congress to join me in congratulating the Eastern Queens Women's Democratic Club "Woman of the Year," Honey Miller, and in wishing her the best of luck as she continues to make eastern Queens a better place in which to live.

RESOLUTION TO HONOR FRANCIS SCOTT KEY

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Ms. OAKAR. Mr. Speaker, I am pleased to sponsor a resolution which would authorize establishment of a memorial to honor Francis Scott Key.

Many Americans have paid tribute to our great Nation while singing the verses of "The Star Spangled Banner". Few, however, know much about the man who wrote the inspiring poem "The Defense of Fort McHenry," which was soon put to music and adopted as our national anthem in 1931.

Francis Scott Key, was a young lawyer from Washington, DC. In 1814, while on a mission of mercy, in which he freed an aging physician captured by the British, Key was arrested. All night long, while under guard, he witnessed "the bombs bursting in air" over Fort McHenry. Early the next morning he saw our Star Spangled Banner was still flying, signaling the defeat of the British. Key was very moved by the sight of our flag, and captured that historic moment with his stirring words which every patriotic American knows.

This memorial would publicly honor and recognize the contribution that Francis Scott Key has made to our national heritage.

TRIBUTE TO JOSEPH E. FAY

HON. JOSEPH J. DioGUARDI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. DIOGUARDI. Mr. Speaker, I rise today to announce the election of Joseph E. Fay to the position of national grand treasurer order, Sons of Italy in America. Mr. Fay has tremendous dedication to the betterment of mankind both locally and nationally. His election is a fitting tribute to his wisdom and experience. Italian-Americans should be greatly honored to have such an outstanding man within our community.

On Friday, November 1, in Pelham, NY, there will be a dinner and dance acknowledging his newly elected national post.

I extend my fullest congratulations and wish Joseph the best of luck in ali of his endeavors.

THE 20TH ANNIVERSARY OF THE CLEVELAND JOB CORPS CENTER

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. STOKES. Mr. Speaker, I take this opportunity to salute the Cleveland Job Corps Center on its 20th anniversary. Alpha Kappa Alpha Sorority, Inc. has served as the contractor for the center since it was established in 1965 in my hometown, the city of Cleveland, OH.

On November 1, 1985, the national president of the sorority, Ms. Faye Bryant, the board of directors, and residents of the Cleveland metropolitan area will celebrate the center's 20th anniversary. On behalf of the residents of the 21st Congressional District, I salute the center staff and the sorority on this significant occasion.

It has been my pleasure to work closely with the center staff through the years. Under the strong leadership of its former directors, Mrs. Mary Chambers and Dr. Zelma George Watson, the Cleveland Job Corps Center made an indelible mark on thousands of young men and women. Under the leadership of its current executive director, Mrs. Jeanne Walker, the center staff continues this tradition of excellence both to its students and the Cleveland community, at large.

As the center celebrates its 20th anniversary, it is an appropriate time to reflect on the achievements of its staff and graduates. The Cleveland Job Corps Center has the distinction of being one of only two centers operated by a women's organization.

This particular center has a proven track record of success. Since opening its doors in 1965, the center has served over 19,000 young men and women. There are more than 8,000 graduates of the Cleveland Job Corps Center. Many of those graduates have continued their education in advanced vocational schools, colleges, and military service. Ultimately graduates have assumed positions in various fields ranging from public schoolteachers, to law enforcement officers to bank officers.

To meet the growing demands of the students, the center staff and facility have also grown. The center has increased its capacity from 325 young women to its present capacity of 530 young women and men. During its 20-year span of service, the center staff moved from a 6-story facility to its present 11-story building in the University Circle area of Cleveland.

Mr. Speaker, in addition to serving the students, the Cleveland Job Corps Center has made an indelible mark on the community. The center staff have spent over $100 million in the greater Cleveland community through goods and services purchased from local businesses. Many Cleveland and 21st District residents have benefited from the programs and training they received at the center.

Mr. Speaker, it is a special pleasure to use this occasion, the 20th anniversary of the Cleveland Job Corps Center, to acknowledge the numerous accomplishments of the center and its dedicated staff. The center has been a lifeline and a beacon of hope to the students it has served and to the people of the 21st Congressional District. At this time, I ask my colleagues to join with me in saluting the Cleveland Job Corps Center on the occasion of its 20th anniversary.

EASTERN CARIBBEAN CENTER

HON. RON de LUGO

OF THE VIRGIN ISLANDS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. DE LUGO. Mr. Speaker, last year I introduced legislation to authorize funding for an Eastern Caribbean Center at the College of the Virgin Islands. This year I am joined by my colleagues, Mr. FOLEY, Mr. BARNES, Mr. GRAY of Pennsylvania, Mr. GARCIA, Mr. ALEXANDER, Mr. RANGEL, Mr. HUTTO, Mr. LAGOMARSINO, Mr. BEREUTER, and Mr. O'BRIEN, in introducing legislation which would accomplish the same.

The Eastern Caribbean Center would be developed to provide the educational and technical resources needed in the small island nations of the eastern Caribbean chain. These small islands, an afterthought in the planning of the Caribbean Basin Initiative, came to the country's collective attention when President Reagan decided to respond to requests made by neighboring islands asking that United States invade Grenada, an island which was rapidly being subsumed by Communist forces from without. Now that the country has taken this firm step in the region, we need to focus our attention on assisting each of the east-

ern Caribbean nations in their struggle for economic viability.

A 1984 study by the General Accounting Office found that between 1972 and 1982 the Soviet Union, other Warsaw Pact countries and Cuba significantly stepped up their all-expense paid scholarship aid for students from the Caribbean and Latin America, by 205 percent. Meanwhile, the United States has decreased its government-sponsored aid by 52 percent. The impact of this educational assistance must not be overlooked.

The College of the Virgin Islands is already playing a small role in countering the impact of this focus by Communist governments. I have met a number of entrepreneurs and government officials from newly independent eastern Caribbean nations who have trained in the Virgin Islands. By way of example, the newest nation is St. Kitts and Nevis, and the Minister of Agriculture is a graduate of the College of the Virgin Islands. This means that the gentleman is the alumnus of an American, as opposed to a Soviet, institution. The impact on his perspective should go without saying. Furthermore, the impact on his ability to respond to the particular agricultural needs of that island nation is probably greater. This latter point serves for mainland United States institutions as well. The College of the Virgin Islands has focused its curriculum on the specific needs of small Caribbean islands. It has amassed a body of expertise on the needs of these islands that is hard to find in other institutions.

I did not push the proposal introduced last year because I wanted the College of the Virgin Islands to develop a complete proposal for developing the Eastern Caribbean Center. This it has done. The center is roughly modeled on the east-west center in Hawaii. Its bent is more technical, however, and its plan includes the hands on response to skills needed to avert crises. I think the proposal demands you attention, and your support.

There is an aspect of this proposal that I am particularly interested in encouraging. The U.S. Virgin Islands, as I noted, is pleased with its status as an American jurisdiction. What would make the people of the islands take more pride in this status is to be given a role in the country's foreign policy in the region. Thus far, Virgin Islanders have served in three wars and can claim one U.S. Ambassador as a native son. I cannot understate the enthusiasm that would attend the Federal Government's recognition of the role we are uniquely positioned to play in the eastern Caribbean.

THE PRESIDENT'S SPEECH TO THE U.N. GENERAL ASSEMBLY

HON. TOBY ROTH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. ROTH. Mr. Speaker, I would like to take this opportunity to commend President Reagan for his inspiring address last Thursday before the U.N. General Assembly. The President of the United States speaks for all Americans when he declares that we champion freedom not only because it is practical and beneficial, but because it is morally right and just. Each of us believes as the President that:

Free people, whose governments rest upon the consent of the governed, do not wage war on their neighbors. Free people, blessed by economic opportunity, and protected by laws that respect the dignity of the individual, are not driven toward the domination of others.

The President correctly points to Ethiopia as one of the countries in this world that abridges the freedom of its people. Chairman Mengistu's Marxist-Leninist crusade, wholly supported by Soviet and Cuban troops, sentences the lives of Ethiopians to a reign of terror. As Assistant Secretary Chester Crocker testified on October 16:

Ethiopia remains bereft of the most basic legal, political, and social freedoms. This deplorable human rights situation exists because Chairman Mengistu and a small group of associates wield ultimate power through intimidation and arbitrary arrest, and maintain complete control over all aspects of Ethiopian life. There is no free press, no independent means of political participation and no independent judiciary.

In Ethiopia, the United States has launched the single, largest relief effort in Africa's history. Our top priority has been to feed as many starving Ethiopians as possible. In stark contrast, the priorities of Ethiopia's Government are to: First, wage civil war against its people, second, feed the urban populations, where it derives its support, third, forcibly relocate 1.5 million Ethiopians 400 to 600 miles from their homes, and, fourth, feed the starving. In no uncertain terms, the Ethiopian Government has played a significant role in the creation, maintenance, and expansion of the present famine.

The United States has supplied over 460,000 metric tons of food to Ethiopia, feeding close to 4 million people. Meanwhile, the Soviet Union and Cuba have supplied 1,700 advisers, 2,500 troops, and $4 billion in weapons.

President Reagan calls for a process of negotiaiton, the withdrawal of foreign troops, and national democratic reconciliation in Ethiopia. Furthermore, the President commits that until these negotiations produce definitive progress, America's support for struggling democratic resistance forces must not and shall not cease.

Up until now, United States support in Ethiopia has been limited to emergency economic assistance to the starving suffering under Chairman Mengistu. It's time for us to lend support for the Ethiopian democratic resistance forces within the country and in exile along Ethiopia's borders. Many of us in Congress believe that now is the time to help democracy's call in Ethiopia. Many of us dare to believe that liberty and the torch of peace can be achieved in Ethiopia; 200 years ago, Bertrand Barere warned: "The tree of liberty grows only when watered by the blood of tyrants." The rains are returning to the parched Ethiopian plains, nurturing with it a harvest of unrest.

TRIBUTE TO MAESTRO MARTIN CANELLAKIS

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. SCHEUER. Mr. Speaker, I would like to take this opportunity to bring to the attention of my colleagues the many accomplishments of Martin Canellakis as he leaves his position as music director of the Queens College Orchestral Society. His 10 years of service as maestro have won him the abiding respect and affection of the members of the society.

Beginning his early musical studies at the piano in Tientsin, China, where he was born in 1942 of Greek-Russian parents, Martin Canellakis grew up in Australia and France. As a teen, Mr. Canellakis received highest honors as a pianist at the prestigious Ecole Normale de Musique in Paris. In 1960, he came to the United States to further his musical education and was graduated from the Julliard School, where he pursued both piano and conducting studies.

Mr. Canellakis has worked with such noted figures as Jorge Mester, Sixten Ehrling, Leon Barzin, Walter Susskind, and Carl Bamberger at the Mannes College of Music, where he received the Carolyn M. Perera Award in orchestral conducting. At the age of 24, he founded and conducted the Peabody Chamber Orchestra and was invited to guest conduct the Baltimore Symphony in the Rockefeller Project for American Music. He has appeared on NET television conducting the National Orchestral Association, and has conducted orchestral ensembles at the Meadow Brook, Aspen and Southern Vermont Music Festivals. For nine seasons, he was music director of the Brooklyn Symphony Orchestra and, during the 1981–82 season, he guest conducted the Westchester Symphony Orchestra and made several appearances with the Eglevsky Ballet. He received critical acclaim for his concerts with the Queens College Orchestral Society in performances at New York's Lincoln Center. Mr. Canellakis is currently in his third season as music director of the Westchester Symphony Orchestra.

Mr. Canellakis has also established an international reputation, conducting in Denmark and Italy, and he has been guest conductor of the Jerusalem Symphony Orchestra in Israel.

In his tenure as music director, Mr. Canellakis has raised the musical standards of the Queens Orchestral Society to new heights, providing the Flushing community and the rest of Queens County with a superb quality of music. In addition, he has served the educational and outreach goals of Queens College—a component of the City University of New York.

Although his students, friends and neighbors regret the fact that he will be leaving his position with the Society, I am pleased to note that Maestro Canellakis will not be leaving the cultural confines of the Eighth Congressional District entirely. He will continue to serve as a member of the faculty as Queensborough Community College in the Oakland Gardens section of Queens and remain music director of the Queensborough College Orchestra.

PERSONAL EXPLANATION

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. CONTE. Mr. Speaker, during the second vote on the Frank amendment to the defense bill today which took place in the House prior to final passage, I was unable to make that vote because I was in a meeting regarding another appropriations bill. Had I been present I would have voted "aye" as I did in the Committee of the Whole when Mr. FRANK offered the amendment.

THE NUCLEAR FREEZE: A PHYSICIAN'S VIEW

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. UDALL. Mr. Speaker, since the nuclear freeze movement began 3 years ago, there is still no progress with nuclear arms talks. I have been and remain hopeful that negotiations in Geneva will bring forth success, but there is no agreement in sight. To bring about nuclear arms control, I remain convinced that we need to implement a negotiated, bilateral and verifiable nuclear freeze. For every year that the arms race continues, billions of dollars are spent on arms that could otherwise be spent on critical human needs.

Dr. Andre Bruwer, a professor at the University of Arizona and chairman of the Southern Arizona Chapter of Physicians for Social Responsibility, has written an article on this subject for the August 2, 1985, edition of JAMA, the Journal of the American Medical Association. In this article, Dr. Bruwer draws an interesting parallel between the treatment of cancer and the search for a solution to the nuclear arms race. In doing so, he illustrates the desperate need for a nuclear arms freeze. He might have added that the money saved as the result of a freeze could be used for such causes as cancer research and treatment. It is compelling reading and I insert it in the RECORD at this time.

THE NUCLEAR WEAPONS FREEZE AND A CANCER METAPHOR—A PHYSICIAN'S VIEW

(By Andre Bruwer)

As a physician I am intrigued by the brilliant logic of the idea of a bilateral nuclear weapons freeze by the nuclear superpowers. It offers the promise of an inspiring start to a scaling down of the nuclear arms race, unencumbered by intellectually contorted strategies such as the so-called build-down proposal or by the frantic addition of more and more missiles so their elimination may be negotiated.

The language of the freeze proposal calls on the leaders of the Soviet Union and the United States to work toward the adoption of an immediate, verifiable, mutual freeze of the testing, production, and deployment of nuclear weapons and their delivery systems.

Why does such a concept appeal to a physician? Let me try to explain.

Politicians are fond of using medical metaphors. We have heard about bombing another country with "surgical precision." We have been urged to "quarantine" an unfriendly nation. We have been warned not to use "Band-Aid measures" to solve serious social problems. Politicians might do well to adopt a cancer metaphor in relation to the nuclear arms race. They may then also come to understand that the metaphor of the freeze can be used in a therapeutic sense.

The arms race—and the nuclear arms race in particular—has often been characterized as a cancer invading human society. Uncontrolled, cancer kills by spreading in the tissues and through the bloodstream and lymph stream of the human organizm. It causes fear and discouragement and saps the strength and energy of the body in which it grows. Billions of dollars and research hours have been spent trying to find a cure for cancer. Although, from time to time, there are glimmerings of hope of a cure, cancer kills more people each year. The usual treatment offered a patient with incurable cancer is palliative, meaning that the physician can provide narcotics, chemotherapy, radiation, or mood-elevating drugs, or a combination of these methods.

The counterpart of these palliative standbys might, in the nuclear arms race, be seen as "deterrence," a method of defense or mutual intimidation, that has provided, for the past 40 years, a nervous peace that most people believe cannot last long unless major changes in thinking occur regarding concepts of living together on one planet.

In the case of human cancer, palliation will ususally make the patient's last few weeks or months of life more bearable. Sometimes it might even create the illusion of cure. But palliation will not cure those in whom the cancer has spread widely. Physicians do not live under such a misconception. Although they always hope for the best for their unfortunate patients, although they always try to be encouraging, they are realists. They do not mistake palliation for cure.

Let us now imagine that doctors throughout the world might be told, by some cosmic force, that if they so wished, they could achieve a cancer freeze. This would mean that they would be able to stop the process of cancer in all their afflicted patients on a mutually agreed-on date, simply by agreeing to do so. The cancer freeze would be universal. In every patient with cancer, the disease would be frozen in its tracks.

What would such a halt in the growth of cancer do for human beings? It would not cure any patients of their cancer, only stop the cancers from spreading further. Furthermore, and of equal importance, it would create time for immense amounts of research on cancer to continue and to flourish in an atmosphere of renewed hope and anticipation. Cancer scientists throughout the world would be heartened and inspired. Patients would be gratified and jubilant. Unfortunately—most unfortunately—doctors and their patients cannot be given such a chance.

In the case of the nuclear arms race, human beings now have a chance to stop the spread of this deadly social cancer, an opportunity to freeze the nuclear weapons race in its tracks. Such a freeze will not cure the cancer of the nuclear arms race. But it will allow people of all nations in the world to breathe a sigh of relief. People will find new hope. It will allow leaders time to work, in a positive atmosphere, toward the elimination of nuclear weapons. Leaders will be able to plan in a spirit of hope and encouragement.

There are doomsayers who say that the freeze, as a beginning of a return to sanity, is idealistic and unrealistic. One can remind them that there were those who lacked the courage and the vision to believe that a former inbred, inherent scourge of mankind, slavery, could be abolished.

Even human sacrifice was, at one time, part of human culture. There are also those who say that a universal nuclear freeze is not enough, that is does not diminish the arsenals.

Imagine the outcry, the indignant condemnation, if, in the case of our imaginary human cancer freeze, a leading physican were to say, "I oppose a cancer freeze because it is not enough." One cannot imagine any physican being so shortsighted and insensitive to the suffering of cancer patients.

But, whereas politicians have the opportunity of a nuclear weapons freeze for the taking, physicians and their patients will never be given a choice.

A bilateral nuclear weapons freeze is a courageous and inspiring idea. It would be a beginning, worthy of the memory of Hiroshima and Nagasaki.

EQUITABLE AUTOMOBILE TRANSPORTATION ACT OF 1985

HON. WALTER B. JONES

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. JONES of North Carolina. Mr. Speaker, this bill is intended to balance the support accorded by Japan to its maritime industry by requiring that an equal number of Japanese cars imported into the United States be transported on U.S. ships as on Japanese ships. For the purpose of this legislation, a Japanese ship includes vessels with at least four Japanese citizens among the ship's complement.

Under the present system, 86 percent of the 600 vehicle carriers operating in the world are owned, operated, or controlled by the Japanese interests. There is not one vehicle carrier registered under the U.S. flag.

More than two-thirds of these vehicle carriers are engaged in the lucrative United States-Japan trade, bringing some 1.9 million Japanese cars to our shores in 1984. The American public spent over $10.3 billion purchasing these cars. The American public is ultimately paying the transportation cost and yet the American maritime industry has no access to this service. I am

determined to see that we get a fair crack at it.

Let me assure my colleagues that this bill in no way abandons the free trade ethic to which our Nation has adhered. Under this proposal, 100 percent of the transportation service could be provided by carriers who are neither Japanese nor United States. However, if, as they have done historically, the Japanese choose to support their high cost merchant fleet by having U.S. car buyers pay the freight, then a like number of cars as are carried on Japanese ships will have to move on U.S. ships.

This bill will provide obvious benefits to our national security and economic well-being. The military establishment has long heralded the advantages of roll-on roll-off ships for use in areas without the sophisticated shoreside equipment necessary to service a containership.

In addition, there have been some indications that both the Japanese Government and Japanese automakers are willing to look closely at easing the access to the car-carrying market for U.S.-flag carriers. The bill I am introducing will help provide an avenue between our carriers and the fine Japanese automotive products that have become so popular in our country. We must not let our steadfast determination to set a laissez-faire example to the world leave our maritime industry without a cargo.

Finally, I urge my colleagues to join me in the promotion of our maritime industry by cosponsoring my bill. Together we can provide a strong and effective chorus of support for our merchant marine and the economy of our Nation.

FAMILY PLANNING

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. SCHEUER. Mr. Speaker, I rise in support of legislation introduced today by NANCY JOHNSON of Connecticut.

This legislation will amend the Foreign Assistance Act to require all Agency for International Development family planning grantees to provide clients with an accurate description of the effectiveness and risks of all major methods of family planning and institute a system of referral to family planning providers offering other methods.

A similar statutory provision has long been part of the law authorizing domestic family planning programs.

Providing a "cafeteria approach" to family planning is especially important for developing nations.

As we heard in testimony before the Science and Technology's Subcommittee on Natural Resources, Agriculture Research, and Environment, which I chair, the success of the natural family planning method depends upon the motivation of the couple, the quality of instruction the couple receives, and the followup by the instructor to ensure that the couple understands the method.

In order to make natural family planning effective an enormous amount of time-consuming training and supervision is required.

A recent article in Science pointed out that natural family planning is also very expensive—estimated at $473 per couple as compared to $31 per couple for other contraceptive users.

Other factors, such as poor health and hygiene, and widespread female circumcision render this method inappropriate for use in developing countries—such as those in sub-Saharan Africa—desperately in need of family planning assistance.

To allow AID to make exceptions and to fund family planning groups which exclude all methods of birth control other than periodic abstinence is not only medically unsound, it is insensitive and inappropriate in a region like sub-Saharan Africa where family planning resources are already stretched too thin.

I urge my colleagues to support this legislation.

CONGRESSIONAL SALUTE TO THE CHOPIN SINGING SOCIETY, INC. OF PASSAIC, NJ, UPON THE CELEBRATION OF THE 75TH ANNIVERSARY OF THEIR FOUNDING

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 30, 1985

Mr. ROE. Mr. Speaker, on Sunday, November 3, the Chopin Singing Society, Inc. of Passaic, NJ, will celebrate the 75th Diamond Jubilee of the founding of this most prestigious group of vocalists. I know you and our colleagues here in the Congress will want to join with me in extending our warmest greetings and felicitations to the distinguished members of the Chopin Singing Society, Inc. upon this most historic observance.

Mr. Speaker, at the outset let me commend to you the officers and directors of this highly talented choral group who throughout the past 75 years have served their membership and the people of our community with their dynamic vocal rhythm, melody and harmony. A roster of the Diamond Jubilee Committee, officers and members is, as follows:

CHOPIN SINGING SOCIETY, INC.

DIAMOND JUBILEE COMMITTEE AND OFFICERS

John A. Budzinski, General Chairman, Ball Chairman, President.

Stephen G. Stys, Honorary Chairman, Banquet Committee, Board of Directors.

Anthony A. Szal, Honorary Chairman, Sergeant-at-Arms.

Christopher C. Rendenna, Concert Chairman, Director.

Vincent Rendenna, Reception Committee, Vice President.

John Zaunczkowski, Journal Committee, Recording Secretary.

Anthony Nieradka, Treasurer.

Richard Daszczyszak, Banquet Committee, Financial Secretary.

Anthony Stelmach, Librarian.

Fred Siwiec, Librarian.

Mitchell M. Zak, Board of Directors.

Jerry Wlodarczyk, Board of Directors.

Stanley A. Kobylarz, Journal Committee, Board of Directors.

Reverend Gerard J. Sudol, Liturgy Committee.

Brent J. Iskra, Liturgy Committee.

Peter C. Eagler, Liturgy Committee.

Edward A. Blyskal, Reception Committee.

MEMBERSHIP

David Anderson; Tadeusz Bednarski; Stanley Bednarz, Sr.; Stanley Bednarz, Jr.; Fred Gill; Louis J. Gill, Sr.; Louis J. Gill, Jr.; Eugene Halka.

Henry Kilanowski; Walter Kobylarz; John Kraska; Arthur Lewandowski; Stephan Modrzynski; Zbigniew Niejadlik; Stanley Sloma; Thaddeus Szarawarski.

Thomas Tencza; Richard Vetanovetz; Edward B. Visocky; Gerald Wlodarczyk; Walter Wojcik; John Wolosz, Sr.; Edward Zak; Casey Ziemba.

Mr. Speaker, the Chopin Singing Society, Inc., of Passaic, NJ, is one of the oldest male independent choral groups still active in the United States. The society was officially organized on March 10, 1910 in honor of Frederic Chopin's 100th anniversary of his birth. Their first musical director was Edmund Sennert, whose family formed the core of the first chorus. Mr. Sennert led the group until he went to his eternal rest in 1951.

The society's first performance was in a commemorative program honoring Polish patriots who died in the revolt against Russian occupation in 1830. When World War I began, 75 percent of the active members joined either the newly organized Polish Legion or the Polish Army, while the remaining members kept the organization alive with fundraising drives, the most successful of which was for the Samaritan Hospital in Poland. After the armistice, the chorus resumed its primary function of promoting and maintaining Polish culture through song.

Some of the choir's earlier accomplishments included performing for the first time in America the opera "Halka," appearing in one of the acts of the opera "Il Trovatore" at the Montauk Theatre in Passaic, NJ, as well as being on the same program with Giovanni Martinelli at the Passaic High School in Passaic, NJ.

The Chopin Singing Society is a member of the Polish Singers Alliance of America—a choral organization comprised of six districts in North America.

With the passing of Edmund Sennert, the position of choral director was filled from the membership ranks by Edward Janiec, a protege of Mr. Sennert's.

Under Mr. Janiec's directorship, the chorus acquired distinction when they recieved the highest rating ever given a chorus in an International Choral competition of the Polish Singers Alliance of America. The society also achieved distinction by being the only chorus in the Polish Singers Alliance of America to win the coveted traveling Cardinal Hlond Trophy (a rare Polish coined trophy) three times—twice in succession. This prestigious award is presented every third year by the Polish

Singers Alliance of America to the best of approximately 35 Polish choruses.

A bulging trophy case at the Polish Peoples Home in Passaic, NJ, holds many proud reminders of the society's success in these competitions.

Although most of the songs in their repertoire are pre-World War II military or old folk, the Chopin Singing Society prides itself on its diversity of singing Latin and English, pop, classic and barbershop. In addition to performing at weddings, church services, social and community functions, festivals, concerts, and patriotic celebrations, the chorus also holds ther own annual concert in April and competes each spring with other Polish singing groups in regional and national choral contests. In all the society makes approximately 20 appearances per year. The choir also adds to its credits their two record albums "Polskie Kolendy"—Polish Christmas Carols—and "Songs of Poland."

In 1979 the Chopin Singing Society acquired a controlling interest in the Polish Peoples Home, their headquarters for the past 75 years. This grand, aging building is being restored by the members into a center for cultural and community activity.

The current musical director is Christopher C. Rendenna who was also chosen from the membership ranks after the passing of longtime leader Edward Janiec in July of 1984. During its long history the Chopin Singing Society has been led by only three choral directors.

Mr. Speaker, a gala celebration is planned at the Polish Peoples Home on Sunday afternoon, November 3, 1985 to culminate an anniversary year of outstanding programs bustling with activity for the chorus. A busy month of December 1984 consisted of performances at Christmas concerts and appearances at various church services in Nutley, Passaic, West Paterson, Clifton and Garfield, NJ. A feature article in the December issue of the Bergen Record "Close-Up" was followed by two singing appearances on the "Polonian Hour" on Meadowlands TV Cable 3 during the Christmas holidays. The Herald News and the Passaic Citizen's "View at the Top" continued into the New Year with stories of the society's long history. With their February 9 annual "Polka Nite Dance" and the Jimmy Sturr Band, the Chopin Singing Society began a year long celebration commemorating its 75th anniversary.

Mr. Speaker, we can indeed all gain strength from our heritage. The success of the Chopin Singing Society to endure throughout three-quarters of a century stems not only from its members' dedication and contribution to the community but also for its desire to never stray from their original purpose to promote and maintain Polish culture through song.

As a nation comprised of all people of all nationalities and regions throughout the world, each singularly, and rightfully so, proud of his or her individual heritage and united in common endeavor of freedom, justice, and a good life for all, we can most assuredly be proud of the exemplary achievements that the people of Polish heritage have contributed to America's greatness. The most artistic vocalists and masters of sound and musical selections of the Chopin Singing Society encourage and bring forth spontaneous participation and delightful relaxation and recreation to their audiences. Their Polish melodies bring inspiration and reflection on the wealth of wisdom, standards of excellence, and cultural enrichment that the people of Polish heritage have contributed to the quality of life and way of life here in America.

Mr. Speaker, as we join the Chopin Singing Society in celebrating their anniversary, we express appreciation for their talented artistry and musical performances which have brought joy and happiness to our people. Their outstanding contribution to the American way of life and the American dream has truly enriched our community, State, and Nation. We do indeed salute the Chopin Singing Society, Inc. of Passaic, NJ, upon the celebration and commemoration of their 75th Diamond Jubilee Anniversary.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, October 31, 1985, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

NOVEMBER 1

9:00 a.m.
Judiciary
To resume closed hearings on the nomination of Stanley Sporkin, of Maryland, to be U.S. District Judge for the District of Columbia.
Room to be announced

9:15 a.m.
Commerce, Science, and Transportation
Surface Transportation Subcommittee
To hold oversight hearings on the implementation of the Staggers Rail Act (P.L. 96-448).
SR-253

9:30 a.m.
Agriculture, Nutrition, and Forestry
To continue hearings on the financial condition of the farm credit system, and to discuss possible legislative remedies.
SR-328A

Finance
Health Subcommittee
To hold hearings on S. 1551, to provide for administrative appeals and judicial review under Part B of Medicare, and to review the beneficiary and provider appeals provisions under Part A and B of the Medicare program.
SD-215

Joint Economic
To hold hearings on the employment/unemployment situation for October.
SD-342

NOVEMBER 4

9:30 a.m.
Commerce, Science, and Transportation
Surface Transportation Subcommittee
To resume oversight hearings on the implementation of the Staggers Rail Act (P.L. 96-448).
SR-253

Labor and Human Resources
To hold hearings on the impact of space technology on human resources.
SD-430

NOVEMBER 5

9:30 a.m.
Commerce, Science, and Transportation
Aviation Subcommittee
To hold oversight hearings on regional airlines.
SR-253

Rules and Administration
To hold hearings on S. 1787, to provide for public financing of Senate general election campaigns.
SR-301

10:00 a.m.
Appropriations
Business meeting, to mark up proposed legislation appropriating funds for fiscal year 1986 for the Department of Defense.
SD-192

Governmental Affairs
To resume hearings on matters relating to certain activities and decision making policies of the Deputy Director of the Office of Management and Budget.
SD-342

NOVEMBER 6

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Environment and Public Works
Transportation Subcommittee
To hold hearings to examine problems associated with construction of Hawaii Interstate H-3, including parkland protection issues.
SD-406

Judiciary
Security and Terrorism Subcommittee
To hold hearings on S. 1654, to provide for criminal forfeiture of proceeds derived from espionage activities and rewards for informants providing information leading to arrests in espionage cases.
SD-226

Judiciary
Administrative Practice and Procedure Subcommittee
Courts Subcommittee
To hold joint hearings on farm bankruptcy.
SD-628

2:00 p.m.
Commerce, Science, and Transportation
Communications Subcommittee
Science, Technology, and Space Subcommittee
To hold joint hearings on the space world administrative radio (WARC).
SR-253

Judiciary
To hold hearings on pending nominations.
SD-226

NOVEMBER 7

9:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings on insurance and space commercialization.
SR-253

10:00 a.m.
Armed Services
Defense Acquisition Policy Subcommittee
To resume oversight hearings to review the status and impact of certain legislative provisions to reform the defense acquisition process.
SD-138

Select on Indian Affairs
Business meeting, to mark up S. 1684, to declare that the U.S. holds certain Chilocco Indian School lands in trust for the Kaw, Otoe-Missouri, Ponca, and Tonkawa Indian Tribes of Oklahoma, S. 1728, to authorize the Cherokee Nation of Oklahoma to lease certain lands held in trust for up to ninety-nine years, S. 1298, to coordinate and expand services for the prevention, identification, and treatment of alcohol and drug abuse among Indian youth, S. 1621, to revise the Indian Education Act Amendments of 1978, by defining the eligibility of children who attend the Bureau of Indian Affairs funded schools, and S. 1396, to settle unresolved claims relating to certain allotted Indian lands on the White Earth Indian Reservation in Minnesota.
SR-385

NOVEMBER 8

9:15 a.m.
Finance
Health Subcommittee
To hold hearings on a Department of Health and Human Services report on proposed reform of the Federal hospital insurance program (Medicare Part A) method of paying for capital costs.
SD-215

9:30 a.m.
Energy and Natural Resources
Natural Resources Development and Production Subcommittee
To hold hearings on S. 570, S. 372, S. 946, and S. 913, bills to improve the administration of the Federal coal leasing program, and other coal related issues.
SD-366

10:30 a.m.
Commerce, Science, and Transportation
To hold hearings on the nomination of Jennifer L. Dorn, of Maryland, to be Associate Deputy Secretary of Transportation.
SR-253

NOVEMBER 12

9:30 a.m.
Governmental Affairs
Permanent Subcommittee on Investigations
To resume hearings on espionage activities in the United States.
SD-342

10:00 a.m.
Judiciary
Administrative Practice and Procedure Subcommittee Courts Subcommittee
To resume joint hearings on farm bankruptcy.
SD-106

Labor and Human Resources
Employment and Productivity Subcommittee
To resume hearings on the impact of trade on employment and productivity.
SD-562

NOVEMBER 13

9:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold oversight hearings on LANDSAT commercialization.
SR-253

Labor and Human Resources
To hold hearings on nutrition and fitness in public health.
SD-430

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Select on Indian Affairs
To hold hearings on S. 1452, to settle certain Indian land claims in Gay Head, Massachusetts.
SD-628

NOVEMBER 14

9:30 a.m.
Commerce, Science, and Transportation
Business meeting, to consider pending calendar business.
SR-253

Governmental Affairs
Permanent Subcommittee on Investigations
To resume hearings on espionage activities in the United States.
SD-342

Governmental Affairs
Intergovernmental Relations Subcommittee
To hold oversight hearings on regulatory activities of the Office of Management and Budget.
SD-562

10:00 a.m.
Energy and Natural Resources
To hold oversight hearings on the President's July 8, 1985 National Defense Stockpile "modernization" proposal and its potential impact on the domestic mining industry.
SD-366

Labor and Human Resources
Education, Arts, and Humanities Subcommittee
Business meeting, to mark up proposed legislation authorizing funds for programs of the Higher Education Act.
SD-430

NOVEMBER 15

10:00 a.m.
Environment and Public Works
Toxic Substances and Environmental Oversight Subcommittee
To resume oversight hearings on ground-water level and use and on ground-water quality and flow in the United States.
SD-406

NOVEMBER 18

9:15 a.m.
Finance
Health Subcommittee
To hold hearings on the Federal supplementary medical insurance program (Medicare Part B) payments for physician services, focusing on efforts by the Department of Health and Human Services and others to assess the current payment mechanism and develop reform options.
SD-215

NOVEMBER 19

9:30 a.m.
Energy and Natural Resources
To hold hearings on S.J. Res. 192, to authorize financial assistance for the Northern Mariana Islands.
SD-366

10:00 a.m.
Commerce, Science, and Transportation
Business, Trade, and Tourism Subcommittee
To hold hearings on the promotion of domestic tourism.
SR-253

Office of Technology Assessment
The Board, to meet to discuss pending business.
EF-100, Capitol

NOVEMBER 20

9:30 a.m.
Labor and Human Resources
To resume hearings to examine certain barriers to health care.
SD-430

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Governmental Affairs
Energy, Nuclear Proliferation and Government Processes Subcommittee
To hold hearings on the 1985 Conferences on the Treaty on the Non-Proliferation of Nuclear Weapons and on the International Atomic Energy Agency.
SD-342

NOVEMBER 21

9:30 a.m.
Commerce, Science, and Transportation
Aviation Subcommittee
To hold oversight hearings on aviation labor issues.
SR-253

Energy and Natural Resources
Energy Regulation and Conservation Subcommittee
To hold oversight hearings to review Federal Energy Regulatory Commission's Order 436, final rule and notice requesting supplemental comments on regulation of natural gas pipelines

after partial wellhead decontrol (Docket No. RM85-1-000).

SD-366

DECEMBER 3

10:00 a.m.
Labor and Human Resources
Children, Family, Drugs, and Alcoholism Subcommittee
To hold hearings on the issues of child-care, focusing on education, job training and the labor market.

SD-430

DECEMBER 10

10:00 a.m.
Energy and Natural Resources
Water and Power Subcommittee
To hold hearings on S. 1785, to amend the Garrison diversion project in North Dakota.

SD-366

Environment and Public Works
Toxic Substances and Environmental Oversight Subcommittee
To hold oversight hearings on environmental effects of global atmospheric warmings.

SD-406

CANCELLATIONS

OCTOBER 31

10:00 a.m.
Small Business
To hold oversight hearings on activities of the Small Business Administration's Office of Veterans Affairs.

SR-428A

HOUSE OF REPRESENTATIVES—*Thursday, October 31, 1985*

The House met at 10 a.m.

The Reverend Paul Durham, Radnor Baptist Church, Nashville, TN, offered the following prayer:

Dear Father in Heaven!

We thank You today for the blessings that You have been so kind to give that has made us to be a great nation. I pray for our President and his staff of our Nation as they labor each day for us.

Now Lord, this great House of Representatives, wilt Thou bless our Speaker and every Member as only You can do. I pray for wisdom and knowledge to be given to them, as they think, plan, pray, and vote on every issue that comes before them.

Dear God, may Your love abound with each and this love be so demonstrated that, so as goes the House, so goes our Nation, and also goes our world; that we will find love and peace with all Your people everywhere, and above all that we have peace with Thee. I pray this prayer in Your name.

Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. MACK. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. MACK. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 267, nays 127, answered "present" 1, not voting 39, as follows:

[Roll No. 380]

□ 1015

So the Journal was approved.

The result of the vote was announced as above recorded.

REV. PAUL DURHAM, RADNOR BAPTIST CHURCH, CHAPLAIN OF THE DAY

(Mr. BONER of Tennessee asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BONER of Tennessee. Mr. Speaker, I would like to extend a warm welcome to my good friend, the Reverend Paul Durham from Nashville, TN, and to thank him for offici-

ating in the opening prayer today in the U.S. House of Representatives.

His accomplishments are worth noting. He is the Reverend of the Radnor Baptist Church in Nashville, 2,500 members strong and the fastest growing church in Nashville for 2 consecutive years.

He oversees a senior citizens housing unit, a Baptist academy, a Baptist child care facility, and a "before and after school program" for working mothers.

He is an executive board member of the Cystic Fibrosis Foundation, the Tennessee Baptist Convention, the Nashville Baptist Association, and is active in several other community projects.

Included in all this, he has been married to his lovely wife Nadene for 32 years and has raised four sons. He is now the proud grandfather of three girls.

He has become a successful investor in the middle Tennessee area and is either the chairman of the board or owner of several corporations.

His generosity is well known and I am proud to call him a friend. Once again, on behalf of my colleagues, I welcome Rev. Paul Durham and thank him for honoring us this morning.

THE HONORABLE JOHN DAVIS LODGE

(Mr. McKINNEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McKINNEY. Mr. Speaker, it is with a sense of deep personal, as well as national, loss that I announce to the House the sad death of John Davis Lodge, a former colleague of ours from 1947 to 1950, and a predecessor of mine in the Fourth Congressional seat of the State of Connecticut.

Connecticut and our Nation lost an incredible public servant. Few men have served in so many capacities. Not only was John Davis Lodge a Congressman, he was Governor of the State of Connecticut. He was Ambassador to Spain, Ambassador to Switzerland, Ambassador to Argentina, Representative to the United Nations, and was, in fact, a Strike Force Ambassador for President Eisenhower for many years.

□ 1025

But John Davis Lodge left his mark on the average man in Connecticut also. At a time when nobody would confront the necessity of building I-95 through southern Connecticut, Governor John Davis Lodge did it, even though he knew his own political party would rebel against him.

John Davis Lodge was bested by no one in his love for his country, his respect for its system of government, and his feisty hate of the dangers communism presents to the free world. The last time he was in my office was to talk about where he could go to continue to work for his country. On the night he died, John Davis Lodge delivered a speech to the New York Republican Club blasting the continuing threat of international communism. He died almost immediately thereafter.

I think, quite frankly, Mr. Speaker, that John is smiling down on us now, saying, "I blasted those Commies once more, and then I went to my Lord."

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 3036, TREASURY, POSTAL SERVICE AND GENERAL GOVERNMENT APPROPRIATIONS ACT, 1986

Mr. HOYER. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tonight to file a conference report on the bill (H.R. 3036) making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain independent agencies, for the fiscal year ending September 30, 1986, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF HOUSE JOINT RESOLUTION 127

Mr. COURTER. Mr. Speaker, I ask unanimous consent that the name of Congressman JAMES JONES of Oklahoma be removed as a cosponsor of House Joint Resolution 127.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 1626

Mr. WEISS. Mr. Speaker, I ask unanimous consent that my name be deleted as a cosponsor of H.R. 1626.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

GRAMM-RUDMAN—THE SON OF FRANKENSTEIN

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, today is Halloween, and it is an appropriate date to celebrate the Gramm-Latta bill because it is a Frankenstein. It was enacted in 1981 and has produced the largest deficit ever before recorded in the history of the world.

That deficit was funded by foreign money which has encouraged a flood tide of imports into our country that has produced the largest trade deficit ever before in the history of our country. Simultaneously, the inflated dollar has priced our farm products out of world competition, and today there is a hearing in order to bail out the Farm Credit System under which I am told the farmers owe about $213 billion.

Now there is another Frankenstein called Gramm-Rudman, which may be the son of Frankenstein, and it offers to us another horror that would duplicate the Frankenstein on the Gramm-Latta Act of 1981. It has horrified the Secretary of Defense.

Mr. Speaker, what is needed is the treat of Presidential leadership, not the trick of Gramm-Rudman that will produce the son of Frankenstein for Halloween of 1985.

THE GRADISON DEFICIT-REDUCTION AMENDMENT

(Mr. LOTT asked and was given permission to address the House for 1 minute.)

Mr. LOTT. Mr. Speaker, I rise first to urge my colleagues to vote against the previous question on the rule we will be taking up after the 1-minute speeches today. That is the rule on the Ways and Means reconciliation package, H.R. 3128.

This rule is unfair. It does not allow several very crucial amendments to be made in order under that rule and to be voted on by our colleagues.

The Gradison amendment that was requested would actually, according to CBO estimates, save about $1 billion that would be cut from this reconciliation. The Health and Human Services Department says that figure actually would be closer to $2.3 billion.

Also the Moore amendment that was offered in the Committee on Ways and Means was defeated by an 18–17 vote and was not made in order. This amendment also would save money on the hospital D.R.G.'s.

Mr. Speaker, I ask the Members to defeat the previous question. Let us make these important amendments in order for consideration in the House.

Many colleagues have been asking about what the schedule is going to be after this reconciliation bill today, tonight and tomorrow. Nobody knows, but I tell the Members what should be voted on tonight or certainly by tomorrow, and that is the Gramm-Rudman deficit-reduction package. The conferees have had 2 weeks now, and all we have had so far is a lot of jockeying, positioning, and demagoging. It is time that the conferees got together to bring a package to the floor of the House so that we can vote on Gramm-Rudman.

Mr. Speaker, we demand a vote on the Gramm-Rudman-Mack legislation tomorrow so that Social Security does not have to be disinvested.

THE DISINVESTMENT OF SOCIAL SECURITY TRUST FUNDS

(Mr. PICKLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PICKLE. Mr. Speaker, in hearings held by the Social Security Subcommittee yesterday, it was revealed that in September of this year, without any public notice or warning to the Congress, the Department of the Treasury began converting the Social Security trust fund reserves into cash, and using this money to pay benefits. At the same time the Treasury Department began using FICA tax receipts to pay the current operating expenses of the Federal Government. As a result, by tonight the Social Security trust funds will have been reduced from $37 billion to $8 billion, and they will be insufficient to pay Social Security benefits due in December unless Congress acts to raise the debt ceiling.

The administration has deliberately chosen to continue spending billions of dollars more than it receives each month, and, since it can no longer borrow these billions from the money lenders, it is misappropriating them from the Social Security trust funds.

This financial shell game by the administration is robbing the trust funds of interest payments to which they are legally entitled. Because the interest bearing Treasury bonds held by the trust funds are being drawn down, and will likely be reinvested at a lower interest rate, the trust funds face the loss of $1 to $2 billion in interest over the next 5 years.

Finally, this economic flimflam cannot help but undermine public confidence in the stability of the Social Security System.

Congress must act immediately to stop this outrage, to restore all the money taken from the trust funds, and to prohibit any administration from resorting to this kind of shameful bookkeeping trickery in the future.

GRAMM-RUDMAN-MACK PROMISES BUDGET DISCIPLINE

(Mr. McCANDLESS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCANDLESS. Mr. Speaker, the Gramm-Rudman-Mack proposal represents solid evidence that Congress may finally be willing to take decisive action to control the deficit.

Some of our colleagues have denounced this proposal as being too "radical."

Mr. Speaker, what is so radical about setting a ceiling and then gradually eliminating the deficit over a period of 5 years? The alternative is the inevitable economic crisis that awaits us if we continue to amass $200 billion deficits.

The Gramm-Mack proposal will inject some much-needed discipline into our budget process. Congress would no longer be able to avoid difficult decisions by funding new programs merely by adding to the deficit. Instead, new spending in one area will have to be offset by a reduction in another area or by an increase in revenues. Congress will be forced to reassess its priorities and will have to learn to live within its budget.

Perhaps this is a radical concept for some Members, Mr. Speaker, but it is a fact of everyday life for the average American and one that we must adopt.

Mr. Speaker, a vote on the Gramm-Rudman Act is essential today or tomorrow in order to prevent disinvestment of our Social Security System.

VA ADMINISTRATOR DUCKS HEARING ON GRAMM-RUDMAN

(Mr. MOLLOHAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOLLOHAN. Mr. Speaker, yesterday VA Administrator Harry Walters refused to appear before the House Veterans' Affairs Committee to tell us just how badly veterans would be hurt by the passage of the so-called Gramm-Rudman budget plan.

That is shocking and we should issue a subpoena demanding his appearance.

On the one hand, the administration is asking Congress to pass Gramm-Rudman while on the other, Administrator Walters—and I assume other administration officials as well—refuses to appear before Congress to tell Members and their constituents just how badly veterans and others are going to be hurt by Gramm-Rudman.

That is asking Congress to legislate in the dark—and we have an obligation to veterans, to seniors, to the poor and the country to legislate in the light of total understanding of the consequences of our actions.

The President asks us to move quickly with a piece of legislation which is broad in scope and uncertain in consequence. At a minimum the administration has a corresponding duty to advise and inform.

If Mr. Walters continues to refuse to testify before Congress, then I encourage the distinguished chairman of the House Veterans to subpoena Mr. Walters.

Mr. Speaker, just how dire are the consequences of Gramm-Rudman that the administration is trying to conceal them by this form of stonewalling?

□ 1035

THE TRICK OR TREAT BUDGET

(Mr. COBEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COBEY. Mr. Speaker, as we have been reminded already, this is Halloween and tonight millions of children will be going house to house saying "Trick or treat," a national tradition.

Well, we should remind ourselves that for 25 out of the last 26 years we have been playing a trick on our children, amassing an enormous debt and enormous deficits in those 25 out of 26 years.

We have a chance through Gramm-Rudman-Mack to play a treat on our children and give them some hope for the future.

I urge, in fact demand on behalf of the overwhelming majority of the people of this country that we get on with correcting this problem and pass this legislation that shows us an opportunity within 6 years to have a balanced budget and stop tricking our children and pay them a treat. This is the time of the year to do it.

TIME FOR U.S. GOVERNMENT TO TAKE DECISIVE AND COHERENT ACTION ON FREE TRADE

(Mr. PEASE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEASE. Mr. Speaker, it is high time the U.S. Government take decisive and coherent action to ensure that free trade will actually benefit the American people in the coming decades.

Free trade can no longer mean laissez-faire and inaction. The present administration's record is proof enough.

Today, I am introducing an omnibus bill of tough, pragmatic international trade legislation aimed at extending the U.S. Government's stewardship over the economy to the international sector. In view of current trends, if we do not act to improve the world's monetary system, curb the proliferation of unfair trade practices, and facilitate trade related adjustment in the domestic economy, we can expect Americans to give up on free trade.

My bill answers this challenge in a responsible way, a middle course between protectionism and the Reagan administration's policy of too-little-too-late.

VOTE ON GRAMM-RUDMAN TODAY

(Mrs. MARTIN of Illinois asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. MARTIN of Illinois. Mr. Speaker, the conferees to Gramm-Rudman have been working, but thus far to no conclusion. We are seeing amendments offered, often by people who oppose the whole concept of Gramm-Rudman and some dilatory long meetings, instead of bringing to the House floor the agreed upon between the House and the Senate versions of a bill and let us see if it can go up or down; but we have done things like that before. The difference this time is that we are holding hostage the senior citizens of the United States of America.

The choice that the Democrats are putting to senior citizens is no checks or disinvestment of the sacred Social Security trust funds.

Now, I say this to you, a majority of the people on Social Security are women. A majority of the people on Social Security depend on those checks.

What choice is the Democratic Party, the party that is sworn to uphold Social Security, offering—disenfranchisement or disinvestment? Let us vote on Gramm-Rudman today, at the latest tomorrow, and protect the senior citizens of America.

INGENIOUS DISINFORMATION ON SOCIAL SECURITY

(Mr. JONES of Oklahoma asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JONES of Oklahoma. Mr. Speaker, there has been some ingenious disinformation about what is happening or has happened to Social Security. We hear that the Social Security trust fund is going to be invaded tomorrow, if Gramm-Rudman is not voted on today.

We held hearings yesterday in the Social Security Subcommittee. The shocking fact is that the Department of the Treasury has already disinvested, they have already invaded the Social Security trust fund and the senior citizens of this Nation have had $14 billion of their reserve savings in the Social Security trust fund sold off and it is going to cost the Social Security trust fund over $300 million a year from now to the year 2000. That is shocking. That is a breach of fiduciary responsiblity to the senior citizens and the Department of the Treasury ought to be made to make this trust fund whole.

It was not caused by the conference on the debt ceiling. This was done with no notification whatsoever to the Congress. It was done with no statutory authority that we can find, and I think it is wrong.

I agree, we ought to vote on some discipline, whether it is a modified Gramm-Rudman, Gramm-Rudman, or whatever.

I say to my Republican friends, what are you afraid of in making that bite this year? Why do you want to hide behind something that does not take effect until 1986, after the elections?

Let us do it, and let us do it now.

SUPPORT ADMINISTRATION PROPOSAL ON CENTRAL AMERICAN COUNTERTERRORISM ACT OF 1985

(Mr. LAGOMARSINO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAGOMARSINO. Mr. Speaker, this week, Salvadoran President Jose Napoleon Duarte is in Washington, only a short time after the release of his daughter following her kidnaping by Communist guerrillas.

President Duarte faces great difficulty in El Salvador in trying to strengthen the democratic institutions of his country at the same time as he tries to defend his people against the wanton attacks and destruction promoted by the guerrillas who are supplied and supported by the Sandinista regime in Nicaragua.

Just days after the release of his daughter and her companion and a number of mayors, the guerrillas struck again kidnaping another Salvadoran Government official. The continuing campaign of terrorism by the guerrillas cannot be tolerated. The administration has proposed the Central American Counterterrorism Act of 1985. It would provide funding for police and military training to help national and local governments combat terrorism in El Salvador and other Central American nations. I urge my colleagues to support this plan to fight terrorism.

Mr. Speaker, we demand a vote on Gramm-Rudman today or tomorrow so that Social Security does not have to be disinvested, or defaulted.

WHILE NERO FIDDLED, ROME BURNED

(Ms. KAPTUR asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. KAPTUR. Mr. Speaker, it is official again. This morning the Commerce Department announced that last month's trade deficit with the world was the largest in our history, over $15 billion more imports on our shores than exports going out in just 1 month. It brings this year's accumulated trade gap to over $107 billion, and one-third of that with one country, Japan, another all-time record.

While these figures climb through the roof, so do the manufacturing unemployment numbers. One-third of a million more jobs have been lost since January of this year.

Despite all of these signals, the Reagan administration has turned its back on the shoe industry, the textile and apparel industries, machine tools, the automotive industry, and farmers.

Either there is a short circuit on the instrument panel at the White House, or the President's pronouncements on trade earlier this fall were meaningless lipservice.

What a traversty for our economy, our industrial base, and most of all, our proud skilled work force.

The President's strategy of waiting it out is creating innocent victims.

While Nero fiddled, Rome burned.

DON'T SHEAR THE SHEEP THAT LAID THE GOLDEN EGG THAT IS GOING TO CAUSE THE WELL TO RUN DRY

(Mr. BARTON of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BARTON of Texas. Mr. Speaker, I would like to borrow a phrase from my distinguished colleague, MOE UDALL, and remind this Congress that it should be careful not to shear the sheep that laid the golden egg that is going to cause the well to run dry.

In short, it is time to fish or cut bait on Gramm-Rudman.

What is the problem? Quite simply, it is evident that some Members, not all, but some Members of the distinguished Democratic Party in the House of Representatives are afraid to make the decision to pass some sort of legislation that sets up a mechanism to get spending under control. We have that legislation at hand. It is called Gramm-Rudman-Mack. It passed the other body almost 3 weeks ago and it has been languishing in the conference committee since that time.

This legislation in the other body was supported by both Republicans and Democrats and passed almost 3 to 1.

Mr. Speaker, the time has come for a straight up or down vote on Gramm-Rudman today or tomorrow, so that we do not have to tamper with the Social Security trust fund.

I would tell my colleagues on the Democratic side of the aisle, if they want to lower that ceiling to $172 billion and make it binding at the committee and subcommittee level, this Member of Congress will vote for that.

WHAT WILL GRAMM-RUDMAN DO TO OUR VETERANS?

(Mr. KANJORSKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KANJORSKI. Mr. Speaker, yesterday 100 former prisoners of war from the Second World War from my

district came to Washington, DC. They had a wonderful visit. They asked for many opportunities and I think we extended the most that we could here in Congress, but they wanted to meet the President. It was very difficult to assure them that was impossible.

But one thing they asked me late yesterday afternoon is what effect Gramm-Rudman would have on the veterans of America.

I assured them that the outstanding chairman of the Veterans Committee had taken action to ask the Administrator of the Veterans' Administration to appear before our committee today to explain just what effect that amendment would have.

Late yesterday afternoon I arrived back in my office to be informed by that chairman that the request to have Mr. Walters testify before the Veterans' Affairs Committee was refused and it was refused on the instructions of the White House. Not only Mr. Walters could not testify, but no official of the Veterans' Administration could testify.

All I have heard this morning is some urging to vote for Gramm-Rudman. I challenge my friends on the Republican side, can any of you tell me sufficiently what the effect will be on the veterans of America by the passage of this bill? Do you know the facts and figures? Do you know what would be closed? Do you know what pensions would be cut back?

I submit that to urge action today in ignorance would be the biggest mistake the Congress could make, with one exception, the acting in ignorance in 1981 that cut taxes when we did not know the consequences and as a result have now doubled the deficit.

WHAT DEMOCRATS REALLY WANT IS TO RAISE TAXES

(Mr. MONSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MONSON. Mr. Speaker, the House is constantly faced with opportunities to show a real commitment to deficit reduction. Last week we had a chance to eliminate $3.5 billion in new add-on spending from the budget in a bill with a deficit reduction title and on an almost straight party line vote we did not take advantage of that.

Today we have a chance to address the issue again with over $2 billion in new add-on spending in the bill that will be before us. But again on a partisan party line vote we do not have a rule that will even allow us to present an amendment to make those cuts in another bill with a deficit reduction title. Isn't it interesting how we hide new spending under a title of deficit reduction.

This morning we read in the paper that the conference committee is now wanting to change the proposal known as Gramm-Mack and make it something that is unachievable and unworkable so that it will be doomed to failure. Some want it to fail!

We are constantly showing that we really do not have a commitment to balance the budget. By setting unreasonable and unworkable targets, we are saying that we want deficit reduction to fail so that we can really do what the Democrats want us to do, and that is raise taxes.

Now we are facing a new dilemma. Social Security must either be disinvested or the checks going out are going to bounce, all because we will not do one thing, and that is vote on the Gramm-Mack proposal and get this important issue of rising deficits under control once and for all.

The Democrats are the ones that are preventing this from happening not the Republicans. The solution is easy. It requires us to have a vote on Gramm-Mack. We demand that vote so that Social Security does not have to be disinvested and to keep the checks from bouncing.

LET US HAVE ACTION ON THE BUDGET DEFICIT THIS YEAR, NOT NEXT YEAR

(Mr. LEVIN of Michigan asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVIN of Michigan. Mr. Speaker, my colleague who just spoke has it mixed up. We want action on the domestic deficit, the budget deficit, not next year, but this year. That is what we want.

We want a vote so that there will be action this fiscal year and not postponed to the next.

We also want both sides of the aisle to talk about both deficits, not only our budget deficit, but the trade deficit, and you are very silent on the other side of the aisle about that.

The facts came out this morning, as already mentioned, a $15.5 billion trade deficit; but all these are statistics. What is the bottom line? There have been 340,000 manufacturing jobs lost in the United States since January.

This administration is saying, "Stay the course," while parts of our economy are going down the drain.

We say shame on the Reagan administration. We Democrats want action on both deficits this year, not next, on the domestic deficit and also on the trade deficit that is badly injuring people in homes throughout the United States of America.

RAISE THE DEBT CEILING AND ADOPT GRAMM-MACK PROPOSAL

(Mr. KOLBE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KOLBE. Mr. Speaker, tomorrow is November 1, 36 million Americans are going to be receiving their monthly Social Security benefit check.

The question for today is: Will those checks clear? Will there be sufficient funds to pay them, or will we have to disinvest the Social Security trust fund to pay them?

The answer to that question lies in our hands. We can stall once again on the question of raising the debt ceiling, or we can pass it. And we can pass it with a serious deficit reduction plan, the Gramm-Mack amendment that is in the conference committee right now.

If the House fails in its responsibility, the Treasury will have only two choices: To not pay those Social Security checks, or to steal from the long-term Social Security investment fund, the funds that are invested in interest-bearing bonds to pay Social Security obligations in the future.

Either of those alternatives is unacceptable. Mr. Speaker, this body must meet its responsibilities. Raise the debt ceiling and adopt the Gramm-Mack deficit reduction plan that the overwhelming majority of Americans want. The American people demand a vote on Gramm-Mack so that Social Security does not have to be disinvested.

Mr. Speaker, let us have that vote today.

IMPORTANT ARMS CONTROL NEWS

(Mr. DICKS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DICKS. Mr. Speaker, today's announcement that the United States will make a counterproposal in Geneva on Friday is important arms control news. The forthcoming visit of Mr. Shultz to Moscow is also an indication that progress toward an agreement in principle may be possible in Geneva at the summit.

The President clearly has a critical choice to make. Is the United States willing to continue adherence to a restrictive interpretation of the ABM agreement in order to achieve deep cuts in offensive weapons? I believe President Reagan should give serious consideration to this proposition. After all, he wants deep cuts in offensive weapons and clearly deep cuts in offensive weapons will make defense a more viable future option.

Stopping erosion of the ABM agreement is also a goal of the administration. At the same time, important research can continue on the SDI Program.

Mr. Speaker, I hope that hardliners in the administration do not make it impossible for us to achieve a truly historic agreement with the Soviet Union.

MORE THAN GOOD FAITH AND A HANDSHAKE NECESSARY WHEN NEGOTIATING WITH RUSSIANS

(Mr. PETRI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PETRI. Mr. Speaker, all the current talk about nuclear arms negotiations brings an earlier attempt at negotiations to mind.

The fur farmers in Wisconsin tell a story they swear is true.

It seems that back in 1945 or 1946, one of our fur farmers decided to attempt some bartering with his counterparts in the Soviet Union, with the hope of acquiring some sables for breeding.

Sables are animals which are similar to mink.

Sable fur is available only from the Soviet Union, but as we breed quality mink in Wisconsin, our fur farmer thought that maybe the Russians would be willing to make a trade.

The Russians proved to be quite cooperative. In exchange for five Wisconsin mink, our farmer was allowed to choose five sable—one male and four females.

But after he got home, he discovered that the sables wouldn't breed. Upon closer examination he found that the male had been neutered. His conclusion: When negotiating with the Russians, you need more than good faith and a handshake.

PERMANENT CONTRACT HEALTH CARE FOR VETERANS IN U.S. VIRGIN ISLANDS

(Mr. DE LUGO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DE LUGO. Mr. Speaker, I would like to thank the House of Representatives for voting yesterday to make permanent the contract health care for veterans in the U.S. Virgin Islands. This, of course, is the exact care that is extended and has been made permanent for veterans in Alaska and Hawaii.

I particularly want to thank Chairman SONNY MONTGOMERY and BOB EDGAR, the chairman of the subcommittee that has jurisdiction in this area, for helping in an area that is very important to these veterans. We have come a long way from the situation that we had when I came here to the House where veterans in the U.S. Virgin Islands had no health care and had to fly to the Commonwealth of Puerto Rico and spend the entire day waiting to be seen by a doctor.

So I commend this House for its action and I again thank the chairman who helped us get this done.

TAKE ACTION ON DEBT CEILING AND GRAMM-RUDMAN NOW

(Mr. NIELSON of Utah asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NIELSON of Utah. Mr. Speaker, one of every eight citizens of this country receive a Social Security check each month. Unless the Congress takes action today or tomorrow, those checks will not go out.

Mr. Speaker, we have three options:

First, do not send out the checks, thus depriving over 36 million Americans of Social Security on which most depend to pay for their food, clothing, and shelter;

Second, raid the Social Security and Disability Trust Funds to get the money so the checks will not bounce; or

Third, take action today or tomorow on the Gramm-Rudman deficit reduction.

Of these alternatives, only the third will do. We demand a vote on Gramm-Rudman so that Social Security recipients can receive their checks without disinvesting the Social Security Trust Fund.

The Democrats oppose this because they say they want Gramm-Rudman to start this year. I agree with that. I would like to say I would start it this year if I could. I would even take a look at some of the programs we have authorized in past years and maybe reduce those as well.

HOW SERIOUS ARE THEY ABOUT DEFICIT REDUCTION?

(Mr. FRANK asked and was given permission to address the House for 1 minute.)

Mr. FRANK. Mr. Speaker, not since the march of the Siamese children has anything been as well orchestrated as the prepared speeches we are getting inaccurately claiming that Social Security checks are not going out tomorrow. Of course they are, and I hope no one will pay any attention to that.

The fight is not whether to reduce the deficit, but how. For example, some of us think that the way to help finance Medicare is to keep the cigarette tax at 16 cents a pack. The President wants to reduce cigarette taxes and, instead, increase the fees that Medicare recipients pay. In other words, some of us think we should tax the things that cause cancer. The President wants to tax the people who have cancer.

That is a difference of opinion not about the level of the deficit, but how to deal with it. Now we are told we have to do the Gramm-Rudman thing. I am preparing a list which I will put in the RECORD this afternoon of those, all on that side, who are sponsors of Gramm-Rudman, because what I found is that an awful lot of them voted against the President when he wanted to reduce the dairy subsidy. They voted yesterday to keep the 12 additional MX missiles we do not need. So I think it is very interesting and we will just have these names listed of people who have shown how serious they are about deficit reduction. They are for balancing the budget, continuing a boondoggle dairy subsidy program, and building 12 unnecessary MX missiles.

A little more budget-balancing like that and they can add another trillion to the Republican deficit.

WORST MONSTER LURKING IN SHADOWS OF CONGRESS IS THE DEFICIT

(Mr. McCOLLUM asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCOLLUM. Mr. Speaker, it is fitting on this Halloween when we are getting so many speeches about the deficit that it seems to me we ought to be talking about the worst monster lurking in this body. It is Count Deficit.

Count Deficit, like the mystical Count Dracula, is sucking blood. He is sucking the lifeblood out of the economy of this country and striking fear and uncertainty into the hearts of millions of our citizens. Every year that Count Deficit strikes, he leaves behind his own Daughters of Darkness in the form of interest payments on the Federal debt. It only took 4 years for the national debt to grow from $1 trillion to $2 trillion, and in the past 10 years, the portion of the Federal budget going to pay interest expense has doubled.

We have the opportunity now to grab the wooden stake of Gramm-Rudman and drive it through the heart of Count Deficit. It seems to me ironic this morning that so many of those on the other side of the aisle who spent years and years building up the deficits and spending and spending are here today saying that they suddenly want to do something about it. It is long overdue that they did.

They are over there trying to scare veterans, also, on that side of the aisle, saying if we pass Gramm-Rudman, there may be some problem with that. There is not going to be if this Con-

gress acts. All Gramm-Rudman will do is to say, "You take the horn, Congress. You do the job you are intended to do and are supposed to do and there will not be a problem, but if you do not do that, then we are going to give the power to the President to sequester, a power that nobody wants to give.

Mr. Speaker, I submit that if we do not want divestment of the Social Security funds, if we do not want problems in any of these other areas, let us do the job, pass Gramm-Rudman now, get on with it, and get on with doing the job we are supposed to do after we pass it.

STOP PLAYING SCARE TACTICS WITH SOCIAL SECURITY RECIPIENTS

(Mrs. BOXER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BOXER. Mr. Speaker, it is almost amusing to hear my Republican colleagues cry out for the senior citizens on Social Security, the same party that has tried to weaken Social Security year after year after year.

□ 1100

The fact is we should vote on a balanced budget approach as soon as possible. But let us not fool the seniors of this Nation into believing that Democrats are jeopardizing Social Security.

The Reagan administration has already invaded the Social Security trust funds because the Republican Senate failed to pass a clean debt ceiling extension. They added a very complicated Gramm-Rudman proposal to the debt extension which the Democrats are working on.

We will have a better version, a version that starts cutting right away, before the 1986 election. We will have a version that protects our senior citizens and our children and our disabled, a version that protects us from a recession.

I ask my Republican colleagues to join us in getting a decent plan and to stop playing scare tactics with our Social Security recipients that many of them never noticed before.

THE NEED FOR CHILD SAFETY

(Mr. LUNGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, I think I am probably going to disappoint some Members on the other side of the aisle, but I will not be talking about the subject which seems to be of the most interest here today. In deference to my friend from California [Mr. DELLUMS], I thought I would talk on another subject.

Mr. Speaker, it is estimated that in 1985 alone, more than 50,000 children will be kidnaped. As a parent of three young children, I am especially disturbed by this statistic.

Tonight is Halloween and amid all its fun and excitement, it is probably the one night each year when parents are most acutely aware of the potential dangers facing their children. For this reason, I have chosen today to introduce a piece of legislation to designate next Halloween, October 31, 1986, as the "National Child Identification and Safety Information Day."

The purpose of this bill is twofold: First, to emphasize the need to provide our children with intensive preventive education. Parents need to take the time to carefully explain to their children how to be cautious and how to recognize potentially dangerous situations. Second, this bill is intended to challenge parents to compile an identification file on each of their children. Each file should include fingerprints, current photographs, video tapes, or dental records.

Beginning today, I will be using this next year to encourage these activities in my home district and I would strongly encourage my colleagues to do the same.

REPUBLICAN ATTEMPT TO COVER UP PAST RAIDS ON SOCIAL SECURITY TRUST FUND

(Mr. COELHO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COELHO. Mr. Speaker, I find it very interesting that my Republican colleagues are trying to pull the greatest coverup that has existed in the last year. That is, they are trying to say that Social Security may be invaded tomorrow or the next day.

But what they are unwilling to say is that Social Security, however, has been invaded. On September 1, the trust fund was invaded by the Republican President, Ronald Reagan. He has repeatedly gone after Social Security in the 5 years that he has been in office, and you people on that side of the aisle have repeatedly supported that.

But what you are trying to do today is to cover up for those past votes and mistakes. It will not work. I want to warn you of that.

And the ghostwriters that have written your statements, one by one, as you have come up to this podium to talk about what is going to happen tomorrow, you ought to ask that those ghostwriters have the facts before you speak.

PROTECTING THE RIGHTS OF MIROSLAV MEDVID

(Mr. RITTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RITTER. Mr. Speaker, I do not really have a ghostwriter. I would just like to continue with my own statement.

Mr. Speaker, some late news has major impact for all of us here in this body and for the American people. This morning I spoke with a Mrs. Irene Padoch, a Ukrainian woman who interviewed Miroslav Medvid for some 1 hour directly after he first jumped off the Soviet ship.

During the course of that interview, the young man repeatedly stated that he did not want to return to the Soviet Union. He stated that he wanted to live in an honest country. He stated that he feared going back to the Soviet Union.

To Mrs. Irene Padoch's mind, there was not a shadow of a doubt that this man wanted to stay in the United States. She was instructed by the Immigration and Naturalization Service people to tell the young man that he would find no harm. In 1 hour, he was returned to the Soviet ship.

My fellow Members, we cannot, given this new knowledge, allow this Soviet ship to take Miroslav Medvid back to the Soviet Union. I urge you to join with me in calling for a full Justice Department investigation of what happened during those initial hours so as to provide the base for keeping Miroslav Medvid from Soviet hands.

Until that information is known, we should not allow that ship to go back to the Soviet Union with Miroslav Medvid on it.

LEGISLATIVE TERRORISM

(Mr. WEISS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEISS. Mr. Speaker, how do you characterize the people who lay down ultimatums and say that unless you do what they ask you to, they will do something that will really hurt you or somebody else? In the criminal codes, we call that kind of behavior extortion or blackmail.

In the context of the threat that unless we adopt Gramm-Rudman, Social Security recipients, the senior citizens of this country will stop receiving their checks, I would characterize as legislative terrorism. The people who are least able to protect themselves are told by the administration in power that they will stop sending out Social Security checks unless the poison pill of Gramm-Rudman is adopted by the Congress of the United States.

Maybe there are Members in this House who think that that is appropriate behavior. I do not.

I would hope that when Gramm-Rudman comes up, it will be defeated, both because of the tactics that have been used to try to get it passed, and because of its substance. the President and his people who have been trying to repeal the social progress of the last 50 years are not satisfied with Gramm-Latta, now they have Gramm-Rudman to undo the Constitution which protects the citizens of this country.

This Congress must not stand for it. Defeat Gramm-Rudman to save the Constitution.

DEFEAT PREVIOUS QUESTION ON RECONCILIATION RULE

(Mr. DAUB asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DAUB. Mr. Speaker, I want to very quickly talk about two things. First, I urge all my colleagues here and listening or watching to participate in defeating the rule with respect to the reconciliation bill that will soon be with us, House Resolution 301, particularly because it contains the Moore/Daub amendment relative to phasing up the national diagnostic-related group payment schedule to a national rate over 3 years.

The following States would be a lot better off under the 60/40 national/hospital-specific blend for hospital inpatient services under the Medicare Program than staying with the committee bill and the Rules Committee version, the current 50/50 percentage relationship to reimbursement provided under the bill:

The States of Alabama, Kentucky, Mississippi, Tennessee, Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota, Arkansas, Louisiana, Oklahoma, Texas, Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, and Wyoming.

DEMOCRATS' DEMOGOGIC DELIGHT

Mr. DAUB. Mr. Speaker, the second subject I want to talk about from my ghostwriter, script-oriented staff is to talk a little bit about the Democrats' demogogic delight, the current subject of conversation, and that is the issue of whether or not we are redeeming, we are engaging in redemption or we are disinvesting moneys from the Social Security trust fund.

When I was a boy growing up back in Nebraska, a pot was a place I sat and grass was something I cut. Now those words mean something different today.

The fact of the matter is not one penny of the investments of interest securities in the Social Security trust fund is not being properly accounted for, not one penny is being lost.

I will tell my colleagues that it is unfortunate that we face the option of redeeming provided by law so that these checks can be issued, or the idea of defaulting. Now that is our problem, not the administration's, and I think it would be irresponsible, the height of irresponsibility for any Democrats in this body that we ought to default, and I hope that is not what they are saying.

TAXES AND BANKS

(Mr. ROTH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROTH. Mr. Speaker, last week the committee studying reform reversed its earlier decision on the tax treatment of loan loss reserves of banks.

I am not going to question, at this time, whether banks are overtaxed or undertaxed in relation to other sectors of the economy. But the committee's decision smacks of a compromise based on expediency rather than a decision based on sound economic principles.

As most of my colleagues are aware, there are serious problems with the safety and soundness of many of our financial institutions. Banks are failing at a rate of two a week. The solvency of deposit insurance funds is threatened.

The problems which affect banks affect small, medium sized and large institutions. The loan loss reserve is one means banks have to cover losses that reduce the value of loan portfolios and in turn the soundness of the institution itself. Providing preferential treatment for such reserves of small banks only, for no apparent good reason, defies common sense at a time when we need common-sense answers to bank problems.

We can go one of two ways. We can base decisions on the taxing of banks on the bottom-line revenue impact, as the committee has apparently done. Or we can base them on rational economic standards which promote the soundness of the institutions on which we depend so heavily.

I suggest that the committee go back to the drawing board.

HOLDING SENIOR CITIZENS HOSTAGE

(Mr. RIDGE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RIDGE. Mr. Speaker, I rise this morning to urge my colleagues on the conference committee on the debt limit bill to reach agreement so that we can continue to fund the Federal Government and to avoid the initiative being proposed by some of my Democratic colleagues to take Social Security recipients as political hostages.

The Gramm-Rudman plan sets reasonable, workable targets for deficit reduction, preserves congressional prerogatives to deal with balancing the budget, avoids default on our obligation, and releases these hostages.

Congress must get serious with the deficit. It is clearly and truly a bipartisan objective and responsibility. As my colleague and friend from Massachusetts previously said, it's not a question of reducing the deficit, but how. Let the record be clear. Holding Social Security recipients hostage to that effort is just as clearly not the way my Republican colleagues and I choose to deal with the deficit. Such political brinksmanship is unworthy of this body.

Mr. Speaker, don't let anyone make my senior citizens, and my Social Security recipients political hostages in this effort. Give us a vote on Gramm-Rudman. It will pass and our senior citizens can be freed from this distasteful political exercise.

PASS GRAMM-RUDMAN OR FACE THE CONSEQUENCES

(Mr. GROTBERG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GROTBERG. Mr. Speaker, this Congress is sitting on a time bomb that will go off tomorrow if we don't stop the political rhetoric and show all those groups of people who are depending on us—seniors, railroad retirees, and others—some responsible leadership. We all know that the Treasury Department told the conference committee on Gramm-Rudman last week that if the debt ceiling is not raised tomorrow, Government securities held by the Social Security trust fund and other Government retirement systems will be canceled. Irresponsible is too mild a word for this House if we look at such an action as a solution.

We demand a vote on Gramm-Rudman tomorrow so Social Security does not have to be disinvested. Mr. Speaker, you and the Democrat majority have the gavel and the votes to stop this nonsensical tragedy. It is your move. Support for Gramm-Rudman is strong. Lets create an economic climate of growth and opportunity.

□ 1115

IT IS ABSURD TO DISINVEST THE SOCIAL SECURITY TRUST FUND

(Mr. SLAUGHTER asked and was given permission to address the House for 1 minute and revise and extend his remarks.)

Mr. SLAUGHTER. Mr. Speaker, this Congress has made little progress toward a budget, much less a balanced budget. We have been slow, ridiculously slow, and we are now, on November 1, as of tomorrow where we should have been on August 1 or September 1. The fiscal year has expired with the end of September.

We can criticize President Reagan all we like, but the President can only recommend to the Congress a budget; and of course he can veto budget bills. Nevertheless, the primary responsibility is upon the Congress to pass a budget, to make appropriations, and to levy taxes to pay for the expenses of Government.

Essentially the process is, the President proposes and Congress disposes. It is absurd not to have a budget 1 month after the fiscal year has ended. It is absurd to sell assets of the Social Security trust fund; that is, disinvest, to pay benefits.

We need action on a budget. We demand a vote on Gramm-Rudman by tomorrow so that Social Security does not have to be disinvested.

THE LEADERSHIP OF THE HOUSE IS TO BLAME

(Mr. GREGG asked and was given permission to address the House for 1 minute.)

Mr. GREGG. Mr. Speaker, a few minutes ago the gentleman from California rose here in the well, and he took his finger and he pointed it at this side of the aisle and he said: It is your fault. You are the ones who are threatening Social Security.

Well, that finger should have been pointed, because we are getting to the 11th hour and it is time to know who is to blame; but not at this side of the House; that finger should have been pointed at the leadership of this House, which has failed consistently for 30 years, 30 years to address the deficits and the spending which this House has undertaken.

Now when we have an opportunity, finally, to address that issue, the leadership of this House does not have the courage to bring the issue to the floor of the House; and why not? Because it does not trust its membership.

The Speaker of this House has said that if Gramm-Rudman comes to the floor, it will pass. Why? Because the rank and file membership on this side of the House and on that side of the House know what the people of America want; they want fiscal responsibility.

Now is the time, ladies and gentlemen, for the leadership of this House after 30 years to face up to fiscal responsibility, and to bring to us for a vote today or tomorrow the Gramm-Rudman proposal.

CHEMICAL WEAPONS: THEY AIN'T BROKE AND DON'T NEED FIXIN'

(Mr. PORTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PORTER. Mr. Speaker, we all voted right yesterday, Mr. Speaker. Not one of us voted for funding for new chemical weapons.

The fact that we didn't vote for this unnecessary new spending program because its Pentagon sponsors didn't offer it, needn't be mentioned. We did the right thing.

In a time of immense budget deficits, we didn't vote to add $20 billion more to them. We didn't support new spending that can't be justified because we already have a huge, safe, effective chemical stockpile in place and providing a fully sufficient deterrent.

You can go back home and tell your constituents you didn't vote for a new spending program to replace one that ain't broke and don't need fixin'.

You can tell 'em you got the message—budget deficits are eating our economy alive, destroying the economic future of our children and grandchildren, and ruining American competitiveness in foreign markets.

We did the right thing in not voting for new nerve gas weapons we don't need Mr. Speaker. I'm proud of the House for taking this wise inaction.

NAKASONE INTERVIEW IN WASHINGTON POST

(Mr. REGULA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. REGULA. Mr. Speaker, on Sunday the Washington Post carried an interview with Japanese Prime Minister Nakasone concerning United States-Japan relations.

In response to a question about the recent trade legislation in Washington, Mr. Nakasone stated that:

> The textile bill that passed the House drew criticism from Asian countries, and U.S. popularity there has gone down. I believe that, before any measure is taken, it is far better for the United States to engage in consultations with the relevant countries; in other words, try and solve matters through dialog.

I would like to remind Mr. Nakasone that his own government is implementing a series of measures designed to restrict textile imports into Japan, and that these measures, in effect, amount to Japan's version of the United States textile bill.

Further, Japan, in implementing its own textile bill sought little consultation with relevant countries, but acted unilaterally in putting pressure on Japanese trading companies to cut textile imports.

Even more important is that our country last year suffered a record textile/apparel trade deficit of $16.2 billion, while Japan enjoys a surplus in its overall textiles trade.

Mr. Speaker, I submit that when Mr. Nakasone gives us advice on speaking before acting, he is singing to the choir. I think it is past time for him to practice what he preaches and get his own house in order with regard to fairness and equity in trading relations with Asia.

WHERE CAN IT GO FROM HERE

(Mrs. BENTLEY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BENTLEY. Mr. Speaker, the Bureau of the Census announced this morning the balance of trade deficits with Japan for the month of September—$5,131.5 billion. Of that, $2 billion was in automobiles. In March, the last month of the President's voluntary restraint on automobile imports from Japan, the value of auto imports was $974 million. The first month restraints were off, the figures jumped past a billion to $1.365 billion. Value of automobile imports since March have totaled $9.012 billion.

Yesterday the Bethlehem Steel Corp. announced its losses for the third quarter—$77 million on sales of $1.3 billion. For the first time since 1939 in the Great Depression, the company will not pay a dividend to its common stock shareholders. The company has failed to show a profit in 14 out of the last 15 quarters.

I think these two economic stories are related. I think one is cause, the other effect. Autos use steel. It is a bit much to expect a lone U.S. industry—steel—to compete with a nation-business, Japan, Incorporated.

The Trade Representative's office is negotiating with the Europeans on steel right now. I hope the Bethlehem figures are foremost in their minds as they represent America at the bargaining table.

The hour is late for one of our major industries. I just hope—not too late.

CONGRESS MUST GET ITS ACT TOGETHER AND PASS GRAMM-RUDMAN

(Mr. DIOGUARDI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DIOGUARDI. Mr. Speaker, I have said it before and I will say it again, we do not need a trade policy in this country, we need a deficit policy. The trade problem is a symptom. The real problem is the deficit.

Why are interest rates right now over 9 percent, 9½ percent the prime

rate? The bankers will tell you that the real interest is 2 percent over inflation. Incredibly, inflation is now below 4 percent. Why is not interest at 6 percent? Why is it at 9½ percent?

I will tell you why, Mr. Speaker, it is because the public does not believe that Congress is going to get its act together. They are already hedging against higher interest rates, higher inflation.

Look at the facts: We have got to borrow $150 billion this year, to pay the interest, just the interest; and that is with a "b"—billion. We do not have the cash to pay the interest. That means that we are going to have additional bonds next year of $150 billion. That is interest on interest.

We need a plan. Gramm-Rudman is a plan. It may not be perfect, but let us make it perfect. The public is entitled to have a plan; the public is entitled to a deficit policy, and tomorrow we have got to be sure that we pass Gramm-Rudman; we vote on it, so that we do not disinvest the Social Security system.

We owe more to our senior citizens in this country than to do that.

A DEMAND FOR A VOTE ON THE GRAMM-RUDMAN PROPOSAL

(Mr. WALKER asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Mr. Speaker, we demand a vote on Gramm-Mack today or tomorrow so that Social Security does not have to be disinvested. The Democratic leadership in this House has dillied and it has dallied trying to prevent a vote on reducing Federal spending and moving toward a balanced budget.

Now those delaying tactics have brought us to the brink of crisis, a crisis that threatens the fund that provides livelihood for millions of America's elder citizens.

We just love to hear the Democrats saying that what we are doing by raising this issue is engaging in scare tactics, when over the past several campaigns, over successive campaigns, that they have run their whole campaign on scaring elder citizens.

It is time to alleviate the crisis. It is time to alleviate this present crisis. It is time to vote. It is time to take the action that even the Democratic leaders admit will pass if it gets to the House floor, action to put our budget back in order.

Mr. Speaker, we demand a vote on Gramm-Rudman today or tomorrow so that Social Security does not have to be disinvested.

THERE IS STILL TIME TO ACT—WE MUST VOTE ON GRAMM-RUDMAN

(Mr. MACK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MACK. Mr. Speaker, some are saying that there should be a short-term extension of the debt ceiling. Others are saying that we ought to allow the Social Security trust funds to be disinvested so that the checks for Social Security and the other retirement accounts are in fact paid.

Let me put that into perspective. First of all, there will be no disinvestment of the trust funds until midnight tomorrow night. There is time to act, There is a third alternative. The third alternative is for this body to vote, to vote on the issue.

The Speaker has the power to see that we have the vote; the Speaker has already indicated that this House would support the measure if it got to the floor.

□ 1125

Again, if those people who are concerned about our ability to see that Social Security checks are paid are truly concerned, they will see that the debt ceiling with Gramm-Rudman-Mack gets to the floor of the House for a vote. We demand the opportunity to vote on this issue to protect those Social Security trust funds.

I thank the Speaker.

THE GROWING FEDERAL BUDGET DEFICIT

(Mr. WYLIE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WYLIE. Mr. Speaker, there is no question that the No. 1 issue of concern across the country according to every poll is the size of the Federal budget deficit.

We passed a budget resolution the other day which calls for a reduction in spending of $55.5 billion for fiscal year 1986. Unfortunately, it also calls for deficit spending of $171 billion-plus for fiscal year 1986.

We have not done enough, in my opinion, to reduce the deficit. I am not sure of all of the nuances of Gramm-Rudman, but I do feel that we do need to exert any discipline which holds any promise of reducing the deficit. That is why I support Gramm-Rudman.

It is unfortunate that the debt ceiling increase which is needed to pay our bills is being held hostage because of the debate on the niceties of Gramm-Rudman.

We should have a vote on Gramm-Rudman tomorrow so that the Social Security people do not have to be disinvested of their trust fund.

I thank the Speaker.

LET US AVOID A SHUTDOWN, LET US PASS GRAMM-RUDMAN

(Mr. SAXTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SAXTON. Mr. Speaker, the Director of the Office of Management and Budget appeared on the "Today" show this morning and confirmed that the Federal Government will have to divest a major portion of the Social Security trust funds this weekend.

Mr. Speaker, I appeal to you to use your influence with House Democrats to report the Gramm-Rudman debt ceiling extension bill so we can take a vote.

By reporting and passing this bill, we can not only avoid frightening millions of senior citizens, but we can give Congress the tools it so desperately needs to balance the budget.

I am pleased to represent an area with a large senior citizen population, and I am distressed that their benefits would be jeopardized. I understand Treasury's dilemma—they have to keep the Government going. But I hope we can avoid this shutdown by passing the Gramm-Rudman debt ceiling extension bill. Please, Mr. Speaker, twist some arms and let us put this thing to a vote.

THE BUDGET PROCESS HAS BROKEN DOWN

(Mr. BOULTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOULTER. Mr. Speaker, obviously the budget process has broken down and is not working. There has never been more pressure on this body than there is right now to come up with a balanced budget plan of some kind. We do have a plan, Mr. Speaker, that even the Democratic leadership admits would pass if we could simply get a vote on it today or tomorrow.

I know that we all mean well in this House, but we need some spending discipline. If we just leave choices up to our own consciences, Mr. Speaker, we are never going to give the American public what they demand and deserve, and that is a balanced budget.

The Gramm-Rudman bill may not be a perfect solution, but if enacted it would at least put an end to reckless spending.

Mr. Speaker, I just hope that you and the other leaders on the other side of the aisle will really put the interests of our elderly citizens first and will really put the interests of the American public first and give us a vote today or tomorrow on Gramm-

Rudman so that Social Security will not have to be disinvested.

SPENDING IS OUT OF CONTROL

(Mr. ARMEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ARMEY. Mr. Speaker, the people of America are wise to us. They know what goes on in this body, and they know who runs this body.

They know who the leadership is, and they know who controls every committee in this body. They know that spending is done by this body through appropriations bills that are brought to this floor by committees. And they know that spending is out of control because this body will not recognize that there are limits to how deep the American taxpayers' pockets can go.

And they also know that there have been efforts made in the past to get limits on that. They continually ask, is there a way to get a balanced budget amendment passed? And they know the House will not accept it.

They ask, "Will you give the responsibility to the President through a line item veto?" And they know this leadership and this House will not accept that.

So they ask for a way.

I think it is ironic that the only way we have found to get any measure that will set limits on this spending is to attach the Gramm-Rudman proposal to an effort to increase the debt ceiling so that we can keep pace with the irresponsible spending of the past.

And now the people of America have found out that once again the leadership of this body has found a way to at least stall and then distort what they, the people, want: Honest government.

I thank the Speaker.

WE DEMAND A VOTE ON GRAMM-RUDMAN

(Mr. GINGRICH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GINGRICH. I thank the Speaker.

Mr. Speaker, a number of Democrats have been wondering why we have been demanding a vote on Gramm-Rudman today or tomorrow so that Social Security does not have to be disinvested. The fact is that we are in a mess.

As the gentlewoman from San Francisco indicated earlier, every time, every 2 years, the Democratic Party runs around screaming about Social Security. So what are our choices? If the Federal Government were to default tomorrow morning and the checks did not go out, we promptly would get a press conference by liberal Democratic leaders saying it was all the Republicans' fault.

If the Government disinvests tomorrow morning and the checks do not go out, we will get a press conference from liberal Democratic leaders saying it is all the Republicans' fault.

I just want the record to show unequivocally that if you seriously cared about the Social Security trust fund, the Speaker could schedule a vote in the next half-hour. You could schedule a vote this evening, you could schedule a vote tomorrow. You could have your options, which include Gramm-Rudman this year; you could have your options; you could have modifications. You could get it all solved before tomorrow is over and we could go home.

If there are any problems in Social Security this year, it is because the Democratic Party is systematically delaying and avoiding reaching a real vote on the House floor on Gramm-Rudman, including your own options.

And you can groan all you like, but the fact is, the Democratic leadership can schedule a vote any time they want to and we can be out of this mess without any trouble.

Thank you, Mr. Speaker.

LET US SET THE RECORD STRAIGHT

(Mr. GRAY of Pennsylvania asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GRAY of Pennsylvania. Mr. Speaker and colleagues, we have heard a lot this morning, most of it inaccurate. Let me give you some facts. First of all, Social Security has not been disinvested because the Democrats are holding hostage Gramm-Rudman, the disinvestment of the Social Security Trust Fund started a month ago by Ronald Reagan.

The American people know who has been going after Social Security for the last 10 years. It has not been the House leadership or the Democrats.

So, therefore, to suggest we are trying to do an *Achille Lauro* with Gramm-Rudman is absolutely absurd.

Second fact, everyone knows that in 1980 the total deficit of this country was $914 billion, George Washington to Jimmy Carter, and now, just 4½ years later, it is over $2 trillion. It is not a 30-year problem, it is a problem created by fiscal policies that the House and the Senate supported, suggested by a Chief Executive, a Chief Executive who has yet to submit a balanced budget and whose budget submitted to us in February was with a deficit of $180 billion.

Final factual point, yesterday, in the conference on Gramm-Rudman, the Democrats suggested dropping the deficit by $20 billion from $180 billion down to $160 billion for 1986, and do you know who voted against it in the House conference? Not the Democrats. Every Democrat except for one voted to lower it $20 billion. Ever Republican except for two on the House side voted to raise it $20 billion and make the target under Gramm-Rudman $182 billion in 1986 as opposed to $161 billion. Those are the facts.

I would urge that each one of you, as you listen to this political debate, understand the facts and not the rhetoric.

The SPEAKER pro tempore (Mr. BENNETT). The time of the gentleman from Pennsylvania has expired.

ORDER OF BUSINESS

Mr. LATTA. Mr. Speaker, Mr. Speaker.

The SPEAKER pro tempore. For what purpose does the gentleman from California [Mr. LEWIS] rise?

Mr. LATTA. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. The Chair did not recognize the gentleman.

The gentleman from California [Mr. LEWIS] is the next up.

Mr. LEWIS of California. No, Mr. Speaker, I am not.

The SPEAKER pro tempore. You are not?

Mr. LEWIS of California. I will rise later.

Mr. DELLUMS. Mr. Speaker, reserving the right to object, there are some gentlemen who have been sitting here diligently and patiently waiting their opportunity, and I would simply like to ask the distinguished ranking minority Member why he chooses to interrupt the proceedings?

The SPEAKER pro tempore. The Chair will continue to do what it has been doing, as the Speaker's guidelines provide. The Chair is going to rotate between the Democratic and Republican sides, and the only reason the Chair did not recognize that gentleman is that he thought the gentleman from California [Mr. LEWIS] wanted to be recognized.

Mr. LEWIS of California. I will wait a while.

The SPEAKER pro tempore. All right.

The Chair recognizes the gentleman from Ohio.

Mr. LATTA. Mr. Speaker, I would be happy to yield to my friend if he wants to use this 1-minute in my stead.

Mr. DELLUMS. If the gentleman will yield briefly to me, I was simply trying to preserve the prerogatives of my distinguished colleagues who have been patiently sitting on the front row.

The SPEAKER pro tempore. The Chair recognizes then it is a misunderstanding about where Members are sitting.

Does the gentleman from Ohio seek recognition?

Mr. LATTA. Yes, Mr. Speaker.

The SPEAKER pro tempore. The gentleman is recognized.

CORRECTING THE RECORD

(Mr. LATTA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LATTA. Mr. Speaker, I do so merely to ask my distinguished chairman of the Committee on the Budget to go back and take a look at the vote that he referred to in the conference yesterday on this matter of lowering the deficit. He will find that more than two Republicans voted in favor of it, and he can correct the record.

Mr. GRAY of Pennsylvania. If the gentleman would yield, I would simply say to the distinguished gentleman from Ohio that I will make a double-check, but I remember, and my memory is correct, the gentleman, Mr. LATTA, and Mr. HORTON also. If I am wrong, I will make the correction.

Mr. LATTA. I am sure the gentleman is wrong.

Mr. GRAY of Pennsylvania. The point that I made is still clear, and that is that the overwhelming number of Members on your side of the aisle who now are talking about the House leadership voted overwhelmingly to——

Mr. LATTA. May I have my time back?

Mr. GRAY of Pennsylvania. I yield back your time, sure.

Mr. LATTA. I want to thank the chairman for acknowledging that he will correct the record, and the record will reflect a different figure than he indicated.

GRAMM-RUDMAN NEEDS TO BE REVISED

(Mr. DURBIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DURBIN. Mr. Speaker, several weeks ago the Gramm-Rudman-Hollings-Mack-Cheney-Gingrich-Walker proposal roared through the U.S. Senate. And after having arrived at the door of the House of Representatives, it was very clear that it came in an imperfect form. After meetings of a conference committee, it is clear to the American people and all serious observers that this package needs to be revised, and unless it is revised, we may find ourselves passing something we will come to regret.

But how does a great train move through the other body and come to this side without fuel? It cannot. The juggernaut of Gramm-Rudman has been fueled by Social Security Trust Funds over the last several weeks.

I support my colleagues in calling for a quick vote on this issue, but I think it is misleading for the administration and my Republican colleagues to suggest that the timing of the House vote will decide whether Social Security Trust Funds are to be raided. That decision was made weeks ago. The administration and the Department of the Treasury have been quietly raiding the Social Security Trust Fund to fuel the Gramm-Rudman train over the last several weeks.

THE GROWING FRUSTRATION WITH A $2 TRILLION DEBT

(Mr. LEWIS of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEWIS of California. Mr. Speaker and my colleagues, the deadline we approach tomorrow involves a deadline which would allow the House or the Government through the House, to raise our spending levels up to limits approaching beyond $2 trillion. That amount of money is startling, to say the least, and some of our colleagues in the other body, the Senate, grew frustrated with the reality that that $2 trillion mark has been reached because of the policies of the Democratic leadership of this House.

In that frustration, two of our colleagues in the other body, Senators GRAMM and RUDMAN, added an amendment to that debt limitation-lifting that said simply we ought to have a formula whereby the Congress commits itself to balancing the budget.

Therefore, the Gramm-Rudman amendment.

The leadership of this House does not want that amendment cleanly before us, and they are resisting that. They want to raise the debt limitation, but they do not want a program for getting our House and the Government in balance. Because we want the votes clearly on the line in the House, we want to recognize that 75 Democrats and Republicans in the other body support Gramm-Rudman. We want a clean vote here. It is critical for us to recognize that the House today is demanding a vote on Gramm-Rudman today or tomorrow because we do not want, once again, the Social Security Trust Funds to be violated by that Democratic leadership of this House.

□ 1140

THE DEBT CEILING

(Mr. DELLUMS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DELLUMS. Mr. Speaker, I normally do not get caught up in these forays between my colleagues on both sides of the aisle. I often define these harangues as infantile, at worst, and adolescent, at best. But, nevertheless, I would like to try to speak here. I am aware of the fact that we often engage in overstatement, exaggeration and hyperbole. That is the order of the day. That is often an occupational disease of politicians. And I realize why we do it—because we tend to play on people's ignorance, on their emotions and on their fears.

I choose, for just a moment, to attempt to play upon people's intelligence. Let me say to you, No. 1, that the House of Representatives a number of years ago engaged in a number of reform processes, and one of them was that we would not allow a provision, an amendment, to come to the floor that was not germane to the issues at hand. And we did that for a very important reason. You cannot attach apples to a bill dealing with oranges. But in the Senate they did not engage in that reform. If you can get a majority of your colleagues to go along, you can add an appendage to any piece of legislation you desire, which leads me to this point, without a lot of fanfare and emotion:

There is another alternative. That alternative is simply to pass a clean increase in the debt ceiling. We do not have to frighten people, we do not have to use words like "terrorism" and "hostage" and all these kinds of things. If you want to increase the debt ceiling, do it without a nongermane item being tacked on to it. We did this in the House for very legitimate reasons. We do not have to engage in all this extraordinary hyperbole. We are playing on people's fears and ignorance. We ought to be down here trying to be intelligent and reasonable.

There is another alternative here if you want to stop invading Social Security. Just pass a clean debt increase. If you want to have Gramm-Rudman, bring it to the various committees and debate it the way you debate any other serious proposal.

EXTENSION OF THE DEBT LIMIT

(Mr. GRADISON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GRADISON. Mr. Speaker, what could be more germane to a discussion of the extension of the debt limit than means to reduce the additions which we are making to the debt?

That is what Gramm-Rudman is all about. It is an attempt to repair the imperfect process which we have on the books today, which has led to deficits, which I think every Member of

this House says day after day are at unacceptably high levels.

Under those circumstances, the debt limit is an ideal opportunity for us, for the first time in years, to reassess how we got in this fix and what we can do so that we do not have to come back year after year continuing to increase the national debt limit.

THE GRAMM-RUDMAN PROPOSAL

(Mr. WILLIAMS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILLIAMS. Mr. Speaker and my colleagues, we know one thing about the Congress of the United States, and particularly this House of Representatives. That is, when it comes to major issues which effect the lives and wallets of the American people, when this House hurries, this House makes mistakes. Everything we know about our history tells us that. We have only to look back to 1980, when Mr. GRAMM and others had a magic balance-the-budget proposal. They were going to balance the budget in how many years? Five. Well, here we are. How well did their proposal, their process, work? We have the largest deficit in history.

Now they have a new proposal. It is called Gramm-Rudman. Is is what you have heard all about today. And let me tell you, in reality, what it does. How many Americans are going to support this: The higher the unemployment goes in this country, the less money we have to spend on unemployment benefits. That is what Gramm-Rudman does.

How many Americans are going to support this: When we have giant needs in education that we have discovered, for example, the shortage of math and science teachers, the less money we have to spend on them. That is what Gramm-Rudman does.

The higher the jobless rate in this society, the less money we can spend on Job Corps. That is what Gramm-Rudman does.

The greater the defense needs, when we have a crisis in this country on defense, the less we are going to have to spend on defense. That is what Gramm-Rudman does.

do the American people support that? No.

Do they support moving toward a balanced budget? Of course.

But the same people who promised to do it in 1980 are now promising to do it with Gramm-Rudman. And, frankly, the American people cannot afford any more of their mistakes.

THE GRAMM-RUDMAN-HOLLINGS PROPOSITION

(Mr. FRENZEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FRENZEL. Mr. Speaker, the House and Senate are in conference on the Gramm-Rudman-Hollings proposition at this moment. The House has had the bill for 2 weeks. It has not made a response to the Senate proposition. It has had fun in subcommittees and, in fact, done some useful work in subcommittees. It is preparing what I believe is probably not a really responsive reply to Gramm-Rudman but it has not put it together yet because the Democratic majority cannot seem to agree.

While it has wasted its time, the Social Security funds are either being disinvested or are shortly to be further disinvested.

It seems to me it is incumbent upon the House to put together its proposition and make it today or stand forever indicted as the instrument who was willing to jeopardize Social Security funds.

PERSONAL EXPLANATION

Mr. GRAY of Illinois. Mr. Speaker, on yesterday I was inadvertently absent due to an emergency. On the appropriations bill for the Department of Defense, I would like to record to show that on rollcall No. 378 I would have voted "aye," and on rollcall vote No. 379 I would have voted "aye."

GRAMM-RUDMAN

(Mr. SCHUMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHUMER. Mr. Speaker, I am a little confused by the actions of the other side and of some of the gentlemen in the other body.

I read in this morning's paper that one of those gentlemen, the head of the conference committee, said that by making Gramm-Rudman work in 1986 it would mess up the whole works, that you were not serious about deficit reduction unless you delay deficit reduction, and that if you wanted deficit reduction to work, you could not have it this year.

That indicates the folly of what the other side has been trying to do. They want to wave banners, they want to toot horns, they really do not want to reduce the deficit, because in 1986 is when this side wants to bring Gramm-Rudman into effect, and the other side is saying no. They are saying no, they do not want it that way, they do not want a separate vote in the Senate to see if it should be in 1986 or 1987.

What the heck is going on? What kind of double think and double talk is that, "Yes, we should balance the budget, but, no, not this year"?

I think what has happened is that the other side has looked Gramm-Rudman in the eye and they blinked.

GRAMM-RUDMAN

(Mr. ROWLAND of Connecticut asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROWLAND of Connecticut. Mr. Speaker, I do not know why there is such confusion. With the vote on Gramm-Rudman today or tomorrow we can accomplish two very important goals, two very simple goals. No. 1, a plan to balance the budget over the next 5 years; and No. 2, a vote that will leave Social Security alone.

I cannot understand why there is so much adverse reaction on either side of the aisle. I think it is a very simple and deliberate action, and I think if we plan to do both of those things and if we believe in both of those things and we do want to leave Social Security alone, we should take this action and do it as soon as possible.

THE FEDERAL BUDGET

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, as a freshman, I recognize the 98th Congress passed the Balanced Budget Act. The President of the United States of America would submit a balanced budget to the Congress.

The Senate Republicans in the majority refused it because the President did not want it, because they avoided the tough decisions of leadership that was given to them and granted to them by the electoral process. They did not want to gore the ox. They did not want to lose the White House.

Now Democrats are sitting back and we are saying, "Let the President's supply side suffer theories wreck the country, and we will gain the White House." The Republicans are saying, "Let it last 2½ more years, and we will put a Republican in the White House."

The bottom line is, we are playing political football with the lives of the American people.

Gramm-Rudman is like kissing your sister, No. 1; and, No. 2, we are just not going to reduce spending and reconcile this budget. We are going to have to raise revenue, look at those corporations that are blatantly refusing to pay tax and have been getting blanket protection by this administration.

And, finally, we have got to get out of a Disney World trade policy that is exporting all of our jobs overseas.

It is not going to be a simple Gramm-Rudman decision. There were 25 Members who wanted it brought to the floor before they even read it.

Now, let's get serious. You are furloughing America's welfare. And let us look at a comprehensive policy to bring some sanity to this process.

THE GRAMM-RUDMAN PROPOSAL

(Mr. MOORE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOORE. Mr. Speaker, I think the American people watching this debate, as I did in my office and then came on over to participate in it, are probably growing a little disenchanted with all of the fingerpointing that is going on.

The Republicans point the finger to the Democrats; the Democrats point the finger at Republicans. The American people are probably pointing the finger at all of us and saying, "When are you going to do something about reducing deficits?"

The reason we have the deficits we have today, pure and simply, is because this Congress and those before it have loved the American people to the point of bankruptcy. We have helped them to the point of bankruptcy. We have passed program after program after program to try to do good work for the American people, and now we can no longer afford it. I guess we are loath to take those things back. But the Gramm-Rudman proposal has as its goal forcing the Congress to do that. We have demonstrated in the last 6 years the lack of will in this Congress to really do it. So let us not point the finger beyond that. Let us accept the responsibility, let us pass Gramm-Rudman, let us give ourselves some stiffening of the spine to do what has to be done to solve these budget problems.

THE GRAMM-RUDMAN PROPOSAL

(Mr. VOLKMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VOLKMER. Mr. Speaker, as one, as the previous speaker mentioned, who has been following this debate, these 1-minute speeches on the balanced budget proposal for 5 years, the Gramm-Rudman proposal, from my office, I was finding myself a little confused about some of the statements made. There has been a lot of fingerpointing, as the gentleman has said. That does not really accomplish anything.

But I have heard here this morning that Social Security funds are already being disinvested, have been for over a month. And now some people are saying, "Well, if we do not do this by Friday evening, they are going to be disinvested."

I would like to know what is accurate on it.

I also find that in the conference yesterday, the gentleman from Pennsylvania says that only two Republicans voted to start the deficit reduction this year, in 1986. The gentleman from Ohio disagrees with that.

I would like to ask the gentleman from Ohio: How many Republicans, out of how many, actually voted, if he would reply, to start it in 1986, as I believe it should.

Mr. LATTA. Mr. Speaker, will the gentleman yield?

Mr. VOLKMER. Yes, for that explanation.

Mr. LATTA. I cannot give the gentleman the exact number, but it was at least half of them.

Mr. VOLKMER. Well, I hope that they will vote, I hope we have a chance. I would like to see it brought up tomorrow. And I hope we have a chance to vote to start the deficit reduction in 1986, this year.

We start at $160 billion, $161 billion. Let us do that, let us go on and let us have a balanced budget by 1990. I think that is the best thing that can happen to this country.

GRAMM-RUDMAN

(Mr. KINDNESS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KINDNESS. Mr. Speaker, as I walked through the looking glass into the House Chamber today, I, too, was a bit concerned and even appalled by some of what I heard.

Demagoguery, polemics, and what have you, can be tolerated, but when childishness and foolishness enter into it, sometimes all of us would feel compelled to remark on what has been said.

I do think that there is room for some application of the Gramm-Rudman proposal in fiscal year 1986, and I was one of those Republican conferees who voted for it as the rollcall was taken yesterday.

I agree with the gentleman from Ohio [Mr. LATTA] that approximately half of the Republican conferees did.

Knowing full well, however, that House Democrat conferees did not feel much confidence in their proposal, knowing, for example, that the current estimates of what the deficit will be are so much higher than $161 billion, that there is no realistic way of achieving a $161 billion deficit without sequestration being involved. In other words, again they seek to duck their responsibility which could be undertaken in a reconciliation bill and the other measures that have been before us in the way of appropriation and authorization bills. We just have not faced up to it.

In order for Gramm-Rudman to work correctly, we need to have the approach to a fiscal year over a 9- or 10-month period that is normal in order for it to function well.

But, OK, if you really want to try to apply Gramm-Rudman in 1986 fiscal year, the current fiscal year, let it apply for that portion only which remains of the fiscal year when sequestration would go into effect.

□ 1155

WILL IT BE TRICK OR TREAT TOMORROW?

(Mr. SILJANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SILJANDER. Mr. Speaker, after all the discussion is said and done, the reality is that America faces incredible deficits, a $2 trillion national debt, and interest payments of over $160 billion. Halloween may be over tonight, but tomorrow could be either a trick or treat for the American people.

Will it be a trick for the senior citizens when Social Security has to be disinvested? Or will it be a treat for the seniors to know that their Social Security system is solvent and safe for their futures? Will it be a trick to the American taxpayers who have been paying more and more taxes for a Congress that has been unable to deal with its frenzy of spending and inappropriate fiscal behavior? Or will it be a treat for the taxpayers, realizing that finally Congress can come up with a program, even though it is 4, 5, or 5½ years long, at least a program that we in fact balance our budget with?

So while Halloween is over tonight, it is up to us whether or not it will be trick or treat tomorrow.

PROVIDING FOR CONSIDERATION OF H.R. 3128, DEFICIT REDUCTION AMENDMENTS OF 1985

Mr. DERRICK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 301 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 301

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 9(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3128) to make changes in spending and revenue provisions for purposes of deficit reduction and program improvement, consistent with the budget process. All points of order against the consideration of the bill for failure to comply with the provisions of section

402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) are hereby waived, and all points of order against the bill for failure to comply with the provisions of clause 5(a) of rule XXI are hereby waived. After general debate, which shall be confined to the bill and to the amendments made in order by this resolution, and which shall continue not to exceed two hours, one hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means and one hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Energy and Commerce, the bill shall be considered as having been read for amendment under the five-minute rule. No amendment to the bill shall be in order except the following amendments, which shall be considered to have been read and to have been adopted in the House and in the Committee of the Whole: (1) an amendment to strike out title I of the bill and to insert in lieu thereof the text of H.R. 3290; (2) an amendment printed in the Congressional Record of October 29, 1985, by Representative Rostenkowski of Illinois, relating to single employer plans; and (3) an amendment to the table of contents striking "Medicare program" and inserting in lieu thereof "Health care programs", and inserting at the end of the table of contents "Title VI. Amemdments relating to single employer plans.". At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from South Carolina [Mr. DERRICK] is recognized for 1 hour.

Mr. DERRICK. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Ohio [Mr. LATTA], for purposes of debate only, pending which I yield myself such time as I may consume.

(Mr. DERRICK asked and was given permission to revise and extend his remarks.)

Mr. DERRICK. Mr. Speaker, House Resolution 301 is a modified closed rule providing for the consideration of H.R. 3128, the Deficit Reduction Amendments of 1985. This bill provides 2 hours of general debate on this bill. One hour will be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means. The second hour will be equally divided and controlled by the chairman and ranking minority member of the Committee on Energy and Commerce.

This rule waives section 402(a) of the Congressional Budget Act against consideration of H.R. 3128. Section 402(a) of the Budget Act prohibits the consideration of bills which authorize the enactment of new budget authority for a fiscal year unless that bill is reported in the House on or before May 15 preceding the beginning of such fiscal year.

Since H.R. 3128 contains authorizations for certain programs within the jurisdication of the Ways and Means Committee, and since the bill was reported after May 15, a waiver of section 402(a) of the Budget Act is necessary if the House is to have an opportunity to vote on the important revenue provisions contained in the bill.

Mr. Speaker, this rule also waives the provisions of clause 5(a) of rule XXI against the provisions in the bill. Clause 5(a) of rule XXI prohibits appropriations in a bill reported from any committee not having authority to report appropriations. Because H.R. 3128 contains several provisions which would constitute appropriations, this waiver is necessary to protect those provisions from a point of order.

Mr. Speaker, under the procedures provided in House Resolution 301, only the three amendments referenced in the text of the rule shall be in order. The rule further provides that these amendments shall be considered to have been read and to have been adopted in the House and in the Committee of the Whole upon adoption of the rule.

The first amendment made in order under this rule strikes out title I of the bill and inserts in lieu thereof the text of H.R. 3290. Presently, title I of H.R. 3128 contains the Medicare reconciliation provisions reported from the Committee on Ways and Means.

The Energy and Commerce Committee, to which H.R. 3128 was referred for consideration of the provisions of title I, was discharged from further consideration of the bill on September 11, and reported a separate bill, H.R. 3101. H.R. 3101, introduced by Chairman WAXMAN, reflected the Medicare provisions adopted by the Ways and Means Committee, as well as additional Medicare and Medicaid provisions reported by the Energy and Commerce Committee.

Due to differences between the Medicare and Medicaid provisions in H.R. 3128 as reported, and H.R. 3101, Chairman ROSTENKOWSKI and Mr. WAXMAN agreed to introduce a clean bill, H.R. 3290, which reflects the actions taken by both committees on these issues.

I should also note, Mr. Speaker, that H.R. 3290 also includes provisions reported from the Judiciary Committee dealing with penalties for hospitals failing to meet new requirements for the handling of emergency cases. This language is presently in title I of H.R. 3128. Therefore, it was necessary to incorporate these provisions into H.R. 3290 as well, since H.R. 3290 will be substituted for title I of the bill.

The incorporation of H.R. 3290 into title I of H.R. 3128 is supported by the committees of jurisdiction, and as I have already indicated, the Committee on Ways and Means, and Energy and Commerce will share the time provided for general debate on H.R. 3128.

The second amendment made in order under this rule is an amendment printed in the CONGRESSIONAL RECORD of October 29, 1985, by Representative ROSTENKOWSKI, relating to the single employer plan termination insurance system. This amendment appears on page 29394 of Tuesday's CONGRESSIONAL RECORD.

This amendment will substitute new provisions into title VI of the bill. Presently, H.R. 3128 contains provisions on this subject reported from the Committee on Education and Labor. Mr. ROSTENKOWSKI's amendment, which will be considered as adopted upon adoption of the rule, will substitute the Ways and Means Committee's provisions into this tile.

Mr. Speaker, as our colleagues are aware, there has been a dispute between the Committees on Education and Labor, and Ways and Means, as to the jurisdiction over provisions relating to the single-employer plan termination insurance system.

Last week, when the House considered H.R. 3500, the Omnibus Budget Reconciliation Act of 1985, the provisions relating to this subject, as reported from the Committee on Education and Labor, were incorporated in that bill in title III. Further, the rule providing for consideration of H.R. 3500 did not allow for amendments to that title. Therefore, the Committee on Ways and Means was precluded from offering alternative provisions on a subject which they believe to be within their jurisdiction.

This rule, therefore, will allow the Ways and Means Committee to add their provisions to this bill. The practical effect of this action, Mr. Speaker, is to allow each committee to take its respective provisions to conference.

The dispute as to jurisdiction, as well as substance, will therefore be resolved in the conference on reconciliation with all the interested parties in attendance.

Mr. Speaker, this is not a perfect solution, but it is a fair one. The perfect solution would have been for these committees to have resolved this jurisdictional dispute prior to House action of the legislation. However, under the rules governing reconciliation legislation, devices such as sequential referrals, which operate as dispute resolution mechanisms, are often not available.

I would hasten to note, Mr. Speaker, that as chairman of the Budget Committee task force on the budget process and reconciliation, I find this situation very frustrating. In fact, H.R. 3500 contained other provisions reflecting directly contradictory positions between several committees of the House.

The only equitable resolution to this situation is to allow the committee to take their conflicting provisions to

conference and allow the parties to work out their differences. This rule will allow this procedure as to the provisions dealing with the single-employer plan termination insurance system.

Mr. Speaker, the last amendment made in order under this rule is printed in the rule and is purely technical in nature. It renames title I and inserts the name of title VI in the table of contents of H.R. 3128.

Mr. Speaker, this is the second major piece of reconciliation legislation considered by the House of Representatives this year. The first piece, H.R. 3500, was approved last week. H.R. 3500 represented the spending reductions reported by 10 committees of the House of Representatives.

H.R. 3128 contains the second important component of the reconciliation effort—revenue increases. The bill makes changes in the Medicare Program, trade and customs laws, the Aid to Families with Dependent Children Program, the railroad unemployment and other unemployment compensation programs, and the Tax Code. Moreover, the committee estimates that the total deficit reduction contained in H.R. 3128 is $19.2 billion over 3 years.

The conference report on the first concurrent resolution on the budget for fiscal year 1986, Senate Concurrent Resolution 32, required the Ways and Means Committee to achieve a deficit reduction target of $21.6 billion over 3 years. Therefore, H.R. 3128, as reported from the Committee on Ways and Means was $2.4 billion short of the reconciliation target contained in the budget resolution.

The Committee on Rules first considered H.R. 3128 for purposes of reporting a rule providing for its consideration on September 17. At that time, the Committee on Rules was advised that the $2.4 billion deficit reduction shortfall would be met by subsequent action in the Ways and Means Committee on legislation providing revenues for the Superfund Program.

Because the Ways and Means Committee had not actually taken action on the Superfund issue, however, that committee could not be scored by the Budget Committee as having met their deficit reduction target. In light of this situation, the Committee on Rules chose to defer action on H.R. 3128 until such time as the Committee on Ways and Means reported further revenue-raising legislation.

As our colleagues are aware, on Thursday, October 17, the Committee on Ways and Means reported out amendments to H.R. 2817, the Superfund Amendments of 1985. This action, therefore, allowed the Ways and Means Committee to be scored with having reported legislation sufficient to meet their deficit reduction target.

In fact, CBO estimates that the Ways and Means Committee amendments to H.R. 2817 will raise nearly $3.1 billion in net revenues above the revenue baseline. Therefore, the provisions in H.R. 3128, in addition to the actions taken on Superfund, will give the Ways and Means Committee a deficit reduction total well in excess of the $21.6 billion 3-year target contained in the budget resolution.

I believe it is important to stress, Mr. Speaker, that the Ways and Means Committee amendments to H.R. 2817, the Superfund Amendments of 1985, are not contained in H.R. 3128, nor are they made in order as amendments under this rule. These amendments will be considered as part of H.R. 2817, which is expected to be considered in the House in the very near future.

Mr. Speaker, as if often the case with reconciliation legislation, it is important that we consider this package as a whole. This rule will allow for several basic changes to the legislation reported from the Committee on Ways and Means, and then an up-or-down vote will be provided on the bill.

As we continue to work on proposals requiring mandatory budget goals for the next few years in an effort to reduce the Federal budget deficit, I believe it is also vitally important for our colleagues to remain focused on the real process of deficit reduction.

Reconciliation is one of the most important means we presently have to make the important and tough budget decisions we must make here and now if we are really serious about cutting the deficit, and not simply posturing on political devices which propose to make these hard choices for us sometime in the future.

Mr. Speaker, I urge adoption of the rule and passage of H.R. 3128.

□ 1205

Mr. LATTA. Mr. Speaker, I yield myself such time as I may use.

Mr. Speaker, let me say at the outset that I agree with the statements made by the gentleman from South Carolina [Mr. DERRICK] about the bill. It is a deficit-reduction bill supposedly, and we have heard much this morning about attempting to ram Gramm-Rudman down our throats without an oppportunity to amend, et cetera, et certera, et certera, but here is a very thick bill on deficit reduction that our Democratic friends are attempting to ram down our throats without an opportunity to amend, if you adopt this rule.

So as a consequence I am going to ask that the Members vote down the previous question on this rule so that we will have an opportunity to amend it.

Certainly we have heard a lot of statements here this morning that were in error. We could not even agree on the facts, listening to what was going on on this floor this morning, as to what transpired on a vote yesterday in the conference on Gramm-Rudman. I was amazed to hear our chairman say that only two Republicans voted to reduce the deficit for fiscal year 1986 by $20 billion when actually there were six Republicans voting to so reduce the deficit, and I was one of them.

Let me say further that I happen to be one of those individuals who are on the miniconference on this budget with our chairman and with the chairman of the Senate Budget Committee and the ranking member on the Senate Budget Committee who put together that budget that they now say they can cut by $20 billion.

Now I have a pretty good memory, and I can recall many, many times during the time that we were attempting to put together that budget that none other than the chairman of our committee would come back into our little huddle and say, "I have talked to the leadership on such-and-such, and we can't cut any more."

Yes. Now that was in August, and I am ready to go back to that conference now—now—to reduce $20 billion, and I will be out there voting for it. So I merely ask my friends on the Democratic side, to join with me in any effort to get a second budget resolution passed to reduce by $20 billion the fiscal 1986 budget.

Mr. DERRICK. Mr. Speaker, will the gentleman yield?

Mr. LATTA. No, I am afraid I do not have the time. We have a lot of speakers on our side. But if you are ready to join with me, I will be happy to yield to the gentleman.

Let me also say that we heard here this morning, you know, from a speaker over on the Democratic side from Ohio, believe it or not, who said it was the Republicans' fault that we did not pass a constitutional amendment to balance the budget. I invite him to take a look at the record. The Republican Senate passed that constitutional amendment by a two-thirds vote, and this House passed it by a majority vote. We did not get the two-thirds vote, so it failed in this House for the want of a two-thirds vote by our Democratic friends. Check the record.

□ 1215

Now let us get into this gag rule, and I say it is a gag rule.

If we accept this rule as crafted by the majority, if the rule is adopted, those amendments in their rule will be deemed to have been adopted as a part of the bill.

Under this rule, the membership of the House will be denied any opportunity to participate in fashioning or amending this far-reaching legislation.

Who is complaining now?

It is strictly a take it or leave it proposition.

Several Members appeared before the Rules Committee and requested that at least five important amendments be made in order for consideration by this House. Their requests were denied by the majority, and I need not tell you that in the Rules Committee the Republicans are outvoted two to one plus one on the Democratic side.

Mr. Speaker, I am not asking that the House open this bill to unlimited amendments, but I do feel that the House should not be completely excluded from the decisionmaking process on this far-reaching bill. Certainly these individuals who appeared before the Rules Committee and had their amendments printed in the RECORD ought to have an opportunity to offer those amendments so that we can all vote on them.

If we vote down the previous question, they are going to have that opportunity.

My amendment to the rule would make in order an amendment by the gentleman from Ohio [Mr. GRADISON]. The Gradison amendment would strike all the spending increases amounting to almost a billion dollars from this bill.

Mr. Speaker, the purpose of reconciliation is supposed to be saving money, not spending more money on more new programs. The Gradison amendment would at least allow the House to remove parts of the bill which would increase the deficit rather than reduce it.

Mr. Speaker, there is a lot of talk about reducing the deficit around here. The Gradison amendment will allow us to convert some of that talk into deficit reduction.

Now we all know that the House failed on a very close vote last week, the Latta amendment, to save $3.5 billion. It could restore a part of its fading luster on deficit reduction if it adopted the Gradison amendment.

Mr. Speaker, the second amendment I would propose to give the House a chance to consider is to be offered by the gentleman from Ohio [Mr. KINDNESS]. The Kindness amendment would strike out provisions which would make newly hired State and local employees subject to the Medicare insurance tax. This is an issue of major importance to a number of States right this single moment. Let me say to those people who have said they are opposed to bringing in State and local employees under Medicare or Social Security, this will be the only opportunity in this legislation you will have to vote yes or no. You either vote to vote down the previous question or you eliminate your vote on this issue.

Mr. Speaker, the third amendment which the House would have an opportunity to consider under my proposed amendment to the rule is an amendment offered by the gentleman from Louisiana [Mr. MOORE] and the gentleman from Nebraska [Mr. DAUB]. Their amendment would delay for 1 year, to 1988, the full phasein of the Medicare prospective payment system for hospitals, the same as section 102 of the Ways and Means bill, but it would keep the new prospective payment system moving more progressively during the interim period than the Ways and Means version.

Incidentally, this was an amendment offered in the Ways and Means Committee that only failed by one vote.

Mr. Speaker, the fourth amendment I would propose to allow the House to consider is one from the gentleman from Georgia [Mr. SWINDALL]. The Swindall amendment would strike the criminal enforcement section of the bill regarding the responsibilities of medical hospitals in emergency cases, and insert language providing for a liability and penalty study by the Secretary of Health and Human Services in consultation with the Attorney General.

Finally, Mr. Speaker, the fifth amendment that the House would be able to consider under my proposal is by the gentleman from New Jersey [Mr. SMITH]. The Smith amendment would permit payment for therapeutic shoes under Medicare part B for individuals with severe diabetic foot disease. This could save $105 million in amputation costs, if you please. As will be explained by the gentleman from New Jersey, it has been estimated that this change could result in a net savings of $86 million a year.

Mr. Speaker, the choice before the House is clear. The House can abdicate its responsibility or it can give the House the right to consider at least five important issues involved in this legislation.

If the Members of this body will vote no on the motion for the previous question, I will offer an amendment to the rule to permit the Members to offer these important amendments.

So I ask for a no vote on the previous question. Let me say I am not the only one asking for a no on the previous question. The Secretary of Health and Human Services is also asking that we do so. I need not read her letter that every Member of this House has received on this subject.

Mr. Speaker, I include the letter as follows:

THE SECRETARY OF HEALTH AND HUMAN SERVICES,
Washington, DC., October 31, 1985.

DEFEAT THE PREVIOUS QUESTION ON HOUSE RESOLUTION 301

DEAR REPRESENTATIVE: The House will today consider H.R. 3128, the Deficit Reduction Amendments of 1985. It is a seriously flawed bill and the rule providing for its consideration, H. Res. 301, will not allow for amendments that would remedy its defects. Therefore I urge you to defeat the previous question to allow for consideration of a rule which would allow the amendments needed to improve the bill.

While H.R. 3128 is called a deficit reduction bill, you should be aware that there are new programs and program expansions in the bill. Additionally, the bill would take the teeth out of the AFDC quality control system. This amounts to subsidizing waste and errors. In total, H.R. 3128 will result in nearly two and one half billion dollars in new HHS costs the next three years.

Further, H.R. 3128 will overturn numerous regulations we have issued to constrain costs in the Medicare program. For example, overturning the hospital payment freeze will cost over one billion dollars over the next three years.

In the face of the tremendous size of the deficit, H.R. 3128 falls far, far short of the mark. It is at best a shovel when the task is moving mountains.

Addressing the deficit requires much more than H.R. 3128 offers. Therefore I urge you to defeat the previous question on House Resolution 301 so that serious deficit reduction can happen.

Sincerely,

MARGARET M. HECKLER,
Secretary.

MAJOR PROVISIONS OF H.R. 3128 THAT WOULD INCREASE HEALTH AND SOCIAL SERVICES SPENDING

REVISE AFDC QUALITY CONTROL

The provision would undermine the quality control system of the Aid to Families with Dependent Children (AFDC) program and inhibit efforts to reduce the Federal deficit. The quality control system was set up to combat waste, fraud, and abuse in the AFDC program. Weakening it would vastly increase the Federal subsidy of erroneous State welfare expenditures.

Cost: $1.1 billion over the first five years.

AUTHORIZE GRANTS TO STATES TO REDUCE TEENAGE PREGNANCY

Funds for this purpose are already being provided under numerous other programs: Titles X (Family Planning) and XX (Adolescent Family Life) of the Public Health Service Act, the Social Services Block Grant, and the Job Training and Partnership Act.

Cost: $150 million over 2-year authorization.

MANDATE AFDC UNEMPLOYED PARENT (UP) PROGRAM

States are currently allowed to make AFDC payments to two-parent families in which both parents are unemployed. Under this provision, even those States which have decided *not* to have a UP program would be required to have one, increasing both Federal and State costs.

Cost: $1.04 billion over the first five years.

CHANGE COVERAGE OF OCCUPATIONAL THERAPY SERVICE

Coverage is currently provided for services given as part of a hospital or skilled nursing facility stay or through a home health agency. The provision would expand the provider base to allow independently practicing therapists to bill Medicare. The primary beneficiary would be the independently practicing therapist; it would not provide any new services to the beneficiary.

Costs: $155 million over the first three years.

EXPAND COVERAGE OF OPTOMETRISTS' SERVICES

The provision would allow optometrists to bill Medicare for whatever services State

law allows them to perform which are covered by Medicare (mostly cataract-related services.)

Cost: $470 million over the first three years.

MANDATE MEDICAID COVERAGE OF PREGNANT WOMEN WHO MEET AFDC INCOME AND RESOURCE TESTS

This provision would expand mandatory Medicaid eligibility to all pregnant women who meet the income and resource tests for AFDC even though they do not meet the categorical requirements, e.g., they are married to employed husbands. (Last year the Deficit Reduction Act of 1984 mandated Medicaid for pregnant women in AFDC-like families and to all children under age 5 who meet the AFDC financial tests.)

Cost: $445 million in the first five years.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 2 minutes to the gentlewoman from California [Mrs. BURTON].

Mrs. BURTON of California. Mr. Speaker, I want to discuss some issues which the Committee on Rules considered in its deliberation on this rule.

Last week the House passed H.R. 3500 containing provisions to strengthen pensions for workers' and retirees. The changes made by the Education and Labor Committee to the Employee Retirement Income Security Act [ERISA] will put the Pension Benefit Guaranty Corporation back on a strong financial footing and will help close loopholes in the law that deprive retirees of their hard-earned benefits when profitable companies terminate their pension plans. These are good provisions; I support them; and I hope that in the conference with the Senate the Education and Labor provisions will prevail.

The parliamentarian has made it clear that primary jurisdiction on this pension matter belongs to Education and Labor. Since the Rules Committee did not allow Ways and Means to amend H.R. 3500, we decided to allow this amendment so that both committees could participate in resolving their differences in conference.

H.R. 3500 is clearly better for retirees, better for workers, and better for the Pension Benefit Guaranty Corporation. The Pension Benefit Guaranty Corporation was created to make sure that retirees get their pensions when their companies fail. I hope that the conferees will put retirees first and come up with a bill that provides the strongest possible protections for workers. Mr. Speaker, I support the rule.

Mr. LATTA. Mr. Speaker, I yield 4 minutes to the gentleman from Ohio [Mr. GRADISON].

Mr. JEFFORDS. Mr. Speaker, will the gentleman yield?

Mr. GRADISON. I yield to the gentleman from Vermont.

Mr. JEFFORDS. Mr. Speaker, I rise in opposition to the rule on H.R. 3128 (H. Res. 301), especially as it relates to the manner in which the ERISA single employer termination insurance provisions were added to H.R. 3128 by the Committee on Ways and Means.

My opposition is twofold. First in passing H.R. 3500, the Omnibus Budget Reconciliation Act, last Thursday, this House has already acted favorably on the ERISA single employer termination insurance reforms as contained in that legislation. The rule now under consideration, if passed, would require this body to approve a second version, the Committee on Ways and Means version, of these ERISA title IV amendments.

I object to the inclusion of these provisions, since the rule would preclude their amendment and any meaningful debate of their intended consequences. This House should not be put in the position during conference of having taken two widely differing positions on this important element of retirement income policy. At best the result could be confusion and at worst the added complexity could undermine the ability of the conferees to adopt the full measure of needed reforms.

Second, I question the fairness of this rule which makes in order a provision which is within the jurisdiction of the Committee on Education and Labor, which first appeared in the CONGRESSIONAL RECORD only this Tuesday, and with respect to which our committee of jurisdiction has had no opportunity to debate or amend.

Over the past 4 years we have requested cooperation from the Committee on Ways and Means to address the ERISA single employer amendments, but without a timely response.

The substitute language requested by the Committee on Ways and Means, and accommodated in the rule, cannot be considered adequate to fully address the abuses or to close the loopholes the Pension Benefit Guaranty Corporation has stated as being necessary to restore the solvency of the title IV single employer program. While my colleagues and I on the Committee on Education and Labor remain open and willing in conference to work with the Committee on Ways and Means to fully take into account their concerns, we must insist that those provisions of H.R. 3500 that the PBGC has identified as being necessary to close these loopholes be included in the final legislation.

For these and other reasons, I must restate my opposition to this rule as drafted in connection with the single employer termination insurance reforms.

Mr. GRADISON. Mr. Speaker, the so-called deficit reduction amendments of 1985 before us this afternoon include almost $1 billion of new spending over the next 3 years, according to CBO or about $2½ billion, according to OMB. This member asked to be allowed to offer an amendment to strike all new spending proposals from this bill. The Rules Committee said no. Thus, what we have before us is a deficit reduction fig leaf being used to cover up new spending.

What are the Democrats who run the Rules Committee and run this House afraid of? Why are they unwilling to let the House vote on new spending? Frankly, this is the same old business as usual we've seen around here for years and which has led to $200 billion dollar deficits.

Something new happened yesterday which suggests that maybe, just maybe, high spending business as usual is ending. The Democratic House conferees recommended eliminating the deficit over 5 years and that the deficit be cut to $161 billion for the current year. This Member, as a member of the conference, supported the $161 billion figure. Now, today, on the next vote we test whether yesterday's action was a media event or a major turning point. We should welcome budget balancers with open arms whether they are born-again spending cutters or life-long true believers.

Much has been said this morning about Gramm-Rudman. Let's be clear about the effect of Gramm-Rudman on the measure before us. Should Gramm-Rudman become law—and this Member hopes it will—every dollar of new spending will trigger a dollar-for-dollar reduction in present spending programs of the Federal Government. Denying a vote on new spending—as this rule would do—is a clever way to avoid discussing what will be cut to pay for the new spending. If Gramm-Rudman means anything at all, it means that such questions should be—indeed must be—addressed.

I urge the House to join me in voting "no" on the previous question so that the House can work its will on an issue which goes to the heart of the integrity of the entire budget process—indeed to the heart of the intregity of this House.

Mr. CAMPBELL. Mr. Speaker, will the gentleman yield?

Mr. GRADISON. I yield to the gentleman from South Carolina.

Mr. CAMPBELL. Mr. Speaker, I thank the gentleman for yielding.

I would ask the gentleman if he is familiar with the debate that took place in the committee concerning the question of abortion, which does arise in the section that the gentleman tried to offer an amendment to before the Rules Committee to strike. If the gentleman will recall, we did in the Ways and Means Committee adopt language in the legislation which said that none of the activities or services offered through the Block Grant Program dealing with teenage pregnancies could include the performance of counseling for abortion. I am sure the gentleman remembers that.

I am concerned and I ask the gentleman if he shares my concern with report language that sought to undo that and has raised this issue on the floor when we tried to avoid in the committee by dealing with it directly.

The report language says:

The legislation includes a prohibition on the use of block grant funds for the performance of abortions and for the counseling of individuals to have abortions except where the life of the mother would be endangered if the fetus were carried to term. This prohibition applies solely to the use of funds provided under the teenage pregnancy block grant established by section 302 of this bill, and is not intended in any way to alter current practices or law and regulations of other title IV or any other Social Security Act programs or other Federally funded health and public assistance programs.

The concern has arisen that will in fact open the door for abortion. I ask the gentleman if he shares that concern in his amendment.

Mr. GRADISON. I share the gentleman's concern.

Mr. LATTA. Mr. Speaker, I yield 1 minute to the gentleman from Utah [Mr. NIELSON].

Mr. NIELSON of Utah. Mr. Speaker, I wish to join my colleague from the Ways and Means Committee, Mr. GRADISON, in opposing this rule because it does not allow an amendment to strike increased spending provisions contained in and H.R. 3128 and H.R. 3290.

I believe that the Members of this House should be afforded the opportunity to offer amendments to strike spending provisions in these bills. According to the Congressional Budget Office, there are provisions in H.R. 3128 and H.R. 3290 that will increase spending by approximately $1 billion for the period fiscal year 1986 through fiscal year 1988. There are those of us in this body who take the budget reconciliation process seriously and desire to use it as a means to make a significant dent in the deficit. We do not think that the reconciliation process should be used as a means to bring increased spending provisions to the floor in a manner that will short-circuit debate.

There are also many of us in this body who believe it is inappropriate to make only nominal savings in order to net out additional spending as was done in H.R. 3101, the legislation that was ordered reported by the Energy and Commerce Committee and is now included in H.R. 3290.

Finally, there is also a significant number of us who are strongly in favor of the spending cuts contained in H.R 3128 and H.R. 3290 but who may be forced to vote against those bills because they contain increased spending provisions as well.

I strongly urge my colleagues to defeat this rule. The rule should allow Members to be able to vote on an amendment that will strike all new spending provisions. We have an enormous deficit that should not be allowed to increase further.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 2 minutes to the gentleman from Tennessee [Mr. FORD].

□ 1230

Mr. FORD of Tennessee. I thank the gentleman for yielding this time to me.

Mr. Speaker, I rise in support of the Deficit Reduction Act of 1985 and would just like to talk briefly on title III of the bill that will be before us if this rule is adopted.

No. 1, under title III of this legislation is contained the public assistance amendments to H.R. 3128. These provisions are intended to combat the steady rise of poverty among children in this Nation. We are talking about teenage pregnancy, which is reaching epidemic proportions in this Nation today. This bill today will address it with a pilot block grant program calling for $50 million in the first year and $100 million in the second year.

We know that we are confronted with severe problems on the issue of teenage pregnancy. The gentleman from Ohio [Mr. GRADISON], a member of the full Committee on Ways and Means, as well as the gentleman from South Carolina [Mr. CAMPBELL], who is the ranking member of the Subcommittee on Public Assistance, know that we adopted the Hyde language in the teenage pregnancy bill. That language was adopted. He is referring to the report language in this bill.

This is only a counseling program. It does two things. It tries to prevent teenage pregnancy and it offers a service after the fact. We call up on a 2-year pilot block grant program that is needed. The antiabortion language that Mr. CAMPBELL has talked about, he knows that he was a part of the compromising efforts on the full Committee on Ways and Means to agree that we would adopt the Hyde language to be a part of the teenage pregnancy program, as well as the UP-2 parent program on AFDC.

We are only talking about and calling for the father or the principal earner within a family to be eligible to live within a household and at the same time his children receive AFDC payments. We are not talking about $2 billion. We are talking about, from 1986 to 1988, $630 million.

We are only trying to protect the safety net that the President has talked about and the President has promised the poor of this Nation.

Mr. Speaker, I would urge my colleagues to adopt this amendment that is before us on the rule.

The SPEAKER pro tempore. The time of the gentleman from Tennessee [Mr. FORD] has expired.

Mr. DERRICK. Mr. Speaker, I yield 1 additional minute to the gentleman from Tennessee.

Mr. CAMPBELL. Mr. Speaker, will the gentleman yield?

Mr. FORD of Tennessee. I would be happy to yield to my ranking minority member, the gentleman from South Carolina.

Mr. CAMPBELL. I thank the gentleman for yielding.

Mr. Speaker, I just wanted to take a moment. The gentleman mentioned my name.

The gentleman is correct, and I am not here questioning the programs or the benefit of them. I was here to raise the question and the concern came from the adoption later of language that seemed to try to negate what the full committee had done.

I wanted to make that very clear. I was not speaking to the other programs or the merit of those programs.

Mr. FORD of Tennessee. But we do not want to mislead our colleagues here. We adopted the Hyde language as a part of the teenage pregnancy program. The report language, when you talk about that, we must realize that this is only a counseling program to combat the real problem that we are faced with on teenage pregnancy.

Mr. CAMPBELL. But I am sure the gentleman would agree, if he would yield a moment, that of course we were not intending to undo the bill language, and if that is the case then we should strike some of this report language and get back to what the committee did.

Mr. FORD of Tennessee. I want to adopt the language that was agreed upon with the gentleman's side of the aisle as well as this side of the aisle in the committee.

Mr. CAMPBELL. The bill language.

Mr. FORD of Tennessee. We thought that we reported a bill that would be acceptable on both sides of the aisle on teenage pregnancy.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from Mississippi [Mr. LOTT].

Mr. LOTT. I thank the gentleman for yielding this time to me.

Mr. Speaker, I have been patiently sitting through hour upon hour of conference sessions on the Gramm-Rudman deficit reduction amendment, listening to speaker after speaker extoll their budget-cutting credentials. Yesterday our majority colleagues in the House, after earlier telling us what an awful thing Gramm-Rudman was, voted for an amendment to cut the deficits by nearly $20 billion more this year. I suppose you could call this, "Gramm-standing."

But, Mr. Speaker, it seems whenever it comes to paying the piper around here, and put out savings where our rhetoric is, we cop-out. Last Thursday, on the omnibus reconciliation bill, the

House narrowly defeated Mr. LATTA's amendment to strike $3.5 billion in spending increases by a vote of 209 to 219. Where were our majority brethern on that one? Only 43 of the Democrat colleagues voted with us to remove these spending increases, while 204 voted to increase spending and the deficit.

It appears that vote made our born-again budget-cutting colleagues so nervous that they prevailed on the Rules Committee not to permit any more votes on striking these add-ons in a reconciliation bill, since the rule before us today is about as closed tight as Dracula's coffin here on Halloween. I guess it's appropriate on Halloween that our Democrat friends played their little trick last night, but are saying in this rule today, don't take away our treats.

Mr. Speaker, we have an opportunity, if we defeat the previous question on this rule, to make in order the Gradison amendment which will eliminate nearly $1 billion in spending increases contained in this legislation. The gentleman from Ohio [Mr. LATTA] attempted to make that in order in the Rules Committee and was turned back on a party-line vote. I tried to make in order the amendment of the gentleman from Louisiana [Mr. MOORE] to keep our prospective payment system for hospitals under Medicare on track, and thereby save the Government additional money. But that too was defeated.

Mr. Speaker, make no mistake about it, the vote on the previous question will be counted as a vote on whether we are really serious about cutting deficits, or whether we're just parading in our Halloween costumes for the benefit of the folks back home. Vote down the previous question so we can vote for cutting the deficit more. Let us see if we are really serious.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 4 minutes to the gentleman from Michigan [Mr. BONIOR], a member of the committee.

Mr. BONIOR of Michigan. I thank my colleague on the committee for yielding this time to me.

Mr. Speaker, in the past few weeks the Rules Committee has grappled with the question of how to facilitate enactment of reforms to the single employer pension plan termination program of ERISA.

Clearly such reforms are urgently needed. The Pension Benefit Guaranty Corporation [PBGC], which is charged with guaranteeing pension benefits in the case of terminated pension plans, is plagued with very serious problems and deficits. The number of claims against the fund have been far greater than expected in the original legislation. If we are to avoid a major funding crisis in ERISA, the program will require both a premium increase and major structural changes to shore up the system and prevent future abuses.

The Rules Committee in this ongoing concern, has been faced with two alternative amendments to reform the single employer pension plan—one presented by the Committee on Education and Labor, and the other by the Committee on Ways and Means.

I believe personally the Education and Labor amendment is preferable on the merits. It is a product of 4 years of the committee's work. During that time, hearings were held involving the input of a wide variety of the parties affected. The legislation proceeded through a careful process of consensus building to arrive at a package that has very strong bipartisan support. It was reported from the Committee on Education and Labor on a unanimous vote. It has the support of the administration and of organized labor. Neither the business community nor any other interested group that I am aware of has expressed objection to the substance of the reforms proposed by the Committee on Education and Labor.

This package will povide a premium increase from the current $2.60 per plan participant to $8.50. It contains reforms that will prevent solvent companies from dumping their unfunded pension liabilities on the PBGC, and from evading responsibility for the provision of certain nonguaranteed rights that have been earned by retirees. It will crack down on employers who undertake transactions purely for the purpose of evading pension liabilities. In sum, it provides protection for retirees and responsible businesses alike, while placing the Pension Benefit Guaranty Corporation on a financially sound basis.

The Education and Labor reforms have already passed the House on H.R. 3500, the Omnibus Budget Reconciliation Act. The Senate has added similar provisions to its own budget reconciliation package. Today, we are faced with an entirely different set of reforms, drafted in the last few weeks by the Ways and Means Committee, and included in the reconciliation bill before us.

There is no doubt about the jurisdiction of the Ways and Means Committee over the question of the premium increase and I think that is important to stress. Yet serious questions have been raised about the committee's claim to jurisdiction over the rest of the single-employer pension plan reforms.

The fact that the Rules Committee has granted a rule, at the request of the Ways and Means Committee, which incorporates this new set of reforms and which protects these provisions from amendments on the floor, should not be interpreted as an endorsement of the Ways and Means Committee's claims to jurisdiction.

Indeed, I believe, that a far stronger case can be made for the claim of the Committee on Education and Labor to sole jurisdiction over the structural reforms of the single-employer pension plans. I would like to insert in the RECORD a letter from that committee to the Speaker which I believe makes a very clear and compelling case for the committee's jurisdiction.

Mr. Speaker, I urge my colleagues to support this rule, and the Ways and Means reconciliation package. It is my hope that the two committees with conflicting claims to jurisdicion over the single-employer pension plans will be able to resolve their differences in conference, in a way that will provide lasting protection for the pension rights of our retired workers.

Mr. Speaker, the letter to which I referred follows:

COMMITTEE ON EDUCATION AND LABOR, U.S. HOUSE OF REPRESENTATIVES,
Washington, DC, September 24, 1985.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, DC.

DEAR MR. SPEAKER: It has come to our attention that the Committee on Ways and Means has requested sequential referral of H.R. 2813, a bill dealing with the single-employer pension plan termination insurance system. This bill contains no amendments to the Internal Revenue Code and was referred solely to the Committee on Education and Labor.

It is our understanding that the basis of the claim by the Committee on Ways and Means is three-fold: the legislative history of the initial enactment of the Employee Retirement Income Security Act of 1974 (ERISA), the procedure followed in 1979-80 when subsequent amendments were made to the multiemployer insurance provisions in title IV, and a generalized claim that by increasing employers' liability under section 4062 of ERISA, the Committee on Education and Labor is depriving the Committee on Ways and Means of its ability to review the size and nature of allowable deductions from taxable income. The Committee on Ways and Means argues that without the ability to review changes in the title IV program itself, even though these are matters historically solely within the jurisdiction of the Committee on Education and Labor, its ability to exercise its authority over tax matters is impeded.

The Committee on Education and Labor disagrees with these claims. Mr. Speaker, we urge you not to refer H.R. 2813 sequentially to the Committee on Ways and Means in light of the following facts.

First, the Committee on Ways and Means asserts that the legislative history of ERISA shows that title IV was intended to be within the joint jurisdiction of the two committees. We sharply disagree. We have attached for your information, a brief history of the origins of the title IV program and its subsequent treatment since 1974. We are confident that after your objective review of this material, you will support the position of the Committee on Education and Labor that the legislative history of the termination insurance provisions demonstrates the

exclusive jurisdiction of our Committee over all sections of title IV, except for the statutorily mandated concurrent resolution process for changing Pension Benefit Guaranty Corporation (PBGC) premiums which requires joint referral. This was made most clear by the Speaker's own decision to divide cleanly the jurisdiction of matters under H.R. 2 (ERISA) by appointing the members of the Committee on Education and Labor as exclusive managers on the part of the House "on title I of the House bill, and modifications thereof which have been committed to conference" (title I exclusively contained the provisions relating to plan termination insurance). Section I(C)(2) in the accompanying memo contains a more detailed discussion of this point.

Second, the Committee on Ways and Means argues that the legislative history of the Multiemployer Pension Plan Amendments Act of 1980 (originally H.R. 3904) supports its claim of joint jurisdiction over all of title IV. Again we sharply disagree. Although we have included a more detailed analysis of the incorrectness of this argument in the attached memo, we point out to you, M. Speaker, a colloquy between Mr. Frank Thompson and Mr. Dan Rostenkowski on the House floor on May 21, 1980 which appears in the Congressional Record for that day on page H 3947. The essence of that colloquy is a reaffirmation of a prior agreement between the committees that the process used in the consideration of that critical legislation was agreed to by both committees to be nonprecedential in nature. Therefore, it is hard for this Committee to understand why the Committee on Ways and Means considers the procedure under which H.R. 3904 was handled to be relevant at all to the question of jurisdiction over title IV generally.

Third, the Committee on Ways and Means make certain generalized claims that the action of our Committee in amending certain sections of title IV which are solely within our jurisdiction would harm (or affect) its ability to exercise its asserted jurisdiction over the size and nature of allowable deductions from taxable income. Not only do we sharply disagree with this analysis generally, but also we are puzzled how, were this analysis correct, any programs could exist under the jurisdiction of any committee without the Committee on Ways and Means sharing jurisdiction. Clearly Mr. Speaker, there are many instances of programs which are under the exclusive jurisdictions of committees other than the Committee on Ways and Means, even though certain aspects of those programs may involve tax deductible amounts. For example, if Committee on Education and Labor were to increase the Federal minimum wage, this would indirectly affect tax revenues. In that instance, as well as the instance at hand, the Committee on Ways and Means would have no jurisdictional claim over a matter solely within the jurisdiction of the Committee on Education and Labor Committee simply because the action of our committee might have an indirect effect on tax revenues. The Committee on Ways and Means claims that by our Committee's amendment of section 4062 of ERISA (which describes the liability of employers terminating certain pension plans), we have impeded its ability to monitor deductible amounts of taxable income under section 404(g)(1) of the Internal Revenue Code. If the Committee on Ways and Means wants to exercise its oversight jurisdiction over deductible limits, it certainly has the ability to do so by a method within its jurisdictional prerogatives, i.e., by amendments to the Internal Revenue Code, and not through limiting our Committee's ability to exercise its legitimate jurisdictional prerogative of amending section 4062.

Moreover, Mr. Speaker, we would like to call to your attention a matter over which you have already ruled which supports the above described argument of the Committee on Education and Labor. Last Congress, as part of the Tax Reform Act of 1984 (H.R. 4170), the Committee on Ways and Means drastically reduced the deductibility of allowable contributions made to certain types of employee benefit welfare plans. The Committee on Education and Labor clearly has jurisdiction under its exclusive authority under title I or ERISA with respect to these plans. At the time we argued that changing the tax treatment with respect to these plans would have a significant effect on employee protections under these plans, thus in effect significantly affecting matters within the jurisdiction of the Committee on Education and Labor. Yet our request to be appointed joint conferees on this issue was denied, on the basis that the amendments were made only to the Internal Revenue Code and not to title I. More recently, this principle was reinforced in your decision to refer sequentially to the Committee on Education and Labor only section 505 of H.R. 3128 (relating to the increase in the premium paid to the Pension Benefit Guaranty Corporation) and not section 161 of that bill (relating to private health insurance continuation). Our request for sequential referral of section 161 was denied because H.R. 3128 amended only the Code and not title I of ERISA, although the introduced bill from which the provision derived was jointly referred. Therefore, any argument raised by the Committee on Ways and Means that, to the extent the Committee on Education and Labor makes title I amendments which may have some indirect effect on tax revenues (as in the example discussed above involving the Federal minimum wage), dual jurisdiction is created and sequential referral is necessary, is inconsistent with previous decisions you have made, Mr. Speaker, on questions identical to this one. Although we continue to disagree with your decision with respect to last year's Tax Reform Act and with respect to section 161 of H.R. 3128, at a minimum, we respectfully urge consistency in your rulings.

In summary, Mr. Speaker, we believe the arguments of the Committee on Ways and Means are inconsistent with both the legislative history and House precedent on the issues at hand. We therefore urge you to reject the request of the Committee on Ways and Means for sequential referral of H.R. 2813.

In the interest of time and in deference to your busy schedule, we have tried to be as brief as possible. Neither this letter nor our supporting memo is a complete recitation of each and every relevant point, but rather a summary of the relevant points related to the sole authority of the Committee on Education and Labor over the programmatic aspects of title IV of ERISA. We remain ready to answer any questions you may have about the material we have submitted as well as any other issues raised with respect to the question of jurisdiction over the title IV plan termination insurance program.

Sincerely,

AUGUSTUS F. HAWKINS,
Chairman.
JAMES M. JEFFORDS,
Ranking Member, Committee on Education and Labor.
WILLIAM L. CLAY,
Chairman, Subcommittee on Labor-Management Relations.
MARGE ROUKEMA,
Ranking Member, Subcommittee on Labor-Management Relations.

POINTS RELEVANT TO SOLE JURISDICTION OF COMMITTEE ON EDUCATION AND LABOR OVER TITLE IV OF THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974 (ERISA)

I. HOUSE ACTIONS LEADING TO ENACTMENT OF ERISA ON SEPTEMBER 2, 1974 (P.L. 93-406)

A. Introduction of original ERISA bills in House

1. H.R. 2 (final bill number of P.L. 93-406), as introduced by Mr. Dent, was referred only to the Committee on Education and Labor (1/3/73).

2. H.R. 462 (incorporated into H.R. 2 by the Committee on Education and Labor on October 2, 1973), as introduced by Mr. Dent, was referred only to the Committee on Education and Labor (1/3/73).

B. House Committee actions in bringing H.R. 2 to the House floor on February 25-28, 1974

The following were substituted as original text for H.R. 2:

H.R. 12906 as reported by the Committee on Education and Labor (2/19/74), and

H.R. 12855 as reported by the Committee on Ways and Means (2/21/74).

1. H.R. 12906 was referred only to the Committee on Education and Labor; part 4 of this bill contained the plan termination insurance provisions.

2. H.R. 12855 as referred to the Committee on Ways and Means did not contain any plan termination insurance provisions.

3. Conclusion:

a. The House bills containing plan termination insurance provisions (currently title IV of ERISA) were referred only to the Committee on Education and Labor and acted on only by such Committee. Such bills were not referred to the Committee on Ways and Means (initially, sequentially, or otherwise) and such bills (or plan termination insurance provisions in any form) were not acted on by the Committee on Ways and Means. We are unaware of any assertion of jurisdiction over plan termination insurance made by the Committee on Ways and Means at that time.

b. The Committee on Education and Labor's involvement with the plan termination insurance provisions of the legislation (title IV of ERISA) stems from clause 6 of Rule XI, which provides that the Committee has jurisdication over "measures relating to . . . labor generally". The sole thrust of title IV of ERISA is to protect workers' pension benefits from loss in the event of pension plan terminations and the Pension Benefit Guaranty Corporation was therefore established as an independent corporate body within the Department of Labor

in recognition of that Department's character to protect workers' interests.

c. The above described exlusive involvement of the Committee on Education and Labor in establishing the programmatic and funding provisions of the plan termination insurance program, as enacted by the House, supports the view that at the time that the House considered ERISA, both the Committee on Education and Labor and the Committee on Ways and Means considered such provisons as outside the scope of clause 21 of Rule IX extending the jurisdiction of the Committee on Ways and Means over, *inter alia*, "revenue measures generally".

d. The fact that the Committee on Ways and Means may share jurisdiction with the Committee on Education and Labor over premiums imposed under the title IV program is not dispositive of the question of whether, because jurisdiction is shared over this aspect of the funding mechanism of a program it necessarily follows that juridiction is shared over the programmatic aspects. Rather, benefit programs tied to the imposition for charges on employers or users do not constitute revenue, and are not necessarily within the jurisdiction of the Committee on Ways and Means Legislation establishing other programs that impose fees or other charges, similar in nature to the premiums under title IV, have been handled exclusively by the committee having jurisdiction of the subject matter (for example, nuclear accident indemnification (42 U.S.C. 2210) and grazing fees (43 U.S.C. 315b, *et seq.*)) without the involvement of the tax-writing committtee in the House or Senate. This treatment is consistent with Supreme Court decisions under the origination clause that conclude that a bill, under which the primary purpose is not to raise revenue, is not a bill for raising revenue. *See, e.g. Twin City Bank v. Nebeker*, 167 U.S. 196, 202-203 (1897). *See, also* Story, *II Commentaries on the Constitution of the United States* (Da Capo ed.) 343 (1970).

C. House action on H.R. 2

1. Throughout the consideration by the House of H.R. 2, the Committee on Education and Labor controlled the time and managed the debate on title I, which contained the plan termination insurance provisions. Title II (which contained no elements relating to plan termination insurance) was managed by the Committee on Ways and Means.

2. The exclusive jurisdiction of the Committee on Education and Labor over plan termination insurance was made crystal clear and memorialized at the time the House agreed to the conference with the Senate as a result of the Speaker's own decision and direction to divide cleanly the jurisdiction of matters under H.R. 2 by appointing the members of the Committee on Education and Labor as managers on the part of the House "on title I of the House bill, and modifications thereof which have been committed to conference" (title I exclusively contained the provisions relating to plan termination insurance) and by appointing the members of the Committee on Ways and Means as managers on the part of the House "on title II of the House bill, and modifications thereof which have been committed to conference" (title II did not contain any provisions relating to plan termination insurance). See page H 2388 of the Congressional Record of April 2, 1974, attached.

2. The Conference Report on H.R. 2 makes clear in the statement of managers that the members of the Committee on Education and Labor were appointed (and, in fact, acted) as the exclusive managers of title I (including the plan termination insurance provisions of the House-passed bill) for purposes of the Conference Committee on H.R. 2.

3. Conclusion:

Each action on H.R. 2 taken: (a) by both the Committee on Education and Labor and the Committee on Ways and Means, (b) by the House, and (c) by the Conference Committee reinforces the view that the plan termination insurance provisions of H.R. 2 as enacted are solely within the jurisdiction of the Committee on Education and Labor. In an exception to the language of the House-passed bill, the Conference Committee included a statutory concurrent resolution mechanism for changing plan termination insurance premiums. Under that procedure, the PBGC's premium request in the form of a current resolution "is transmitted to the Committees on Education and Labor and Ways and Means of the House and to the Committees on Finance and Labor and Human Resources of the Senate."

As has been stated before, it is the view of the Committee on Education and Labor, relying on precedents and examples, that the fact that the mechanism for raising premiums is a jointly referred concurrent resolution in no way affects its claim to sole jurisdiction over the programmatic aspects of the title IV insurance system. On the contrary, the Committee on Education and Labor believes that if the intent of the Conference Committee was to make the whole of title IV a matter of concurrent jurisdiction, there would have been no need to single out this provision and specifically refer to the tax-writing committees. In fact, since the members of the Committee on Education and Labor were the sole House conferees on these provisions and therefore, absent a specific reference, would continue to have exclusive jurisdiction over the whole of title IV, the specific reference was necessary to make it clear that, in the limited instance of the use of a concurrent resolution mechanism to change premiums, there was a minimal role for the tax-writing committees.

Similarly, it has been argued that the reason the Conference Committee placed the termination insurance program in a separate title (and removed it from title I) was to indicate that it was not within the sole jurisdication of the Committee on Education and Labor. The Committee strongly disagrees with that line of reasoning. In fact, the plan termination insurance provisions were removed from title I since the program was to be administered by the Pension Benefit Guaranty Corporation, and independent corporate body within the Department of Labor. As a drafting convenience, the provisions were put in a separate title. Moreover, this mere drafting convenience did not in any way dilute or change the Committee on Education and Labor's sole authority as appointed House conferees on matters relating to plan termination insurance as clearly spelled out by the Speaker's designation of members of such Committee as sole conferees with respect to such matters under the House bill on which the conference was held. See page H 2388 of the Congressional Record of April 2, 1974, attached. In addition, the plan termination insurance program was then, and continues today, to be within the budgetary control of the Secretary of Labor. It is unlikely (as well as unprecedented) that the Committee on Education and Labor would have gratuitously agreed to joint control with tax-writing committees over the whole of a program developed by the Committee on Education and Labor and solely within the ambit of the U.S. Department of Labor.

II. HOUSE ACTION SUBSEQUENT TO ERISA'S ENACTMENT

A. 95th Congress

1. H.R. 9378 (a bill to delay the effective date of plan termination insurance for multiemployer pension plans under title IV of ERISA) was referred solely to the Committee on Education and Labor and was reported formally there. This bill was managed solely by members of the Committee on Education and Labor and was passed by the House on November 1, 1977, without any committee (or other action) having been taken by the Committee on Ways and Means.

2. H. Con. Res. 369 (introduced pursuant to the statutory mechanism for increasing the premiums under the plan termination insurance program) was referred, as statutorily required, to both committees. The extent of the Committee on Ways and Means jurisdiction with respect to such a current resolution setting the level of premiums was clarified in a colloquy between Mr. Pickle and Mr. Perkins on December 7, 1977 (Congressional Record at page H 12833, attached) at the time the House again considered H.R. 9378 (which had been amended by the Senate to include the substance of H. Con. Res. 369—namely the premium increase). In that colloquy, the two gentlemen agreed that there existed joint jurisdiction over concurrent resolutions increasing the level of premiums but that exclusive jurisdiction over the balance of title IV is retained by the Committee on Education and Labor.

This interpretation is further supported by the fact that H.R. 9368 (as agreed to by the House) contained a mandated study of the multiemployer pension plan termination insurance program, which, in the House, was to be referred solely to the Committee on Education and Labor, in recognition of the Committee on Education and Labor's sole jurisdiction over the balance of title IV (P.L. 95-214).

B. 96th Congress

1. H.R. 3915 (a bill to delay further to May 1, 1980, the effective date of plan termination insurance for multiemployer plan under title IV) was referred solely to the Committee on Education and Labor and reported favorably thereon. On June 4, 1979, H.R. 3915 which was managed solely by members of the Committee on Education and Labor, was passed by the House without any committee (or other) action having been taken by the Committee on Ways and Means. The Senate accepted the House bill (P.L. 96-24).

2. H.R. 7140 (a bill to delay further to June 1, 1980, the effective date of plan termination insurance for muliemployer plans under title IV) was referred solely to the Committee on Education and Labor. On April 28, 1980, H.R. 7140 which was managed solely by members of the Committee on Education and Labor, was passed by the House by unanimous consent without any committee (or other) action having been taken by the Committee on Ways and Means. The House accepted a Senate amendment extending the delay date to July 1, 1980 on April 29, 1980 (P.L. 96-239).

3. H.R. 7685 (a bill to delay further to August 1, 1980 the effective date of plan termination insurance for multiemployer plans under title IV) was referred solely to the

Committee on Education and Labor. On June 30, 1980, H.R. 7685 which was managed solely by the members of the Committee on Education and Labor, was approved by unanimous consent by the House, without any committee (or other) action having been taken by the Committee on Ways and Means. Later that same day, the bill cleared the Senate (P.L. 96-293).

4. H.R. 3904, the Multiemployer Pension Plan Amendments Act of 1980 (a bill to make mandatory pension plan termination insurance for multiemployer plans and to raise the level of premiums for such plans) was jointly referred to both the Committee on Education and Labor and the Committee on Ways and Means, pursuant to a legislative process agreed upon at the time by the two committees to be non-precedential in nature. The common concern was that the emergency nature of the legislation, as evidenced by the previous efforts to delay the effective date of mandatory coverage, did not leave sufficient time for strict adherence to the jurisdictional requirements which both committees, nonetheless, recognized as binding upon them (see supporting colloquy between Mr. Thompson and Mr. Rostenkowski, Congressional Record of May 21, 1980 at H 3947, attached).

a. In recognition of the programmatic responsibilities of the Committee on Education and Labor with respect to the title IV plan termination insurance system, the Committee on Education and Labor first reported H.R. 3904 (H. Rept. 96-869, Part 1) on April 2, 1980. In recognition of the responsibilities of the Committee on Ways and Means in connection with the bill's change in premium rates and other conforming changes in the Internal Revenue Code (the provisions on which initial referral were based), the Committee on Ways and Means subsequently reported the bill (H. Rept. 96-869, Part 2).

During the consideration of the bill by the Committee on Ways and Means, the two committees worked closely together and the Committee on Education and Labor reviewed any non-Code changes which had been suggested, in conformance with the agreed upon procedure between the two committees, thus avoiding the need for the Committee on Education and Labor to demand strict adherence to jurisdictional precedents with respect to the non-premium programmatic sections of title IV. In light of the agreement that this procedure would be non-precedential and the emergency nature of the legislation, the Committee on Education and Labor relied on such agreement and did not demand that it be given the opportunity to reopen consideration of portions of the bill solely within its jurisdiction which the Committee on Ways and Means may have amended in an agreed-upon manner.

b. On May 21-22, 1980, the House took up H.R. 3904, pursuant to the rule making in order an amendment in the nature of a substitute which consisted of the separate amendments reported by the two committees. The amendment of the Committee on Ways and Means included the amendment adopted by the Committee on Education and Labor together with several additional committee amendments agreed to by the Committee on Education and Labor under the non-precedential arrangement between the two committees. That the procedure under which H.R. 3904 was developed and considered by the House was exceptional and of no precedent is evidenced by the colloquy between Mr. Thompson and Mr. Rostenkowski appearing at page H. 3947 of the Congressional Record of May 21, 1980, attached.

c. Conclusion:

1. The post-enactment ERISA legislative history, as recorded above, could hardly be more illuminating in support of the Committee on Education and Labor's primary and exclusive jurisdiction over the plan termination insurance program provisions under title IV of ERISA (the sole exception is the joint jurisdiction of the Committee on Ways and Means with the Committee on Education and Labor in connection with the statutorily prescribed concurrent resolution process to increase the level of premiums charged both single and multiemployer plans). Time after time, the Committee on Education and Labor acted on matters exclusively within its own jurisdiction under title IV of ERISA in addressing the problems connected with pension plan termination insurance and without challenge to the Committee's jurisdictional prerogatives.

2. The joint referral of H.R. 3904, the multiemployer legislation, to both committees (to the Committee on Ways and Means in accord with the established practice to refer bills containing amendments to the Internal Revenue Code to such committee, as in this case), and even the subsequent markup of the Committee on Education and Labor version of the bill by the Committee on Ways and Means (pursuant to the agreement cited above), do not and should not provide to the Committee on Ways and Means a basis for "bootstrapping" jurisdiction under title IV of ERISA when in fact none previously existed.

To hold otherwise would be totally contrary to the intent of the Thompson-Rostenkowski colloquy which confirmed the non-precedential nature of the procedure by which H.R. 3904 was considered. To hold otherwise would also do violence to the notion that the Speaker has continually urged with respect to sensitive matters of jurisdiction generally, namely, for committees to work together to enact urgently needed legislation, while both sides preserve their jurisdictional claims, rather than waste time squabbling over jurisdictional prerogatives at the expense of needed legislation.

The SPEAKER pro tempore. The Chair will advise the gentleman from South Carolina [Mr. DERRICK] that he has 10 minutes remaining and the gentleman from Ohio [Mr. LATTA] has 13 minutes remaining.

Mr. LATTA. Mr. Speaker, I yield 1 minute to the gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. I thank the gentleman for yielding this time to me.

Mr. Speaker, the bill before us is from the Committee on Ways and Means. That particular committee is one of the more collegial bodies on this campus and normally works its will in at least a sort of bipartisan manner.

This is one of the few bills that the committee has passed in my memory which all the Republicans voted against. That ought to be an immediate signal to the Members of the body that something is wrong here. What is wrong is that we have added new programs which could be removed if the Gradison amendment were in order.

□ 1240

Since the Rules Committee refused to stop the creation of new programs and the expansion of other programs by at least allowing us to work our will on the Gradison amendment, it is necessary to defeat the previous question.

I hope that all Members understand the nature of the previous question. If you want a chance to defeat new spending, if those newly crowned heros from yesterday on the Democrat side who voted for further reductions want to put their money where there mouths are, they may now vote against the previous question.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 1706. An act to authorize the Architect of the Capitol, in cooperation with the Union Station Redevelopment Corporation, to design a building or buildings adjacent to Union Station in Washington, DC.

DEFICIT REDUCTION AMENDMENTS OF 1985

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from Louisiana [Mr. MOORE].

Mr. MOORE. Mr. Speaker, this bill takes a step backward in another way other than those already described. The law we passed in 1983 calling for the repayment for Medicare to our hospitals to go from the old expensive and inefficient cost-plus basis to the new prospective payments system, PPS, and paying by DRG's, has been delayed in this bill.

What they have done is this year that we are in now, it should have gone to a 75-25 basis, 75 percent paid under this new prospective system and 25 percent under the old way, and next year it should go to 100 percent.

Some hospitals have not been doing well, some have been inefficient and they have come to the Ways and Means Committee last year and we defeated them. And they came back this year and they won to freeze that system to 50-50, to delay going to it.

My colleagues, the most impressive step we have taken to hold down health care costs was the passage of this prospective system.

In 1980, Medicare costs were rising at the rate of 19 percent a year. It is down now to 6.3 percent. Hospital expenses were rising at 10.2 percent 2 years ago, and last year only 4½ percent. The cost per case declined nearly 3 percent, and admissions and length of stay dropped about 4 percent.

So what we are doing is finally we took some meaningful steps, and this

bill backs away from them by refusing to go further in that system.

I would like to offer an amendment. I did in the Ways and Means Committee and it failed by only one vote. We would like to offer an amendment here on the House floor to reach a compromise and say, OK, let us go to 75-25. This year it is going to 60-40, and next year, instead of going to 100 percent, we will go to 80-20.

In other words, we will compromise and try to help those hospitals having a difficult time, but keep them moving toward the progressive system to where some day we will be 100 percent under this new payment system which will save the taxpayers money, save the Medicare system, and see to it we continue the system that has been working so well.

The hospitals are saying that they need this break.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 3 minutes to the gentleman from California [Mr. MATSUI].

Mr. MATSUI. Mr. Speaker, the Ways and Means Committee Deficit Reduction Act of 1985 is a well-crafted package that meets two important commitments, substantial deficit reduction and the preservation of the safety net for the poor. A vital component of this bill is the provision to pause the prospective payment system under Medicare.

I would first like to emphasize that the Ways and Means Committee very strongly supports a prospective payment system for Medicare hospital services. When we designed the PPS legislation in 1983 as part of the Social Security legislation, we did so with an understanding that it was an imperfect system and that we would need time to make refinements and improvements before it became fully effective.

We are now at the midpoint in our transition to a national pricing system; yet we find that virtually none of the expected refinements to the PPS have been implemented. As a result, we are beginning to see "windfall" payments to certain hospitals and significant underpayments to other hospitals. These differences are not related to efficiency or lack of efficiency in hospital operations. Instead, they are a result of one, the failure to distinguish severity of illness; two, its lack of sensitivity to variations in the costs of labor and other goods and services purchased at a local market; and three, its failure to adjust to those hospitals that serve a higher proportion of indigent care. This disparity among hospitals does not occur between regions, this disparity occurs within regions.

By moving forward with the transition schedule, we are ignoring these facts and the growing body of evidence that is supporting the need for reform of the PPS. Even the Prospective Payment Commission, a nonpartisan body set up by Congress to monitor and make recommendations about the new system, has issued over 20 recommendations for improvements to the PPS and has agreed that we must pause the system, and we must pause it now, to make these corrections.

In the absence of more refined and precise adjustments to hospital prices, the Ways and Means Committee did not support continuation of the scheduled transition to national rates. If we continue the transition, we will only make worse the distortions present in the system today which will lead to unnecessary and in some cases irreparable damage to our hospital system.

An extension of the PPS transition schedule will not increase Medicare outlays nor will it interfere with the positive incentives of prospective payment. It will however, provide for a series of midcourse corrections and for additional time to develop further refinements that increase payment precision and equity. The Ways and Means Committee's approach will simply provide for a fair evaluation of the PPS and gives us greater confidence that no hospitals is either penalized or rewarded on any other basis than its operational performance.

The gentleman from Louisiana would like to offer an amendment to allow for a 60-40 percent split in the system instead of 50-50 percent. The problem with this approach is that hospitals would have to adjust to a new payment rate this year and another again next year. The 50-50 percent in the bill maintains some stability and certainty at a time of major change in hospital reimbursement.

I urge support of the rule.

Mr. DERRICK. Mr. Speaker, I yield such time as he may consume to the gentleman from Missouri [Mr. CLAY].

Mr. CLAY. Mr. Speaker, I rise to express my concerns about the Pension provisions of this bill. On Tuesday I appeared before the Committee on Rules to oppose the request of the Committee on Ways and Means to have included as original text of H.R. 3128 their amendment relating to the single-employer termination insurance provisions of ERISA. These are the same provisions we heard about last week when we debated the rule on H.R. 3500. These are the provisions that the Ways and Means Committee was unsuccessful in getting offered as a substitute to the education and labor provisions in H.R. 3500.

Although neither my position nor the position of the Education and Labor Committee toward these amendments has changed since last week, there is one difference. Today these amendments are before the House in a procedurally protected manner.

Our objections to the Ways and Means amendments are based both on jurisdiction and substance. Since ERISA was enacted in 1974, the Committee on Education and Labor has had sole jurisdiction over the nonpremium aspects of title IV of ERISA. Title IV established the pension plan termination insurance system administered by the Pension Benefit Guaranty Corporation [PBGC]. The Committee on Ways and Means continues to assert that they have joint jurisdiction over these matters. That is simply untrue. Although the Parliamentarian has repeatedly confirmed that the Committee on Ways and Means does not have joint jurisdiction with our committee over these matters, they continue to insist that they do.

Their claim is based on an creative argument. Because the employer liability payments required under section 4062 of title IV are tax deductible by companies under Internal Revenue Code section 404(g), the Committee on Ways and Means argues that they should have an equal say when our committee, in an exercise of its legitimate jurisdiction, changes that liability. Now remember, the Committee on Ways and Means is not powerless in this situation. If they did not agree with the changes our committee made, they always would have a remedy. There is no dispute that Ways and Means could, in fact, exercise its own jurisdictional prerogatives and simply amend section 404(g) and we could not stop them.

I raise this point merely as a word of warning to other committees. The current jurisdictional dispute between Education and Labor and Ways and Means may not be of particular interest to you now. But if the argument of the Ways and Means Committee were to prevail at some time in the future, it could have significant long-range ramifications for many other committees. If programs within the sole jurisdiction of your committee have an effect on tax revenues, no matter how indirect, the Committee on Ways and Means could begin to assert jurisdiciton over them as well.

One of my most serious objections to this rule is that at some later point it might be erroneously characterized as endorsing the claim of the Committee on Ways and Means to joint jurisdiction over title IV. In fact, the chairman of the Ways and Means has already laid the groundwork for that erroneous characterization in his statement to the Committee on Rules and in his statements here today. He argues that it is "only fair" that the Ways and Means amendment be part of H.R. 3128, since the Education and Labor provisions were part of H.R. 3500. I appreciate the statements made today by members of the Committee on Rules confirming that in their view the Committee on Education and Labor clearly has primary jurisdiction over these matters and indicating that the adoption of this rule should not be construed in any way as an endorsement of the Committee on Ways and Means jurisdictional claim.

If we adopt the rule and pass H.R. 3128 today, as I assume we will, the practical result is a weakened House position in conference on this issue. The House will have two different sets of provisions dealing with the same subject matter in two different reconciliation bills. Although we have been assured that both H.R. 3500 and H.R. 3128 will be conferenced together, because

both provisions will represent the House position in conference, confusion will inevitably result.

The Senate bill is similar to H.R. 3500 in many material respects. The bills are similar because they have both been developed over a substantial period of time, with the input of many outside parties, and are as close to a consensus bill that Congress is likely to achieve on these complicated issues. On the other hand, the Ways and Means amendment is fundamentally different from either of the other two bills. Instead of narrowing the differences to facilitate the resolution of the issues in conference, I fear that the effect of passing H.R. 3128 will be to make the conferees less likely to reach agreement in a reasonable period of time.

Because of the confusion and practical difficulties engendered when substantially different House provisions addressing the same subject matter exist, the House should only resort to that approach in very limited instances. I believe the existence of dual House provisions might be reasonable only if the jurisdiction over the issues is clearly joint and only if both committees had spent a considerable amount of time examining the issues and had simply agreed to disagree over the best approach to solving the problems. Neither is the true, however, in the case before us today.

It is well established that no joint jurisdiction exists over the reforms. In addition, it is clear that only one committee has spent a considerable amount of time examining these issues. The provisions adopted by the House in H.R. 3500 are the product of over 4 years of bipartisan effort by the Committee on Education and Labor. They have been widely and publicly debated and are supported by the administration, organized labor, and retiree groups. Business does not oppose them. On the other hand, the Ways and Means amendment contained in the bill before you today was adopted hurriedly, with no opportunity for public discussion and debate, with no hearings, and after the chairman of the Committee on Ways and Means admitted before Committee on Rules that as of September 19, 1985, his committee had not considered the question of reforms at all.

It is hard to imagine how either fundamental fairness or good public policy could support the need for a second House position on reforms to the single-employer termination insurance program. Yet that is the situation we find ourselves in today.

In addition to my concerns about this rule based on jurisdictional matters, I also have serious substantive questions about these specific proposals. The longer you examine the Ways and Means approach to the serious problems facing the termination insurance system, the clearer it becomes that their provisions are substantively flawed. Even a first reading of the text reveals that the provisions are, at best, a thinly disguised attempt to establish the legitimacy of their jurisdictional claims over provisions in ERISA which are not within their jurisdiction.

The current statutory framework for administering ERISA is well established. The Secretary of Labor administers title I and the Secretary of Treasury administers title II. In many instances, title I and title II are identical. The existence of these "mirror image" provisions mean that ongoing pension plans are currently subject to dual regulation. The Secretary of Labor administers title I and the Secretary of Treasury administers title II. Dual jurisdiction has caused immeasurable conflict and confusion over the years and has led many current and former Members of Congress and many in the private sector to call for the establishment of a single agency to administer ERISA. Presidential Reorganization Plan No. 4, adopted by Congress in 1978, was an attempt to bring some order into the chaos of dual jurisdiction. It divided certain ERISA responsibilities for ongoing pension plans between the Departments of Labor and Treasury to minimize the overlapping and inconsistent administration of the law. Although the situation has improved somewhat since Reorganization Plan No. 4 was adopted, many problems still remain.

Once a pension plan is terminated, however, sole administration of the ERISA provisions has been the responsibility of the Pension Benefit Guaranty Corporation ever since ERISA was enacted in 1974. There never has been any complaint or concern raised about that arrangement.

The Ways and Means proposal contained in H.R. 3128, however, would, for the first time, subject terminated plans to dual regulation: One set of rules administered by the PBGC and the other by the IRS. The public policy reasons for this change are unknown. It seems like a step backward to me to drag terminating plans into the morass of dual jurisdiction for no apparent policy reason. From a public policy point of view, the Ways and Means approach makes no sense. It appears to be a solution in search of a problem. Rather the purpose of this ill-conceived change in ERISA administration can only be understood when viewed in the context of a method to strengthen the Tax Committee's arguable jurisdictional claim over the reforms.

Nevertheless the Ways and Means Committee touts this bill as a "reform" and a solution to the PBGC's problems. Ironically the administration does not think it is much of a solution. In fact, in certain instances, it puts the PBGC in a weaker position than the Agency would be under current law.

Instead of shoring up the financial condition of the PBGC by closing the loopholes that all agree exist, the Ways and Means bill fails to deal with most of the major loopholes at all. In addition, PBGC would be in a worse cash poisition than it is under current law were H.R. 3128 to become law. Currently when an underfunded single-employer pension plan terminates, the PBGC is entitled to claim up to 30 percent of the employer's net worth immediately to offset the liability the PBGC will pick up to guarantee benefits under the plan. Of course, PBGC may agree to alternative terms and conditions to collect this amount, but it has the statutory right under current law to demand the 30 percent in a lump sum when the plan terminates.

Under the Ways and Means bill, the employer has an absolute right to demand payment terms under which the liability to the PBGC can be paid over a 5- or 15-year period. If 5 years is chosen, PBGC gets nothing up front. If 15 years is chosen, PBGC also gets nothing up front. Thus in those cases, the PBGC would be in a worse position than it is now to collect a portion of the liability immediately.

Second, the Ways and Means bill contains an interesting provision which relates to evasion of liability. This, too, represents a serious undercutting of the PBGC's present position. In litigation under current law, the PBGC has assessed employer liability against an employer that engaged in a spinoff transaction, a principal purpose of which was to evade liability to the PBGC for an underfunded plan termination. Liability was assessed as if the spinoff had never occurred. H.R. 3128 would explicitly limit PBGC's ability to assess such liability in the future to cases in which the evasion was "fraudulent." I have a number of problems with such a provision. First, the burden of proof for the PBGC to establish in a court of law that an evasion of liability was fraudulant is almost insurmountable. Second, if you think about this provision for more than 10 seconds, you will see how easy it would be to get around it. If a company could only be held liable if its attempt to evade liability was "fraudulent," why wouldn't every company simply issue a press release at the time that it undertook at transaction to evade liability which said: "Company XYZ is today selling subsidiary ABC to evade its liability to PBGC". No court in this country would say that such an action was fraudulent. On the contrary, the company was completely honest and open about what it was doing and why. Yet the PBGC would be stuck with the unfunded liability. Why the Committee on Ways and Means wants to protect companies that try to evade their liability to the PBGC is beyond me.

Another serious flaw in the Ways and Means bill is that access to the PBGC insurance program is not limited to companies in genuine financial hardship. By not adopting a similar approach to that found in the Education and Labor provisions in H.R. 3500, there is very little protection for the PBGC from the abusive situation under current law in which highly profitable companies can dump their liabilities on the PBGC, and thus pass on the cost of paying for their underfunded pension plan to the rest of the premium payers.

My greatest concern with the Ways and Means amendment, however, is that it does not protect retirees. Under current law, a perfectly healthy employer is able to cut back on the pension benefits promised to retirees when a plan is terminated. This abuse is prohibited both under H.R. 3500 and the Senate bill, but is allowed to con-

tinue under the Ways and Means bill before us today. The administration and a unanimous Education and Labor Committee have supported closing this loophole. So has the Senate. Apparently the only people who see nothing wrong with this practice are the members of the Committee on Ways and Means who support H.R. 3128. There is no reason to continue allowing healthy employers to reduce substantially the pension benefits of employees who have worked long and hard to earn their pensions. The Ways and Means bill fails to address this abuse at all.

In conclusion, I would only reiterate my opposition to the ERISA amendments contained in H.R. 3128 on both jurisdictional and substantive grounds. I believe the amendments contained in this bill far exceed any jurisdiction the Ways and Means Committee might have over these issues. In addition, even if they had jurisdiction over the matters in the bill, I would have serious reservations about it because it is a bad bill. I thought the purpose of reform was to make things better. These so-called reforms would do nothing to help retirees and actually make things worse for the PBGC. That's not my idea of reform.

Mr. LATTA. Mr. Speaker, I yield 1½ minutes to the gentleman from Nebraska [Mr. DAUB].

Mr. DAUB. Mr. Speaker, I appreciate the time and will try to make my remarks succinct.

We have made a great deal of progress in instilling economic common sense in the ways Medicare pays hospitals. As you know, the Medicare hospital payment system is now based on a prospectively determined rate of payment with built-in incentives for cost control and efficient management of resources, rather than cost reimbursement.

Since we made the change, the performance of the industry has been remarkable, with the expenses rising by only 4.5 percent in 1984 as compared to 10.2 percent in 1983, while at the same time the cost per case declined nearly 3 percent and admissions and lengths of stay dropped about 4 percent.

Let me remind my colleagues as well that profits during this same period of time were up for hospitals, and their return on their equity in their investment rose at the same time.

We, I think as well as others, have considered many other factors that are at play, including pressure from the business community and private insurers.

So what I want my colleagues to do is to vote no on this rule for the very simple reason that some 25 States have committed themselves under the prospective payment system to make the efficiencies that are necessary, and we should not penalize them by essentially going backward in our attempt to go to one national rate for prospective payments under the diagnostic-related group program. Let us stay with the program.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from Ohio [Mr. KINDNESS].

Mr. KINDNESS. Mr. Speaker, I thank the gentleman for yielding this time, and I would like to draw to the attention of my colleagues the fact that this is the only opportunity that you will have to express yourself on the point I am about to raise; it is the only opportunity, and that is to vote no on the previous question.

The issue involved is whether the United States has the constitutional authority to impose a tax on the States. We are accustomed to thinking of it under this bill in section 123, the bill that would be considered under the rule, as just bringing new State and local government employees under the coverage of Medicare. That involves a tax upon the States.

That is not within the powers of the United States that are enumerated in the Constitution—so where does the power come from? It does not come from the 16th amendment which allows the income tax to be imposed. That is a tax on individuals.

There is no power in the Constitution for the United States to impose a tax upon the States. The 10th amendment to the Constitution makes it clear that those powers not enumerated and given to the United States are retained by the States, and there is nothing about the authority of this Congress to impose a tax on the States.

Where we have a bill like this one that is increasing spending, putting in new spending, somewhere you have to make up for it, and the idea was, I suppose, to take in section 123 new coverage under Medicare and extend it to State and local government employees, and it would not work. The power to tax is the most basic power of any governmental entity. Without that power, other governmental powers mean very little or nothing.

Imposing a tax on the States goes right to the very basis of whatever sovereignty the States have maintained under our Constitution, and you may argue about how much that is, but this Congress has no power to impose a tax upon the States in this manner.

I urge you to vote no on the previous question so that we may debate that issue.

Mr. LATTA. Mr. Speaker, I yield 1½ minutes to the gentleman from New Jersey [Mr. SMITH].

Mr. SMITH of New Jersey. Mr. Speaker, I rise against the rule and ask Members to support the gentleman from Ohio [Mr. LATTA] in his efforts to make five amendments in order, and thus urge a no vote on the previous question.

Mr. Speaker, I had planned to offer an amendment that I am sure many Members would have strongly supported. My amendment, which was voted down eight to five by the Rules Committee, would permit payment for therapeutic footwear under Medicare part B for individuals with severe diabetic foot disease.

According to information compiled by the American Diabetes Association, this amendment would result in net savings of $214 million over 3 years, $86 million in the first year alone. Savings would occur through decreased need for costly amputation versus the need of less-expensive therapeutic shoes.

Mr. Speaker, each year, up to 25,000 diabetics 65 or older are required to have lower extremity amputations. The American Diabetes Association has estimated that 40 percent of those amputations could be avoided, or simply not occur, if proper shoes were available. The fact of the matter is, while Medicare reimburses the cost of amputation, which is approximately $15,000 per patient, it does not provide reimbursement for the footwear which would prevent the amputation. My amendment would simply provide for this.

Mr. Speaker, I believe that this amendment should be made in order. Certainly, the amendment the gentleman from Ohio [Mr. LATTA] would offer would include this, and I urge that we defeat the previous question.

Mr. LATTA. Mr. Speaker, I yield 1 minute to the gentleman from Georgia [Mr. SWINDALL].

Mr. SWINDALL. Mr. Speaker, I rise in opposition to the rule because the net effect of the passage of this rule will be to create yet another Federal cause of action—specifically, a Federal cause of action for medical malpractice.

The reason that I am concerned about this is that I further believe that the net effect will be to lower the quality of Medicare recipients' health attention in this country.

During the hearings in the Judiciary Committee, my amendment first passed by a show of hands and by voice vote, only to be defeated 18 to 16 by a rollcall vote.

What concerns me about that is the only reason it was defeated by a rollcall was the use of proxies. For too many years, we have allowed the will of the majority to be frustrated by loading these committees and the rules that are allowing these proxy votes.

To further not allow this amendment to frustrate this creation of another Federal cause of action I think would be a grave mistake. The net effect would be an increase in medical malpractice, and ultimately the increase of the cost of medical procedures in this country.

I urge, therefore, the defeat of this rule.

□ 1255

The SPEAKER pro tempore. The gentleman from Ohio [Mr. LATTA] has 4 minutes remaining, and the gentleman from South Carolina [Mr. DERRICK] has 7 minutes remaining.

Mr. LATTA. Mr. Speaker, I yield 1 minute to the gentleman from Connecticut [Mr. ROWLAND].

Mr. ROWLAND of Connecticut. Mr. Speaker, I also rise in opposition to this rule. I am troubled that there must be an up or down vote on this bill, since very significant policy changes relating to a major welfare program are contained in title III.

These changes do not constitute deficit reduction, but rather they will actually cost $1 billion in new spending each year. One provision will virtually gut the Michel amendment, adopted several years ago by this Congress. This was aimed at reducing welfare error rates and improper payments.

This was done by imposing fines and sanctions against State AFDC programs which have high error rates due to program mismanagement and fraud. These high error rates represent hundreds of millions of dollars in improperly paid welfare benefits to those who are legally ineligible.

All we want to do is combat welfare fraud and abuse so that those scarce dollars can indeed go to those who are truly needy. Like other Members, I have been pressured by my State welfare commissioner and the welfare lobby to ease up on these quality controls.

In Connecticut, for example, we have had terribly high error rates. At one point, one in six payments was incorrect.

I urge rejection of the previous question.

Mr. LATTA. Mr. Speaker, I yield the balance of my time to the gentleman from Illinois [Mr. MICHEL].

Mr. MICHEL. Mr. Speaker, this rule represents another effort by the majority in this body to ram big spending proposals down our throats.

Prohibiting us a separate vote on the spending increases in this bill is as much as a gag order, and that's what the Rules Committee has done. They have denied us a vote, because they know we may win it and God forbid we really cap spending around here.

Last week, this House passed a so-called deficit reduction bill that included $3.5 billion in spending increases. Now, we are about to take up a second deficit reduction bill that includes another $1 billion in spending increases. And because we came within 10 votes of knocking out the spending add-ons in last week's bill, the majority obviously doesn't want to take any chances this time around, so they seek to prevent us from even offering amendments to eliminate the spending increases.

We need to defeat the previous question so that a substitute rule can be offered making such amendments in order.

Not only is it important from a budgetary standpoint that we eliminate the program expansions, but it is equally important, on grounds of simple efficient management of the taxpayers' money!

Hundreds of millions of dollars are being wasted every year in the AFDC Program due to erroneous payments by the States.

In an effort to force the States to tighten the administration of this program and reduce the waste, we enacted legislation I drafted a few years ago when I was serving as our ranking member of the HEW Appropriations Subcommittee.

We wrote into the law established error rates requiring the States to meet those standards. If they failed to meet the goal—they were penalized.

The standards and accompanying penalities are working. The latest figures show that the national error rate is now 6.5 percent, the lowest rate since the collection of statistics began some 10 years ago. Nevertheless, it is still high, with some 39 States currently not meeting their targets.

We need to keep their feet to the fire. But what does this bill do? It relaxes the standards and reduces the penalties. CBO says that these changes will reduce penalties by 75 percent.

CBO estimates that, under this bill, the Federal Government will be forced to "eat" an additional $500 million in waste committed by the States between 1986 and 1990. The Department of Health and Human Services estimates that the Federal loss will be considerably more.

When we have an opportunity to save Federal dollars with efficiency rather than the meat ax, we best not squander that opportunity. They don't come our way that often.

We have no choice but to defeat the previous question so that amendments can be offered eliminating the spending add-ons and striking the provisions that are so damaging to the battle against waste.

Mr. DERRICK. Mr. Speaker, I yield myself such time as I may consume.

We passed a Budget Act back in 1974 that began in 1975; we all had great hopes that that was going to bring some fiscal responsibility to this Government. It has not.

We may pass Gramm-Rudman tomorrow. We are in hopes that that is going to bring some fiscal responsibility to this Government. Under the same conditions as the Budget Act, it will not.

The reason it will not is because we once again, as we did with the Budget Act, are looking for a mechanism so that we as Members will not have to make the hard decisions that it takes to cut this deficit and to hopefully, one day, balance it.

We can vote for the budget resolution, as it passed by somewhat of a majority last time around; we can vote for the conference, we can vote for all the balanced budget amendments and cosponsor them and do all that sort of thing, but we really are not denying those constituencies that want additional money.

I do not mean to be pointing to the other side of the aisle; I include both sides of the aisle in this. There is probably one vote or two that you get in the course of a session that you actually say "no" in real terms; and that is enforcement of reconciliation under the Budget Act.

We passed H.R. 3500, which was the 10 committees on the House on reconciliation. This is reconciliation on behalf of the Committee on Ways and Means. The budget conference report instructed the Committee on Ways and Means that they were to create $21.2 billion in savings.

Through very diligent work on their behalf, they have not only created $21.1 billion of savings, they have exceeded that amount in savings. So they have done more than that which we asked.

I suggest to the membership on both sides of the aisle very strongly that we vote for this rule so that we may go ahead today with the bill of reconciliation by the Committee on Ways and Means, which will mean over $21 billion of savings to the American taxpayer.

Mr. Speaker, I move the previous question.

The SPEAKER pro tempore. The question is on ordering the previous question.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. LATTA. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device and there were—yeas 219, nays 205, not voting 10, as follows:

NOT VOTING—10

Addabbo	Martinez	Parris
Brooks	McCollum	Tauzin
Manton	Nelson	
Marlenee	O'Brien	

□ 1320

Mr. MOLLOHAN changed his vote from "yea" to "nay."

Mr. WALGREN changed his vote from "nay" to "yea."

So the previous question was ordered.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The question is on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore (Mr. SMITH of Iowa). Pursuant to House Resolution 301 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 3128.

□ 1322

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3128) to make changes in spending and revenue provisions for purposes of deficit reduction and program improvement, consistent with the budget process, with Mr. BARNARD in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Illinois [Mr. ROSTENKOWSKI] will be recognized for 30 minutes; the gentleman from Tennessee [Mr. DUNCAN] will be recognized for 30 minutes; the gentleman from California [Mr. WAXMAN] will be recognized for 30 minutes; and the gentleman from Illinois [Mr. MADIGAN] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Illinois [Mr. ROSTENKOWSKI].

Mr. ROSTENKOWSKI. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, H.R. 3128, the Deficit Reduction Amendments of 1985, contains provisions that are estimated to reduce the Federal deficit by $19.5 billion over the 3-year period from 1986 to 1988. This is all but $2.1 billion of the reconciled amount for the Committee on Ways and Means contained in the fiscal 1986 budget conference agreement.

Last week, the Committee on Ways and Means reported an amendment to H.R. 2817, the Superfund Amendments of 1985, that will reduce the deficit over the 3-year period by an additional $3.1 billion. With this Superfund legislation, the Committee on Ways and Means will have exceeded its total reconciled amount.

We anticipate that our Superfund Revenue legislation will be considered by the House as a part of H.R. 2817, the Superfund authorizing legislation reported by the Committees on Public Works and Transportation, Energy and Commerce, Merchant Marine and Fisheries, and Judiciary.

Title I of H.R. 3128, as it is before the House, incorporates all provisions of H.R. 3290. H.R. 3290 contains all the Medicare provisions reported by the Committee on Ways and Means in H.R. 2128, as well as the Medicare and Medicaid provisions reported by the Committee on Energy and Commerce. In addition, H.R. 3290 incorporates amendments made by the Committee on the Judiciary to the provisions relating to treatment of emergency cases in hospital emergency rooms. The amendments contained in H.R. 3290 are estimated to achieve $10.5 billion in savings from 1986 to 1988.

Among other things, the provisions in H.R. 3290 establish the amounts physicians and hospitals can charge Medicare beneficiaries. Basically, these provisions will continue the current reimbursement rates for physicians and grant a 1-percent increase to hospitals. There will be enormous confusion with regard to how much a provider can charge a Medicare recipient, and what the reimbursement levels for fiscal 1986 will be, if we do not have the provisions in this bill enacted by November 15. For this reason, we need to complete action on this bill as soon as possible.

Title II of H.R. 3128 contains various budget-related trade provisions. It reauthorizes for 4 years the trade ad-

justment assistance programs for workers and firms adversely affected by increased import competition. These programs expire November 15.

The bill authorizes fiscal year 1986 appropriations for the U.S. Customs Service, the U.S. International Trade Commission, and the U.S. Trade Representative. The authorization includes restoration of the administration's proposed cut of 887 positions in the U.S. Customs personnel, which will increase Customs revenues by about $1.2 billion over the next 3 years.

Title II also provides for Customs user fees to be assessed on the arrival of commercial vessels, trucks, trains, private vessels, and general aviation, and on passengers arriving on commercial aircraft, trains, and vessels. This provision sunsets after 3 years, and should increase Customs revenues by about $545 million over the 3-year period.

Title III of the legislation contains several public assistance provisions that were carefully developed to address the alarming rise in the poverty rate in recent years, without significantly increasing costs. These provisions include a 2-year block grant program to assist States in preventing teenage pregnancies and providing services to teen parents so they will complete their education and avoid welfare dependence. There is also a requirement that all States implement the AFDC unemployed parent program; and amendments to the current AFDC quality control program that will reduce erroneous AFDC payments without unfairly penalizing States.

Title IV of the bill amends the railroad unemployment insurance program and the Federal Supplemental Compensation Program. The railroad unemployment repayment tax is increased and will result in about $200 million in additional revenues. The FSC amendments would provide unemployment benefits to certain National Guardsmen who lost such benefits because of service during a national disaster.

The revenue title of H.R. 3128 includes five provisions, which together would raise $7.6 billion in revenue through fiscal year 1988.

First, the bill includes a sense of the Congress resolution providing for an increase in the administration's proposed budget for the IRS. The funds will be used to increase computer capacity and to hire new employees who primarily process tax returns and taxpayer correspondence. The level of funds provided is consistent with the amount approved by the House Appropriations Committee.

Second, the bill makes permanent the present 16 cents per pack cigarette excise tax. Without this provision, the tax will revert to 8 cents per pack on November 15, 1985. The bill also dedicates 1 cent of the 16 cents to the tobacco support program.

Third, the bill will temporarily increase the manufacturers excise tax imposed on domestically mined coal. The administration requested this temporary increase because the black lung trust fund is experiencing an enormous deficit.

Fourth, the bill provides that tier I railroad retirement benefits be taxed in the same manner as ordinary pension benefits, to the extent they exceed benefits received by Social Security recipients.

Finally, section 505 of the bill temporarily increases to $8 the annual per participant premium to the Pension Benefit Guaranty Corporation [PBGC] for single-employer plans.

This premium increase sunsets after 3 years, which will give the committee time to study the possibility of replacing the present flat premium with a risk-related premium.

Title VI provides structural reforms of the single employer pension plan termination provisions of ERISA. This title is designed to ensure that employers may not easily terminate their underfunded pension plans and expect the Pension Benefit Guaranty Corporation to pick up the employer's unfunded liability. Under this bill, employers who terminate a plan and remain in business, remain liable for the guaranteed portion of their plans, unless they can demonstrate to the PBGC they are unable to satisfy their liability. This provision differs somewhat from the PBGC provisions agreed to by the Committee on Education and Labor, and approved by the House last week as part of H.R. 3500. I anticipate that the PBGC provisions of both committees will be considered together during the House/Senate conference on fiscal 1986 reconciliation legislation. I look forward to working with the members of the Committee on Education and Labor to fashion a bill that members of both committees agree will work.

Mr. Chairman, I urge the Members of the House to support this important legislation. As I stated at the beginning, it contains provisions that will reduce the deficit by $19.5 billion. In addition, it addresses a number of expiring provisions. We have already had to pass an emergency 45-day extension in order to keep current law in effect until November 15. If we are to prevent serious disruptions in the Medicare, trade adjustment assistance, and railroad unemployment programs, we must enact this legislation before that date.

I include in the RECORD at the end of my statement additional explanatory material. In addition, Mr. STARK, chairman of the Subcommittee on Health and Mr. FORD, chairman of the Subcommittee on Public Assistance and Unemployment Compensation, will provide a more detailed description of the Medicare and public assistance provisions contained in the bill.

DETAILED DESCRIPTION OF H.R. 3128

The medicare spending and revenue provisions approved by the Committee on Ways and Means are contained in title I. For purposes of consideration, the Rule has provided that H.R. 3290 will be considered as original text for Title I of H.R. 3128. H.R. 3290 incorporates the Ways and Means Committee reported medicare amendments, the Energy and Commerce Committee reported medicare and medicaid amendments, and the amendment reported by the Judiciary Committee relating to inappropriate hospital discharges.

The Committee succeeded in reducing medicare program spending over the next three years by over $10 billion while respecting the need to avoid increasing out-of-pocket costs to medicare beneficiaries. The Committee bill provides for a number of major improvements in the medicare program, while meeting the reconciliation target in this area.

The medicare provisions approved by the Committee on Ways and Means include the following:

The bill provides for a one percent increase in payments to hospitals under medicare for fiscal year 1986.

Add-on payments to teaching hospitals would be reduced to more closely reflect their actual costs.

Additional payments would be made to those urban hospitals with 100 beds or more that serve more than their share of low-income patients. We know these hospitals have higher costs and this adjustment is designed to compensate for those additional costs.

The transition to national rates under the prospective payment system would be delayed for one year. Hospitals would be paid on the basis of the present blend of fifty percent hospital-specific payment and fifty percent Federal DRG rate for an additional year.

The bill requires that a new gross wage index be applied for adjusting medicare hospital payments. The bill eliminates the requirement for retroactive implementation of the wage index.

Beginning October 1, 1986, return on equity payments would no longer be a medicare allowable cost for inpatient hospital services, and would be excluded from the base when capital is included in DRG payment rates. Beginning October 1, 1985, return on equity payments for hospital outpatient services and non-hospital providers would be reduced to one times the rate of return on the HI Trust Fund.

The bill would freeze, for one more year, medicare payments for nonparticipating physicians. The bill would also freeze the amounts these non-participating physicians are permitted to charge medicare beneficiaries. The current payment freeze on participating physicians under medicare would be lifted.

The bill provides for medicare coverage for state and local employees hired on or after January 1, 1986. The coverage extension is only for medicare and only for newly hired employees. Some 85% of these employees are expected to qualify for medicare through work outside government or through a spouse. By and large they will have paid far less in medicare taxes than other medicare beneficiaries. Equity requires that they pay the tax when the over-

whelming majority will become eligble for the benefit.

The bill incorporates amendments made by the Judiciary Committee in the hospital emergency patient 'dumping' provision. The bill provides that medicare participating hospitals and their employees would be required to provide appropriate medical screenings, stabilizing treatment, and transfers for all emergency cases. Hospitals that fail to meet these requirements would face exclusion from the medicare program, civil money penalties, and/or civil enforcement by aggrieved patients. Physicians who knowingly fail to meet these requirements would be subject to civil money penalties.

The medicare hospice benefit would become a permanent part of the medicare program. The daily payment rates would be increased for hospice care furnished during fiscal year 1986.

Group health plans provided by employers would be required to offer five-year continuation options to widowed, divorced or separated spouses and their dependent children, and to medicare ineligible spouses and their dependent children. After the five-year period, those individuals would have the right to convert to individual policies. The requirement that employers offer the continuation option would be a condition for the business tax deduction for their group health plans.

A more detailed description of the medicare provisions of the bill as approved by the Committee on Ways and Means and amended by the Committee on the Judiciary is provided at the end of this statement.

Title II of H.R. 3128 contains various budget-related trade provisions concerning the trade adjustment assistance programs, authorizations of appropriations for major trade agencies, and customs user fees. All of the provisions were the subject of hearings and through consideration by the Subcommittee on Trade and the full Committee.

Title II reauthorizes for four years trade adjustment assistance for workers and firms adversely affected by increased import competition. These programs expire November 14. Amendments would (a) extend program coverage to workers laid off from firms relocated overseas and to firms with production or sales losses in significant product lines, (b) extend the collection period for worker benefits and liberalize prior employment requirements, (c) remove matching share requirements for certain firm assistance, and (d) improve program administration.

The bill authorizes fiscal year 1986 appropriations for the U.S. Customs Service, the U.S. International Trade Commission and the U.S. Trade Representative. The authorization includes restoration of the Administration's proposed cut of 887 positions in the U.S. Customs Service plus an additional 800 front-line Customs personnel. The enhanced enforcement ability would result in an estimated net increase in Customs revenues of about $1.2 billion over the next 3 years.

Finally, Title II provides for Customs user fees to be assessed for 3 years on the arrival of commerical vessels, trucks, trains, private vessels and general aviation, and on passenger arriving on commerical aircraft, trains, and vessels. These fees which cover expenses incurred by the Customs Service in processing arrivals at ports of entry in the U.S. customs territory, would be deposited in a Treasury proprietary account. It is expected that these fees would result in increased customs revenues of about $545 million over the 3-year period.

Title III of the legislation contains the public assistance provisions of the bill. These provisions were carefully developed to address the alarming rise in the poverty rate in recent years without significantly increasing costs. The public assistance amendments are:

(1) A two-year block grant program to assist States in preventing teenage pregnancies and providing services to teen parents so that they will complete their education and avoid welfare dependence.

(2) A requirement that all States implement the AFDC Unemployed Parent program.

(3) Amendments to the current AFDC quality control program that will reduce erroneous AFDC payments without unduly penalizing States.

Title IV of the bill amends to the railroad unemployment insurance system and the Federal Supplemental Compensation program. The amendments increase repayments on the loans the railroad retirement system has made to the rail unemployment system, and provide for the prompt repayment of any new loans. The FSC amendments allow for the payment of these benefits to certain National Guardsmen who lost their benefits due to service during a major disaster.

The revenue title of H.R. 3128 includes 5 provisions, which together would raise $7.6 billion in revenue through fiscal year 1988.

First, the bill includes a "sense of the Congress" resolution providing for an increase in the Administration's proposed budget for the Internal Revenue Service (IRS). The Appropriations Committee also endorsed this recommendation in H.R. 3036. The funds would be used to increase computer capacity and to hire new employees, who primarily would process tax returns and taxpayer correspondence. This increase is necessary for efficient tax administration and collection of taxes owed to the government. It is important that the IRS be provided sufficient resources to accomplish its vital role in raising Federal revenues.

Second, the bill makes permanent the present 16-cents per pack cigarette excise tax. Without this bill, the tax would revert to 8-cents per pack on November 15, 1985. The present budgetary situation requires continuation of the revenues from the present cigarette excise tax. Because of its flat rate and the increase in cigarette prices, this tax is still effectively lower than when first enacted in 1951.

For the first 5 years, the bill would appropriate a portion of the cigarette excise tax increase to a newly-established Tobacco Equalization Trust Fund to supplement the funding provided by grower and other fees for the tobacco price support program.

Third, the bill would temporarily increase the manufacturers excise tax imposed on domestically mined coal. Revenues from this tax deposited into the Black Lung Disability Trust Fund.

Under present law, the rate of tax is the lesser of (1) $1 per ton for coal from underground mines and 50 cents per ton for coal from surface mines, or (2) 4 percent of the price for which the coal is sold. The tax rate on underground coal would increase to the lesser of $1.50 per ton or 6 percent of sales price from 1986 through 1990, $1.60 per ton or 6.4 percent of sales price from 1991 through 1995, and in 1996 revert to $1.50 per ton or 6 percent of sales price. The tax rate on surface coal would increase to the lesser of 75 cents per ton or 6 percent of sales price from 1986 through 1990, 80 cents per ton or 6.4 percent of sales price from 1991 through 1995, and in 1996 reverts to 75 cents per ton or 6 percent of sales price. The rates for 1986 and later years would not apply beginning two years after the year in which the indebtedness of the Trust Fund has been entirely retired (and no new debt had been incurred). At that time, the present law rates would be reinstated.

The Administration requested this temporary increase because the Trust Fund is experiencing a deficit. At the end of fiscal year 1984, the Trust Fund had a cumulative deficit of approximately $2.5 billion. Unless the present rates of the coal excise tax are increased, this deficit may reach $30 billion by 2010.

The Department of Labor estimates that these tax rate increases, coupled with other Labor Department proposals for a temporary cap on black lung benefit payments, would make borrowing from general revenues unnecessary by 1990 and may allow total retirement of all Trust Fund debt by the end of this century.

Fourth, the bill provides that tier 1 Railroad Retirement benefits would be taxed in the same manner as social security benefits to the extent they are equivalent to social security benefits. To the extent they are like private pension benefits, they would not be eligible for the special tax treatment accorded social security benefits.

Fifth, the bill would temporarily increase to $8 the annual per participant premium to the Pension Benefit Guaranty Corporation (PBGC) for single-employer plans. After 1988, the $8 premium would revert to its present $2.60 level under the bill.

PBGC was established in 1974 to administer a program of insurance for employee benefits under most tax qualified, private, domestic, defined benefit pension plans.

This temporary increase is in response to the Administration's request for a premium increase to cover projected claims, and the current PBGC deficit over a reasonable period of time.

Although the PBGC requested that the annual premium be increased for plan years beginning after 1985, the premium increase was made prospective because of the administrative burdens that would be imposed on plans if a retroactive increase were adopted. The PBGC has indicated that this brief deferral will not jeopardize benefits under the program.

The Committee agreed to limit the premium increase to a 3 year period. The reason for sunsetting the premium increase after 1988 is to allow the Committee sufficient time to study the feasibility of adopting a risk related premium; that is, a premium that reflects the different degrees of risk exposure imposed on the PBGC by employers with different histories and in different circumstances.

Title VI reforms the single employer defined benefit pension plan provisions of the Employee Retirement Income Security Act of 1974 (ERISA). The purpose of Title VI is to ensure that employers who terminate an underfunded plan retain more liability to the plan than under current law.

Section VI has a number of provisions to accomplish this objective.

1. SCOPE OF EMPLOYER LIABILITY

There would be no change in current law treatment of an employer who terminates a plan and goes out of business (i.e., liabilities would be limited to 30 percent of net worth).

An employer who terminates an underfunded plan, and does not go out of business would be liable to the Pension Benefit

Guaranty Corporation (PBGC) for the plan's guaranteed benefits, even if these exceed the current statutory maximum of 30 percent of the employer's net worth.

2. COLLECTION MECHANISM

The employer could elect to satisfy this liability in one of four ways:

(a) lump sum settlement, in which case no lien would be applied against the employer's assets;

(b) 5-year amortization of liability, in which case no lien would be applied against the employer's assets;

(c) 15-year amortization of liability, in which case the PBGC could apply a lien against the employer's assets. The PBGC could require other forms of employer security after regulations specify acceptable kinds of security; or

(d) negotiated settlement, in which case the employer could apply to the PBGC for terms of payment of liability, or for reduction or waiver of liability.

Failure to pay required amounts would be treated as similar to a violation of the minimum funding standard, that is, a payment deficiency would be subject to a 5 percent excise tax. If uncorrected within 90 days, the deficiency would be subject to an excise tax of 5 percent per month. The total excise tax imposed could not exceed 105 percent of deficiency. Payments to the PBGC would be credited, dollar for dollar, against the excise tax owed.

The interest rate applicable to the computation of amounts owed in any extended payment schedule would equal the prime rate (as determined under Internal Revenue Code section 6621(c)).

3. EMPLOYER AVOIDANCE AND EVASION

If within five years before a plan termination a corporation undertakes a transaction a principal purpose of which is to fraudulently evade liability to the plan, liability to the PBGC would be fixed on the corporation that fraudulently evaded such liability, and on all the members of that corporation's controlled group, determined as of the date of plan termination. This provision would be effective for transactions undertaken to fraudulently evade liability after the date of enactment.

4. MINIMUM FUNDING WAIVERS

The Internal Revenue Service would have authority to require that the employer provide security as a condition of granting a minimum funding waiver.

5. STUDY OF RISK-RELATED PREMIUM

The Treasury Department would study the feasibility of a premium that can be adjusted to reflect different risk exposure imposed on the PBGC by employers with different histories and in different circumstances.

6. EFFECTIVE DATE

These provisions would be effective for plan terminations for which notification was made after the date of enactment.

H.R. 3128—MEDICARE PROVISIONS APPROVED BY COMMITTEE ON WAYS AND MEANS

H.R. 3290 will be considered as original text for Title I of H.R. 3128 when it is considered on the Floor. H.R. 3290 incorporates the Ways and Means Committee reported bill (title I of H.R. 3128), the Energy and Commerce Committee reported bill and the amendment reported by the Judiciary Committee relating to inappropriate hospital discharges.

Described below are the provisions that were reported by the Committee on Ways and Means with the amendment by the Judiciary Committee incorporated.

Sec. 101. Hospital Rate of Increase.—The Secretary of HHS would be required to provide a 1% rate of increase to the diagnosis-related group (DRG) payments for fiscal year 1986. A 1% rate of increase would also be provided to prospective payment system (PPS)-exempt hospitals for fiscal year 1986.

Sec. 102. Hospital Transition to National Payment Rates.—The 50% hospital specific payment (HSP)/50% Federal DRG rate would be maintained for another year. The transition schedule therefore would be: FY 1986: 50% HSP/50% Federal DRG; FY 1987: 25% HSP/75% Federal DRG; FY 1988: 100% Federal DRG.

Sec. 103. Hospital Area Wage Index.—The Secretary of HHS would be required to implement the new gross wage index effective October 1, 1985. The requirement that the new wage index be retroactive to October 1, 1983, would be eliminated. The Secretary would be required to study and make a recommendation to the Congress on refining the area wage adjustment to reflect the higher wage costs incurred in core city areas relative to suburban areas of the same metropolitan area.

Sec. 104. Indirect Teaching Adjustment.—The indirect teaching adjustment would be reduced to 8.1% for fiscal years 1986 and 1987 on a variable or curvilinear basis. (CBO has estimated that the medicare per resident costs increase at a slower rate as teaching hospitals get larger.) When the disproportionate share provisions expire at the end of fiscal year 1987, the indirect teaching adjustment would rise to 8.7%. The Secretary would be prohibited from changing the manner in which residents' services to inpatients and outpatients are counted for the purposes of determining the indirect teaching adjustment. The provision would be effective for discharges on or after October 1, 1985.

Sec. 105. Disproportionate Share Adjustment.—The Secretary of HHS would be required to make additional payments to urban PPS hospitals with 100 beds or more serving a disproportionate share of low-income patients. The proxy measure for low-income would be the percentage of a hospital's total patient days attributable to medicaid patients (including medicaid-eligible elderly, i.e., medicare/medicaid crossovers).

The Federal DRG payment would be increased by 7 percent for each 10 percentage point increase in the proportion of low-income days to total days, above the minimum threshold of 15%. The maximum adjustment would be no greater than 16%. Approximately 850 hospitals would receive some adjustment under this proposal. A limited exceptions process would be established for urban hospitals with 100 beds or more. The Secretary would be required to make disproportionate share payments of 16% per DRG where a hospital can demonstrate that 30% of its revenue is provided by local or state governments for patient care for low-income patients not covered by medicaid. The provision would expire in two years. The provision would be effective for discharges on or after October 1, 1985.

Sec. 106. Osteopathic Referral Centers.—Certain osteopathic rural hospitals could qualify for status as rural referral centers under the medicare PPS program if they have at least 3,000 discharges in a year and meet all other requirements for rural referral center status.

Sec. 107. Direct Medical Education.—The Secretary would be prohibited from imposing a one-year freeze on medicare payments for the direct costs of medical education.

Sec. 108. Return on Equity for Proprietary Hospitals.—Beginning October 1, 1986, return on equity would no longer be a medicare allowable cost for inpatient hospital services and would also be excluded in determining DRG payment rates. Beginning on October 1, 1985, for outpatient departments and all other providers, the rate of return would be reduced to one times the average rate of return on the hospital insurance trust fund.

Sec. 109. Allow Continued Medicare Waiver for Certain Areas.—certain local medicare reimbursement waiver programs now conducted as research projects would be allowed to continue under conditions similar to those provided for States—basically that medicare payments be no more than they would be under the prospective payment system.

Sec. 110. New Jersey Medicare Reimbursement Waiver.—The test of whether medicare reimbursement based on New Jersey's State reimbursement control system is no more costly to medicare than payments under medicare's regular payment system would be applied over a four year, rather than a three year period.

Sec. 111. Certain Transfers of Ownership.—Where a State donates a hospital or skilled nursing facility to a nonprofit corporation, the basis for medicare capital-related costs to the new owner will be the lesser of the fair market value or the prior owner's historical cost (net of depreciation).

Sec. 112. Study of Outlier and Transfer Policy on Rural Hospitals.—The Secretary would be required to review the adequacy of payments under the prospective payment system's outlier and transfer policies to determine their impact on rural hospitals, with emphasis on those hospitals with less than 100 beds, and to report to Congress findings with recommendations to address these problems by April 1, 1986.

Sec. 113. Medicare Hospital Payment Information.—The Secretary would be required to provide, on a timely basis, all hospital specific payment information to the Prospective Payment Assessment Commission, to the Congressional Budget Office, and to the Committees with legislative jurisdiction over part A of medicare. The provider specific information would remain confidential and would be used for analysis of the impact of the PPS system on a state by state basis, SMSA or other basis.

Sec. 121. Hospice Extension.—The sunset provision of current law would be repealed. The daily payment rates would each be increased by $10.00 a day.

Sec. 122. Limit the Late Enrollment Penalty for Medicare Part A.—The part A premium penalty would be limited to 10% no matter how late an individual enrolled, and the period during which the penalty is paid would be limited to twice the number of years the enrollment was delayed. At the end of this period, the premium would revert to the standard monthly premium in effect at that time.

Sec. 123. Medicare Coverage for Newly Hired State and Local Employees.—Medicare coverage would be extended to all new State and local government employees. The hospital insurance portion of the FICA tax would be paid by the governmental entities and their employees. Effective date—employees hired on or after January 1, 1986.

Sec. 124. Responsibilities of Hospitals in Emergency Cases.—Three new requirements

would be established for medicare hospitals and employees, as follows:

a. Medicare Screening.—Requirement under which every patient who comes to a hospital emergency department for examination or treatment would be provided an appropriate medical screening.

b. Necessary Stabilizing Treatment.—Within their capacities, hospital emergency departments must provide appropriate treatment to stabilize patients who have emergency medical conditions and to provide treatment for patients in active labor, or provide for appropriate transfers.

c. Prohibiting Inappropriate Transfers.—The transfer of a patient with an unstable emergency medical condition would be prohibited unless (1) the benefits of the transfer outweigh the risks, and (2) the transfer is an appropriate transfer (that includes the transfer of appropriate documents) and is accomplished in an appropriate manner.

d. Penalty.—Failure to meet these requirements would subject the hospital to denial of medicare participation, civil monetary penalties, as well as civil enforcement by aggrieved patients.

In addition, a responsible physician who knowingly fails to meet these requirements would be subject to civil monetary penalties. These provisions would not pre-empt stricter state laws.

Sec. 131. Extend the Working Aged Provision.—The working aged provision would be amended by removing the upper age limit, thereby extending its applicability to people aged 70 and above.

Sec. 132. Health Maintenance Organization Technical Amendments.—Technical amendments relating to health maintenance organizations (HMOs) and competitive medical plans (CMPs) would: a) clarify financial liability for patients hospitalized on the effective date of enrollment/disenrollment; b) make disenrollments effective with the first day of the first month following the month in which the disenrollment request was made; and c) require all TEFRA HMO/CMPs to submit all marketing materials to HCFA for approval at least 45 days before issuance. The HMO/CMP could assume approval in the absence of a response from HCFA within the 45 day period; d) require the Secretary to publish the AAPCC annually, no later than September 7.

Sec. 133. Evaluation of Preadmission Certification Programs.—The Secretary would be required to evaluate the effectiveness of the PRO 100% preadmission certification programs in comparison with programs that require less than 100% preadmission certification, and to consider the extent to which part B carriers or private entities might perform prior approval activities in outpatient and ambulatory settings more efficiently and effectively than PROs. Furthermore, the Secretary would be required to evaluate the feasibility of extending the PRO prior approval activities to outpatient and ambulatory settings. The Secretary would be required to report findings to Congress by December 1986.

Sec. 134. End Stage Renal Disease Networks.—The Secretary would be prohibited from dismantling ESRD networks, and from consolidating their organization and functions with those of any other entity, such as a Peer Review Organization.

Sec. 135. Extension of certain medicare municipal health services demonstration projects.—The Secretary would be required to extend for three more years medicare health maintenance organization demonstration waivers for three municipal health services HMO projects jointly sponsored by the Robert Wood Johnson Foundation and the Department of Health and Human Services.

Sec. 136. Technical Corrections.—Medicare technical corrections relating to the working aged provision and other minor technical corrections.

Sec. 141. Physician Fee Freeze Extension.—For fiscal year 1986, any physician who signs a participation agreement effective for the year beginning October 1, 1985, would receive an increase in medicare payments. For any physician who does not sign a participation agreement, the current 15-month freeze on medicare payments would be extended for 12 months, beginning October 1, 1985. The current prohibition on increases in actual charges of all nonparticipating physicians would also be extended for 12 months, beginning October 1, 1985. Both participating and nonparticipating physicians would be given an increase in medicare payments on October 1, 1986; however, increases for nonparticipating physicians would be lagged one year behind those of participating physicians. A number of incentives for participation are included.

Sec. 142. Physician Payment Arm of PROPAC.—The Director of the Congressional Office of Technology Assessment would appoint to the Prospective Payment Assessment Commission two additional members to provide representation for rural hospitals and for nurses. In addition, the Director would appoint six new members to comprise a physician payment unit, which would function as a subcommittee of the Commission. The chairman of the Commission would have discretion as to the allocation of other members of the Commission between the physician and hospital subcommittees.

The mission and duties of the physician subcommittee would be to make recommendation regarding medicare physician payment. Its ongoing duties would be to make recommendations regarding adjustments to reasonable charge levels for physician services, and/or structural changes in the medicare physician payment mechanism. The physician subcommittee would advise the Secretary on the development of a fee schedule based on a relative value scale (RVS), to be implemented by October 1, 1987.

Sec. 143. Change the Calculation of the Medicare Part B Premium.—The temporary provision of law under which enrollee premiums are to produce premium income equal to 25% of program costs for elderly enrollees would be extended for one additional year (1988).

Sec. 144. Hospital-Based Physicians.—On October 1, 1985, participating hospital-based physicians (HBPs) whose compensation-related charges were frozen as part of the general medicare fee freeze would, like other participating physicians, receive increases in their medicare payment based on their actual charges. Participating HBPs would receive increases that reflect charges that they made during the same base period used to update other participating physicians' charges (April 1984-March 1985). Nonparticipating HBPs would receive payments that reflect their charges during April 1984-March 1985, but deflated to approximate 1982 charges. This is the same period on which other nonparticipating physicians' payment is based. On October 1, 1986, participating and nonparticipating HBPs would be treated the same as all other participating and nonparticipating physicians.

Inherent reasonableness.—In order to prevent arbitrary application of the "inherent reasonableness" clause (already in regulations), the Secretary would be required to promulgate regulations which specify explicitly the criteria of "inherent reasonableness." The Secretary would be directed to correct both excessive and deficient charge allowances in accordance with these regulations. The regulations which define "inherent reasonableness" would extend to all part B reasonable charge reimbursement.

Sec. 145. Occupational Therapy Services.—Medicare coverage would be extended to occupational therapy services provided (a) in skilled nursing facilities (when part A coverage has been exhausted), (b) in clinics, rehabilitation agencies and (c) by therapists in independent practice (subject to the same annual $500 limit on incurred expenses applicable to physical therapy services).

Sec. 146. Reimbursement for Rented Durable Medical Equipment.—New medicare reimbursement limits would be imposed on rented durable medical equipment. During fiscal year 1986, medicare customary and prevailing charges for rented durable medical equipment would be allowed to increase by only one percent. Thereafter, medicare allowable charges for both rented and purchased durable medical equipment would rise no faster than the CPI. Medicare payment for rented equipment would only be made on the basis of mandatory assignment; i.e., the supplier would be required to accept medicare's allowable charge as his full charge and could collect from the beneficiary no more than the applicable deductible and coinsurance.

Sec. 147. Medicare's Reimbursement of Assistant Surgeons During Cataract Operations.—The Secretary would be required to establish national guidelines to prohibit medicare reimbursement for assistant surgeons' charges in connection with routine cataract operations performed on either an inpatient or outpatient basis. The assistant surgeon would be prohibited from billing medicare or the beneficiary for services that did not receive prior approval. The Secretary would have authority to enforce this provision by invoking the penalty provisions that apply with respect to violations of the fee freeze.

Sec. 148. Prosthetic Lenses.—Medicare reimbursement for prosthetic lenses would be limited as follows: (a) for cataract eyeglasses, one replacement each year; and (b) for cataract contact lenses, one original and two replacements per eye the first year after surgery and two replacements per eye each subsequent year. The Secretary would be required to apply an "inherent reasonableness" test in determining reimbursement amounts for lenses and to determine separately the reasonable charge for the related professional service.

Sec. 149. Preventive Services Demonstrations.—The Secretary of HHS would be directed to establish demonstration projects in at least five states, under the auspices of schools of public health, to determine whether and under what conditions it would be cost-effective to include preventive services as a medicare benefit.

Sec. 181. Private Health Insurance Continuation.—The business tax deduction for a group health plan would be denied any employer who fails to include in the plan a continuation option to (1) a widowed spouse and dependent children, (2) divorced or separated spouse and dependent children, or (3) medicare ineligible spouse and dependent children. A five-year continuation

option would be available to the above groups after which time they would be offered the right to convert to an individual policy. The coverage would be identical in scope to the coverage provided under the group plan to similarly situated individuals in the group. The insured spouse would be required to pay both employer and employee share of the premium costs, although the employer could assume the employer share. Coverage would be cancelled during the five-year period if the employer stopped offering group health insurance, the insured spouse did not pay the premiums or became covered under another group policy or medicare, or the insured spouse remarried.

Mr. Chairman, I reserve the balance of my time.

Mr. DUNCAN. Mr. Chairman, I yield myself such time as I may consume.

□ 1335

Mr. DUNCAN. Mr. Chairman, this bill was reported out of the Ways and Means Committee on a 24-to-14 vote.

We Republicans obviously favor deficit reduction. We just think this bill is the wrong way to go about it. We might not all oppose a particular part of the package, but we do agree in opposition to the whole.

We concede that H.R. 3128 does make some justifiable deficit reductions. Many members—not all—generally accept the amount of spending cuts allowed through the Medicare provisions. Many others approve of the increase in customs personnel, with the hope this would enhance efficiency of the service, especially in the commercial sector, and add to customs revenues over 3 years by about $1.15 billion. Comparable member support exists for the bill's increase in Internal Revenue service positions, on the main grounds that revenues would be boosted by about $1.245 billion over 3 years and that tax return processing would be improved.

Virtually all of us on the committee could agree, I think, that one of the strongest features of the bill is the language relative to the Pension Benefit Guaranty Corporation. We believe these provisions, one of which would increase for 3 years the employer premiums sufficiently to correct a serious unfunded liability, would put this extremely important pension program on sounder ground. If that proposition were put to us separately, we would give it strong backing.

Unfortunately, the PBGC portion of the bill is surrounded by provisions which would: First, expand spending for the Aid to Families With Dependent Children [AFDC] Program; second, weaken the AFDC quality control effort; third, create a new, $150 million scheme of Federal grants to States for teenage pregnancy prevention services and counseling; and fourth, continue trade adjustment assistance [TAA], which was scheduled to close at the end of the late fiscal year.

With respect to expansion of AFDC, the bill would cost about 300 million Federal dollars per year by 1989, and require all States to pay welfare benefits to certain two-parent families. As to the teenage pregnancy provisions, we recognize this as a serious social problem, but we doubt that merely throwing Federal money at it will help bring about a responsible solution. As for the TAA Program, the Jobs Partnership Training Act provides much the same set of services, and we really do not need more duplicative programs.

In summary, Mr. Chairman, we are pleased that the Committee on Ways and Means found $19 billion in savings, but we are unhappy about the Federal spending increases and program expansions which this bill would provide. H.R. 3128 has a little something each one of us is forced to oppose.

Mr. JEFFORDS. Mr. Chairman, will the gentleman yield?

Mr. DUNCAN. I yield to the gentleman from Vermont.

Mr. JEFFORDS. I thank the gentleman for yielding to me.

Mr. Chairman, I rise in opposition to title VI. As I stated in connection with the rule on this bill, I have several reservations regarding the ERISA single employer termination insurance provisions that have been introduced.

These provisions were asked to be included only after hasty action that precluded debate. It is regretful that the repeated attempts over the past several years by the members of the Committee on Education and Labor to obtain the full participation and cooperation of the Committee on Ways and Means in fashioning a shared solution to the critical financial situation facing the Pension Benefit Guaranty Corporation [PBGC] were not more successful. As a result this body is now faced with the prospect of adopting dual approaches to the restoration of PBGC's fiscal health. The Committee on Education and Labor's provisions were adopted earlier as part of H.R. 3500, the Omnibus Budget Reconciliation Act of 1985.

There can be no mistaking the relevancy that the title IV ERISA changes under H.R. 3500 have to deficit reduction. The intent and the effect of the provisions in the bill now under consideration is not at all clear. The PBGC Single Employer Program had a $462 million deficit as of September 30, 1984, and a negative cashflow. The deficit continues to grow, especially when the roughly $160 million unfunded liability of one large plan that was recently terminated is taken into account. If recent news accounts of the finances of certain companies can be believed, absent the final enactment of the reforms contained in subtitle C of H.R. 3500, the PBGC deficit could easily be expected to triple in size to over $1½ billion. As described by Secretary Brock, the reforms will have a direct and substantial effect on the Federal deficit and thus, are clearly germane to the budget process.

They are inextricably intertwined with the premium rate proposal; and their adoption would lead to a significant decrease in payments from the PBGC's revolving fund (and, hence, to reduce outlays in the Federal budget). The PBGC estimates that approximately 20 percent of its claims to date have resulted from abuses of the sort addressed by the reforms. The present value of these claims is about $300 million, representing outlays averaging $35 million per year over the next 20 years. Without the proposed reforms, abusive claims will continue in the future and will probably increase as a result of recent financial activities, including takeover, merger, and leveraged buy-outs.

The premium increase to $8.50 contained in subtitle B of H.R. 3500 and the reforms in subtitle C, when considered together, are estimated by the Congressional Budget Office to result in a reduction in Federal outlays of about $666 million over the next 3 fiscal years—1986–88.

The other body has also included similar ERISA title IV single employer changes in its reconciliation bill. Given the foreknowledge of the number of differences between the two measures and the inherent complexity of ERISA, perhaps it is not an overstatement to observe that an exceptional level of cooperation and care will be required in conference, if the final product is to stand the test of time and not contain inadvertent oversights. In this connection I would encourage the Pension Benefit Guaranty Corporation to offer the conferees its close cooperation and expertise toward this end.

In order to contrast the provisions of H.R. 3500 adopted earlier by the House with those taken up today, I offer the following analysis.

Consistent with the goals originally proposed to the Congress by the Pension Benefit Guaranty Corporation, the single employer termination insurance provisions under title III of H.R. 3500 are intended to address the following problems. First the increase in the per capita premium from $2.60 to $8.50 per annum beginning in 1986 is designed to amortize the current PBGC deficit over a reasonable period of about 15 years. The level is set to also meet the rising level of claims projected to be incurred over the foreseeable future. Together with the program reforms the increased premium income is expected to place the PBGC on a more sound financial footing, alleviating the present threat to the continued payment of guaranted benefits at current levels. Second, the H.R. 3500 reform package is intended to deal with three major abuses that exist under the present law. Currently it is possible for an employer to re-

ceive a minimum funding waiver without providing any security to secure repayment of the waived contribution. The revisions permit the IRS to impose security conditions in connection with such waivers after actively taking into account any comments or concerns the PBGC may have.

Also, at present a company can, in certain circumstances, dump unfunded pension benefits on the PBGC and continue in business with little or no liability for those benefits. The revisions in H.R. 3500 require an employer to meet one of four statutory distress tests before being able to terminate an underfunded plan. The employer would also be subject to a 10-percent pretax profits interest to the PBGC in the event the employer's liability exceeds 30 percent of net worth.

Currently a controlled group of corporations can spin off a financially distressed affiliate with large unfunded pensions benefits and escape any responsibility for any subsequent claim against the PBGC. The H.R. 3500 reforms clarify that an employer remains liable if there is an "evasion" of liability.

Finally, the H.R. 3500 reforms require a plan sponsor to fully fund for vested benefits if the plan is to be terminated other than in a distress situation. This enhances the protection of employee vested benefits in cases in which the sponsor can afford to meet the promised level of benefits. In the case of a distress termination, vested but nonguaranteed benefits would be protected by means of an additional 5 percent employer pretax profits interest payable to a termination trust.

In summary these goals to close the loopholes in current law are worthy ones that both bodies should seek to obtain, cooperatively, in the expected conference on these budget reconciliation measures.

Mr. DUNCAN. Mr. Chairman, I yield 1 minute to the gentleman from Nebraska [Mr. DAUB].

Mr. DAUB. I thank the gentleman for yielding me this time.

Mr. Chairman, I rise only for the very brief purpose of pointing out to my colleagues that contained in this piece of legislation is a very important change in current law, and I want to give credit particularly to our ranking Member, Mr. GRADISON, and our subcommittee chairman, Mr. STARK, for including the Area Wage Index in the legislation.

While not considered to be all that earth-shaking change from current law, it resolves the conflict between retroactive reimbursement and prospective reimbursement with respect to taking into account part-time labor. Our Bureau of Labor Standards process through the Health Financing Administration did not take that into account, and it is one of the ways that all of our hospitals under the diagnostic related group prospective payment system had been able to economize. Failing to take into account reimbursements for part-time help simply stresses, particularly rural and small hospitals.

So I thank the subcommittee and the committee for including this in the reconciliation package.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 1½ minutes to the gentleman from Florida [Mr. GIBBONS].

Mr. GIBBONS. Mr. Chairman, I thank the gentleman for yielding me this time, and I now yield to the gentleman from Texas [Mr. COLEMAN] for purposes of a colloquy.

Mr. COLEMAN of Texas. Mr. Chairman, as the chairman of the Congressional Border Caucus and the Representative from El Paso, TX, I have great concern about the economic impact of the custom user fees contained in this bill. I would like to enter into a colloquy with the gentleman from Florida, the chairman of the Subcommittee on Trade, regarding section 251 of the bill, User Fees Customs Service.

I would like to ask the gentleman from Florida if any consideration was given to the impact these fees might have on the United States-Mexico border economy when the committee drafted the legislation?

Mr. GIBBONS. Yes; consideration was given to the potential effect these fees would have on the United States-Mexico border economy and steps were taken to keep such impact to a minimum.

The fee is only $1 and applies only to passengers arriving on commercial airplanes, trains and vessels.

The fee is collected by the commercial carrier as part of the ticket price.

No fees would be assessed on passengers in private vehicles, buses, or pedestrians.

Mr. COLEMAN of Texas. Are the fees applicable to individuals or pedestrians entering the United States from Mexico?

Mr. GIBBONS. No.

Mr. COLEMAN of Texas. Is it the intention of the committee that these fees will only be temporary as a means of reducing the deficit, and that it is not the intention of the committee or the managers of the bill that upon expiration of these fees that they should be made permanent?

Mr. GIBBONS. These fees will expire after a 3-year period and the committee has no plans at this time to seek their renewal.

Mr. COLEMAN of Texas. After the implementation of the fees, would the chairman be willing to hold field hearings along the United States-Mexico border to consider the impact of these fees?

Mr. GIBBONS. The committee will be providing very active oversight regarding the effect of these fees and, if a need is demonstrated, would consider holding oversight hearings on this matter.

Mr. COLEMAN of Texas. Mr. Chairman, title II, part C, sections 251 through 254, would impose Customs Service user fees for commercial and passenger carriers entering the United States. While I realize the need to reduce the deficit, I question the false economies behind such fees.

I represent a district along the United States-Mexico border and serve as the chairman of the Congressional Border Caucus. During my tenure in Congress I have concentrated on border issues because of their importance to the border regions as well as the entire nations. When Congress acts on such issues as trade, health, and immigration, the consequences usually affect the border more than other regions of the Nation, and the imposition of customs user fees is a good example.

Many of you remember the 1982 economic crisis experienced by Mexico when the world price of oil dropped and that nation's foreign debt situation became unmanagable. The President of Mexico at that time, Lopez Portillo, took steps to impose economic austerity programs to ease capital flight and avoid default. Perhaps the most crucial and devastating step, from the standpoint of the United States, was the devaluation of the Mexican peso. That action caused an immediate chain reaction along the border, coinciding with a recession in this country which has caused unprecendented business failures and an unemployment rate well above the national average.

During the last 2½ years, communities such as mine in El Paso have attempted to reconstruct the local economy. It has not been easy, but we have made progress. Part of our rebuilding has included the growth of twin plant industries or maquilas along the United States-Mexico border, utilizing tariff items 806 and 807. Another factor has been the stabilization of the Mexican economy, which has increased Mexican consumption in United States markets. Yet, in spite of all this, we are faced today with the prospect of wiping out that limited recovery and possibly causing another capital crunch in Mexico, which is again having difficulty servicing its $96 billion foreign debt.

The imposition of customs user fees would place an unfair burden on the local economies of the United States-Mexico border. In the case of El Paso, over 600 entries would be taxed daily by this user fee on commercial vehicles before any tariffs are paid. While the fee may seem small or even trivial to some, it will have a cumulative impact when you consider that in areas such as El Paso we have trucks crossing back and forth several times a day. The long-term impact could be a decline in cross border commerce which could create another round of economic problems for the United States and Mexican economies. That in turn would impact the U.S. communities along the border. Twin plants in El Paso-Cuidad Juarez employ 8,000 in El Paso and contribute directly to the employ-

ment of several thousand more Americans throughout the United States. Companies that produce goods through twin plant operations are based throughout the United States, and compete with imports from abroad. To impose a user fee on the transport of goods which are part U.S. content would not only put U.S. production at a further disadvantage, but would hurt U.S. employment. Such fees could also have an impact on Mexican firms and consumers willing to conduct business in the United States. That too would have an adverse impact on our economy.

Mr. Chairman, I understand as well as any other Member of this body that we must reduce the Federal budget deficits which have caused our national debt to more than double since 1981. I understand that reducing those deficits would have a direct impact on interest rates, our trade deficit, and our position in the world economy. However, the imposition of Customs user fees is the wrong way to raise revenues to accomplish these goals. It is nothing more than double taxation and it unfairly places the burden of deficit reduction on the Nation's border economy. This is yet another example of Washington, DC, ignoring the needs of the Nation's border.

Mr. DUNCAN. Mr. Chairman, I yield 5 minutes to the gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. I thank the gentleman for yielding me this time.

Mr. Chairman, as I indicated in the debate on the rule, this is a bill on which all Members of the minority voted "no" when it emerged from the committee. The principal objection that we had to it was the terrible irony of bringing out a reconciliation bill that was supposed to reduce the deficit and then finding within the bill a billion dollar's worth of new spending programs.

In addition, I think taking a look at the committee's whole jurisdiction and seeing that the bill represents a real failure in some very excellent opportunities which we had to make real deficit reduction savings. Nobody regrets that more than I do. I think the committee worked hard to bring out a good product, and the bill is not without some redeeming qualities.

In general, however, it falls so far short of a responsible challenge to work down the deficit, that the bill must command a "no" vote. I am particularly disturbed with some of the new programs that are created; they have been referred to by other speakers. Many will discuss the new program.

Mr. Chairman, one of the things that has not been discussed very thoroughly about this bill is the extension of the cigarette tax. In fact, one of the ways that the Ways and Means Committee met its responsibilities under our cream puff budget resolution was in two very large tax areas. One, the extension of the cigarette tax, and the other in the imposition of very large additional Superfund taxes.

The cigarette tax, to which I do not object, in fact, it probably should be higher, is objectionable because it turns around and gives a penny of that cigarette tax back to the producers as a gift from the taxpayers of America, which I think taxpayers would prefer not to give. This amounts to a couple of hundred million dollars a year, and would be better saved or not even taxed than to simply be given back in an automatic spending kind of regimen.

Mr. Chairman, there are some redeeming aspects as I noted before. One of the important ones comes in the Customs authorization bill.

Mr. Chairman, one aspect of the bill I do support is the provisions on customs user fees. Although it is difficult to move to a user fee system, the increasing demands on the Customs Service and the additional functions necessary to provide efficient and expeditious processing of merchandise have made it necessary to establish a system of fees to cover certain costs. Without user fees, given budgetary pressures, I am afraid we will begin to move backward with respect to the operation of the Customs Service.

We moved rather quickly in the Ways and Means Committee to devise the kinds of user fees to be collected and how the moneys should be deposited in the U.S. Treasury. Some problems have emerged since the bill was reported which I hope can be resolved in conference. One such problem is preserving the automatic reimbursement to the Customs Service's appropriation of overtime and other reimbursable fees. These fees are paid by the importer directly to Customs to cover special activities such as overtime or assistance to INS and Department of Agriculture and, under existing law, are reimbursed immediately to the agency's appropriation. Also, some clarification of the bill's provisions may be necessary to avoid double fees on vessels or on railroad cars not carrying freight.

I hope we can take care of these minor but important changes in conference as well as eliminate the more significant objectionable provisions that escalate costs and, in effect, defeat our efforts to balance the budget.

I think these things can be taken care of. I make note of them so that Members will be advised that there will be necessary changes made in the conference committee.

Mr. Chairman, this is a good effort on the part of the committee. The effort fell short; the reconciliation bill is inadequate. The vote should be "no."

Mr. Chairman, I yield back the balance of my time.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield such time as he may consume to the gentleman from California [Mr. STARK], the subcommittee chairman.

Mr. STARK. Mr. Chairman, H.R. 3128 is an extremely important piece of legislation. As chairman of the Ways and Means Subcommittee on Health, I would first like to thank the ranking minority member, the distinguished gentleman from Ohio and all of the members of my subcommittee, for their time and bipartisan effort. I would also like to thank our hardworking chairman and the gentleman from Tennessee, the ranking minority member, for their efforts in bringing this responsible deficit reduction bill to the House floor.

I urge my colleagues to support this legislation because it achieves some very important goals. First, it has essentially met the budget reconciliation's Medicare budget savings targets. But far more important is how we achieved the savings. We cut the cost without cutting the care. Instead of simply freezing Medicare payments to providers, this legislation makes an effort to provide reasonable payments. We have sought fairness in Medicare payments to hospitals. On the one hand, believing that Medicare should guarantee no hospital a profit, we have eliminated the return on equity payment for profitmaking hospitals' inpatient services, as of October 1, 1986. On the other hand, knowing that poor patients are costlier to treat, we have directed the Secretary of Health and Human Services to provide an additional payment to hospitals serving a disproportionate share of low-income patients.

H.R. 3128 provides a 1-percent increase in Medicare payments to hospitals. It also adds an additional year to the prospective payment transition. During this year, Medicare hospital payments will again be based 50 percent on Federal DRG's and 50 percent on hospitals' historical costs. We lack good data on how prospective payment has affected hospitals of various types in various geographic areas. This 1-year, one-time, delay in movement toward fully national payment rates will avoid harm to some hospitals and give time for better data and analysis.

H.R. 3128 also provides an increase in Medicare payments for all physicians who participate this coming year. Nonparticipating physicians will have their Medicare payments and their charges to beneficiaries frozen for another 12 months. We intend that this provision and other incentives in the bill to encourage greater physician participation which, we believe, protects beneficiaries from high and unpredictable out-of-pocket costs.

The bill extends to people above age 69 a provision under which benefici-

aries who have health benefits through current employment will have those benefits as primary, with Medicare secondary, unless they elect otherwise. And H.R. 3128 extends Medicare coverage to State and local employees hired on or after January 1, 1986. The coverage, and payment of payroll taxes, would apply only for Medicare and only for newly-hired employees. Over 90 percent of State and local government employees eventually qualify for Medicare as spouses or through other employment covered by Medicare. The bill would start requiring them to contribute toward its cost as other workers do.

Taken together, the cost-containment provisions we pass today will result in more moderate medical bills for Medicare beneficiaries in the future.

This legislation is also significiant for what it doesn't do. We rejected administration proposals that would have cost Medicare beneficiaries $9 billion over the next 3 years. We showed that it is possible to control the Federal Government's Medicare tab without further burdening, beneficiaries. While it is true that the bill extends for 1 more year—1988—the requirement that beneficiary premiums equal 25 percent of the part B program costs; we rejected the administration's proposal to raise the premium to cover 35 percent of program costs.

Finally, H.R. 3128 calls for two small but significant proposals to help the uninsured. The bill requires hospital emergency departments to medically screen and stabilize any patient seeking medical attention from the emergency department. Hospitals that fail to meet these requirements, or that transfer patients inappropriately, can be excluded from the Medicare Program, and both hospitals and responsible physicians can face civil monetary penalties. We accept in full the Judiciary Committee's amendments to this provision. Also, some 5 million women could benefit from the provision that will allow widows, divorced and separated spouses; Medicare ineligible spouses; and the dependents of individuals in these groups to remain in their spouses' private group health plans.

This legislation deserves your support because it reduces our budget deficits and responsibly restrains Medicare costs, without increasing the financial liability of Medicare beneficiaries.

Mr. DUNCAN. Mr. Chairman, I yield 4 minutes to the gentleman from New Hampshire [Mr. GREGG], a member of the committee.

Mr. GREGG. Mr. Chairman, I thank the ranking member for yielding time to me.

Mr. Chairman, I would first like to note a point of congratulations to the chairman of the Subcommittee on Health. I had a chance to serve on that subcommittee, and I believe he approached the issues of health in a very organized and thoughtful manner. We put together a package which I was not totally happy with, but I think it was an excellent compromise in an attempt to address the issues which we have to address in order to bring out this reconciliation bill.

□ 1355

My concerns with this bill are quite a number, many of which have been mentioned, so I would like to target on one or two specifically.

First, I do not think the reconciliation bill is the proper place to add new programs. I believe that has been mentioned before, but I think that we are setting a precedent which is totally inappropriate if we generate new programs within a reconciliation bill.

But second and more importantly is my concern about the way we structured this tobacco tax. The gentleman from Minnesota alluded to it. I think the Members of the House should take note of it.

I agreed with keeping the tobacco tax at 16 cents. I think that is appropriate. I agreed when earlier today Mr. FRANK, I believe it was, the gentleman from Massachusetts, came to the floor and talked about the damage which tobacco has done to the health of America. Therefore, I do not think it is appropriate that within the retention of the 16 cents of tobacco tax and the basic increase by 8 cents of the tobacco tax we are sending 12 percent of that tax to tobacco growers for their benefit, or 1 cent of the additional 8 cents.

So I would ask my colleague when they are considering voting for this bill to note that a vote for this bill is a vote basically to subsidize tobacco growing.

Now, there was another vote in our committee which was to take some of the tobacco increase and give it to medical research on the problems which tobacco causes, specifically the problems of cancer. That vote failed. I did not happen to vote for that, either, because I do not believe in earmarking; but I think it is totally inconsistent that if you are going to earmark money for the tobacco growers that you are not going to earmark money for the cancer research area.

It seems to me that if we are going to pass a bill which is earmarking part of the tobacco money, 12 percent of the increase in the tax, to the tobacco growers for their benefit so that they can grow more tobacco, we are sending absolutely the wrong signal to the American people.

It is bad enough that we run through this House in a steamroller fashion the agricultural bill every year which just increases and increases the subsidies to various commodities, including tobacco; but then on top of those subsidies to throw an additional tax burden which goes to the benefit of the tobacco industry is in my opinion a major mistake.

Mr. ROSE Mr. Chairman, will the gentleman yield briefly?

Mr. GREGG. I am happy to yield to the gentleman.

Mr. ROSE. Mr. Chairman, the gentleman makes a very valid point. I was not one that had an opportunity to vote in the committee because I am not on the committee.

Mr. Chairman, I think the gentleman does make a very valid fairness argument and I would certainly support in future legislation if we do retain the 1 cent earmarking of the cigarette tax to help pay off some obligations of the program, we should do as the gentleman suggested and that is have an equal amount earmarked for health programs. I would support that in the future.

Mr. GREGG. Mr. Chairman, I appreciate the comment. I think that is a constructive position for the gentleman to take if he supports earmarking for the tobacco industry; but as a practical matter in this bill we do not have the opportunity to vote that way. This bill is an up or down vote on whether we are going to earmark solely for tobacco growers.

Mr. DUNCAN. Mr. Chairman, I yield 1½ minutes to the gentlewoman from New Jersey [Mrs. ROUKEMA].

Mrs. ROUKEMA. Mr. Chairman, I rise today to address a serious problem our Nation's elderly are currently facing: Home health care.

As we know, reductions in reimbursement rates to hospitals has had many beneficial effects, such as reducing unnecessary diagnostic procedures, unnecessary surgical procedures, and shortening hospital stays for routine procedures, One result of these changes is that home health care agencies are taking on a greater number of ill people with increased medical needs.

In July, the Health Care Financing Administration [HCFA] released regulations which not only change the manner in which reimbursements are calculated but also the amount of the reimbursement for home health agencies. I believe that these new regulations are detrimental. On one hand we are encouraging shorter hospital stays, and on the other, we are not providing the necessary incentives for home care.

The Congress has previously mandated studies for home health care reimbursements. To date the results of one study are merely preliminary, and the second study has not even begun. On August 1, I introduced legislation H.R. 3220 which would prohibit the Secretary of Health and Human Serv-

ices from implementing any changes in the reimbursement rates. I did so to enable Congress to carefully evaluate the two previously mandated studies on home health care reimbursement.

It is unfortunate that this delay is not included in the bill which is before us today. The other body should be commended for including language in its reconciliation measure which would delay the implementation of these onerous regulations for 1 year. There is strong support in this body for this delay, and I would urge the members who will sit on the conference committee to do all in their power to ensure that the provisions of the other body are included in the final reconciliation package.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield such time as he may consume to the gentleman from Tennessee [Mr. FORD].

Mr. FORD of Tennessee. Mr. Chairman, I rise in strong support of H.R. 3128. I would like to commend the chairman of the full Committee on Ways and Means for his leadership in bringing this reconciliation bill to the House floor; also the ranking minority member of the full committee, along with my ranking minority member, on Public Assistance and Unemployment Compensation, the gentleman from South Carolina [Mr. CAMPBELL].

Mr. Chairman, there have been those who have talked about the components within title III of this bill and said that we are constantly talking about creating new programs and we will spend additional dollars. I would like to remind my colleagues that there have been two commitments that we have made from this Congress, as well as from our President, one is to reduce the deficit, and number two, to provide a safety net. This bill addresses both commitments, Mr. Chairman. We have exceeded our reconciliation targets.

We have also made modest improvements in AFDC, improvements that were significantly cut back on the subcommittee level, as well as the full committee level.

Mr. Chairman, I rise in support of title III of the bill, Mr. Chairman. Title III contains the public assistance amendments to H.R. 3128. These provisions are intended to really address some of those problems which we know we are confronted with when we see a rise in the child poverty rate in this country.

Mr. Chairman, those three components or three provisions under title III are a requirement that all States implement the AFDC unemployed parent program. 25 States have adopted such a program which aids needy two-parent families in which the principal earner is unemployed.

Number two, it addresses a teenage pregnancy problem which we know we are faced with in this Nation. This provision will provide a 2-year block grant program to assist States in preventing teenage pregnancies and provide services to teen parents so that they will complete their education and avoid any welfare dependency.

The program will be targeted to children and teenagers in families eligible for AFDC.

It would also offer amendments to the current AFDC quality control program that will reduce enormous AFDC payments without unduly penalizing States.

Mr. Chairman, I would like to just spend a minute or two talking about the three provisions under title III. The AFDC for unemployed two-parent families the facts are that 25 States today have already opted out under current law. This provision is saying that we will make it mandatory under this provision to say that all States would say that to qualify, the principal earner in a two-parent family must be unemployed, working less than 100 hours per month and have a recent attachment to the labor force.

Mr. Chairman, we think that is no more than right, not to put the father, the principal earner, out of a household to be eligible for the children to receive aid to families with dependent children.

The proposal would mandate the two-parent coverage in all States, rather than the 23 States with the District of Columbia and one of the other Caribbean islands.

Changes in the quarters of work requirements to allow a substitution for school attendance in vocational training for quarters of work under certain circumstances.

Mr. Chairman, the two-parent coverage would be mandatory and I would hope that my colleagues would see fit to adopt that program.

When we look at the poverty rates in this country, we can see that this is one component within the AFDC program alone that we can keep intact and we can respond to the poverty problems of this Nation.

Also the teenage pregnancy prevention in the block grant program, Mr. Chairman. We have had a lot of talk and we have had a lot of studies conducted on teenage pregnancies. One out of every seven births in this country is to a teenage mother. Each year more than 500,000 babies are born to teenage mothers in this country. One-third of these mothers will be under the age of 18 and a vast majority of teenagers who give birth each year have not finished high school. Thirty-six thousand of these mothers have not finished the ninth grade.

The majority of all black children are born to a single teenage mother in this country.

Mr. Chairman, we had some 50 to 60 witnesses testify before the subcommittee. We reported stronger legislation out of the subcommittee; we wanted to, at least. There were certain modifications made from the minority side of the subcommittee that we felt we were ready to address. We reported the legislation out. It went to the full committee and we made even further modifications in this area.

We think we have a sound 2-year block grant program in the reconciliation bill that is before the House floor today. We think it is sound. We will look at it for a 2-year period. If it does not work, then we will know; but if it does, then we can come back to the Congress and try to convince this Congress to continue the program.

Also, finally, the third component of the bill is the AFDC quality control. We have talked about the error rates. With the rule, hopefully we can continue to discuss that if those Members on the other side would like to discuss it, but we feel that we have tried in every way to work with the administration on the error rates. We feel that we have a sound proposal in this bill that is before us today and, hopefully, title III of this bill will not only strengthen the AFDC quality control, but also the two new programs which will be implemented.

Mr. DUNCAN. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from Ohio [Mr. KINDNESS].

Mr. KINDNESS. Mr. Chairman, I thank the gentleman from Tennessee for his generosity in yielding this 5 minutes.

I know that my colleagues, including me, probably least like to be reminded of the Constitution and sometimes our responsibility under it. We do not like to have people pull out a copy of the Constitution and read from it, but sometimes it is necessary to be reminded that we just do not have the constitutional authority to pass legislation imposing a tax on the States; so I will not quote from the Constitution. I will just remind my colleagues that if they take a look at the 16th amendment, which has to do with the income tax, it is not there. If they take a look at the whole of article I of the Constitution, section 10 in particular, they will not find it there. In fact, they find limitations on the ability of the United States to tax certain things. That is why the 16th amendment was necessary, so that the United States could have an income tax, and since 1913 there has been that authority; but just to read that part, the 16th amendment that the Congress shall have power to lay and collect taxes on incomes from whatever source derived without apportionment among the several States and without regard to any census or enumeration; but that does not give us the power to impose a tax upon the States.

Now, what are we about here? We have before us a bill that is supposed

to bring down the projected deficit and if we do it with false hopes and an unconstitutional tax, then we have not done our job right. If we can be pretty sure to begin with that what we have done is invalid, then why do it?

This is a very hot issue in my home State of Ohio. Some of my colleagues from Ohio voted for the previous question on the rule, so that we would not have the opportunity to present an amendment to delete section 123 of the bill, which includes this coverage under Medicare of State and local government employees, beginning January 1, 1986. It should be stricken from the bill, but the opportunity is not here to even present such an amendment.

The gentleman from California indicated, the chairman of the Subcommittee on Health, that the amounts of revenue involved for the States to pay this tax are very small. It is only prospective and it is only new employees of State and local governments. That will grow, my friends, if it remains in effect, obviously. It is like being a little bit pregnant; but if the amounts of money that it is going to cost the States happens to be so small, then how much revenue is there for the United States to be derived from section 123 coverage?

□ 1410

No, my friends, the arguments do not make any sense to me. We are putting forward a false hope that we are doing something to reduce the deficit. I grant Members that it is not desirable to have people getting Medicare coverage anyway on a secondary basis or a collateral basis, and that is the problem we have to deal with. The way to deal with that problem is to correct the provision of the Medicare Program so that we do not extend the coverage unless people really have the qualifications for it and the taxes have been paid. Let it be direct coverage for those who are already legally covered by Medicare, not on a spousal basis.

If the coverage is too generous in terms of how much time people have worked under Social Security in a part-time job, then correct that, but do not impose a tax upon the States which is, in fact, unconstitutional.

The Supreme Court decision in Garcia versus San Antonio Metropolitan Transit Authority earlier this year is cited by some as the basis for justifying imposing this tax because the Garcia decision dealt with working conditions, the coverage of the Fair Labor Standards Act. Just this week this House acted to modify the effect of the Garcia decision, recognizing it as wrong, even though the Supreme Court said, "We are not going to get into it. The Congress can decide this political question."

We have another political question here, folks, and no opportunity to decide it. I would urge a "no" vote on the bill.

Mr. DUNCAN. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. ROSTENKOWSKI. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. The gentleman from California [Mr. WAXMAN] is recognized for 30 minutes.

Mr. WAXMAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of the Medicare and Medicaid provisions contained in H.R. 3128. This is a package that Members on both sides of the aisle can—and do—support.

Title I of this bill, which contains Medicare and Medicaid savings provisions, will reduce Federal spending over the next 3 years by over $10.4 billion. And it will make some long-overdue improvements in the Medicare and Medicaid programs.

I urge my colleagues to support these provisions and to vote against the motion to recommit, if offered.

The Medicare and Medicaid provisions in this bill are a combination of the efforts of the Committee on Energy and Commerce and the Committee on Ways and Means to meet the budget reconciliation instructions relating to these programs. I want to thank Chairman ROSTENKOWSKI and his staff for their cooperation in bringing these provisions before the House for its consideration.

The provisions in this bill that were contributed by the Energy and Commerce Committee were initially reported as H.R. 3101, the Medicare and Medicaid Budget Reconciliation Amendments of 1985. The provisions in H.R. 3109, as reported, were then inserted without change into H.R. 3290, the Medicare and Medicaid Budget Reconciliation Amendments of 1985, introduced on September 12. It is the text of H.R. 3290 that is being considered the original title I of H.R. 3128 on the floor today. Thus, the views of the Energy and Commerce Committee on its provisions in the measure before the House at this time may be found in the committee report on H.R. 3101, House Report 99-265, part I.

The major thrust of the Energy and Commerce provisions is to reduce Medicare and Medicaid outlays without harming program beneficiaries. The committee has included a number of Medicare provisions that, in total, will reduce Medicare spending by $2.8 billion over the next 3 years. These include: A 1-year extension of the physician fee freeze on nonparticipating physicians; an extension of the working aged provision to employees and spouses over age 69; and reductions in payments for durable medical equipment, clinical laboratory services, and physician services for cataract surgery.

Many of the Medicare provisions reported by the Energy and Commerce Committee are identical to, or vary only slightly from, those reported by the Ways and Means Committee. There are also some provisions reported by Energy and Commerce, for which no comparable action was taken by Ways and Means, which have increased the savings impact of the bill.

In Medicare, we have established upper limits on the fees paid for clinical laboratory services. Under this provision local lab service fee schedules that greatly exceed the majority of fees nationwide for the same service would be brought into line. We have also instituted a second opinion program for a limited number of elective surgeries under Medicare. The elimination of unnecessary surgery not only saves money, but it also reduces health risks and promotes patient understanding and involvement in choosing the most appropriate health care.

In Medicaid, the Energy and Commerce provisions would reform the way in which Medicaid pays for direct graduate medical education costs at teaching hospitals, at a 3-year savings of $45 million.

Some of the Medicare and Medicaid reforms adopted by the Energy and Commerce Committee will result in some increased spending. I want to stress, however, that these provisions are all improvements and expansions of existing programs. No new programs are proposed.

I also want to stress that the cost of these provisions is exceedingly modest in relation to the savings achieved by the bill. The three Medicare spending provisions—relating to vision care, occupational therapy, and beneficiary appeal rights—and the two Medicaid provisions—relating to infant morality reduction and to MMIS penalties—would cost a total of $306 million over the next 3 years. This reduces the total savings in title I of $10.8 billion by less than 3 percent.

The Medicare vision care provision, which was authored by Representatives WHITTAKER and MIKULSKI, would authorize payment to optometrists for vision care services that Medicare now covers when furnished by a physician. This does not establish a new benefit. The costs of this provision result from more Medicare beneficiaries using services to which they are currently entitled.

The Medicare occupational therapy provision would extend the current benefit to nursing homes, to clinics and rehabilitation agencies, and to therapists in independent practice, subject to a $500 maximum. This will put occupational therapy on the same footing as physical therapy under Medicare.

The final Medicare provision would give elderly and disabled beneficiaries the right to administrative and judicial review of denials of their claims under part B—a right they already have under part A. This will protect beneficiaries against arbitrary claims denials. The provision would cost an estimated $25 million over the next 3 years—a trivial price to pay for a fairer Medicare Program.

With regard to the Medicaid Program, the bill contains a provision that would overturn a penalty that was inappropriately imposed on the State of Maryland in connection with its Medicaid Management Information System.

In addition, the Energy and Commerce provisions would extend Medicaid coverage to pregnant women in two-parent working poor families in the 18 States that don't now cover these women. This will assure that these women and their unborn children receive adequate prenatal and maternity care, so that the children are born as healthy as possible.

CBO says the cost of this provision will be $100 million over the next 3 years. I accept this estimate, but do not agree with it. The prestigious Institute of Medicine of the National Academy of Sciences, in an exhaustive study of low birthweight, calculated that each $1 invested in prenatal care for disadvantaged women could save over $3 because of the reduction in the number of low-birthweight births and the associated costs of newborn intensive care and long-term institutionalization. I am firmly convinced that this provision will save us money in the long run.

More importantly, though, this provision will lead to a reduction in infant mortality. And reducing the number of infants who die before age 1 is, in and of itself, a completely sufficient reason to adopt this amendment. Whether a Member is prochoice or prolife, he or she ought to be able to support this amendment.

In summary, these program improvements are modest in cost, they are plainly justified on the meritis, and they have bipartisan support.

I want to stress again that even with these spending provisions, title I of the bill before the Members would still reduce Federal outlays by $10.4 billion over the next 3 years.

I would urge the Members to vote against any motion to recommit, and support the recommendations by our committees.

Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. The Chair now recognizes the gentleman from Illinois [Mr. MADIGAN] for 30 minutes.

Mr. MADIGAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, at the outset I want to congratulate my distinguished colleague, the chairman of the Subcommittee on Health and the Environment, the gentleman from California, for his description of this proposal as having no new programs in it.

There is a provision in what has been included in this proposal by the gentleman from California that provides for reimbursement to certain providers who have never been qualified for reimbursement before, and the gentleman describes that as not being a new program. There is a provision that allows appeals under part B Medicare that has never existed before, and the gentleman says that is not a new program; that is an extension of a provision that exists in part A.

There is an expansion of the CHAP Program, with a $100 million price tag that the gentleman describes as not being a new program. And there is a penalty waiver in here that affects only one State in the Union, and the gentleman describes that as not being something new.

□ 1420

Mr. Chairman, I wish to express my opposition to all of this.

I would like to speak specifically, about the Medicare and Medicaid provisions reported out of the Energy and Commerce Committee which I have just described. The very minimal savings that were achieved through changes in Medicare and Medicaid programs are significantly reduced by the measures which I have just outlined for you, which actually increase spending under the Energy and Commerce provisions of this bill.

While there may or may not be merit to the spending proposals that I have described to you, it seems to me that the reconciliation process, is an inappropriate and unusual forum in which to incorporate these new programs that actually increase spending.

The legislation ordered reported by the Energy and Commerce Committee here, incorporated is not a legitimate budget-cutting vehicle, but is, instead, something that makes a mockery of the reconciliation process. I urge my colleagues to reject this purported savings package that actually includes a considerable amount of hidden spending; new spending in the form of something that I think is accurately described as new programs.

Mr. Chairman, I reserve the balance of my time.

Mr. WAXMAN. Mr. Chairman, I proudly yield 2 minutes to the very distinguished gentleman from Michigan [Mr. DINGELL] chairman of the full Committee on Energy and Commerce.

Mr. DINGELL. Mr. Chairman, I thank my friend from California for making this time available. I rise in support of H.R. 3128, the Deficit Reduction Amendment of 1985.

In particular, I want to commend my dear friend from California [Mr. WAXMAN] for his leadership in the Subcommittee on Health and the Environment in achieving these savings and reforms in both the Medicaid and Medicare Part B programs. As a result of his efforts and those of others on the Committee on Energy and Commerce, the committee reported a bipartisan package of Medicaid and Medicare amendments that will improve both programs while saving the taxpayer's nearly $150 million over 3 years.

I also want to thank our colleague, the distinguished gentleman from Illinois [Mr. ROSTENKOWSKI] chairman of the Committee on Ways and Means, for his extraordinary cooperation in putting together a package of health care measures that contains the work of both his committee and the Committee on Energy and Commerce. This package, embodied in H.R. 3290, will be incorporated in the bill before us pursuant to the rule as a substitute for title I.

Finally, Mr. Chairman, I believe high commendations are in order for both the gentleman from Pennsylvania [Mr. GRAY] chairman of the Committee on the Budget, and the gentleman from South Carolina [Mr. DERRICK] chairman of the reconciliation task force, for their labors in bringing forward a budget program of the quality we have passed this year.

At this time Mr. Chairman, I would like to place in the RECORD of these proceedings an exchange of correspondence between the Committee on Energy and Commerce and the Committee on the Budget concerning the treatment of Superfund in reconciliation. This correspondence makes clear that the Committee on Energy and Commerce is not to be charged for Superfund spending in reconciliation now or in the future as a result of the Budget Committee's agreement to credit the Ways and Means Committee in reconciliation for Superfund revenues included in H.R. 2817 rather than in the bill before us, H.R. 3128, as had been originally been contemplated.

COMMITTEE ON ENERGY AND COMMERCE,
Washington, DC, October 4, 1985.

Hon. WILLIAM H. GRAY III,
Chairman, Committee on the Budget, House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: I understand that you have reached an agreement with Chairman Rostenkowski as to the scoring of Superfund in reconciliation.

Under this agreement, it appears that the Budget Committee will score the Ways and Means Committee for Superfund revenues above the Congressional Budget Office baseline at such time as Ways and Means reports a Superfund revenue title as part of H.R. 3128. The Superfund authorization legislation, however, will move separately from H.R. 3128 and outside of the reconciliation process.

I presume that this arrangement will not result in the Committee on Energy and

Commerce being charged in reconciliation with Superfund spending now or in the future, inasmuch as no spending language will be made a part of the Ways and Means reconciliation package. Would you please confirm for me, at your earliest convenience, that my understanding on this matter is correct.

Thank you.

Sincerely,

JOHN D. DINGELL,
Chairman.

COMMITTEE ON THE BUDGET,
Washington, DC, October 7, 1985.

Hon. JOHN D. DINGELL,
House of Representatives, Rayburn Office Building, Washington, DC.

DEAR MR. CHAIRMAN: Thank you for your letter of October 4, 1985, in which you inquire about the way that Superfund expenditures might be scored.

Your understanding that the scoring arrangement for reconciliation deficit reduction reported and to be reported by the Committee on Ways and Means is correct. Further, your understanding that such scoring would not result in the charging of any expenditures against the Committee on Energy and Commerce in reconciliation also is correct.

Your understanding and cooperation are always appreciated.

Sincerely,

WILLIAM H. GRAY III,
Chairman.

COMMITTEE ON ENERGY AND COMMERCE,
Washington, DC, October 29, 1985.

Hon. WILLIAM H. GRAY III,
Chairman, Committee on the Budget, House of Representatives, Washington, DC.

DEAR BILL: I understand that the Budget Committee has agreed to score the Ways and Means Committee in reconciliation for Superfund revenues reported by Ways and Means as part of H.R. 2817.

This scorekeeping agreement has apparently obviated the need for Superfund revenue legislation to be included in H.R. 3128 for reconciliation purposes, as had previously been contemplated. In accordance with the understanding reflected in our earlier correspondence on this issue, I presume that this new arrangement will similarly not result in the Committee on Energy and Commerce being charged in reconciliation with Superfund spending now or in the future. Would you please confirm for me, at your earliest convenience, that my understanding on this matter is correct.

Thank you.

Sincerely,

JOHN D. DINGELL,
Chairman.

COMMITTEE ON THE BUDGET,
Washington, DC, October 31, 1985.

Hon. JOHN D. DINGELL,
Chairman, Committee on Energy and Commerce, House of Representatives, Rayburn House Office Building, Washington, DC.

DEAR JOHN: In response to your letter of October 29, 1985 on Superfund, your understanding is correct. The Energy and Commerce Committee spending in the Superfund authorizing bill will not be scored as part of reconciliation.

Sincerely,

WILLIAM H. GRAY III,
Chairman.

Mr. MADIGAN. Mr. Chairman, I yield such time as he may consume to the gentleman from Florida [Mr. BILIRAKIS].

Mr. BILIRAKIS. Mr. Chairman, as a member of the Energy and Commerce Health Subcommittee, and as the representative of one of the most elderly populated districts in the Nation, the bill before us today is of special interest to me and to my constituents. During subcommittee and committee consideration of the Medicare and Medicaid deficit reduction amendments, we had tough choices to make in order to reach our mandated savings. Efforts were made to increase costs to Medicare beneficiaries which would have permitted physicians to raise fees and pass through this increase to those least able to afford such an increase. There were also efforts to impose a copayment on Medicare beneficiaries who receive home health care services and to increase the Medicare part B premiums. Luckily, we were able to defeat these proposals. During consideration of this legislation one thing kept coming to my mind and that is that it was extremely unfair to burden senior citizens with even more medical costs when there were other areas that could sustain cuts without adversely affecting a vulnerable group. I am dismayed, however, that there is an expansion or creation of new spending programs included which does not permit me to support passage of this package. I do not feel that this is the time to be devising new schemes for increased spending since we are seeking to cut the deficit. This is regrettable since I do believe there are some worthwhile policy changes in the bill such as the second surgical opinion provision which will go far in protecting the elderly from unnecessary surgery, while at the same time saving the Government money through the elimination of unnecessary surgeries.

Mr. Chairman, earlier this year I introduced legislation which expresses the sense of the Congress that no person should be denied emergency health care or hospital admittance because of a lack of money or insurance. I firmly believe the American people should continue to expect that when they see an emergency sign on a hospital or free standing clinic they can expect access to emergency care. Unfortunately, there are countless examples where this isn't the case. I am pleased that in the bill before us the trust of my legislation has been included. The quality of American health care is unparalleled throughout the world and it should be the national policy for hospitals and free standing emergency centers to provide high quality emergency care to all patients without discriminating on the grounds of economic status, color, race, religion, sex or national origin. Judging by the numbers of cosponsors of my legislation this is a view shared by the majority of this body.

Even though there are provisions that I embrace totally, the cuts in this bill are not sufficient and the new or expanded programs do not show a commitment to cutting the deficit which adversely affects every American. Therefore, Mr. Chairman, I must oppose passage of this bill.

Mr. WAXMAN. Mr. Chairman, no other member of the subcommittee played a more constructive role in devising many of the reforms that are in this package today than the gentleman from Oregon [Mr. WYDEN]. I am pleased to yield 4 minutes to him at this time.

Mr. WYDEN. Mr. Chairman, in beginning, I want to commend the gentleman from California, Chairman WAXMAN, for doing what I think is a tremendous job in putting together this legislation under very difficult circumstances. It seems to me that the challenge in this country is to reduce health care costs without reducing needed health care services, and I think the gentleman from California [Mr. WAXMAN] has labored hard and very well to try to deal with that very difficult task, and I want to commend him for putting together this legislation.

Very briefly, Mr. Chairman, I would like to touch on just a couple of provisions of the legislation that I think are particularly important. The first and foremost is the provision that I think is going to stimulate the availability of private insurance to help pay nursing home bills in this country.

Along with the gentleman from Massachusetts [Mr. DONNELLY] and a number of my colleagues, I have had a special interest in this matter. A survey by the respected American Association of Retired Persons reveals how 79 percent of older Americans believe Medicare will foot their long term costs. This is tragic. Too late, do three out of four elderly Americans learn that they won't qualify for Medicare.

Nearly 1.3 million Americans now live in nursing homes at a cost expected to exceed $90 billion within 5 years. The average cost typically reaches $15,000 to $30,000 per year. These dollar symbols go beyond ravishing the lifetime savings of middle-income working people. It impoverishes them.

Medicaid covers costs for some seniors. But many seniors pay a terrible price to get Medicaid. I am speaking of retired middle-income people, teachers, farmers and professionals, who must liquidate their life systems to meet Medicaid's draconian minimum income requirements.

I think the private sector can meet the needs of some of our elderly. A provision in this legislation will create a Task Force on Long Term Health

51-059 O-87-43 (Pt. 21)

Care Policies. This task force will have the mission of stimulating interest in the private sector to offer affordable long term care insurance for our elderly. If a small percentage of older people can be served through the provision of long-term care insurance, we will at least have made a beginning. At present, financing long-term care is the No. 1 health care need of the elderly. We need to come up with a variety of approaches to meet this need and we can start with this reconciliation package.

Another area in this legislation that is important is the provision that deals with Medicare appeals rights. Under part A of Medicare, which pays for hospital services, and part B, which covers all outpatient services, we must make some changes to ensure fairness for seniors.

Earlier this year, I introduced H.R. 2864, the Fair Medicare Appeals Act of 1985, to give seniors the rights to which they are entitled under Medicare.

Under part A, the administration has seen fit to take away the right of our senior citizens to be represented in an appeals proceeding by their doctor or hospital. For more than 18 years, senior citizens and providers have had the option to work together in filing an appeal.

Recently, without hearings or public notice, their choice was taken away. The Congress never instructed the Heath Care Financing Administration to save dollars by taking away the rights of senior citizens. That's why we restore them in this bill.

This legislation will also bring the Medicare part B appeals process in line with the times, Currently, Medicare part B appeals are heard by hearing officers often employed by insurance carriers. It was a system designed to adjudicate small claims.

But part B is no longer only small claims. Under the new prospective payment system, more and more care is taking place outside the hospital and part B claims are getting bigger. The system for appealing coverage of those claims should be changed to reflect that fact.

That's what this legislation will do.

The legislation will provide for hearings by an administrative law judge for any part B claim greater than $500. For disputes of more than $1,000, judicial review will be available if the beneficiary is not satisfied with the results of the administrative law judge review.

If we don't bring the part B appeals system up-to-date, the Federal Government may end up paying more in the long run. Without a rational and equitable appeals system, beneficiaries and providers are going to be denied payments they are entitled to receive. In turn, seniors won't get care they need because they can't pay for it, and some providers will not be able to pick up the bill. Seniors who can't get care are likely to get sicker and sicker and may eventually need the most expensive care of all—institutional care.

The fact is that the Medicare system makes mistakes. We need to make these changes in the Medicare appeals process so that when mistakes are made in the denial of Medicare coverage, beneficiaries have a fair opportunity to appeal the decision. With these changes—which are just plain commonsense—we will be moving a long way toward making the Medicare Program more efficient and more fair. I think that's a combination that ought to be law.

The last provision deals with what are called Medicaid waivers. In effect, these are opportunities for the States to set up new approaches to deliver home-care services around the country in a fashion that is going to save the Government money, and, at the same time, give older people an opportunity for more of what they desire most, which is to stay in their homes and communities. Senator BRADLEY and I introduced legislation to deal with this issue earlier this year and the gentleman from California, Chairman WAXMAN, deals with the issue of Medicaid waivers and the difficulties States have had in obtaining these waivers in a way that is very sensible.

Together these three proposals—private insurance to cover nursing home bills, legislation that permits seniors a fair appeal when they have been denied their benefits, and, the opportunity for more home care under the waiver provision than possible under traditional Medicaid programs—will help us greatly in the years ahead to reduce health care costs without denying older people needed services.

I want to commend the gentleman from California [Mr. WAXMAN] again for putting together what I think is a very good bill under difficult circumstances, and I yield back the balance of my time.

Mr. MADIGAN. Mr. Chairman, I reserve the balance of my time.

Mr. WAXMAN. Mr. Chairman, I am pleased to yield 2 minutes to the gentlewoman from Connecticut [Mrs. KENNELLY].

Mrs. KENNELLY. Mr. Chairman, I rise in support of H.R. 3128. Each year we face a dilemma when we are asked to examine Medicare for potential budget savings. While I agree fully with the need to reduce budget deficits, I am constantly concerned over how our elderly population can maintain adequate health-care standards in the face of continual cuts, and I have often expressed my opposition to increasing the out-of-pocket expense of senior citizens for health care.

I am pleased that the Committees on Ways and Means and Energy and Commerce approved a set of Medicare changes that were reasonably acceptable to all concerned parties—while producing considerable budget savings for the Federal Treasury.

H.R. 3128 does not require cuts in Medicare benefits or significant increases in out-of-pocket expenses for senior citizens. The package includes refinements in the prospective payment system for hospital reimbursement, to continue the efforts to hold down hospital costs. It extends the freeze on fees charged by those physicians who do not agree to accept assignment on all Medicare claims, so that the inflation in physician fees can be further controlled.

One provision in the bill that is of particular interest is the adoption of my proposal for a second surgical opinion program that would protect beneficiaries from unnecessary surgery while saving money for Medicare. This provision has a projected savings of $215 million over 3 years.

I believe that a mandatory second surgical opinion program will ensure that Americans served by Medicare receive the health care they need and deserve, while at the same time reducing or eliminating unnecessary surgery and the high costs that go with it. It will enable beneficiaries to make informed decisions regarding the desirability of surgery by arming them with more complete information on the benefits and risks of such surgery. It will enhance the beneficiary's freedom of choice as he or she faces the difficult decision of whether to undergo a surgical procedure.

This year, we celebrate the 20th anniversary of Medicare—a program that helps more than 30 million older Americans meet their health care needs. Medicare is a vital commitment made by this country to its citizens to ensure that all of us have basic health care in our older years. To mark this occasion, it is important that we renew the commitment and maintain the broad support enjoyed by the Medicare program. H.R. 3128 is not a perfect bill, but I believe that it is fully consistent with these goals.

Mr. WAXMAN. Mr. Chairman, I yield 2 minutes to the gentleman from Michigan [Mr. LEVIN].

Mr. LEVIN of Michigan. Mr. Chairman, I wanted to comment on some of the debate not so directly on this portion, but on other portions of H.R. 3128.

There has been a lot of reference here, especially on the other side, to the fact that some of the portions of H.R. 3128 are new and, therefore, we should vote against H.R. 3128. I just wanted to come on the floor to say I do not understand that logic. In the last months, we have voted on a number of new proposals, SDI, aid to insurgents in Cambodia, Afghanistan. There is a proposal from the adminis-

tration for $300 million through Exim, or through the Department of Treasury to get at the problem of tied-in credits.

□ 1435

Because something is new does not mean we vote against it. We are here to cut the deficit. We have to be unrelenting in doing so, but that does not mean that we have blinders on, that does not mean that anything that is newly proposed is automatically bad, and it is ironic for people here to get up on the floor, especially those who support a lot of new programs such as SDI and the others I have mentioned. I did not support all of the SDI proposals; I have supported some of the other new proposals, but for them to arise and say, vote against a program that would help get at the problem of teenage pregnancy because it is new—that does not carry out our responsibilities whatsoever.

What we have to do is to make a determined effort to reduce the deficit, at the same time solving or helping to solve, or at least to address major problems that are of national interest.

The CHAIRMAN. The time of the gentleman has expired.

Mr. WAXMAN. Mr. Chairman, I yield 1 additional minute to the gentleman from Michigan [Mr. LEVIN].

Will the gentleman yield to me?

Mr. LEVIN of Michigan. I would be glad to.

Mr. WAXMAN. I want to point out that, in the health area, we are not talking about new programs. We already provide for vision care for the elderly under Medicare, but we do not pay for an optometrist to provide that very same service; we only pay for ophthalmologists.

Well, why should they not be able to see an optometrist if the optometrist is licensed to do the job, and there are more optometrists readily available for them to see. That is the only reason there is a slight increase in cost for this provision.

This is a reconciliation bill. It is really the only time we can do anything in Medicare and Medicaid by way of program improvements. But, we stayed within the budget limits, and that is the important thing. The provision to allow people to go to an optometrist as well as an ophthalmologist was authored by a Republican member of our subcommittee, Mr. WHITTAKER, along with Congresswoman MIKULSKI, who is a Democrat. This whole bill received bipartisan support in the Committee on Energy and Commerce. I think it is a red herring to talk about new spending for new programs, when they are not new spending programs; they are expansions of benefits by allowing people to go to an occupational therapist or optometrist for services rendered under the program.

Mr. MADIGAN. Mr. Chairman, I yield myself such time as I may consume.

I would like, very briefly, to engage in a colloquy with the distinguished chairman of the Subcommittee on Health and the Environment, the gentleman from California [Mr. WAXMAN], if the gentleman is available?

Mr. WAXMAN. I am available and ready to answer any questions that the gentleman might have.

Mr. MADIGAN. I yield to the gentleman to be available.

I am reading a summary of what is contained in this total package, and I read here where it says: "The committee derives about half the total savings, $5.4 billion, by limiting payment increases for both prospective payment system and system-exempt hospitals to 1 percent in fiscal year 1986. Current law would have allowed an increase of more than 5 percent."

I also read here where it says: "Responding to recent reports of insufficient emergency treatment of uninsured patients, the committee includes provisions requiring participating hospitals to provide an appropriate medical screening examination for patients with emergency conditions regardless of their insurance status;" and then it stipulates what the penalties are for a hospital if they do not do this.

Parenthetically let me say I do not have any argument with requiring the hospitals to do that. It is an additional expense for them, however.

Then I read where it says the bill reduces supplementary payments to teaching hospitals which otherwise would compensate those hospitals for their generally higher costs by revising the calculation formula.

So just very quickly, there are two very substantial hits on hospitals; limiting the increase in payments to hospitals to 1 percent next year rather than the minimum of 5 percent that would have occurred; while asking them to provide these additional emergency services, and reducing the payments to teaching hospitals. All of that is being done to hospitals who are the primary providers of health care in this country, so that we can expand these programs to do these new things that otherwise would not be done.

Now I ask the gentleman from California [Mr. WAXMAN] if he thinks it is fair to place this terrible burden upon the hospitals of the United States so as to create the money to do these new things that otherwise would not be done.

Mr. WAXMAN. If the gentleman would yield to me, we have provided for a 1-percent increase for the hospitals, although the Reagan administration asked for no increase at all. By their recommendation, we would have frozen the hospitals, but we at least provide 1 percent. As the gentleman from Illinois [Mr. MADIGAN] indicated, the hospitals might otherwise argue for a 5-percent increase to keep up with the cost-of-living increases.

It seems to me we have got to hold the line where we can. I was very distressed to have to continue the freeze on the physicians. I think it is wrong to have the freeze on the hospitals and the doctors, as the Senate has on the hospitals and we have on the doctors; but the reality is we cannot come up with our savings in any other way.

Now, those are big savings items. What we have in our bill for optometrists is a relatively small amount of money and, without it, people who are covered and eligible for vision care would go without that care because they may not have an ophthalmologist near them in order to provide those services.

In Medicaid, we would provide for low income, pregnant women to get prenatal care. We are going to pay far more to take care of their low-birthweight babies if they do not get prenatal care. The Institute of Medicine indicated it saves $3 for every $1 we propose to spend if we were to end up paying for those low-birth-weight babies. CBO does not give us a cost saving on it, because they only look at the immediate savings.

I think we have come up with a package that I am not thrilled with; but is realistic, given the budget constraints that have been placed upon us by our colleagues who voted for this budget. I think we have handled it in a responsible way.

Mr. MADIGAN. Reclaiming my time, I would say in response to the gentleman that notwithstanding whatever he says the administration position was, current law would have allowed for at least a 5-percent increase.

Mr. WAXMAN. I beg to differ with the gentleman. That is not accurate at all. The administration is empowered to come in with their recommendation as to the amount of increase for hospitals; the Senate has come in with a freeze; the Reagan administration has, by regulation, established a freeze. We recognize that they ought to have some increase as we phase in this new DRG system, and we said at least give them 1 percent, since there is an outside commission that recommended more than 1 percent.

Mr. MADIGAN. Let me reclaim my time to ask the gentleman this question: If current law would not have provided for a greater increase, then how does limiting the increase to 1 percent provide for a $5.4 billion saving? How do you get the saving?

It is a rhetorical question.

Does the gentleman wish to answer the question himself? Go ahead. I yield to the gentleman from California [Mr. WAXMAN].

Mr. WAXMAN. The saving is based on the CBO estimates of the base, and that base included a projected increase. That is the way they figure what the cost would be.

Any reduction on that, under the terms of the budget law, means we are saving money from what would otherwise be spent. That is why the Reagan administration wanted to go to a freeze; they wanted to save that money. It is why the Senate has a freeze and why we have kept it as low as 1 percent.

Mr. MADIGAN. Well, if the gentleman will allow me to reclaim my time, I understand the CBO baseline very well, but the savings here is achieved by limiting the increase on hospitals to 1 percent from what otherwise would have occurred under the CBO baseline.

That is what it is all about. So we do that to hospitals; we take a second shot at teaching hospitals, reducing their reimbursement; we take a third shot at all hospitals by imposing new requirements on them to do things that some presently do not do.

We ask hospitals to do all of these things at a time when inflation may only be 3 or 4 percent, admittedly. We are saying to the hospitals of America: We are going to give you 1 percent and you eat the difference, whatever it is, so that we can generate some money here in Washington to create some new programs that otherwise do not exist.

What we are saying to the elderly people who are the primary users of hospitals, is that we are going to stick it to you elderly folks so that we can do a political thing here to give some constituents something they have not got, and that will make us popular. I think that is a sham and if we do this, if we vote for this, we should all be very embarrassed by it.

Mr. WAXMAN. Will the gentleman yield?

Mr. MADIGAN. I would be happy to yield.

Mr. WAXMAN. I find many of the gentleman's views quite refreshing. When we get into the conference with the other body, where they have gone along with the Reagan administration's recommendations for very low freezes and lower reimbursement levels, then let us fight for a higher reimbursement level than we have been forced to go to on the House side; we are higher on hospital reimbursement, appropriately so, and I hope you will keep that same view when we get into that conference with the other body.

Mr. MADIGAN. If the gentleman will allow me to reclaim my time, Mr. Chairman, my preference would be that we would never get into conference with the Senate with a reconciliation bill that is supposed to have savings in it when it actually is just a guise for new programs and new spending. This is an embarrassment to me and to many other Members of the House.

Mr. WAXMAN. Mr. Chairman and my colleagues, let me point out that we saved $10.4 billion, and if my friend from Illinois [Mr. MADIGAN] would like us not to save $10.4 billion, net overall in spending in the health care area, then so be it, he can vote against the package.

□ 1445

I think it is a reasonable package, given the budget constraints that we have had.

Mr. Chairman, I yield 3 minutes to the gentleman from Massachusetts [Mr. DONNELLY].

Mr. DONNELLY. Mr. Chairman, at the outset let me thank my colleague from Oregon for his kind words about my participation with him in putting together the long-term care insurance package that is in this legislation. I think it is a significant and progressive step forward in dealing with the problems of our frail elderly.

Mr. Chairman, I also rise in strong support of House Resolution 3128, the Deficit Reduction Amendments Act of 1985.

I think it makes a significant, fair reduction in the deficit in the amount of almost $20 billion over 3 years.

I commend both Chairman ROSTENKOWSKI and Chairman WAXMAN for their fine work in bringing this package to the floor today. One of the most important provisions of the legislation for police officers, teachers, firefighters, and all public employees in my own State of Massachusetts and several other States is the provision that only newly hired public employees be required to pay into the Medicare System. I support this provision which I offered as an amendment during the Health Subcommittee markup of this legislation in the Ways and Means Committee, frankly, because it is the only workable alternative to requiring Medicare coverage for all public employees, both those currently employed and new hires.

All public employees were included in the initial committee markup, and the other body's version of this bill also includes all employees. Requiring all public employees to pay into the Medicare System when they already have successful plans of their own and without adequate advance notice is, in my view, unfair and unacceptable. In view of the fact, however, that a vast majority of public employees are already covered by Medicare, I believe the inclusion of only new hires is the best way to effect a transition of coverage for all employees.

In my own State of Massachusetts, no State or local employees are currently covered by Medicare. It would cost the Commonwealth over $70 million in 1986 and nearly $400 million over the next 5 years.

This is clearly an overwhelming financial burden to impose on the Commonwealth of Massachusetts and other States across this country, and they clearly did not anticipate this added additional expense when they were putting together their budget plans for fiscal year 1986 and beyond.

It is also most unfair to change the rules in the middle of the game by imposing an additional 1.45 percent payroll tax on State and local employees not already covered by Medicare. That category includes not only public employees in Massachusetts and Ohio but also most police officers, teachers, and firefighters. Requiring those employees to pay an additional 1.45 percent tax is clearly not just an additional cost to the locality but, in fact, is a tax increase to the local public employees.

Requiring coverage of only newly hired public employees is the only fair way to provide the employees and employers a workable transition period.

I support the amendment, and I support the bill.

Mr. WAXMAN. Mr. Chairman, I yield 1 minute to the very distinguished gentleman from Pennsylvania [Mr. WALGREN].

Mr. WALGREN. I thank the gentleman for yielding.

Mr. Chairman, I rise in support of the Medicare/Medicaid provisions of this bill and indicate especially how important I think it is that we realize that in many ways what we are doing is not continuing to cut off our nose to spite our face. When we expand coverage for women and infants and children, we simply limit the amount of money that we will pay under these programs in the outyears. So it is only sensible economically and certainly should not be criticized as a new spending program.

I would like to also focus on the language in the bill that gives greater direction to the 2176 waivers that encourage the Medicare system to be able to pay benefits for home and community-based care. This also is an area where there are no new costs but certainly a great ability to save money because people can be treated more economically and more humanely in their homes.

The House Energy and Commerce Committee, at my suggestion, included a provision relating to long-term care for the elderly and chronically disabled. In essence, we have clarified certain points in the law to help people get home care instead of institutional care, when appropriate to the person's health care needs and when cost neutral.

In 1981, with my support, Congress enacted a provision known as the 2176 waiver. Under this provision, States were given encouragement and more flexibility

to provide home and community-based long-term care services to individuals who otherwise would require care in a skilled nursing care facility like a nursing home—when that care costs no more than institutional care. Unfortunately, the Department of Health and Human Services in the last 4 years has erected innumerable obstacles to the implementation of this provision, especially requiring inordinate paperwork, assurances and documentation. In the words of one State administrator:

We believe HHS and OMB have gone far beyond congressional intent. Indeed, they have gone so far that a good argument can now be made that a state would be better off not pursuing home and community-based services as an alternative, and instead continue to build expensive nursing home beds and filling them with people who could be better served in the community.

In my home State of Pennsylvania, two waivers to enhance home care have been approved and four have been denied. People in my area tell me that these numbers hardly reflect what could be done because the administrative climate is so discouraging. The hoops Washington makes the health care providers jump through discourage people from seeking waivers for home care instead of encouraging them as Congress intended.

One of my constituents is a good case in point: Merilee Trapp. Ms. Trapp is a 37-year-old woman with cerebral palsy, a resident of a nursing home in my district for 15 years. Merilee came before our Health Subcommittee and testified that she needs some assistance because of her disability, but she is not sick. Merilee does not need skilled nursing home care; she is a perfect example of a person who could function is at home if Medicaid paid for even limited home care. United Cerebral Palsy went to bat for her and got the State to apply for a home-care waiver for Merilee. A year of bureaucratic back-and-forth ensued and Merilee did not move. We hope the changes we make in this bill will eliminate some of the hurdles our State encountered and make the intent of Congress to encourage home care under these circumstances absolutely clear.

Long-term health care for the elderly and the chronically disabled is a time bomb waiting to go off in this country. Before the Congress enacted the 2176 waiver in 1981, Federal policy literally required institutionalization before health care services could be paid for under Medicare. We are trying to change this in favor of a more humane system of health care. It was one small step toward bringing some balance to the system. But in the last 4 years, roadblock after roadblock has been raised to the point that there is a real question whether the administration is trying to kill a program administratively that it cannot kill any other way? And here for once we are not talking about a costly program. Home care cannot cost any more than institutional care, under the waiver policy.

One of the ironies of this situation is that in 1981, President Reagan went on national television complaining about Government regulation and bureaucracy that did not keep people like little Katie Beckett, a paralyzed and ventilator-dependent little girl, in her home with her parents. Congress responded by putting into law this change. Katie's problems got solved. But it should not take a White House press conference to get people the kind of basic care they need in their home and community instead of being required to be institutionalized.

Former HCFA Administrator, Dr. Caroline Davis, testified that an estimated one-fourth of the current nursing home population might be better served in the community. She said:

Many elderly, disabled and chronically ill persons live in institutions not for medical reasons, but because of lack of affordable health and social services available to them in their homes or communities, due to individual's inability to pay for those services or the failure of the state plan to cover them when they do exist.

I hope the administration will join us in ironing out whatever biases and quirks there are in our policies so that we can develop a health care system that provides people what they need.

I would like to share with my colleagues the testimony of my constituent, Merille Trapp, which expresses better than I, her need and wish for home health care:

TESTIMONY OF MERILEE TRAPP, BEFORE THE SUBCOMMITTEE ON HEALTH AND THE ENVIRONMENT

Good Morning Mr. Chairman: My name is Merilee Trapp. I am 37 years old and I am a resident of Kane Hospital Ross Regional Center. Kane is a large intermediate/skilled institution primarily for the aged. There are 360 residents, with 90 percent over 60 years of age. I have lived in Kane for almost 15 years, being admitted in 1970. At that time my mother could not care for me at home because she had to work.

As you can see, I have cerebral palsy and need some assistance in personal care. But I am not sick. I am in no need of nursing care, which is primarily what Kane offers. The only reason I live at Kane is because the services I need cannot be paid for under title 19 in the community.

I appreciate the opportunity to come and speak with you this morning. It's not often that we in institutions get a chance to do things like this. In fact this is the first time I have ever been to Washington, DC. I am not afraid to tell you that I am a little nervous.

I am here today on behalf of all physically disabled young persons like myself who are stuck in institutions. I don't know if anyone here has spent time in an institution but it isn't fun. Most of the residents in my institution are frail elderly. It is very depressing and frustrating for me. I tell my friends that institutions are nice places to visit, but you wouldn't want to live there. There is no privacy, you have no control, and most of the time we are treated as if we are sick. Don't get me wrong, Kane does good things, but as I said it is primarily for the elderly. In fact, the average age at Kane Ross is 78. Yet in the State of Pennsylvania there are thousands of physically disabled people my age living in ICF's.

My life at Kane is dull. Sure there are activities, but they are set up for the elderly; bingos, things like that and after 4 p.m. the place more or less closes up. When people my age are just starting to have a good time, we in institutions are getting ready for bed. Some people in my room go to bed at 7:30, some even earlier. Yet the wailing and night long crying often keeps me awake.

Right now the only times I ever get out of Kane is when I attend the Independent Living Program at UCP in Pittsburgh. Boy do I look forward to these days. At UCP I see other people like myself who are learning to be independent, I'm treated like an adult not a patient and it makes me feel good. These kinds of programs teach us how to manage money, cook meals, and deal with community situations. Yet the new waiver regulations disallow these types of programs and make the unfair assumption that prevocational programs do not lead to self-sufficiency. It is outrageous and personally insulting to me that whoever wrote these regulations don't understand the link between prevocational services and remaining in the community.

I don't understand all the details but my friend, Al Condeluci, who works at UCP has applied to the Federal Government for a waiver to set up community services to help me and many of the other young physicially disabled residents move from Kane. He has done this for a lot of other clients of UCP who are retarded, using State funds and they are doing great. These people are doing the things that folks like you do. They go to the store, movies, go to eat, go to sleep when they want. I know that because I have had the opportunity to spend a few weekends with these friends and have seen things firsthand.

The waiver Al worked on was designed to help people with physical disabilities like me, who are not retarded, have the same chance. Although I try not to get my hopes up too high, I am excited about the possibilities for me in the community. I dream about it. To have friends over and to take care of my own affairs. To be treated like a real person in my own apartment seems almost too good to be true.

I understand that our waiver was not accepted because we were compared to the elderly in the confusing formula we had to use (see Appendix B). Why is it that this always happens? Why do we always have to be compared to the elderly? We are different? Sure we may have some similar attendant care needed but to make me live with people 80 and over is unfair. My present roommate is 88 years old and can speak no English. I can't even talk to her!

I am not sure if my testimony today is helpful or not, but I wanted you to know what it is like for someone like me. The waiver offered me an alternative to living at Kane. It saddens me that the new regulations create even more barriers. I always thought Congress gave us the waiver demonstrations to be flexible and to try new things. It's a shame that this administration has made the waiver process so prohibitive.

Please remember that we disabled are not asking for a handout—only a chance to live a more meaningful life. The waivers offer such an opportunity.

I thank the chairman.

Mr. WAXMAN. Mr. Chairman, may I inquire how much time remains?

The CHAIRMAN. The gentleman from California [Mr. WAXMAN] has 9 minutes remaining.

Mr. WAXMAN. Mr. Chairman, I yield 2 minutes to the gentleman from Ohio [Mr. PEASE].

Mr. PEASE. Mr. Chairman, I rise in support of the bill, among other reasons, because it contains a 4-year reauthorization of the Trade Adjustment Assistance Program which helps workers who have lost their jobs because of imports to adjust to their loss of a job. It provides retraining, it provides job relocation and job search services to those laid off workers. I am pleased to report that a recent recommendation from the Democratic task force encouraged continuation of TAA, as does trade legislation introduced by our Republican colleagues within the last month.

Senator ROTH in the other body is currently working on extension of TAA in that body's reconciliation bill, as well.

Mr. Chairman, the trade imbalance for the United States for the month of September, the figures just came out today, it is $15.5 billion. That is, at an annual rate, $189 billion trade deficit for this country.

It is clear, with that kind of anemic performance in the trade area, we are going to have more and more workers impacted by losing their jobs to imports. It seems to me only fair, right, and decent that we would use the Trade Adjustment Assistance Program, a very modest and cost-effective program, to help ameliorate the sufferings that go with the loss of jobs because of imports.

Mr. Chairman, I yield back the balance of my time.

Mr. WAXMAN. Mr. Chairman, I yield 1 minute to the gentleman from West Virginia [Mr. RAHALL].

Mr. RAHALL. I thank the gentleman for yielding to me.

Mr. Chairman, I strongly support the reauthorization of the Trade Adjustment Assistance Act as envisoned in this bill. However, as we consider H.R. 3128, the Deficit Reduction Amendments Act, I would draw the attention of my colleagues, and especially those from coal-producing and/or consuming districts of the Nation, to one of the revenue amendments to the Ways and Means portion of this legislation. The provision of concern seeks to impose an additional tax burden on the coal industry of $1.2 billion over the next 5 years through an increase in the black lung excise tax assessed on every ton of coal mined. The reason for the increase in the black lung excise tax is, according to the Ways and Means Committee, to reduce the deficit in the black lung disability trust fund, in which black lung claims filed up to 1973 are paid. If the Congress is prepared to enact this rather dramatic tax increase on the coal industry, Mr. Chairman, I would suggest that coal has paid more than its fair share of any tax reform effort.

President Reagan's tax reform plan, if enacted as proposed, would create an additional coal industry tax liability of $1 billion over the next 5 years.

Surely, we must all realize the enactment of a $1.2 billion in black lung tax increase and a $1 billion tax "reform" increase on coal is simply too much to expect of an industry saddled with weak markets and skyrocketing unemployment levels.

I would say to the members of the Committee on Ways and Means, as you consider tax reform legislation remember what coal is being made to pay in the bill before us today H.R. 3128. And remember, that tax reform should not mean the death of an industry. Few, if any, industries today are capable of withstanding an increase in taxes amounting to 2.2 billion over the next 5 years.

Let's tax imported coal, not domestic coal.

Mr. WAXMAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, before I yield back the balance of my time, I want to indicate that there will be a motion to recommit from the Republican side, which I would like to point out would strike from the bill the opportunity for the elderly to get vision care services from optometrists, would prevent low-income women from getting prenatal care under Medicaid, would deny occupational therapy for people under Medicare, and would strike the Medicare appeals procedures.

That is what we would do if that motion to recommit is passed.

Mr. Chairman, I would urge we defeat any motion to recommit and adopt the legislation before us. It saves in the Medicaid and Medicare program over $10 billion.

It is an effort worth supporting.

Mr. MORRISON of Connecticut. Mr. Chairman. I support 3128, the Deficit Reduction Amendments of 1985.

I will vote for the bill because the Ways and Means Committee has presented the House of Representatives with a plan to cut spending which meets the targets set by our budget resolution and does so, for the most part, in a fair and balanced way.

There is a part of this bill, however, which I cannot support and which will cause many of our older constituents substantial hardship.

Section 504 of this bill will make subject to tax that portion of tier I Railroad Retirement benefits that exceed the Social Security benefits available to retirees with comparable earnings.

If this provision becomes law, the IRS will extract an additional $161 million in taxes over the next 3 years from railroad retirees.

At present, these benefits are taxed in the same way as Social Security income; that is, income tax is imposed on only one-half of that amount of the benefits, which taken together with other income, exceeds $25,000 for unmarried individuals and $32,000 for married individuals.

Section 504 of the bill would change that dramatically. Beginning January 1, 1986, all tier I benefits of retirees under 62 years of age would be fully taxed. For example, an individual under the age of 62 who receives the maximum monthly tier I benefit of $717 would be taxed on the full amount of that benefit.

The majority of retirees who are 62 years or older would also have to pay additional tax, since their benefits exceed those available to Social Security beneficiaries with comparable earnings record.

The committee proposal will also have a devastating impact on railroad retirees who receive "occupational disability annuities" since no comparable benefits exist under Social Security. Under the committee plan, the total amount of the occupational annuity would be taxed.

Because full Social Security benefits are not available to Social Security recipients under age 65 but are available to many railroad retirees, this proposal would require taxation of the difference between the amount of the benefits received by rail retirees between the ages of 62 and 65 years and that amount that would be available to a Social Security recipient of the same age and earnings record. Moreover, because the reduction in benefits is permanent for those who retire before age 65 years under Social Security, the difference in the rate of benefits received by railroad retirees would be fully taxed for as long as the benefits continued to be received.

There is no plan to phase-in this change. Many individuals who already have retired and who have adjusted to a standard of living based on their relatively fixed incomes will lose thousands of dollars each year. That is particularly true of those who are currently under 62 years. This change will mean intollerable hardship for thousands.

In considering this issue, Members must acknowledge the substantial burden this Congress placed on retirees as part of the Railroad Solvency Act. In 1984 and 1985, retirees lost cost-of-living adjustments equivalent to 5 percent of total benefits and tier II benefits were made fully taxable as part of our plan to shore up the tier II pension fund. In addition, tier I benefits were made taxable as part of the Social Security Amendments Act of 1983.

Frankly, I find it hard to believe that the committee fully understood the impact of this proposal.

I strongly urge those members of the committee who will be House conferees to abandon this section of the bill when they meet in conference with the Senate.

Mr. DORGAN of North Dakota. Mr. Chairman, during the Ways and Means Committee markup of this bill, I asked my colleagues to consider an amendment to require the Secretary of Health and Human Services to conduct a survey to examine the effects of the prospective payment system on rural hospitals. My colleagues agreed that the problems of rural hospitals are unique and merit such a study, and the amendment was adopted.

Oftentimes, 50 percent of the patients in a rural hospital are Medicare beneficiaries who are classified as outlier patients; that is, those patients who enter the hospital and stay well beyond the DRG estimated length of stay and who require more intensive care than other patients under the same diagnostic-related group. Because of their size and greater caseload of Medicare patients, rural hospitals have great difficulty absorbing the extra costs incurred by the hospital to care for outlier patients.

Rural hospitals provide a valuable service to the citizens of the community, particularly to elderly citizens who have difficulty traveling to larger, city hospitals. I hope that, with the Secretary's report, we can discover ways to help ensure that rural hospitals will continue to provide quality and convenient health care to the elderly.

Ms. OAKAR. Mr. Chairman, today, the Members of this House are considering H.R. 3128, the Deficit Reduction Amendments of 1985. This legislation, like most bills that we face, contains provisions that I favor and provisions that I oppose. I appreciate the difficulty in crafting compromises, such as this one, in order to reduce the deficit in ways that are fair and fiscally responsible. I believe this bill, overall, constitutes good legislation, and so intend to vote in favor of H.R. 3128.

One significant provision in this legislation would include State and local government employees, newly hired on or after January 1, 1986, under the Medicare system. As we all know, earlier this summer, there were proposals to this Congress to include all State and local employees under both Social Security and Medicare. I strongly opposed that proposal because it would have placed an unduly heavy financial burden on employees, including those of the State of Ohio, who were already making substantial contributions to their State retirement and health insurance programs.

As currently written, however, the ways and means Committee's bill will require participation in the Medicare program only, and only for newly hired State and local employees. The total cost in payroll taxes to these employees will be one-sixteenth of the cost of the proposal originally under consideration. This is a compromise that I wish we did not have to accept, but for the sake of the Medicare Program, we must accept it.

Mr. Chairman, this legislation also institutes some extremely important reforms in Medicare and in other health care and income security programs. With respect to Medicare, H.R. 3128 will:

Increase Medicare payments to hospices by $10 per day;

Provide for additional payments to urban hospitals which treat a great number of low-income patients;

Prohibit the Secretary of HHS from freezing payments to teaching hospitals;

Guarantee access to employer group health insurance for divorced and widowed spouses and dependent children;

Prohibit hospitals from refusing emergency care to indigent patients;

Freeze the phase-in of national DRG reimbursement rates to hospitals for 1 year;

Extend the freeze on Medicare physician reimbursement for an additional year, with inflation adjustments going to physicians who accept Medicare reimbursement as payment in full; and

Establish demonstration projects to show the cost-effectiveness of a preventive care benefit under Medicare.

In addition, H.R. 3128 increases funds for the Aid to Families with Dependent Children Program and makes permanent the 16 cents Federal excise tax on cigarettes.

Mr. Chairman, I believe the Medicare and health care provisions in this legislation are sensible and forwardlooking. They will institute long-needed reforms that will improve access to health care for the elderly and the poor and they will begin to reorient our system of health care toward promotion of wellness.

I am especially pleased with section 149 of the Medicare title of this legislation, which establishes preventive care demonstrations under Medicare. I have long been a fervent supporter of measures to promote prevention and health maintenance. The value of preventive care is clear, and, in many cases, has been proven cost-effective. The National Cancer Institute, for example, has proven that 30 percent of breast cancer deaths can be prevented with regular mammography screening. Similarly, we know that 70 percent of deaths from cancer of the colon—which struck our own President—can be prevented with early detection. Heart disease, hypertension, depression, and many other health conditions can be prevented or controlled with regular screening; and this kind of prevention will produce cost savings for the Medicare Program.

Mr. Chairman, preventive care is especially crucial for older women, because 1 in 11 American women will develop breast cancer in their lifetime. With annual mammography screening, we could catch most breast cancers in their earliest stages, while they are operable and survivable. However, only 10 to 15 percent of American women have an annual mammogram. As a result, the breast cancer mortality rate has not changed in 50 years and 38,000 women—1 every 15 minutes—die of breast cancer each year.

Last week, during Breast Cancer Awareness Week, I cochaired a hearing with my dear friend and colleague, Senator CLAUDE PEPPER, on the value of screening of breast cancer. Surgeons, radiologists, cancer center representatives, lay experts, and officials from the administration all testified about the value of early screening for breast cancer. Their message was clear:

Mammography will save money. The cost of treating early stage breast cancer averages $20,000, compared to $60,000 for late stage breast cancer. In all, this Nation spent $2 billion in 1984 on Medical care for breast cancer; $677 million of that total was paid by Medicare.

Mammography will save surgery. This spring, a group of physicians, led by Dr. Bernard Fisher, proved that breast cancer in its early stages can be successfully treated with limited surgery, or lumpectomy. The more extensive mastectomy can be avoided with early detection of breast cancer.

Mammography will save lives. As the National Cancer Institute survey has shown, regular screening can reduce breast cancer deaths by 30 percent. Private demonstrations have since confirmed this finding.

Mr. Chairman, earlier this year, I introduced H.R. 1402, to establish a permanent, voluntary preventive health care option under Medicare. My bill required that mammography be included among the covered preventive services. I strongly urge the authors of this legislation to instruct the Department of Health and Human Services to include mammography screening as a covered service under these worthy demonstration projects.

To conclude, Mr. Chairman, I would like to commend again the authors of this legislation for their courage and their fairmindedness. I believe we are taking important steps forward today, both toward reducing the deficit and toward improving our health care system, and I look forward to continued progress toward both of these goals.

Mr. HOPKINS. Mr. Chairman, there are several provisions of this bill which I oppose. Mr. GRADISON planned to offer an amendment which would have taken care of some of my problems, however, unfortunately the rule adopted by this body did not permit that amendment.

Specifically, I am concerned about provisions to increase the black lung benefit coal tax by $680 million. I also believe it is ludicrous to approve over a billion dollars in increased welfare spending in a bill to reduce the deficit.

However, there is one provision of this bill which is of particular interest to my district because it impacts the Tobacco Program.

H.R. 3128 would continue the Federal excise tax at 16 cents a pack for 5 years instead of allowing it to end as was originally intended in 1982. One cent of this tax will be earmarked for the Tobacco Program for 5 years.

I view this section of the bill with mixed emotions. On the one hand, tobacco producers are facing great difficulties due to a surplus of tobacco which they are financially responsible. Assistance with that financial burden would be helpful.

However, this suggestion also offers a troubling precedent which may pave the way for earmarking of this tax for other purposes. Large increases in the Federal excise tax could reduce demand for cigarettes and thus reduce demand for Kentucky burley tobacco.

There is a tobacco provision in the reconciliation bill under consideration by the other body which would make changes in the Tobacco Program without resorting to earmarking excise taxes. This plan, originally introduced as S. 1418, has been endorsed by a number of Kentucky agricul-

ture organizations and is the plan I have endorsed as my first choice.

Tobacco producers are seeking changes to their program. If I had both plans before me I would choose the plan embodied in the reconciliation bill considered in the other body. However, that is not the situation at hand. I believe the proposal in H.R. 3128 is better than continuing the current program with no changes.

Mr. PANETTA. Mr. Chairman, I rise today in strong support of H.R. 3128, the Deficit Reduction Amendments of 1985. This legislation contains two important provisions which will allow for the further development and utilization of hospice care in the United States. One provision approved by the House Ways and Means Committee would make the hospice benefit under Medicare a permanent program. At present, this benefit is scheduled to terminate at the end of this fiscal year. In addition, a provision approved by the House Energy and Commerce Committee would allow States to fund hospice programs using Medicaid funding. This would allow the poor and the elderly, eligible for Medicaid and suffering from a terminal illness to receive treatment in a hospice program.

As you know, Mr. Chairman, Congress adopted legislation in 1982 which provided coverage of hospice care under Medicare. This program has proven successful and has provided compassionate care to many terminally ill Medicare patients. However, the program has not operated without difficulty. In implementing this program, we have seen constant delays by the Department of Health and Human Services in issuing regulations, meeting deadlines laid out in the authorizing legislation. Also, hospice programs throughout the country have experienced enormous difficulties in obtaining reimbursement from their intermediaries. Even with the administrative hurdles and barriers which hospice programs, have had to encounter, many terminally ill patients and their family members have been served by hospice program from around the country participating in the Medicare Program. The results we have seen clearly indicate that the hospice program deserves to be a permanent part of Medicare. Furthermore, I am hopeful that by making this program permanent the approach to this program by the Department of Health and Human Services will be modified and we will see a more effective and responsive implementation. Also, by making this program permanent any uncertainty by health care providers will be removed and greater participation can be expected.

Mr. Chairman, the Medicaid provision will give States the option to fund hospice programs under the Medicaid Program. While the majority of persons in this country suffering from a terminal illness are elderly, there is a sizable population of Medicaid eligible persons who also may choose to utilize hospice care. I think we should make this option available to Medicaid patients similar to the option currently made available to Medicare beneficiaries. The compassionate and cost-effective alternative offered through the use of hospice should be part of the Medicaid Program, and I strongly urge my colleagues to support this provision and the Medicare provision which will further advance the role of hospice care in caring for the terminally ill in our country.

Mr. JONES of Oklahoma. Mr. Chairman, I would like to take this opportunity to call to the attention of the House a situation in my State of Oklahoma which is currently affecting a number of elderly nursing home residents. The problem was brought to my attention after the Ways and Means and Energy and Commerce Committees passed their health provisions in this bill.

The homes of elderly patients who are permanently committed to nursing homes must be sold to cover their expenses before Medicaid takes over. The Department of Health and Human Services requires that the home be sold within 90 days from the time it becomes apparent that the owner will be in the nursing home permanently. If the home has not been sold in 90 days, patients are forced to leave the nursing home.

Because of the poor state of the economy in Oklahoma, 90 days is not always a long enough period in which to sell a home at fair market value. The homes are sold at a loss, and Medicaid is forced to begin paying the patient's costs at an earlier date than if the houses were sold at fair market value.

Also, there is the possibility of unscrupulous individuals buying the homes from the owners at rock bottom prices and then selling them for a large profit.

My fellow Oklahoman, Senator DAVID BOREN, offered an amendment to the Senate reconciliation package, which the Finance Committee accepted, which eased this problem by putting a 1-year moratorium on the 90-day sales limit.

The gentleman from California [Mr. WAXMAN] whose subcommittee has jurisdiction over Medicaid, across with my position and is positively desposed to accept this amendment. Then the problem will be eased over the short term. However, a more permanent solution will have to be worked out.

On behalf of the 2,000 Oklahoma nursing home patients who will benefit from this provision, I would like to thank Mr. WAXMAN for his cooperation on this problem.

Mr. REID. Mr. Chairman, it is with great reluctance that I rise in opposition to this legislation—H.R. 3128, the Deficit Reduction Act of 1985. I appreciate the long hours of hard work expended by the chairmen and the members of the congressional committees charged with the responsibility of bringing this legislation to the floor of this body.

I share the concern of every member—all of us who want to reduce the cost of funding the Federal Government.

Although this legislation contains several provisions that I support, it also has some provisions that I do not support. Specifically, I am opposed to the mandatory Medicare coverage for State and local employees. Presently, State and local governments have the option of deciding whether their employees will be covered by Medicare. I believe that this should remain a local or State government option. I believe that mandatory inclusion of this requirement is inequitable and shortsighted. This mandatory requirement will increase liabilities for these programs. In short, the liabilities will outweigh the alleged benefits.

For example, a very successful retirement system exists in my State of Nevada. It provides its State and local employees with their own security in their postretirement years. These workers are already contributing their fair share to a solvent retirement system. They are already in a position to provide for themselves.

I oppose this action—an action that will load a horrendous financial burden on States like Nevada that have done an outstanding job of maintaining their own financial integrity.

For these reasons, I urge defeat of H.R. 3128.

Mr. MCGRATH. Mr. Chairman, I would like to take this opportunity to express my opposition to H.R. 3128, as reported from the Ways and Means Committee. Included in this so-called deficit reduction package are onerous provisions which affect the Medicare, public assistance, and unemployment compensation programs, impose a new tax in the form of customs user fees and earmark a portion of the cigarette excise tax.

At a time when Congress is reviewing Federal programs with an eye toward reducing the Federal deficit, it is completely irresponsible to spend $600 million in new money. In addition to the inclusion of $600 million incease in spending, there is a $10 billion cut proposed in the Medicare Program. Subsequently, out of the $19.2 billion in revenue savings, more than half of the reductions will fall on the one group which can least afford the weight of deficit reduction, the elderly.

Included in this legislation are revisions to the Aid to Families with Dependent Children Program [AFDC]. The intent is to make improvements in AFDC quality control standards and procedures. However, instead of initiating the incentives needed to reduce a State's error rate, this legislation liberalizes Federal financing for erroneous payments made by the States when administering the program. Additionally, the estimated cost of $110 million does not earmark $1 for recipients covered by AFDC.

This bill also expands the AFDC Unemployed Parent [UP] Program by requiring each State to extend AFDC benefits to families which include an unemployed parent. This program has always been at the option of States which are in a position to best determine the appropriate scope of their program. The Secretary of Health and Human Services has estimated the increase in Federal expenditures due to this expansion to be over $204 million in fiscal year 1986 alone. State costs could exceed $250 million, and associated Medicaid costs may run as high as $100 million.

As introduced, H.R. 3128 will authorize additional grants to State welfare agencies for the implemetation of counseling and preventive services to reduce the rate of teenage pregnancies. There is no justification for an increase of $150 million in Federal spending to duplicate other authorities available to States under the current law. Under titles X and XX of the Public Health Service Act, States receive Federal financial assistance to provide free and confidential family planning assistance. Also, counseling is available under the social services block grant under title XX of the Social Security Act, and prenatal care and child health services under the maternal and child health block grant under title V of the act.

The imposition of Customs Service user fees is a misguided approach which opens a Pandora's box by creating a new tax with serious and far-reaching implications. The Customs Service brings in over $20 in revenue for each dollar it spends, making it one of the great revenue generating agencies of our Government. More importantly, its services are fundamentally designed to benefit and protect the general public and national welfare.

The General Accounting Office has concluded that no user fees should be assessed for a service that primarily benefits the general public. Additionally, user fees should not be imposed for a service a user is compelled by statute to obtain. Furthermore, it is inconceivable that foreign interests should be charged for services which do not benefit them at all. Assessing user fees against them, in fact, could lead to retaliatory taxing measures by their governments, an action which would only compound our serious trade imbalance.

Finally, this bill contains ill-advised provisions which would earmark a portion of the excise tax on cigarettes for the Tobacco Price Support Program; $200 million of the cigarette tax revenues would be diverted from the Federal Treasury to the tobacco industry. I view this earmarking as a terrible precedent and a backdoor approach to increases in Federal spending.

I have no objection to earmarking the gasoline tax for highways or to earmarking in certain other circumstances. However, earmarking of a specific revenue source for a specific spending program is a devise that should be used sparingly. Earmarking makes it difficult for the legislative body to change the pattern of Government spending and to exercise control over Government programs. Further, it is unusual to find a case in which the amount of revenue derived from a specific tax source bears any relationship to the desirable level of spending for the program for which the tax is earmarked.

Mr. Chairman, this bill is best described as a lost opportunity to make meaningful reductions in Federal spending. I urge my colleagues to oppose this bill and send it back to the committee to come up with a program of deficit reductions, without increases in spending.

Mr. FEIGHAN. Mr. Chairman, the Deficit Reduction Act before us today has many admirable features. it would reauthorize the Trade Adjustment Assistance Program that provides needed relief to the hundreds of thousands of American workers whose jobs have been casualties in our country's international trade war. It will reform the Pension Benefit Guaranty Corporation to increase the safety of private pension plans. And it will crack down on waste in welfare programs while offering more support for programs designed to combat teenage pregancy.

Most important, the bill will cut the Federal deficit by nearly $20 billion over the next 3 years. The Deficit Reduction Act is one of Congress' three real chances this year to start the process of budget balancing. In it, Congress moves beyond mere talk of schedules and targets, and instead puts in place the policy changes that will actually help shrink the Federal deficit

But for all its virtues, the Deficit Reduction Act has one damning flaw: It would force State and local public employees to join the Medicare system. Many States, including my home State of Ohio, have generous and well-funded retirement and health benefit programs for State and local employees. These employees don't need Medicare. They don't want Medicare. And now, simply because the Federal Government is groping for every source of additional revenue it can find to shore up its own financial condition, these State and local public employees will be forced to pay 1.45 percent of their paychecks to the Federal Government.

This sort of Federal meddling is as shortsighted as it is unjustifiable. While the Federal Government will gain a little bit of revenue in the short run—so its books will look a little better to public scrutiny—in the long run the Federal Government will be a net loser. As these State and local public employees claim their Medicare benefits, the system will end up paying out more than it took in from them.

In Ohio alone, the requirement for new hirees to pay into Medicare will cost workers nearly $14 million in the first year. Public employers will bear a similarly heavy cost.

With this sort of coercive legislation, the Federal Government is really trying to force State and local governments to pay off a piece of the Federal deficit. State and local governments have worked hard, often under statutory requirement, to keep their budgets in order. The Congress should be trying to emulate the example provided by the fiscal responsibility of State and local governments, not trying to shift the cost of its own budgetary failure onto the backs of these governments and their employees.

Mr. WAXMAN. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. All time has expired.

Pursuant to the rule, the bill is considered as having been read for amendment under the 5-minute rule. No amendments are in order except for the three amendments which are made in order by House Resolution 301, which shall be considered as having been read and having been adopted.

The text of the bill is as follows:

H.R. 3128

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Deficit Reduction Amendments of 1985".

(b) TABLE OF CONTENTS.—

Title I. Health care programs.
Title II. Trade and customs laws amendments.
Title III. Provisions relating to aid to families with dependent children.
Title IV. Provisions relating to railroad unemployment repayment tax and unemployment compensation.
Title V. Revenue provisions.
Title VI. Amendments relating to single employer plans.

TITLE I—HEALTH CARE PROGRAMS

SEC. 100. SHORT TITLE; TABLE OF CONTENTS OF TITLE.

This title may be cited as the "Medicare and Medicaid Budget Reconciliation Amendments of 1985".

TABLE OF CONTENTS OF TITLE

Part A—Changes Relating Primarily to Part A of the Medicare Program
Subpart 1—Hospital Payment Rates
Sec. 101. Rate of increase in payments for inpatient hospital services.
Sec. 102. One-year extension of DRG transition.
Sec. 103. Application of revised hospital wage index.
Sec. 104. Change in formula for indirect teaching adjustment.
Sec. 105. Computation of additional payment amounts for hospitals serving a disproportionate share of low-income patients.
Sec. 106. Treatment of certain rural osteopathic hospitals as rural referral centers.
Sec. 107. One-year prohibition on freezing cost increases that may be recognized for direct medical education.
Sec. 108. Return on equity capital for inpatient hospital services and other services.
Sec. 109. Continuation of medicare reimbursement waivers for certain hospitals subject to regional hospital reimbursement demonstrations.
Sec. 110. Four-year test for state waivers for certain states.
Sec. 111. Special rule for treatment of depreciation and capital indebtedness for donations of state property to non-profit corporations.
Sec. 112. Report on impact of outlier and transfer policy on rural hospitals.
Sec. 113. Information on impact of PPS payments on hospitals.
Subpart 2—Benefits, Coverage, Premiums, and Provider Agreements
Sec. 121. Extension and payment for hospice care.
Sec. 122. Limiting the penalty for late enrollment in part A.
Sec. 123. Medicare coverage of, and applica-

tion of hospital insurance tax to, newly hired State and local government employees.
Sec. 124. Responsibilities of medicare hospitals in emergency cases.

PART A—CHANGES RELATING PRIMARILY TO PART A OF THE MEDICARE PROGRAM

Subpart 1—Hospital Payment Rates

SEC. 101. RATE OF INCREASE IN PAYMENTS FOR INPATIENT HOSPITAL SERVICES.

(a) SETTING APPLICABLE PERCENTAGE AT ONE PERCENT.—The second sentence of section 1886(b)(3)(B) of the Social Security Act (42 U.S.C. 1395ww(b)(3)(B)) is amended to read as follows: "Notwithstanding the previous sentence or subsection (e), for purposes of subparagraph (A) for cost reporting periods beginning during fiscal year 1986 and for purposes of subsection (d)(3)(A) for discharges occurring during that fiscal year, the applicable percentage increase shall be one percent.".

(b) APPLICATION TO DRG PAYMENT SYSTEM.—Section 1886(d)(3)(A) of such Act is amended by striking out "for fiscal year 1985" and inserting in lieu thereof "for each of fiscal years 1985 and 1986".

(c) NO SECRETARIAL DISCRETION FOR FISCAL YEAR 1986.—Section 1886(e)(4) of such Act is amended by striking out "1986" and inserting in lieu thereof "1987".

SEC. 102. ONE-YEAR EXTENSION OF DRG TRANSITION.

(a) MAINTAINING CURRENT BLEND FOR ONE YEAR.—Section 1886(d)(1) of the Social Security Act (42 U.S.C. 1395ww(d)(1)) is amended by striking out "1985" and "1986" and inserting in lieu thereof "1986" and "1987", respectively, each place either appears.

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply to cost reporting periods, and discharges in fiscal years, beginning on or after October 1, 1985.

SEC. 103. APPLICATION OF REVISED HOSPITAL WAGE INDEX.

(a) APPLICATION OF REVISED INDEX PROSPECTIVELY.—(1) Subsection (b) of section 2316 of the Deficit Reduction Act of 1984 (Public Law 98-369; 98 Stat. 1081) is amended to read as follows:

"(b) The Secretary shall adjust the payment amounts for hospitals for discharges occurring during fiscal year 1986 to reflect the changes the Secretary has proposed (in the Federal Register on June 10, 1985) in regulations respecting the hospital wage index under section 1886(d)(3)(E) of the Social Security Act, as that proposal relates to the use of total gross hospital wages. For discharges occurring after September 30, 1986, the Secretary shall provide for such periodic adjustments in the appropriate wage index used under that section as may be necessary, taking into account changes in the wage differences of full-time and part-time workers.".

(2) The amendment made by paragraph (1) shall be effective as if it had been included in the Deficit Reduction Act of 1984.

(b) STUDY OF METHODOLOGY FOR AREA WAGE ADJUSTMENT FOR CENTRAL CITIES.—(1) The Secretary of Health and Human Services, in consultation with the Prospective Payment Assessment Commission, shall collect information and shall develop one or more methodologies to permit the adjustment of the wage indices used for purposes of sections 1886(d)(2)(C)(ii), 1886(d)(2)(H), and 1886(d)(3)(E) of the Social Security Act, in order to more accurately reflect hospital labor markets, by taking into account variations in wages and wage-related costs between the central city portion of urban areas and other parts of urban areas.

(2) The Secretary shall report to Congress on the information collected and the methodologies developed under paragraph (1) not later than May 1, 1986. The report shall include a recommendation as to the feasibility and desirability of implementing such methodologies.

SEC. 104. CHANGE IN FORMULA FOR INDIRECT TEACHING ADJUSTMENT.

(a) SUBSTITUTION OF NEW FORMULA.—Section 1886(d)(5)(B) of the Social Security Act (42 U.S.C. 1395ww(d)(5)(B)) is amended—

(1) by inserting "(i)" after "(B)",

(2) in the first sentence—

(A) by inserting "for discharges occurring during fiscal years 1984 and 1985" after "except that", and

(B) by inserting before the period at the end the following: ", and except that for discharges for fiscal years after fiscal year 1985 the payment amount shall be determined by multiplying (I) the sum of the amount determined under paragraph (1)(A)(ii)(II) (or, if applicable, the amount determined under paragraph (1)(A)(iii)) and the amount paid to the hospital under subparagraph (A), by (II) the indirect teaching adjustment factor described in clause (ii)", and

(3) by adding at the end the following new clause:

"(ii) For purposes clause (i)(II), the indirect teaching adjustment factor for discharges occurring—

"(I) during fiscal years 1986 and 1987, is equal to 2 x [(1+r)$^{.4}$ -1], where 'r' is the ratio of the hospital's full-time equivalent interns and residents (including those assigned to outpatient departments of the hospital) to beds and '$^{.4}$' is .405, or

"(II) after fiscal year 1987, is equal to 1.5 x [(1+r)$^{.4}$ -1], where 'r' is the same as 'r' under subclause (I) and '$^{.4}$' is .5795.".

(b) ADJUSTMENT OF PAYMENT AMOUNTS.—

(1) RESTANDARDIZING DRG PAYMENT AMOUNTS TO REFLECT CHANGE IN FORMULA.—Section 1886(d)(2)(C)(i) of such Act is amended by inserting "(taking into account, for discharges occurring after September 30, 1985, the amendments made by section 104(a) of the Medicare and Medicaid Budget Reconciliation Amendments of 1985)" after "medical education costs".

(2) PROVIDING FOR SYSTEM SAVINGS FROM CHANGE IN FORMULA.—Subparagraph (C) of section 1886(d)(3) of such Act is amended—

(A) by inserting "(i)" after "(C)",

(B) by inserting "FOR FISCAL YEAR 1985" after "NEUTRALITY",

(C) by striking out "The Secretary" and inserting in lieu thereof "For discharges occurring in fiscal year 1985, the Secretary", and

(D) by adding at the end the following new clause:

"(ii) REDUCING FOR SAVINGS FROM AMENDMENT TO INDIRECT TEACHING ADJUSTMENT FOR SUBSEQUENT FISCAL YEARS.—For discharges occurring after fiscal year 1985, the Secretary shall further reduce each of the average standardized amounts (in a proportion which takes into account the differing effects of the standardization effected under paragraph (2)(C)(i)) so as to provide for a reduction in the total of the payments (attributable to this paragraph) made for discharges occurring during—

"(i) each of fiscal years 1986 and 1987, of an amount equal to the estimated reduction in the additional payment amounts under paragraph (5)(B) that would have resulted from the enactment of the amendments made by section 104 of the Medicare and Medicaid Budget Reconciliation Amendments of 1985 if the factor described in clause (ii)(II) of paragraph (5)(B) were applied for each respective fiscal year instead of the factor described in clause (ii)(I) of that paragraph, and

"(ii) each fiscal year thereafter, of an amount equal to the estimated reduction in the additional payment amounts under paragraph (5)(B) for that fiscal year that has resulted from the enactment of the amendments made by section 104 of the Medicare and Medicaid Budget Reconciliation Amendments of 1985.".

(3) CONFORMING AMENDMENT.—Clauses (i)(I) and (ii)(I) of section 1886(d)(3)(D) of such Act are each amended by inserting "or reduced" after "(B), and adjusted".

SEC. 105. COMPUTATION OF ADDITIONAL PAYMENT AMOUNTS FOR HOSPITALS SERVING A DISPROPORTIONATE SHARE OF LOW-INCOME PATIENTS.

(a) REQUIRING ADJUSTMENT.—Section 1886(d)(5) of the Social Security Act (42 U.S.C. 1395ww(d)(5)) is amended by adding at the end the following new subparagraph:

"(F)(i) The Secretary shall provide under this subparagraph, for discharges occurring during fiscal years 1986 and 1987, for an additional payment amount, for discharges occurring in a cost reporting period of a hospital, for a subsection (d) hospital that is located in an urban area, that has 100 or more beds, and that—

"(I) serves a significantly disproportionate number of patients who have low income (as defined in clause (iv)(I)), or

"(II) can demonstrate that its net inpatient care revenues (excluding any of such revenues attributable to this title or State plans approved under title XIX) during the cost reporting period for indigent care from State and local government sources exceed 30 percent of its total of such revenues during the period.

"(ii) The amount of such payment for each discharge shall be the amount determined under paragraph (1)(A)(ii)(II) (or, if applicable, the amount determined under paragraph (1)(A)(iii)) for that discharge multiplied by the disproportionate share adjustment percentage established under clause (iii) for the cost reporting period in which the discharge occurs.

"(iii) The disproportionate share adjustment percentage for a cost reporting period—

"(I) for a hospital described in clause (i)(II) is equal to 16 percent, and

"(II) for other hospitals is equal to seventenths of the excess low income patient percentage (as defined in clause (iv)(IV)) for that period,

but in no case may the percentage for any hospital for any period exceed 16 percent.

"(iv) In this subparagraph:

"(I) A hospital 'serves a significantly disproportionate number of patients who have low income' for a cost reporting period if the hospital has a low income patient percentage (as defined in subclause (II)) for that period which equals, or exceeds, 15 percent.

"(II) The term 'low income patient percentage' means, with respect to a cost reporting period of a hospital, the percentage of its total number of patient days of inpatient hospital services it provided during period which are attributable to low income patients (as defined in subclause (III)).

"(III) The term 'low income patient' means, with respect to inpatient hospital services provided to a patient, a patient who was, or is determined to have been, entitled to medical assistance under title XIX with respect to some or all of such services during the hospital stay, and includes such an individual notwithstanding the fact that some or all of such services were actually paid for under this title.

"(IV) The term 'excess low income patient percentage' means, for a cost reporting of a hospital, the hospital's low income patient percentage (as defined in subclause (II)) for that period minus 15 percent.".

(b) RESTANDARDIZING DRG PAYMENT AMOUNTS TO REFLECT DISPROPORTIONATE SHARE PAYMENTS.—Section 1886(d)(2)(C) of such Act is amended—

(1) by striking out "and" at the end of clause (ii),

(2) by striking out the period at the end of clause (iii) and inserting in lieu thereof ", and", and

(3) by adding at the end the following new clause:

"(iv) for discharges occurring during fiscal years 1986 and 1987, excluding an estimate of the additional payments to certain hospitals to be made under paragraph (5)(F).".

SEC. 106. TREATMENT OF CERTAIN RURAL OSTEOPATHIC HOSPITALS AS RURAL REFERRAL CENTERS.

(a) IN GENERAL.—Section 1886(d)(5)(C)(i) of the Social Security Act (42 U.S.C. 1395ww(d)(5)(C)(i)) is amended by inserting before the period at the end of the second sentence the following: "and which shall not require a rural osteopathic hospital to have more than 3,000 discharges in a year in order to be classified as a rural referral center".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to cost reporting periods beginning on or after the date of the enactment of this Act.

SEC. 107. ONE-YEAR PROHIBITION ON FREEZING COST INCREASES THAT MAY BE RECOGNIZED FOR DIRECT MEDICAL EDUCATION.

(a) RULE.—The Secretary of Health and Human Services may not implement any regulation that would limit, under the authority of section 1861(v) of the Social Security Act, the costs that may be recognized as reasonable under title XVIII of that Act with respect to the net costs of approved educational activities for a cost reporting period based upon the net costs of those activities for any previous cost reporting period.

(b) EFFECTIVE PERIOD.—The prohibition of subsection (a) shall apply to the cost reporting periods beginning during the one-year period beginning on July 1, 1985.

SEC. 108. RETURN ON EQUITY CAPITAL FOR INPATIENT HOSPITAL SERVICES AND OTHER SERVICES.

(a) INPATIENT HOSPITAL SERVICES.—(1) Section 1861(v)(1) of the Social Security Act (42 U.S.C. 1395x(v)(1)) is amended by adding at the end the following new subparagraph:

"(P) Such regulations may not provide for any payment, with respect to the reasonable costs of inpatient hospital services, for a return on equity capital for hospitals.".

(2) Section 1886(g) of such Act (42 U.S.C. 1395ww(g)) is amended—

(A) by striking out "(1)" after "(g)", and

(B) by striking out paragraph (2).

(b) OTHER SERVICES.—(1) Section 1861(v)(1)(P) of such Act, as added by subsection (a)(1), is amended by inserting "(i)" after "(P)" and by adding at the end the following new clause:

"(ii) If such regulations provide for the payment for a return on equity capital, the rate of return to be recognized, for determining the reasonable cost of services furnished in a cost reporting period, shall be equal to the average of the rates of interest, for each of the months any part of which is included in the period, on obligations issued for purchase by the Federal Hospital Insurance Trust Fund.".

(2) Section 1861(v)(1)(B) of such Act (42 U.S.C. 1395x(v)(1)(B)) is amended—

(A) by striking out "any fiscal period" and "such fiscal period" and inserting in lieu thereof "any cost reporting period" and "the period", respectively, and

(B) by striking out "not exceed one and one-half times" in the second sentence and inserting in lieu thereof "be equal to".

(c) EFFECTIVE DATES.—(1) The amendments made by subsection (a) shall apply to payments made, on the basis of reasonable cost, for hospital cost reporting periods beginning on or after October 1, 1986. Costs attributable to a return on equity capital shall not be included in determining national and regional adjusted DRG prospective payment rates (under section 1886(d) of the Social Security Act) for discharges occurring on or after October 1, 1986.

(2) The amendments made by subsection (b) shall apply to cost reporting periods beginning on or after October 1, 1985.

SEC. 109. CONTINUATION OF MEDICARE REIMBURSEMENT WAIVERS FOR CERTAIN HOSPITALS SUBJECT TO REGIONAL HOSPITAL REIMBURSEMENT DEMONSTRATIONS.

For purposes of section 1886(c) of the Social Security Act (including paragraph (4) thereof), a hospital reimbursement control system which, on January 1, 1985, was carrying out a demonstration under a contract which had been approved by the Secretary of Health and Human Services under section 222(a) of the Social Security Amendments of 1972 shall be deemed (as of the date of the enactment of this Act) to meet the requirements of section 1886(c)(1)(A) of the Social Security Act if the system applies—

(1) to substantially all non-Federal acute care hospitals (as defined by the Secretary for purposes of that section) in the geographic area served by the system on January 1, 1985; and

(2) to the review of at least 75 percent—

(A) of all revenues or expenses in such geographic area for inpatient hospital services, and

(B) of revenues or expenses in the geographic area for inpatient hospital services

provided under the applicable State plan approved under title XIX of the Social Security Act.

SEC. 110. FOUR-YEAR TEST FOR STATE WAIVERS FOR CERTAIN STATES.

(a) IN GENERAL.—Section 1886(c) of the Social Security Act (42 U.S.C 1395ww(c)) is amended by adding at the end the following new paragraph:

"(7) In the case of a State which made a request under paragraph (5) before December 31, 1984, for the approval of a State hospital reimbursement control system and which request was approved—

"(A) in applying paragraphs (1)(C) and (6), a reference to a '36-month period' is deemed a reference to as '48-month period', and

"(B) in order to allow the State the opportunity to provide the assurances described in paragraph (1)(C) for a 48-month period, the Secretary may not discontinue payments under the system, under the authority of paragraph (3)(A) because the Secretary has reason to believe that such assurances are not being (or will not be) met, before July 1, 1986.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect on the date of the enactment of this Act.

SEC. 111. SPECIAL RULE FOR TREATMENT OF DEPRECIATION AND CAPITAL INDEBTEDNESS FOR DONATIONS OF STATE PROPERTY TO NON-PROFIT CORPORATIONS.

(a) GENERAL RULE.—Section 1861(v)(1)(O) of the Social Security Act (42 U.S.C. 1395x(v)(1)(O)) is amended—

(1) by inserting ", except as provided in clause (iv)," in clause (i) after "such regulations shall provide", and

(2) by adding at the end the following new clause:

"(iv) In the case of the transfer of a hospital or skilled nursing facility from ownership by a State to ownership by a non-profit corporation without monetary consideration, clause (i) shall be applied without regard to the acquisition cost of the hospital or facility to the new owner.".

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall be applied as though they were included in the Deficit Reduction Act of 1984.

SEC. 112. REPORT ON IMPACT OF OUTLIER AND TRANSFER POLICY ON RURAL HOSPITALS.

(a) REVIEW.—The Secretary of Health and Human Services shall review the impact of policies respecting outliers and patient transfers on payments under section 1886(d) of the Social Security Act to rural hospitals (particularly on rural hospitals with less than 100 beds).

(b) REPORT.—The Secretary shall report to Congress on the findings of the review not later than May 1, 1986, and shall include in the report recommendations on changes in policies respecting outliers and patient transfers to the extent they adversely affect rural hospitals.

SEC. 113. INFORMATION ON IMPACT OF PPS PAYMENTS ON HOSPITALS.

(a) DISCLOSURE OF INFORMATION.—The Secretary of Health and Human Services shall make available to the Prospective Payment Assessment Commission, the Congressional Budget Office, and to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate the most current information on the payments being made under section 1886 of the Social Security Act to individual hospitals. Such information shall be made available in a manner that permits examination of the impact of such section on hospitals.

(b) CONFIDENTIALITY.—Information disclosed under subsection (a) shall be treated as confidential and shall not be subject to further disclosure in a manner that permits the identification of individual hospitals.

Subpart 2—Benefits, Coverage, Premiums, and Provider Agreements

SEC. 121. EXTENSION AND PAYMENT FOR HOSPICE CARE.

(a) ELIMINATION OF SUNSET.—Section 122(h)(1) of the Tax Equity and Fiscal Responsibility Act of 1982 (P.L. 97-248, 96 Stat. 362), relating to the end of the effective date for hospice care, is amended—

(1) in subparagraph (A)—

(A) by striking out "(h)(1)(A) Subject to subparagraph (B), the" and inserting in lieu thereof "(h)(1) The", and

(B) by striking out ", and before October 1, 1986", and

(2) by striking out subparagraph (B).

(b) INCREASE IN PAYMENT OF DAILY RATES FOR HOSPICE CARE FOR FISCAL YEAR 1986.—(1) Subparagraph (B) of section 1814(i)(1) of the Social Security Act (42 U.S.C. 1395f(i)(1)) is amended to read as follows:

"(B) Notwithstanding subparagraph (A) and for hospice care furnished on or after October 1, 1985, the daily rate of payment per day for routine home care shall be $63.17 and the daily rate of payment for other services included in hospice care shall be the daily rate of payment recognized under subparagraph (A) as of July 1, 1985, increased by $10.".

(2) Subparagraph (C) of such section is amended by striking out "1985" and inserting in lieu thereof "1986".

SEC. 122. LIMITING THE PENALTY FOR LATE ENROLLMENT IN PART A.

(a) LIMITING PENALTY TO 10 PERCENT AND TWICE THE PERIOD DURING WHICH NOT ENROLLED.—Section 1818(c) of the Social Security Act (42 U.S.C. 1395i-2(c)) is amended—

(1) by striking out "and" at the end of paragraph (5),

(2) by striking out the period at the end of paragraph (6) and inserting in lieu thereof "; and", and

(3) by adding at the end the following new paragraph:

"(7) any percent increase effected under section 1839(b) in an individual's monthly premium may not exceed 10 percent and shall only apply to premiums paid during a period equal to twice the number of months in the full 12-month periods described in that section.".

(b) EFFECTIVE DATE.—(1) The amendment made by subsection (a)(3) shall apply to premiums paid for months beginning with January 1986.

(2) In applying that amendment, months (before, during, or after January 1986) in which an individual was required to pay a premium increased under the section that was so amended shall be taken into account in determining the month in which the premium will no longer be subject to an increase under that section as so amended.

SEC. 123. MEDICARE COVERAGE OF, AND APPLICATION OF HOSPITAL INSURANCE TAX TO, NEWLY HIRED STATE AND LOCAL GOVERNMENT EMPLOYEES.

(a) APPLICATION OF HOSPITAL INSURANCE TAX TO NEWLY HIRED EMPLOYEES OF STATE AND LOCAL GOVERNMENTS.—

(1) IN GENERAL.—Subsection (u) of section 3121 of the Internal Revenue Code of 1954 (relating to application of hospital insurance tax to Federal employment) is amended to read as follows:

"(u) APPLICATION OF HOSPITAL INSURANCE TAX TO FEDERAL, STATE, AND LOCAL EMPLOYMENT.—

"(1) FEDERAL EMPLOYMENT.—For purposes of the taxes imposed by sections 3101(b) and 3111(b), subsection (b) shall be applied without regard to paragraph (5) thereof.

"(2) STATE AND LOCAL EMPLOYMENT.—For purposes of the taxes imposed by sections 3101(b) and 3111(b)—

"(A) IN GENERAL.—Except as provided in subparagraphs (B) and (C), subsection (b) shall be applied without regard to paragraph (7) thereof.

"(B) EXCEPTION FOR CERTAIN SERVICES.—Service shall not be treated as employment by reason of subparagraph (A) if—

"(i) the service is included under an agreement under section 218 of the Social Security Act, or

"(ii) the service is performed—

"(I) by an individual who is employed by a State or political subdivision thereof to relieve him from unemployment,

"(II) in a hospital, home, or other institution by a patient or inmate thereof as an employee of a State or political subdivision thereof or of the District of Columbia,

"(III) by an individual, as an employee of a State or political subdivision thereof or of the District of Columbia, serving on a temporary basis in case of fire, storm, snow, earthquake, flood or other similar emergency, or

"(IV) by any individual as an employee included under section 5351(2) of title 5, United States Code (relating to certain interns, student nurses, and other student employees of hospitals of the District of Columbia Government), other than as a medical or dental intern or a medical or dental resident in training.

As used in this subparagraph, the terms 'State' and 'political subdivision' have the meanings given those terms in section 218(b) of the Social Security Act.

"(C) EXCEPTION FOR CURRENT EMPLOYMENT WHICH CONTINUES.—Service performed for an employer shall not be treated as employment by reason of subparagraph (A) if—

"(i) such service would be excluded from the term 'employment' for purposes of this chapter if subparagraph (A) did not apply;

"(ii) such service is performed by an individual—

"(I) who was performing substantial and regular service for remuneration for that employer before January 1, 1986,

"(II) who is a bona fide employee of that employer on December 31, 1985, and

"(III) whose employment relationship with that employer was not entered into for purposes of meeting the requirements of this subparagraph; and

"(iii) the employment relationship with that employer has not been terminated after December 31, 1985.

"(D) TREATMENT OF AGENCIES AND INSTRUMENTALITIES.—For purposes of subparagraph (C), under regulations—

"(i) All agencies and instrumentalities of a State (as defined in section 218(b) of the Social Security Act) or of the District of Columbia shall be treated as a single employer.

"(ii) All agencies and instrumentalities of a political subdivision of a State (as so defined) shall be treated as a single employer and shall not be treated as described in clause (i).

"(3) MEDICARE QUALIFIED GOVERNMENT EMPLOYMENT.—For purposes of this chapter, the term 'medicare qualified government employment' means service which—

"(A) is employment (as defined in subsection (b)) with the application of paragraphs (1) and (2), but

"(B) would not be employment (as so defined) without the application of such paragraphs."

(2) CONFORMING AMENDMENTS.—

(A)(i) Section 3125 of such Code (relating to returns in the case of governmental employees in Guam, American Samoa, and the District of Columbia) is amended by redesignating subsections (a), (b), and (c) as subsections (b), (c), and (d), respectively, and by inserting before subsection (b) (as so redesignated) the following new subsection:

"(a) STATES.—Except as otherwise provided in this section, in the case of the taxes imposed by sections 3101(b) and 3111(b) with respect to service performed in the employ of a State or any political subdivision thereof (or any instrumentality of any one or more of the foregoing which is wholly owned thereby), the return and payment of such taxes may be made by the head of the agency or instrumentality having the control of such service, or by such agents as such head may designate. The person making such return may, for convenience of administration, make payments of the tax imposed under section 3111 with respect to the service of such individuals without regard to the contribution and benefit base limitation in section 3121(a)(1)."

(ii) The section heading for such section 3125 is amended by inserting "STATES," before "GUAM".

(iii) The item relating to section 3125 in the table of sections for subchapter C of chapter 21 of such Code is amended by inserting "States," before "Guam".

(B) Subsection (b) of section 1402 of such Code is amended by striking out "medicare qualified Federal employment (as defined in section 3121(u)(2))" and inserting in lieu thereof "medicare qualified government employment (as defined in section 3121(u)(3))".

(C) Section 3122 of such Code (relating to Federal service) is amended by striking out "including service which is medicare qualified Federal employment (as defined in section 3121(u)(2))" and inserting in lieu thereof "including such service which is medicare qualified government employment (as defined in section 3121(u)(3))".

(D) Subsection (a) of 6205 of such Code (relating to special rules applicable to certain employment taxes) is amended by adding at the end thereof the following new paragraph:

"(5) STATES AND POLITICAL SUBDIVISIONS AS EMPLOYER.—For purposes of this subsection, in the case of remuneration received from a State or any political subdivision thereof (or any instrumentality of any one or more of the foregoing which is wholly owned thereby) during any calendar year, each head of an agency or instrumentality, and each agent designated by either, who makes a return pursuant to section 3125 shall be deemed a separate employer."

(E)(i) Section 6413(a) of such Code (relating to adjustment of certain employment taxes) is amended by adding at the end thereof the following new paragraph:

"(5) STATES AND POLITICAL SUBDIVISIONS AS EMPLOYER.—For purposes of this subsection, in the case of remuneration received from a State or any political subdivision thereof (or any instrumentality of any one or more of the foregoing which is wholly owned thereby) during any calendar year, each head of an agency or instrumentality, and each agent designated by either, who makes a return pursuant to section 3125 shall be deemed a separate employer."

(ii) Section 6413(c)(2) of such Code (relating to special refunds of certain employment taxes) is amended—

(I) by striking out "3125(a)", "3125(b)", and "3125(c)" in subparagraphs (D), (E), and (F), respectively, and inserting in lieu thereof "3125(b)", "3125(c)", and "3125(d)", respectively, and

(II) by adding at the end thereof the following new subparagraph:

"(G) EMPLOYEES OF STATES AND POLITICAL SUBDIVISIONS.—In the case of remuneration received from a State or any political subdivision thereof (or any instrumentality of any one or more of the foregoing which is wholly owned thereby) during any calendar year, each head of an agency or instrumentality, and each agent designated by either, who makes a return pursuant to section 3125(a) shall, for purposes of this subsection, be deemed a separate employer."

(b) ENTITLEMENT TO HOSPITAL INSURANCE BENEFITS.—

(1) REVISION OF DEFINITION OF MEDICARE QUALIFIED GOVERNMENT EMPLOYMENT.—Section 210(p) of the Social Security Act (42 U.S.C. 410(p)) is amended to read as follows:

"Medicare Qualified Government Employment

"(p)(1) For purposes of sections 226 and 226A, the term 'medicare qualified government employment' means any service which would constitute 'employment' as defined in subsection (a) of this section but for the application of the provisions of—

"(A) subsection (a)(5), or

"(B) subsection (a)(7), except as provided in paragraphs (2) and (3).

"(2) Service shall not be treated as employment by reason of paragraph (1)(B) if the service is performed—

"(A) by an individual who is employed by a State or political subdivision thereof to relieve him from unemployment,

"(B) in a hospital, home, or other institution by a patient or inmate thereof as an employee of a State or political subdivision thereof or of the District of Columbia,

"(C) by an individual, as an employee of a State or political subdivision thereof or of the District of Columbia, serving on a temporary basis in case of fire, storm, snow, earthquake, flood or other similar emergency, or

"(D) by any individual as an employee included under section 5351(2) of title 5, United States Code (relating to certain interns, student nurses, and other student employees of hospitals of the District of Columbia Government), other than as a medical or dental intern or a medical or dental resident in training.

As used in this paragraph, the terms 'State' and 'political subdivision' have the meanings given those terms in section 218(b).

"(3) Service performed for an employer shall not be treated as employment by reason of paragraph (1)(B) if—

"(A) such service would be excluded from the term 'employment' for purposes of this section if paragraph (1)(B) did not apply;

"(B) such service is performed by an individual—

"(i) who was performing substantial and regular service for remuneration for that employer before January 1, 1986,

"(ii) who is a bona fide employee of that employer on December 31, 1985, and

"(iii) whose employment relationship with that employer was not entered into for purposes of meeting the requirements of this subparagraph; and

"(C) the employment relationship with that employer has not been terminated after December 31, 1985.

"(4) For purposes of paragraph (3), under regulations (consistent with regulations established under section 3121(u)(2)(D) of the Internal Revenue Code of 1954)—

"(A) all agencies and instrumentalities of a State (as defined in section 218(b)) or of the District of Columbia shall be treated as a single employer, and

"(B) all agencies and instrumentalities of a political subdivision of a State (as so defined) shall be treated as a single employer and shall not be treated as described in subparagraph (A).".

(2) ENTITLEMENT TO HOSPITAL INSURANCE BENEFITS.—

(A) FOR INDIVIDUALS AGE 65 OR OLDER AND FOR DISABLED INDIVIDUALS.—Section 226 of such Act (42 U.S.C. 426) is amended by striking out "medicare qualified Federal employment" in subsections (a)(2)(C)(i) and (b)(2)(C)(ii)(I) and inserting in lieu thereof "medicare qualified government employment".

(B) FOR INDIVIDUALS WITH END-STAGE RENAL DISEASE.—Section 226A(a) of such Act (42 U.S.C. 426-1(a)) is amended by striking out "medicare qualified Federal employment" in paragraphs (1)(A)(ii) and (1)(B)(iii) and inserting in lieu thereof "medicare qualified government employment".

(C) CONFORMING AMENDMENTS.—

(i) Section 1811 of such Act (42 U.S.C. 1395c) is amended by striking out "Federal employment" in clauses (1) and (2) and inserting in lieu thereof "government employment".

(ii) Section 226(g) of such Act (42 U.S.C. 426(g)) is amended by striking out "medicare qualified Federal employment" and inserting in lieu thereof "medicare qualified government employment by virtue of service described in section 210(a)(5)".

(c) EFFECTIVE DATES.—

(1) HOSPITAL INSURANCE TAXES.—The amendments made by subsection (a) shall apply to services performed after December 31, 1985.

(2) MEDICARE COVERAGE.—

(A) IN GENERAL.—The amendments made by subsection (b) shall be effective after December 31, 1985, and the amendments made by paragraph (3) of that subsection shall apply to services performed (for medicare qualified government employment) after that date.

(B) TREATMENT OF CERTAIN DISABILITIES.—For purposes of establishing entitlement to hospital insurance benefits under part A of title XVIII of the Social Security Act pursuant to the amendments made by subsection (b), no individual may be considered to be under a disability for any period beginning before January 1, 1986.

SEC. 124. RESPONSIBILITIES OF MEDICARE HOSPITALS IN EMERGENCY CASES.

(a) REQUIREMENT OF MEDICARE HOSPITAL PROVIDER AGREEMENTS.—Section 1866(a)(1) of the Social Security Act (42 U.S.C. 1395cc(a)(1)) is amended—

(1) by striking out "and" at the end of subparagraph (G),

(2) by striking out the period at the end of subparagraph (H) and inserting in lieu thereof ", and", and

(3) by inserting after subparagraph (H) the following new subparagraph:

"(I) in the case of a hospital, to comply with the requirements of section 1867 to the extent applicable.".

(b) REQUIREMENTS.—Title XVIII of such Act is amended by inserting after section 1866 the following new section:

"EXAMINATION AND TREATMENT FOR EMERGENCY MEDICAL CONDITIONS AND WOMEN IN ACTIVE LABOR

"SEC. 1867. (a) MEDICAL SCREENING REQUIREMENT.—In the case of a hospital that has a hospital emergency department, if any individual (whether or not eligible for benefits under this title) comes to the emergency department and a request is made on the individual's behalf for examination or treatment for a medical condition, the hospital must provide for an appropriate medical screening examination to determine whether or not an emergency medical condition (within the meaning of subsection (e)(1)) exists or to determine if the individual is in active labor (within the meaning of subsection (e)(2)).

"(b) NECESSARY STABILIZING TREATMENT FOR EMERGENCY MEDICAL CONDITIONS AND ACTIVE LABOR.—If any individual (whether or not eligible for benefits under this title) comes to a hospital and the hospital determines that the individual has an emergency medical condition or is in active labor, the hospital must provide either—

"(1) within the staff and facilities available at the hospital, for such further medical examination and such treatment as may be required to stabilize the medical condition or to provide for treatment of the labor, unless the examination or treatment is refused, or

"(2) for transfer of the patient to another medical facility in accordance with subsection (c).

"(c) RESTRICTING TRANSFERS UNTIL PATIENT STABILIZED.—

"(1) RULE.—If a patient at a hospital has an emergency medical condition which has not been stabilized (within the meaning of subsection (e)(4)(B)) or is in active labor, the hospital may not transfer the patient unless—

"(A) a physician (within the meaning of section 1861(r)(1)) has signed a certification that, based upon the reasonable risks and benefits to the patient, and based upon the information available at the time, the benefits reasonably expected from the provision of appropriate medical treatment at another medical facility outweigh the increased risks to the individual's medical condition from effecting the transfer, and

"(B) the transfer is an appropriate transfer (within the meaning of paragraph (2)) to that facility.

"(2) APPROPRIATE TRANSFER.—An appropriate transfer to a medical facility is a transfer—

"(A) in which the receiving facility—

"(i) has available space and qualified personnel for the treatment of the patient, and

"(ii) has agreed to accept transfer of the patient and to provide appropriate medical treatment, and

"(iii) is being provided appropriate medical records (or copies thereof) of the examination and treatment effected at the transferring facility;

"(B) in which the transferring hospital provides the receiving facility with appropriate medical records (or copies thereof) of the examination and treatment effected at the transferring hospital;

"(C) in which the transfer is effected through qualified personnel and transportation equipment, including the use of medically appropriate life support measures during the transfer; and

"(D) which meets such other requirements as the Secretary may find necessary in the interest of the health and safety of patients transferred.

"(d) ENFORCEMENT.—

"(1) AS REQUIREMENT OF MEDICARE PROVIDER AGREEMENT.—Failure of a hospital to meet the requirements of this section subjects the hospital to termination of its medicare provider agreement under this title, in accordance with section 1866(b).

"(2) CIVIL MONETARY PENALTIES.—In addition to the other grounds for imposition of a civil money penalty under section 1128A(a), a participating hospital that knowingly violates a requirement of this section and the responsible physician in the hospital with respect to such a violation are each subject, under that section, to a civil money penalty of not more than $25,000 for each such violation. As used in the previous sentence, the term 'responsible physician' means, with respect to a hospital's violation of a requirement of this section, a physician who—

"(A) is employed by, or under contract with, the participating hospital, and

"(B) acting as such an employee or under such a contract, has professional responsibility for the provision of examinations or treatments for the individual, or transfers of the individual, with respect to which the violation occurred.

"(3) CIVIL ENFORCEMENT.—Any individual who suffers personal harm and any medical facility which suffers a financial loss as a direct result of a participating hospital's violation of a requirement of this section may, in a civil action against the participating hospital, obtain damages and other appropriate relief. No action may be brought under this paragraph more than two years after the date of the violation with respect to which the action is brought.

"(e) DEFINITIONS.—In this section:

"(1) The term 'emergency medical condition' means a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) such that the absence of immediate medical attention could reasonably be expected to result in—

"(A) placing the patient's health in serious jeopardy,

"(B) serious impairment to bodily functions, or

"(C) serious dysfunction of any bodily organ or part.

"(2) The term 'active labor' means labor at a time at which—

"(A) delivery is imminent,

"(B) there is inadequate time to effect safe transfer to another hospital, or

"(C) a transfer may pose a threat of the health and safety of the patient or the unborn child.

"(3) The term 'participating hospital' means hospital that has entered into a provider agreement under section 1866 and has, under the agreement, obligated itself to comply with the requirements of this section.

"(4)(A) The term 'to stabilize' means, with respect to a medical condition, to provide such medical treatment of the condition as may be necessary to assure that no material deterioration of the condition is likely to result from the transfer of the individual from a facility.

"(B) The term 'stabilized' means, with respect to a medical condition, that no material deterioration of the condition is likely to result from the transfer of the individual from a facility.

"(5) The term 'transfer' means the movement (including the discharge) of a patient outside a hospital's facilities at the direction of any person employed by (or affiliated or associated, directly or indirectly, with) the hospital, but does not include such a movement of a patient who (A) has been declared dead, or (B) leaves the facility without the permission of any such person.

"(f) PREEMPTION.—The provisions of this section do not preempt any State or local law requirement respecting hospitals, except to the extent that the requirement directly conflicts with a requirement of this section.".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on October 1, 1985.

PART B—CHANGES RELATING TO PARTS A AND B OF THE MEDICARE PROGRAM

SEC. 131. EXTENSION OF WORKING AGED PROVISIONS TO INDIVIDUALS OVER 69.

(a) EXTENSION OF MEDICARE AS SECONDARY PAYOR.—Section 1862(b)(3)(A) of the Social Security Act (42 U.S.C. 1395y(b)(3)(A)) is amended—

(1) in clause (i), by striking out "who is under 70 years of age during any part of such month" and ", if the spouse is under 70 years of age during any part of such month", and

(2) in clause (iii), by striking out "and ending with the month before the month in which such individual attains the age of 70".

(b) EXTENSION OF ANTI-DISCRIMINATION PROVISIONS.—

(1) Section 4(g)(1) of the Age Discrimination in Employment Act of 1967 (29 U.S.C. 623(g)(1)) is amended by striking out "through 69" and inserting in lieu thereof "or older" each place it appears.

(2) Section 12(a) of such Act (29 U.S.C. 631(a)) is amended by inserting "(except the provisions of section 4(g))" after "Act".

(c) CONFORMING AMENDMENTS.—

(1) SPECIAL ENROLLMENT PERIOD.—Paragraph (3) of section 1837(i) of the Social Security Act (42 U.S.C. 1395p(i)(3)) is amended to read as follows:

"(3) The special enrollment period referred to in paragraphs (1) and (2) is the period beginning with the first day of the first month in which the individual is no longer enrolled in a group health plan described in section 1862(b)(3)(A)(iv) by reason of current employment and ending seven months later.".

(2) EFFECTIVE DATE OF ENROLLMENT.—Subsection (e) of section 1838 of the Social Security Act (42 U.S.C. 1395q) is amended to read as follows:

"(e) Notwithstanding subsection (a), in the case of an individual who enrolls during a special enrollment period pursuant to section 1837(i)(3)—

"(1) in the first month of the special enrollment period, the coverage period shall begin on the first day of that month, or

"(2) in a month after the first month of the special enrollment period, the coverage period shall begin on the first day of the month following the month in which the individual so enrolls."

(d) EFFECTIVE DATES.—(1) The amendments made by subsection (a) shall apply with respect to items and services furnished on or after January 1, 1986.

(2) The amendments made by subsection (b) shall become effective on January 1, 1986.

(3) The amendments made by subsection (c) shall take effect on January 1, 1986, but shall not apply to any individual with respect to whom a special enrollment period

under section 1837(i)(3) began before that date.

SEC. 132. PROVISIONS RELATING TO HEALTH MAINTENANCE ORGANIZATIONS AND COMPETITIVE MEDICAL PLANS.

(a) FINANCIAL RESPONSIBILITY FOR PATIENTS HOSPITALIZED ON THE EFFECTIVE DATE OF AN ENROLLMENT OR DISENROLLMENT.—(1) Subsection (c) of section 1876 of the Social Security Act (42 U.S.C. 1395mm) is amended by adding at the end the following new paragraph:

"(7) A risk-sharing contract under this section shall provide that in the case of an individual who is receiving inpatient hospital services from a subsection (d) hospital (as defined in section 1886(d)(1)(B)) as of the effective date of the individual's—

"(A) enrollment with an eligible organization under this section—

"(i) payment for such services until the date of the individual's discharge shall be made under this title as if the individual were not enrolled with the organization,

"(ii) the organization shall not be financially responsible for payment for such services until the date after the date of the individual's discharge, and

"(iii) the organization shall nonetheless be paid the full amount otherwise payable to the organization under this section; or

"(B) termination of enrollment with an eligible organization under this section—

"(i) the organization shall be financially responsible for payment for such services after such date and until the date of the individual's discharge,

"(ii) payment for such services during the stay shall not be made under section 1886(d), and

"(iii) the organization shall not receive any payment with respect to the individual under this section during the period the individual is not enrolled.".

(2) Subsection (a)(3) of such section is amended by striking out "Payments" and inserting in lieu thereof "Subject to subsection (c)(7), payments".

(3) Subsection (a)(6) of such section is amended by striking out "If" and inserting in lieu thereof "Subject to subsection (c)(7), if".

(b) DISENROLLMENTS.—

(1) EFFECTIVE DATE.—Subsection (c)(3)(B) of such section is amended by striking out "a full calendar month after" and inserting in lieu thereof "the date on which".

(2) INFORMATION.—Such subsection is further amended by adding at the end the following: "In the case of an individual's termination of enrollment, the organization shall provide the individual with a copy of the written request for termination of enrollment and a written explanation of the period (ending on the effective date of the termination) during which the individual continues to be enrolled with the organization and may not receive benefits under this title other than through the organization.".

(c) REVIEW OF MARKETING MATERIAL.—Subsection (c)(3)(C) of such section is amended by adding at the end the following: "No brochures, application forms, or other promotional or informational material may be distributed by an organization to (or for the use of) individuals eligible to enroll with the organization under this section unless (i) at least 45 days before its distribution, the organization has submitted the material to the Secretary for review and (ii) the Secretary has not disapproved the distribution of the material. The Secretary shall review all such material submitted and shall disapprove such material if the Secretary determines, in the Secretary's discretion, that the material is materially inaccurate or misleading or otherwise makes a material misrepresentation.".

(d) PROMPT PUBLICATION OF AAPCC.—Subsection (a)(1)(A) of such section is amended by inserting after "The Secretary shall annually determine" the following: ", and shall publish not later than September 7 before the calendar year concerned".

(e) EFFECTIVE DATES.—

(1) FINANCIAL RESPONSIBILITY.—The amendments made by subsection (a) shall apply to enrollments and disenrollments that become effective on or after October 1, 1985.

(2) DISENROLLMENTS.—The amendments made by subsection (b) shall apply to requests for termination of enrollment submitted on or after October 1, 1985.

(3) MATERIAL REVIEW.—(A) The amendment made by subsection (c) shall not apply to material which has been distributed before October 1, 1985.

(B) Such amendment also shall not apply so as to require the submission of material which is distributed before November 15, 1985.

(C) Such amendment shall also not apply to material which the Secretary determines has been prepared before the date of the enactment of this Act and for which a commitment for distribution has been made, if the application of such amendment would constitute a hardship for the organization involved.

(4) PUBLICATION.—The amendment made by subsection (d) shall apply to determinations of per capita rates of payment for 1987 and subsequent years.

(5) NECESSARY MODIFICATION OF CONTRACTS.—The Secretary of Health and Human Services shall provide for such changes in the risk-sharing contracts which have been entered into under section 1876 of the Social Security Act as may be necessary to conform to the requirements imposed by the amendments made by this section on a timely basis.

SEC. 133. EVALUATION OF PREADMISSION AND PRE-PROCEDURE CERTIFICATION PROGRAMS.

(a) EFFECTIVENESS OF 100 PERCENT REVIEW.—The Secretary of Health and Human Services shall evaluate the relative effectiveness of peer review organizations that require preadmission certification of 100 percent of elective inpatient surgical procedures with other peer review organizations that require such certification of a lesser percentage of such procedures.

(b) FEASIBILITY OF PRE-PROCEDURE CERTIFICATION FOR OUTPATIENT SURGICAL PROCEDURES.—The Secretary also shall evaluate the feasibility of extending the pre-procedure certification activities of peer review organizations to cover elective surgical procedures conducted in outpatient and ambulatory care settings. In doing the evaluation, the Secretary shall consider the extent to which entities with contracts with the Secretary under section 1842 of the Social Security Act and other entities might perform such activities more efficiently and effectively than peer review organizations.

(c) REPORT.—The Secretary shall report to Congress, not later than December 31, 1986, on the results of the evaluations conducted under this section.

(d) DEFINITIONS.—In this section, the term "peer review organization" means a utilization and quality control peer review organization with a contract under part B of title XI of the Social Security Act.

SEC. 134. PROHIBITION OF ADMINISTRATIVE MERGER OF RENAL DISEASE NETWORKS WITH OTHER ORGANIZATIONS.

The Secretary of Health and Human Services may not provide for the merger of any renal disease network (established under section 1881(c) of the Social Security Act) into a utilization and quality control peer review organization (with a contract under part B of title IX of such Act) or another entity without express statutory authorization.

SEC. 135. EXTENSION OF CERTAIN MEDICARE MUNICIPAL HEALTH SERVICES DEMONSTRATION PROJECTS.

The Secretary of Health and Human Services shall extend, for a period of three additional years, approval of three municipal health services demonstration projects (located in Cincinnati, Milwaukee, and San Jose) authorized under section 402(a) of the Social Security Amendments of 1967.

SEC. 136. TECHNICAL CORRECTIONS.

(a) WORKING AGED TECHNICAL CORRECTIONS.—

(1) PREMIUM PENALTY.—The second sentence of section 1839(b) of the Social Security Act (42 U.S.C. 1395r(b)), as amended by section 2338(a) of the Deficit Reduction Act of 1984, is amended by striking out "months in which" and all that follows through "clause (iv) of such section" and inserting in lieu thereof "months during which the individual has attained the age of 65 and for which the individual can demonstrate that the individual was enrolled in a group health plan described in section 1862(b)(3)(A)(iv)".

(2) SPECIAL ENROLLMENT PERIODS.—Section 1837(i) of the Social Security Act (42 U.S.C. 1395p), as added by section 2338(b) of the Deficit Reduction Act of 1984, is amended—

(A) in paragraph (1), by amending subparagraph (A) to read as follows:

"(A) has attained the age of 65,"; and

(B) in paragraph (2), by redesignating subparagraph (C) as subparagraph (D) and by amending subparagraphs (A) and (B) to read as follows:

"(A) has attained the age of 65;

"(B)(i) has enrolled (or has been deemed to have enrolled) in the medical insurance program established under this part during the individual's initial enrollment period, or (ii) is an individual described in paragraph (1)(B);

"(C) has enrolled in such program during any subsequent special enrollment period under this subsection during which the individual was not enrolled in a group health plan described in section 1862(b)(3)(A)(iv) by reason of the individual's (or individual's spouse's) current employment; and".

(3) EFFECTIVE DATES.—

(A) The amendment made by paragraph (1) shall apply to months beginning with January 1983 for premiums for months beginning with the first month that begins more than 30 days after the date of the enactment of this Act.

(B)(i) The amendments made by paragraph (2) shall apply to enrollments in months beginning with the first effective month (as defined in clause (ii)), except that in the case of any individual who would have a special enrollment period under section 1837(i) of the Social Security Act that would have begun after November 1984 and before the first effective month, the period shall be deemed to begin with the first day of the first effective month.

(ii) For purposes of clause (i), the term "first effective month" means the first

month that begins more than 90 days after the date of the enactment of this Act.

(b) MISCELLANEOUS TECHNICAL CORRECTIONS.—

(1)(A) Subclause (III) of section 1842(b)(7)(B)(ii) of the Social Security Act (42 U.S.C. 1395u(b)(7)(B)(ii)), as added by section 2307(a)(2)(G) of the Deficit Reduction Act of 1984, is amended by indenting it two additionals ems to the right so as to align its left margin with the left margins of subclauses (I) and (II) of that section.

(B) Section 1861(n) of the Social Security Act (42 U.S.C. 1395x(n)), as inserted by section 2321(e)(3) of the Deficit Reduction Act of 1984, is amended by striking out "at his home" and inserting in lieu thereof "as his home".

(C) Section 1888(b) of the Social Security Act (42 U.S.C. 1395yy(b)), as added by section 2319(b) of the Deficit Reduction At of 1984, is amended by striking out "nothwithstanding" and inserting in lieu thereof "notwithstanding".

(D) The amendments made by this paragraph shall be effective as if they had been originally included in the Deficit Reduction Act of 1984.

(2)(A) Clause (iii) of section 1842(b)(7)(B) of the Social Security Act (42 U.S.C. 1395u(b)(7)(B)), as added by section 3(b)(6) of Public Law 98-617, is amended by moving its alignment two additionals ems to the left so as to align its left margin with the left margins of clauses (i) and (ii) of that section.

(B) The amendment made by subparagraph (A) shall be effective as if it had been originally included in Public Law 98-617.

(3)(A) Section 1861(v)(1)(G)(i) of the Social Security Act (42 U.S.C. 1395x(b)(1)(G)(i)), as amended by section 602(d)(1) of the Social Security Amendments of 1983, is amended by inserting, in the matter after subclause (III), "on the basis of" after "(during such period)".

(B) The amendment made by subparagraph (A) shall be effective as if it had been originally included in the Social Security Amendments of 1983.

PART C—CHANGES RELATING PRIMARILY TO PART B OF THE MEDICARE PROGRAM

SEC. 141. EXTENSION OF PHYSICIAN FEE FREEZE FOR NON-PARTICIPATING PHYSICIANS AND IMPROVEMENTS IN THE PARTICIPATING PHYSICIAN PROGRAM.

(a) ONE-YEAR EXTENSION FOR NON-PARTICIPATING PHYSICIANS.—

(1) EXTENSION.—Section 1842(b)(4) of the Social Security Act (42 U.S.C. 1395u(b)(4)) is amended—

(A) in subparagraph (A)—

(i) by inserting "(i)" after "(4)(A)", and

(ii) by adding at the end the following new clauses:

"(ii) In determining the prevailing charge levels under the third and fourth sentences of paragraph (3) for physicians' services furnished during the 12-month period beginning October 1, 1985, by a physician who is not a participating physician (as defined in subsection (h)(1)) at the time of furnishing the services, the Secretary shall not set any level higher than the same level as was set for the 12-month period beginning July 1, 1983.

"(iii) In determining the prevailing charge levels under the third and fourth sentences of paragraph (3) for physicians' services furnished during a 12-month period beginning on or after October 1, 1986, by a physician who is not a participating physician (as defined in subsection (h)(1)) at the time of furnishing the services, the Secretary shall not set any level higher than the same level as was set for services furnished during the previous fiscal year for physicians who were participating physicians during that year.";

(B) in subparagraph (B)—

(i) by inserting "(i)" after "(B)", and

(ii) by adding at the end the following new clause:

"(ii) In determining the reasonable charge under paragraph (3) for physicians' services furnished during the 12-month period beginning October 1, 1985, by a physician who is not a participating physician (as defined in subsection (h)(1)) at the time of furnishing the services, the customary charges shall be the same customary charges as were recognized under this section for the 12-month period beginning July 1, 1983.";

(C) in subparagraph (C)—

(i) by inserting "(i)" after "(C)",

(ii) by striking out "(A)" and inserting in lieu thereof "(A)(i)" each place it appears, and

(iii) by adding at the end the following new clause:

"(ii) In determining the prevailing charge levels under the third and fourth sentences of paragraph (3) for physicians' services furnished during the periods beginning after September 30, 1986, by a physician who was not a participating physician on that date, the Secretary shall treat the level as set under subparagraph (A)(ii) as having fully provided for the economic changes which would have been taken into account but for the limitations contained in subparagraph (A)(ii).."; and

(D) in subparagraph (D)—

(i) by striking out "who at no time" and all that follows through "subsection (h)(1))" and insert in lieu thereof "who was not a participating physician (as defined in subsection (h)(1)) on September 30, 1985",

(ii) by inserting "(i)" after "(D)", and

(iii) by adding at the end the following new clause:

"(ii) In determining the customary charges for physicians' services furnished during the 12-month period beginning October 1, 1986, or October 1, 1987, by a physician who is not a participating physician (as defined in subsection (h)(1)) on September 30, 1986, the Secretary shall not recognize increases in actual charges for services furnished during the 12-month period beginning on October 1, 1985, above the level of the physician's actual charges billed during the 3-month period ending on June 30, 1984.".

(2) CONTINUED ENFORCEMENT.—The first sentence of section 1842(j)(1) of such Act (42 U.S.C. 1395u(j)(1)) is amended to read as follows: "In the case of a physician who is not a participating physician for items and services furnished during a portion of the 27-month period beginning July 1, 1984, the Secretary shall monitor the physician's actual charges to individuals enrolled under this part for physicians' services during that portion of that period.".

(3) EFFECTIVE DATE.—The amendments made by this subsection shall apply to services furnished on or after October 1, 1985.

(b) INCENTIVES FOR PARTICIPATING PHYSICIAN PROGRAM.—

(1) ONE-YEAR EXTENSION OF TRANSFER OF FUNDS FOR CARRIERS.—Section 2306(e) of the Deficit Reduction Act of 1984 (Public Law 98-369; 98 Stat. 1073) is amended—

(A) by striking out "and 1985" and inserting in lieu thereof ", 1985, and 1986",

(B) by striking out "the amendments made by this section" and inserting in lieu thereof "subsections (b)(4), (h), and (j) of section 1842 of the Social Security Act",

(C) by striking out "for fiscal year 1985" and inserting in lieu thereof "for each of fiscal years 1985 and 1986", and

(D) by adding at the end the following new sentence: "A significant proportion of such funds shall be used for the expansion of the participating physician and supplier program and for the development of professional relations staffs dedicated to addressing the billing and other problems of physicians and suppliers participating in that program.".

(2) IMPROVEMENT OF PARTICIPATING PHYSICIAN DIRECTORIES.—Section 1842(i) of the Social Security Act (42 U.S.C. 1395u(i)) is amended—

(A) in the first sentence of paragraph (2)—

(i) by striking out "a directory" and inserting in lieu thereof "directories (for appropriate local geographic areas)", and

(ii) by inserting "for that area" before "for that fiscal year";

(B) in the second sentence of paragraph (2), by striking out "The directory" and inserting in lieu thereof "Each directory";

(C) in paragraph (3)—

(i) by striking out "directory" the first place it appears and inserting in lieu thereof "the directories", and

(ii) by striking out "directory" the second place it appears and inserting in lieu thereof "the appropriate area directory or directories"; and

(D) in paragraph (4)—

(i) by striking out "directory" and inserting in lieu thereof "the directories", and

(ii) by adding at the end the following: "The Secretary shall provide that each appropriate area directory is sent to each participating physician located in that area.".

(3) ELIMINATION OF PHYSICIAN ASSIGNMENT RATE LIST.—Section 1842(i) of such Act is further amended—

(A) by striking out "(i)(1)" and all that follows through the end of paragraph (1),

(B) by striking out "subsection (h)(1)" in paragraph (2) and inserting in lieu thereof "paragraph (1)",

(C) by striking out "such list and" and "the list and" each place either appears in paragraphs (3) and (4), and

(D) by redesignating paragraphs (2) through (4) as paragraphs (4) through (6) of subsection (h), respectively.

(4) INFORMATION ON THE PARTICIPATING PHYSICIAN AND SUPPLIER PROGRAM IN EXPLANATIONS OF MEDICARE BENEFITS FOR UNASSIGNED CLAIMS.—Section 1842(h) of such Act, as previously amended by this subsection, is further amended by adding at the end the following new paragraphs:

"(7) The Secretary shall provide that each explanation of benefits provided under this part for services furnished in the United States, in conjunction with the payment of claims under section 1833(a)(1) (made other than on an assignment-related basis, described in paragraph (8)), shall include—

"(A) a reminder of the participating physician and supplier program established under this subsection (including the limitation on charges that may be imposed by such physicians and suppliers), and

"(B) the toll-free telephone number or numbers, maintained under paragraph (2), at which an individual enrolled under this part may obtain information on participating physicians and suppliers.

"(8) For purposes of this title, a claim is considered to be paid on an 'assignment-related basis' if the claim is paid on the basis of an assignment described in subsection (b)(3)(B)(ii), in accordance with subsection

(b)(6)(B), or under the procedure described in section 1870(f)(1).".

(5) EFFECTIVE DATE.—Section 1842(b)(7) of the Social Security Act, as added by paragraph (4) of this subsection, shall apply to explanations of benefits provided on or after such date (not later than April 1, 1986) as the Secretary of Health and Human Services shall specify.

SEC. 142. EXPANSION OF MEMBERSHIP AND DUTIES OF THE PROSPECTIVE PAYMENT ASSESSMENT COMMISSION TO INCLUDE REVIEW OF PAYMENTS FOR PHYSICIANS' SERVICES.

(a) EXPANSION AND ESTABLISHMENT OF SUBCOMMITTEES.—

(1) IN GENERAL.—Section 1886(e)(6) of the Social Security Act (42 U.S.C. 1395ww(e)(6)) is amended—

(A) by amending subparagraph (A) to read as follows:

"(A)(i) The Commission shall consist of 23 members. Fifteen members of the Commission shall first be appointed no later than April 1, 1984, and the remaining members shall first be appointed no later than January 1, 1986, for a term of three years, except that the Director may provide for such shorter terms as will insure that (on a continuing basis) the terms of no more than eight members expire in any one year. The Director shall appoint a member to serve as Chairman.

"(ii) The Chairman of the Commission shall provide for two subcommittees of the Commission, one with functions and responsibilities relating primarily to hospital payment issues and the other with functions and responsibilities relating primarily to physician payment issues. The Chairman may assign members of the Commission to serve on either or both subcommittees of the Commission."; and

(B) in subparagraph (B), by inserting "representatives of consumer and elderly groups," after "third party payors,".

(2) INITIAL ASSIGNMENT OF MEMBERS TO SUBCOMMITTEES.—The Chairman of the Commission shall initially assign—

(A) to serve on the hospital payment subcommittee of the Commission—

(i) all the members of the Commission serving in positions established before the date of the enactment of this Act, and

(ii) two of the members appointed to the Commission for additional positions established by the amendment made by paragraph (1), and

(B) to serve on the physician payment subcommittee of the Commission the six remaining members of the Commission who are appointed to serve in the additional positions so established.

(b) ADDITIONAL FUNCTIONS RELATING TO PHYSICIANS' PAYMENTS.—Section 1886(e) of such Act is amended by adding at the end the following new paragraph:

"(7)(A) The Commission shall make recommendations to the Congress, not later than February 1 of each year (beginning with 1987), regarding adjustments to the reasonable charge levels for physicians' services recognized under section 1842(b) and changes in the methodology for determining the rates of payment, and for making payment, for physicians' services under this title and other items and services under part B.

"(B) In making its recommendations, the Commission shall—

"(i) consider, and make recommendations on the feasibility and desirability of reducing, the differences in payment amounts for physicians' services under part B which are based on differences in geographic location or specialty;

"(ii) review the input costs (including time, professional skills, and risks) associated with the provision of different physicians' services;

"(iii) identify those charges recognized as reasonable under section 1842(b) which are significantly out-of-line, based on the considerations of clauses (i) and (ii);

"(iv) assess the likely impact of different adjustments in payment rates, particularly their impact on physician participation in the participation program established under section 1842(h) and on beneficiary access to necessary physicians' services;

"(v) make recommendations on ways to increase physician participation in that participation program and the acceptance of payment under part B on an assignment-related basis;

"(vi) make recommendations respecting the advisability and feasibility of making changes in the payment system for physicians' services under part B based on (I) the Secretary's study under section 603(b)(2) of the Social Security Amendments of 1983 (relating to payments for physicians' services furnished to hospital inpatients on the basis of diagnosis-related groups) and (II) the Office's report under section 2309 of the Deficit Reduction Act of 1984 (relating to physician reimbursement under part B);

"(vii) identify those procedures, involving the use of assistants at surgery, for which payment for those assistants should not be made under this title without prior approval; and

"(viii) identify those procedures for which an opinion of a second physician should be required before payment is made under this title.

"(C) The Commission also shall advise and make recommendations to the Secretary respecting the development of the relative value scale under section 1845.".

(c) STUDY OF RELATIVE VALUE SCALE FOR PHYSICIANS' SERVICES.—Part B of title XVIII of such Act is amended by adding at the end the following new section:

"STUDY OF RELATIVE VALUE SCALE FOR PHYSICIANS' SERVICES

"SEC. 1845. (a) The Secretary shall develop a relative value scale that establishes a numerical relationship among the various physicians' services for which payment may be made under this part.

"(b) In developing the scale, the Secretary shall consider among other items—

"(1) the report of the Office of Technology Assessment under section 2309 of the Deficit Reduction Act of 1984,

"(2) the recommendations of the Prospective Payment Assessment Commission under section 1886(e)(7)(C), and

"(3) factors with respect to the input costs for furnishing particular physicians' services, such as—

"(A) the differences in costs of furnishing services in different settings,

"(B) the differences in skill levels and training required to perform the services, and

"(C) the time required, and risk involved, in furnishing different services.

"(c) The Secretary shall complete the development of the relative value scale under this section, and report to Congress on the development, not later than April 1, 1987. The report shall include recommendations for the application of the scale to the payment for physicians' services furnished under this part on or after October 1, 1987.".

(d) MODIFICATION OF FUNDING FORMULA.—Section 1886(e)(6)(I)(ii) of such Act is amended by striking out "Eighty-five" and "15" and inserting in lieu thereof "Fifty" and "50".

(e) STAFFING.—Section 1886(e)(6)(C)(i) of such Act is amended by striking out "25" and inserting in lieu thereof "35".

(f) EFFECTIVE DATE.—The amendments made by this section shall take effect on October 1, 1985.

SEC. 143. PART B PREMIUM.

Section 1839 of the Social Security Act (42 U.S.C. 1395r) is amended—

(1) in subsection (e), by striking out "1988" and inserting in lieu thereof "1989" each place it appears;

(2) in subsection (f)(1), by striking out "or 1986" and inserting in lieu thereof ", 1986, or 1987"; and

(3) in subsection (f)(2), by striking out "or 1987" and inserting in lieu thereof ", 1987, or 1988".

SEC. 144. DETERMINATIONS OF INHERENT REASONABLENESS OF CHARGES AND CUSTOMARY CHARGES FOR CERTAIN FORMER HOSPITAL-COMPENSATED PHYSICIANS.

(a) REGULATIONS RELATING TO INHERENT REASONABLENESS OF CHARGES.—Section 1842(b) of the Social Security Act (42 U.S.C. 1395u(b)) is amended by adding at the end the following new paragraph:

"(8) The Secretary by regulation shall—

"(A) describe the factors to be used in determining the cases (of particular items or services) in which the application of this subsection results in the determination of a reasonable charge that, by reason of its grossly excessive or grossly deficient amount, is not inherently reasonable, and

"(B) provide in those cases for the factors that will be considered in establishing a reasonable charge that is realistic and equitable.".

(b) COMPUTATION OF CUSTOMARY CHARGES FOR CERTAIN FORMER HOSPITAL-COMPENSATED PHYSICIANS.—(1) In applying section 1842(b) of the Social Security Act for payment for physicians' services performed during fiscal year 1986, in the case of a physician who during the period beginning on October 31, 1982, and ending on January 31, 1985, was a hospital-compensated physician (as defined in paragraph (2)) but who, as of January 31, 1985, was no longer a hospital-compensated physician, the physician's customary charges shall—

(A) be based upon the physician's actual charges billed during the 12-month period ending on March 31, 1985, and

(B) in the case of a physician who is not a participating physician (as defined in section 1842(h)(1) of the Social Security Act) on October 1, 1985, be deflated (to take into account the legislative freeze on actual charges for nonparticipating physicians' services) by multiplying the physician's customary charges by .83.

(2) In paragraph (1), the term "hospital-compensated physician" means, with respect to services furnished to patients of a hospital, a physician who is compensated by the hospital for the furnishing of physicians' services for which payment may be made under this part.

SEC. 145. OCCUPATIONAL THERAPY SERVICES.

(a) COVERAGE.—Subparagraph (C) of section 1832(a)(2) of the Social Security Act (42 U.S.C. 1395k(a)(2)) is amended to read as follows:

"(C) outpatient physical therapy services (other than services to which the second

sentence of section 1861(p) applies) and outpatient occupational therapy services (other than services to which such sentence applies through the operation of section 1861(g));".

(b) LIMITATION ON PAYMENTS.—Section 1833(g) of such Act (42 U.S.C. 1395l(g)) is amended—

(1) by striking out "next to last sentence" and inserting in lieu thereof "second sentence", and

(2) by adding at the end thereof the following new sentence: "In the case of outpatient occupational therapy services which are described in the second sentence of section 1861(p) through the operation of section 1861(g), with respect to expenses incurred in any calendar year, no more than $500 shall be considered as incurred expenses for purposes of subsections (a) and (b).".

(c) CERTIFICATION STANDARD.—(1) Section 1835(a)(2)(C) of such Act (42 U.S.C. 1395n(a)(2)(C)) is amended—

(A) by inserting "or outpatient occupational therapy services" after "outpatient physical therapy services",

(B) in clause (i), by inserting "or occupational therapy services, respectively" after "physical therapy services", and

(C) in clause (ii), by inserting "or qualified occupational therapist, respectively" after "qualified physical therapist".

(2) The second sentence of section 1835(a) of such Act and section 1866(e) of such Act (42 U.S.C. 1395n(a), 1395cc(e)) are each amended—

(A) by inserting "(or meets the requirements of such section through the operation of section 1861(g))" after "1861(p)(4)(A)" and after "1861(p)(4)(B)", and

(B) by inserting "or (through the operation of section 1861(g)) with respect to the furnishing of outpatient occupational therapy services" after "(as therein defined)".

(d) DEFINITION AND INCLUSION WITH OTHER PART B SERVICES.—(1) Section 1861 of the Social Security Act (42 U.S.C. 1395x) is amended by inserting after subsection (f) the following new subsection:

"Outpatient Occupational Therapy Services

"(g) The term 'outpatient occupational therapy services' has the meaning given the term 'outpatient physical therapy services' in subsection (p), except that 'occupational' shall be substituted for 'physical' each place it appears therein.".

(2) Section 1861(s)(2)(D) of such Act (42 U.S.C. 1395x(s)(2)(D)) is amended by inserting "and outpatient occupational therapy services" after "outpatient physical therapy services".

(3) Section 1861(v)(5)(A) of such Act (42 U.S.C. 1395x(v)(5)(A)) is amended by inserting "(including through the operation of section 1861(g))" after "section 1861(p)".

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to expenses incurred for outpatient occupational therapy services furnished on or after October 1, 1985.

SEC. 146. PAYMENT FOR DURABLE MEDICAL EQUIPMENT.

(a) LIMITING TO ONE PERCENT INCREASES IN CUSTOMARY AND PREVAILING CHARGES FOR DURABLE MEDICAL EQUIPMENT FURNISHED ON RENTAL BASIS.—Section 1842 of the Social Security Act (42 U.S.C. 1395u) is amended by adding at the end the following new subsection:

"(k)(1) In determining the customary and prevailing charge levels under the third and fourth sentences of subsection (b)(3) for durable medical equipment furnished on a rental basis (other than under a lease-purchase agreement) during the 12-month period beginning on October 1, 1985, the Secretary shall not set any such level higher than 101 percent of the same level as was set for the 15-month period beginning July 1, 1984.".

(b) REQUIRING PAYMENT ON AN ASSIGNMENT BASIS FOR DURABLE MEDICAL EQUIPMENT FURNISHED ON A RENTAL BASIS.—Section 1842(k) of such Act, as added by subsection (a), is amended by adding at the end the following new paragraph:

"(2) Payment under this part for durable medical equipment furnished on a rental basis (other than under a lease-purchase agreement) may only be made on an assignment-related basis (as defined in subsection (h)(8)) or to a provider of services with an agreement in effect under section 1866.".

(c) LIMITING INCREASE IN PREVAILING CHARGES FOR DURABLE MEDICAL EQUIPMENT TO CONSUMER PRICE INDEX.—Section 1842(k) of such Act, as previously amended, is further amended by adding at the end the following new paragraph:

"(3) In the case of durable medical equipment, the prevailing charge levels determined for purposes of clause (ii) of the third sentence of subsection (b) for any 12-month period (beginning after September 30, 1986) may not exceed (in the aggregate) the levels determined under such clause (taking into account paragraph (1), if applicable) for the preceding 12-month period by a percentage which exceeds the percentage increase in the Consumer Price Index for all urban consumers (U.S. city average), as published by the Secretary of Labor, for the 12-month period ending in March of that preceding 12-month period.".

(d) CLARIFICATION OF PREVIOUS EFFECTIVE DATE.—Section 2306(b)(2) of the Deficit Reduction Act of 1984 is amended by adding before the period at the end the following: "and to durable medical equipment furnished on or after July 1, 1985".

(e) EFFECTIVE DATES.—

(1) SUBSECTION (a).—The amendments made by subsection (a) shall apply to durable medical equipment furnished on or after October 1, 1985.

(2) SUBSECTION (b).—The amendments made by subsection (b) shall apply to durable medical equipment furnished on or after January 1, 1986.

(3) SUBSECTION (c).—The amendments made by subsection (c) shall apply to durable medical equipment furnished on or after October 1, 1986.

(4) SUBSECTION (d).—The amendment made by subsection (d) shall take effect as though it were included in the enactment of the Deficit Reduction Act of 1984.

SEC. 147. PAYMENT FOR ASSISTANTS AT SURGERY FOR CERTAIN CATARACT OPERATIONS AND OTHER OPERATIONS.

(a) LIMITATION ON PAYMENT.—Section 1862(a) of the Social Security Act (42 U.S.C. 1395y(a)) is amended—

(1) by striking out "or" at the end of paragraph (13),

(2) by striking out the period at the end of paragraph (14) and inserting in lieu thereof "; or", and

(3) by adding at the end the following new paragraph:

"(15) which are for services of an assistant at surgery in a cataract operation unless, before the surgery is performed, the appropriate utilization and quality control peer review organization (under part B of title XI) has approved of the use of such an assistant in the surgical procedure based on the existence of a complicating medical condition.".

(b) ADDITIONAL PRO FUNCTIONS.—Section 1154(a)(8) of such Act (42 U.S.C. 1320c-3(a)(8)) is amended by inserting before the period at the end the following: "or as may be required to carry out section 1862(a)(15)".

(c) PROHIBITION FOR SUBMITTING BILL FOR WHICH PAYMENT MAY NOT BE MADE.—Section 1842 of such Act (42 U.S.C. 1395u) is amended—

(1) in subsection (j)(2), by inserting "or subsection (l)" after "paragraph (1)", and

(2) by adding after subsection (k), added by section 146(a) of this title, the following new subsection:

"(l)(1) If a physician knowingly and willfully bills an individual enrolled under this part for actual charges for services as an assistant at surgery for which payment may not be made by reason of section 1862(a)(15), the Secretary may apply sanctions against such physician in accordance with subsection (j)(2).

"(2) If a physician knowingly and willfully bills an individual enrolled under this part for actual charges that includes a charge for an assistant at surgery for which payment may not be made by reason of section 1862(a)(15), the Secretary may apply sanctions against such physician in accordance with subsection (j)(2).".

(d) EXTENSION OF PROHIBITION TO OTHER PROCEDURES.—The Secretary of Health and Human Services, after consultation with the Prospective Payment Assessment Commission, shall develop recommendations and guidelines respecting other surgical procedures for which an assistant at surgery is generally not medically necessary and the circumstances under which the use of an assistant at surgery is medically appropriate with prior approval of an appropriate entity. The Secretary shall report to Congress, not later than April 1, 1986, on these recommendations and guidelines.

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to services performed on or after October 1, 1985.

SEC. 148. LIMITATION ON MEDICARE PAYMENT FOR POST-CATARACT SURGERY PATIENTS.

(a) PAYMENT FOR REPLACEMENT OF LOST OR DAMAGED CATARACT EYEGLASSES AND CATARACT CONTACT LENSES.—With respect to the payment for replacement cataract eyeglasses and cataract contact lenses under title XVIII of the Social Security Act in the case of an individual beneficiary—

(1) payment may be made for the replacement only once every year of lost or damaged cataract eyeglasses, and

(2) payment may be made—

(A) in the first year after surgery, for one original cataract contact lens for each eye and for the replacement only twice of a lost or damaged cataract contact lens for each eye, and

(B) in each subsequent year, for the replacement only twice of a lost or damaged cataract contact lens for each eye.

(b) DETERMINATION OF SEPARATE PAYMENT AMOUNTS FOR PROSTHETIC LENSES AND PROFESSIONAL SERVICES.—Section 1842(b) of the Social Security Act (42 U.S.C. 1395u(b)) is amended by adding after paragraph (8), added by section 144(a) of this Act, the following new paragraph:

"(9) In providing payment for cataract eyeglasses and cataract contact lenses, and professional services relating to them, under this part, each carrier shall—

"(A) provide for separate determinations of the payment amount for the eyeglasses and lenses and of the payment amount for the professional services, and

"(B) not recognize as reasonable for such eyeglasses and lenses more than such amount as the Secretary establishes in guidelines relating to the inherent reasonableness of charges for such eyeglasses and lenses.".

(c) EFFECTIVE DATE.—(1) The amendments made by this section shall apply to items and services furnished on or after October 1, 1985.

(2) In applying the amendment made by subsection (a), there shall not be taken into account any cataract eyeglasses or contact lenses replaced before October 1, 1985.

SEC. 149. DEMONSTRATION OF PREVENTIVE HEALTH SERVICES UNDER MEDICARE.

(a) DEMONSTRATION PROGRAM.—The Secretary of Health and Human Services (hereinafter in this section referred to as the "Secretary") shall establish a demonstration program designed to reduce disability and dependency through the provision of preventive health services to individuals entitled to benefits under title XVIII of the Social Security Act (hereinafter in this section referred to as "medicare beneficiaries").

(b) PREVENTIVE HEALTH SERVICES UNDER DEMONSTRATION PROGRAM.—The preventive health services to be made available under the demonstration program shall include—

(1) health screenings,

(2) health risk appraisals,

(3) immunizations, and

(4) counseling on and instruction in—

(A) diet and nutrition,

(B) reduction of stress,

(C) exercise and exercise programs,

(D) sleep regulation,

(E) injury prevention,

(F) prevention of alcohol and drug abuse,

(G) prevention of mental health disorders,

(H) self-care, including use of medication, and

(I) reduction of smoking.

(c) CONDUCT OF PROGRAM.—The demonstration program shall—

(1) be conducted under the direction of accredited public or private nonprofit schools of public health;

(2) be conducted in no fewer than five sites, which sites shall be chosen so as to be geographically diverse and shall be readily accessible to a significant number of medicare beneficiaries;

(3) involve community outreach efforts at each site to enroll the maximum number of medicare beneficiaries in the program; and

(4) be designed—

(A) to test alternative methods of payment for preventive health services, including payment on a prepayment basis as well as payment on a fee-for-service basis,

(B) to permit a variety of appropriate health care providers to furnish preventive health services, including physicians, health educators, nurses, allied health personnel, dieticians, and clinical psychologists, and

(C) to facilitate evaluation under subsection (d).

(d) EVALUATION.—The Secretary shall evaluate the demonstration project in order to determine—

(1) the short-term and long-term costs and benefits of providing preventive health services for medicare beneficiaries, including any reduction in inpatient services resulting from providing the services, and

(2) what practical financing mechanisms exist to provide payment for preventive health services under title XVIII of the Social Security Act.

(e) REPORTS TO CONGRESS.—(1) Not later than three years after the date of the enactment of this Act, the Secretary shall submit a preliminary report to the Committee on Ways and Means of the House of Representatives and to the Committee on Finance of the Senate on the progress made in the demonstration program, including a description of the sites at which the program is being conducted and the preventive health services being provided at the different sites.

(2) Not later than five years after the date of the enactment of this Act, the Secretary shall submit a final report to those Committees on the demonstration program and shall include in the report—

(A) the evaluation described in subsection (d), and

(B) recommendations for appropriate legislative changes to incorporate payment for cost-effective preventive health services into the medicare program.

(f) FUNDING.—Expenditures made for the demonstration program shall be made from the Federal Supplementary Medical Insurance Trust Fund (established by section 1841 of the Social Security Act). Grants and payments under contracts may be made either in advance or by way of reimbursement, as may be determined by the Secretary, and shall be made in such installments and on such conditions as the Secretary finds necessary to carry out the purpose of this section.

(g) WAIVER OF MEDICARE REQUIREMENTS.—The Secretary shall waive compliance with such requirements of title XVIII of the Social Security Act to the extent and for the period the Secretary finds necessary for the conduct of the demonstration program.

PART D—OTHER AND ADDITIONAL CHANGES RELATING TO PART B (OR TO PARTS A AND B) OF THE MEDICARE PROGRAM

SEC. 151. EXTENSION OF PHYSICIAN FEE FREEZE FOR CERTAIN NON-PARTICIPATING PHYSICIANS AND IMPROVEMENTS IN THE PARTICIPATING PHYSICIAN PROGRAM.

(a) ONE-YEAR EXTENSION FOR NON-PARTICIPATING PHYSICIANS.—

(1) EXTENSION.—Section 1842(b)(4) of the Social Security Act (42 U.S.C. 1395u(b)(4)) is amended—

(A) in subparagraph (A)—

(i) by inserting "(i)" after "(4)(A)", and

(ii) by adding at the end the following new clauses:

"(ii) In determining the prevailing charge levels under the third and fourth sentences of paragraph (3) for physicians' services furnished during the 12-month period beginning October 1, 1985, by a physician who is not a participating physician (as defined in subsection (h)(1)) at the time of furnishing the services, the Secretary shall not set any level higher than the same level as was set for the 12-month period beginning July 1, 1983; except that in the case of a physician described in subparagraph (E)(i), the Secretary shall not set any level higher than the increase percentage (described in subparagraph (E)(ii)) above the level that was set for the 12-month period beginning July 1, 1983.

"(iii) In determining the prevailing charge levels under the third and fourth sentences of paragraph (3) for physicians' services furnished during a 12-month period beginning on or after October 1, 1986, by a physician who is not a participating physician (as defined in subsection (h)(1)) at the time of furnishing the services, the Secretary shall not set any level higher than the same level as was set for services furnished during the previous fiscal year for physicians who were participating physicians on the last day of that year; except that in the case of a physician described in subparagraph (E)(i), the Secretary shall not set any level higher than the increase percentage (described in subparagraph (E)(ii)) above the level that was set for services furnished during the previous fiscal year for physicians who were participating physicians on the last day of that year.";

(B) in subparagraph (B)—

(i) by inserting "(i)" after "(B)", and

(ii) by adding at the end the following new clause:

"(ii) In determining the reasonable charge under paragraph (3) for physicians' services furnished during the 12-month period beginning October 1, 1985, by a physician who is not a participating physician (as defined in subsection (h)(1)) at the time of furnishing the services, the customary charges shall be the same customary charges as were recognized under this section for the 12-month period beginning July 1, 1983; except that in the case of a physician described in subparagraph (E)(i), the customary charges may not exceed the customary charges that were recognized under this section for the 12-month period beginning July 1, 1983, increased by the increase percentage (described in subparagraph (E)(ii)).";

(C) in subparagraph (C)—

(i) by inserting "(i)" after "(C)",

(ii) by striking out "(A)" and inserting in lieu thereof "(A)(i)" each place it appears, and

(iii) by adding at the end the following new clause:

"(ii) In determining the prevailing charge levels under the third and fourth sentences of paragraph (3) for physicians' services furnished during periods beginning after September 30, 1986, by a physician who was not a participating physician on that date, the Secretary shall treat the level as set under subparagraph (A)(ii) as having fully provided for the economic changes which would have been taken into account but for the limitations contained in subparagraph (A)(ii).";

(D) in subparagraph (D)—

(i) by striking out "who at no time" and all that follows through "subsection (h)(1))" and insert in lieu thereof "who was not a participating physician (as defined in subsection (h)(1)) on September 30, 1985",

(ii) by inserting "(i)" after "(D)", and

(iii) by adding at the end the following new clause:

"(ii)(I) In determining the customary charges for physicians' services furnished during the 12-month period beginning October 1, 1986, or October 1, 1987, by a physician who is not a participating physician (as defined in subsection (h)(1)) on September 30, 1986, except as provided in subclause (II) the Secretary shall not recognize increases in actual charges for services furnished during the 12-month period beginning on October 1, 1985, above the level of the physician's actual charges billed during the 3-month period ending on June 30, 1984.

"(II) In the case of a physician who was a participating physician on September 30, 1985, the Secretary shall recognize increases in actual charges for services furnished during the 12-month period beginning on October 1, 1985, above the level of the physician's actual charges billed during the 3-

month period ending on June 30, 1984, but only to the extent that the percentage of such an increase does not exceed one-half of the percentage increase in the physician's actual charges for services furnished over the period beginning July 1, 1984, and ending September 30, 1985."; and

(E) by adding at the end the following new subparagraph:

"(E)(i) With respect to services furnished during a 12-month period beginning on October 1, a physician described in this clause is a physician who is not a participating physician at the time of furnishing the services but who either (I) was a participating physician on September 30 before that period, or (II) accepted payment on an assignment-related basis (as defined in subsection (h)(8)) for all claims received during the immediately preceding 12-month period for services furnished by the physician under this part during that period.

"(ii) The 'increase percentage' described in this clause is, with respect to a physician for items and services furnished during a 12-month period beginning on October 1, one-half of the percentage increase that otherwise would be applicable to services furnished by the physician if the physician (I) had been a participating physician on the date before the first date of the period, and (II) were to sign up to be a participating physician for items and services furnished during the period.".

(2) CONTINUED ENFORCEMENT.—Section 1842(j)(1) of such Act (42 U.S.C. 1395u(j)(1)) is amended—

(A) by amending the first sentence to read as follows: "In the case of a physician who is not a participating physician for items and services furnished during a portion of the 27-month period beginning July 1, 1984, the Secretary shall monitor the physician's actual charges to individuals enrolled under this part for physicians' services during that portion of that period."; and

(B) in the second sentence, by inserting ", or, in the case of items and services furnished during fiscal year 1986 by a physician who was a participating physician on September 30, 1985, if such physician knowingly and willfully bills individuals enrolled under this part for actual charges which are more than the increase percentage (which may be recognized under subparagraph (D)(ii)(II)) above such physician's actual charges for the calendar quarter beginning on April 1, 1984" after "April 1, 1984".

(3) EFFECTIVE DATE.—The amendments made by this subsection shall apply to services furnished on or after October 1, 1985.

(b) INCENTIVES FOR PARTICIPATING PHYSICIAN PROGRAM.—

(1) ONE-YEAR EXTENSION OF TRANSFER OF FUNDS FOR CARRIERS.—Section 2306(e) of the Deficit Reduction Act of 1984 (Public Law 98-369; 98 Stat. 1073) is amended—

(A) by striking out "and 1985" and inserting in lieu thereof ", 1985, and 1986",

(B) by striking out "the amendments made by this section" and inserting in lieu thereof "subsections (b)(4), (h), and (j) of section 1842 of the Social Security Act",

(C) by striking out "for fiscal year 1985" and inserting in lieu thereof "for each of fiscal years 1985 and 1986", and

(D) by adding at the end the following new sentence: "A significant proportion of such funds shall be used for the expansion of the participating physician and supplier program and for the development of professional relations staffs dedicated to addressing the billing and other problems of physicians and suppliers participating in that program.".

(2) IMPROVEMENT OF PARTICIPATING PHYSICIAN DIRECTORIES.—Section 1842(i) of the Social Security Act (42 U.S.C. 1395u(i)) is amended—

(A) in the first sentence of paragraph (2)—

(i) by striking out "a directory" and inserting in lieu thereof "directories (for appropriate local geographic areas)", and

(ii) by inserting "for that area" before "for that fiscal year";

(B) in the second sentence of paragraph (2), by striking out "The directory" and inserting in lieu thereof "Each directory";

(C) in paragraph (3)—

(i) by striking out "directory" the first place it appears and inserting in lieu thereof "the directories", and

(ii) by striking out "directory" the second place it appears and inserting in lieu thereof "the appropriate area directory or directories";

(D) in paragraph (4)—

(i) by striking out "directory" and inserting in lieu thereof "the directories", and

(ii) by adding at the end the following: "The Secretary shall provide that each appropriate area directory is sent to each participating physician located in that area.".

(3) ELIMINATION OF PHYSICIAN ASSIGNMENT RATE LIST.—Section 1842(i) of such Act is further amended—

(A) by striking out "(i)(1)" and all that follows through the end of paragraph (1),

(B) by striking out "subsection (h)(1)" in paragraph (2) and inserting in lieu thereof "paragraph (1)",

(C) by striking out "such list and" and "the list and" each place either appears in paragraphs (3) and (4), and

(D) by redesignating paragraphs (2) through (4) as paragraphs (4) through (6) of subsection (h), respectively.

(4) INFORMATION ON THE PARTICIPATING PHYSICIAN AND SUPPLIER PROGRAM IN EXPLANATIONS OF MEDICARE BENEFITS FOR UNASSIGNED CLAIMS.—Section 1842(h) of such Act, as previously amended by this subsection, is further amended by adding at the end the following new paragraphs:

"(7) The Secretary shall provide that each explanation of benefits provided under this part for services furnished in the United States, in conjunction with the payment of claims under section 1833(a)(1) (made other than on an assignment-related basis, described in paragraph (8)), shall include—

"(A) a reminder of the participating physician and supplier program established under this subsection (including the limitation on charges that may be imposed by such physicians and suppliers), and

"(B) the toll-free telephone number or numbers, maintained under paragraph (2), at which a beneficiary may obtain information on participating physicians and suppliers.

"(8) For purposes of this title, a claim is considered to be paid on an 'assignment-related basis' if the claim is paid on the basis of an assignment described in subsection (b)(3)(B)(ii), in accordance with subsection (b)(6)(B), or under the procedure described in section 1870(f)(1).".

(5) EFFECTIVE DATE.—Section 1842(b)(7) of the Social Security Act, as added by paragraph (4) of this subsection, shall apply to explanations of benefits provided on or after such date (not later than April 1, 1986) as the Secretary of Health and Human Services shall specify.

SEC. 152. PHYSICIAN PAYMENT REVIEW COMMISSION AND DEVELOPMENT OF RELATIVE VALUE SCALE.

(a) ESTABLISHMENT OF COMMISSION.—Part B of title XVIII of the Social Security Act is amended by adding at the end the following new section:

"PHYSICIAN PAYMENT REVIEW COMMISSION

"SEC. 1845. (a)(1) The Director of the Congressional Office of Technology Assessment (hereinafter in this section referred to the the 'Director' and the 'Office', respectively) shall provide for the appointment of a Physician Payment Review Commission (hereinafter in this section referred to as the 'Commission'), to be composed of individuals with expertise in the provision and financing of physicians' services appointed by the Director (without regard to the provisions of title 5, United States Code, governing appointments in the competitive service).

"(2) The Commission shall consist of 11 individuals. Members of the Commission shall first be appointed no later than December 1, 1985, for a term of three years, except that the Director may provide initially for such shorter terms as will insure that (on a continuing basis) the terms of no more than four members expire in any one year.

"(3) The membership of the Commission shall include physicians, other health professionals, individuals skilled in the conduct and interpretation of biomedical, health services, and health economics research, and representatives of consumers and the elderly. The Director shall seek nominations from a wide range of groups, including—

"(A) national organizations representing physicians, including medical specialty organizations,

"(B) organizations representing the elderly and consumers,

"(C) national organizations representing medical schools,

"(D) national organizations representing hospitals, including teaching hospitals, and

"(E) national organizations representing health benefits programs.

"(b)(1) The Commission shall make recommendations to the Congress, not later than February 1 of each year (beginning with 1987), regarding adjustments to the reasonable charge levels for physicians' services recognized under section 1842(b) and changes in the methodology for determining the rates of payment, and for making payment, for physicians' services under this title and other items and services under this part.

"(2) In making its recommendations, the Commission shall—

"(A) consider, and make recommendations on the feasibility and desirability of reducing, the differences in payment amounts for physicians' services under this part which are based on differences in geographic location or specialty;

"(B) review the input costs (including time, professional skills, and risks) associated with the provision of different physicians' services;

"(C) identify those charges recognized as reasonable under section 1842(b) which are significantly out-of-line, based on the considerations of subparagraphs (A) and (B);

"(D) assess the likely impact of different adjustments in payment rates, particularly their impact on physician participation in the participation program established under section 1842(h) and on beneficiary access to necessary physicians' services;

"(E) make recommendations on ways to increase physician participation in that participation program and the acceptance of payment under this part on an assignment-related basis;

"(F) make recommendations respecting the advisability and feasibility of making changes in the payment system for physicians' services under this part based on (i) the Secretary's study under section 603(b)(2) of the Social Security Amendments of 1983 (relating to payments for physicians' services furnished to hospital inpatients on the basis of diagnosis-related groups) and (ii) the Office's report under section 2309 of the Deficit Reduction Act of 1984 (relating to physician reimbursement under this part);

"(G) identify those procedures, involving the use of assistants at surgery, for which payment for those assistants should not be made under this title without prior approval;

"(H) identify those procedures for which an opinion of a second physician should be required before payment is made under this title; and

"(I) evaluate the method for calculating the number of full-time-equivalent residents set forth in section 1902(h)(4)(D) and make recommendations regarding revisions in, or alternatives to, that method.

"(3) The Commission also shall advise and make recommendations to the Secretary respecting the development of the relative value scale under subsection (e).

"(c)(1) The following provisions of section 1886(e)(6) shall apply to the Commission in the same manner as they apply to the Prospective Payment Assessment Commission:

"(A) Subparagraph (C) (relating to staffing and administration generally).

"(B) Subparagraph (D) (relating to compensation of members).

"(C) Subparagraph (F) (relating to access to information).

"(D) Subparagraph (G) (relating to reports and use of funds).

"(E) Subparagraph (H) (relating to periodic GAO audits).

"(F) Subparagraph (J) (relating to requests for appropriations).

"(2) In order to carry out its functions, the Commission shall collect and assess information on medical and surgical procedures and services, including information on regional variations of medical practice. In collecting and assessing information, the Commission shall—

"(A) utilize existing information, both published and unpublished, where possible, collected and assessed either by its own staff or under other arrangements made in accordance with this section,

"(B) carry out, or award grants or contracts for, original research and experimentation, where existing information is inadequate for the development of useful and valid guidelines by the Commission, and

"(C) adopt procedures allowing any interested party to submit information with respect to physicians' services (including new practices, such as the use of new technologies and treatment modalities), which information the Commission shall consider in making reports and recommendations to the Secretary and Congress.

"(d) There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this section. Such sums shall be payable from the Federal Supplementary Medical Insurance Trust Fund.".

(b) DEVELOPMENT OF RELATIVE VALUE SCALE FOR PHYSICIANS' SERVICES.—Section 1845 of the Social Security Act, as added by subsection (a), is further amended by adding at the end the following new subsection:

"(e)(1) The Secretary shall develop a relative value scale that establishes a numerical relationship among the various physicians' services for which payment may be made under this part or under State plans approved under title XIX.

"(2) In developing the scale, the Secretary shall consider among other items—

"(A) the report of the Office of Technology Assessment under section 2309 of the Deficit Reduction Act of 1984,

"(B) the recommendations of the Physician Payment Review Commission under subsection (b)(3), and

"(C) factors with respect to the input costs for furnishing particular physicians' services, such as—

"(i) the differences in costs of furnishing services in different settings,

"(ii) the differences in skill levels and training required to perform the services, and

"(iii) the time required, and risk involved, in furnishing different services.

"(3) The Secretary shall complete the development of the relative value scale under this section, and report to Congress on the development, not later than April 1, 1987. The report shall include recommendations for the application of the scale to payment for physicians' services furnished under this part on or after October 1, 1987.".

SEC. 153. PAYMENT FOR DURABLE MEDICAL EQUIPMENT.

(a) FREEZING CUSTOMARY AND PREVAILING CHARGES FOR ITEMS FURNISHED ON RENTAL BASIS AND HOME OXYGEN SERVICES.—Section 1842 of the Social Security Act (42 U.S.C. 1395u) is amended by adding at the end the following new subsection:

"(k)(1) In determining the customary and prevailing charge levels under the third and fourth sentences of subsection (b)(3)—

"(A) for durable medical equipment furnished on a rental basis (other than under a lease-purchase agreement), and

"(B) for oxygen therapy services furnished,

during the 12-month period beginning on October 1, 1985, the Secretary shall not set any such level higher than the same level as was set for the 15-month period beginning July 1, 1984. As used in this subsection, the term 'oxygen therapy services' means durable medical equipment, accessories, and supplies for the provision of oxygen therapy in a patient's home.".

(b) REQUIRING PAYMENT ON AN ASSIGNMENT BASIS FOR DURABLE MEDICAL EQUIPMENT FURNISHED ON A RENTAL BASIS AND FOR OXYGEN THERAPY SERVICES.—Section 1842(k) of such Act, as added by subsection (a), is amended by adding at the end the following new paragraph:

"(2) Payment under this part for durable medical equipment furnished on a rental basis (other than under a lease-purchase agreement) and for oxygen therapy services may only be made on an assignment-related basis (as defined in subsection (h)(8)) or to a provider of services with an agreement in effect under section 1866.".

(c) LIMITING INCREASE IN PREVAILING CHARGES FOR DURABLE MEDICAL EQUIPMENT TO CONSUMER PRICE INDEX.—Section 1842(k) of such Act, as previously amended, is further amended by adding at the end the following new paragraph:

"(3) In the case of durable medical equipment, the prevailing charge levels determined for purposes of clause (ii) of the third sentence of subsection (b) for any 12-month period (beginning after September 30, 1986) may not exceed (in the aggregate) the levels determined under such clause (taking into account paragraph (1), if applicable) for the preceding 12-month period by a percentage which exceeds the percentage increase in the Consumer Price Index for all urban consumers (U.S. city average), as published by the Secretary of Labor, for the 12-month period ending in March of that preceding 12-month period.".

(d) CLARIFICATION OF PREVIOUS EFFECTIVE DATE.—Section 2306(b)(2) of the Deficit Reduction Act of 1984 is amended by adding before the period at the end the following: "and to durable medical equipment furnished on or after July 1, 1985".

(e) EFFECTIVE DATES.—

(1) SUBSECTION (a).—The amendments made by subsection (a) shall apply to durable medical equipment (including oxygen therapy services) furnished on or after October 1, 1985.

(2) SUBSECTION (b).—The amendments made by subsection (b) shall apply to durable medical equipment furnished on or after January 1, 1986.

(3) SUBSECTION (c).—The amendments made by subsection (c) shall apply to durable medical equipment furnished on or after October 1, 1986.

(4) SUBSECTION (d).—The amendment made by subsection (d) shall take effect as though it were included in the enactment of the Deficit Reduction Act of 1984.

SEC. 154. PAYMENT FOR CLINICAL LABORATORY SERVICES.

(a) CHANGING MONTH OF ANNUAL UPDATE FROM JULY TO OCTOBER.—

(1) IN GENERAL.—Section 1833(h) of the Social Security Act (42 U.S.C. 1395l(h)) is amended—

(A) by striking out "June 30, 1987" and "July 1, 1987" and inserting in lieu thereof "September 30, 1987" and "October 1, 1987", respectively, each place either appears, and

(B) in paragraph (2), by inserting "(to become effective on October 1 of each year)" after "adjusted annually".

(2) EFFECTIVE DATE.—The amendments made by paragraph (1) shall apply to clinical laboratory diagnostic tests performed on or after July 1, 1986.

(3) TRANSITION.—The Secretary of Health and Human Service shall provide that the annual adjustment under section 1833(h) of the Social Security Act for 1986—

(A) shall take effect on October 1, 1986,

(B) shall apply for the 12-month period beginning on that date, and

(C) shall take into account the percentage increase or decrease in the Consumer Price Index for all urban consumers (United States city average) occurring over a 15-month period, rather than over a 12-month period.

(b) PROVIDING CEILING ON RATES.—

(1) CEILING ON PAYMENTS.—Paragraphs (1)(D)(i) and (2)(D)(i) of section 1833(a) of the Social Security Act (42 U.S.C. 1395l(a)) are each amended by inserting after "lesser of the amount determined under such fee schedule" the following: ", the limitation amount for that test determined under subsection (h)(4)(B),".

(2) ESTABLISHMENT OF LIMITATION AMOUNT.—Section 1833(h)(4) of such Act is amended by inserting "(A)" after "(4)" and by adding at the end the following new subparagraph:

"(B) For purposes of subsections (a)(1)(D)(i) and (a)(2)(D)(i), the limitation

amount for a clinical diagnostic laboratory test performed—

"(i) on or after January 1, 1986, and before October 1, 1986, is equal to 115 percent of the median of all the fee schedules established for that test for that laboratory setting under paragraph (1), or

"(ii) after September 30, 1986, and so long as a fee schedule for the test has not been established on a nationwide basis, is equal to 110 percent of the median of all the fee schedules established for that test for that laboratory setting under paragraph (1).".

(3) EFFECTIVE DATE.—The amendments made by this subsection shall apply to clinical diagnostic laboratory tests performed on or after January 1, 1986.

(c) REPORT ON MINIMUM STANDARDS FOR CLINICAL LABORATORIES THAT ARE PART OF, OR ASSOCIATED WITH, PHYSICIANS' OFFICES.—The Secretary of Health and Human Services shall report to Congress, not later than 12 months after the date of the enactment of this Act, on the standards that might be established under the medicare program for clinical laboratories which are part of or associated with a physician's office to assure the health and safety of individuals with respect to whom the laboratories perform clinical diagnostic laboratory tests for which payment may be made under the program. In recommending standards, the Secretary shall consider the differences in the scope, type, and complexity of tests performed by such laboratories and such other factors as may indicate a need for different standards for laboratories with different characteristics.

SEC. 155. VISION CARE.

(a) DEFINING SERVICES AN OPTOMETRIST CAN PROVIDE.—Clause (4) of section 1861(r) of the Social Security Act (42 U.S.C. 1395x(r)) is amended to read as follows: "(4) a doctor of optometry, but only with respect to the provision of items or services described in subsection (s) which he is legally authorized to perform as a doctor of optometry by the State in which he performs them, or".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to services furnished on or after April 1, 1986.

SEC. 156. SECOND OPINIONS.

(a) IN GENERAL.—Title XVIII of the Social Security Act is amended by adding at the end the following new section:

"SECOND OPINIONS FOR CERTAIN SURGICAL PROCEDURES

"SEC. 1890. (a) CONDITION OF PAYMENT.—No payment shall be made under part A or part B with respect to items or services furnished in connection with a surgical procedure listed by the Secretary pursuant to this section unless the individual undergoing the procedure obtains a second opinion as to the necessity and appropriateness of such procedure, in accordance with this section. For purposes of determining whether an opinion is the second opinion, the first opinion must be made by a physician who is qualified to perform the surgical procedure, and the second opinion is any subsequent opinion made by a physician of the appropriate specialty, as determined under subsection (b)(3). Such second opinion need not necessarily agree with the first opinion in order for payment to be made.

"(b) SURGICAL PROCEDURES TO WHICH CONDITION APPLIES.—

"(1) SECRETARY TO ESTABLISH LIST.—The Secretary shall establish a list of not less than 10 surgical procedures to which the requirements of this section shall apply. The Secretary shall establish such list based upon the following criteria:

"(A) The procedure is one which generally can be postponed without undue risk to the patient.

"(B) The procedure is a high volume procedure among patients who are covered under the programs established under this title, or is a high cost procedure.

"(C) The procedure has a comparatively high rate of nonconfirmation upon requesting a second opinion, based upon data available to the Secretary from any sources.

"(2) LIST VARIATIONS.—The Secretary may vary the list on a State-by-State basis, or within areas of a State, if data available with regard to volume and costs of procedures suggest that to do so would be cost effective and would better serve the purposes of this section.

"(3) LIST TO SPECIFY SPECIALISTS WHO MUST RENDER SECOND OPINION.—The Secretary shall specify, for each procedure on a list established under this subsection, the type or types of board certified or board eligible specialists who must be consulted for the second opinion, based upon the nature of the procedure.

"(c) REFERRAL MECHANISM FOR SECOND OPINIONS.—

"(1) USE OF PRO AS REFERRAL CENTER.—The Secretary shall enter into or modify contracts with utilization and quality control peer review organizations under which such organizations shall serve as referral centers for second opinions required under this section.

"(2) REFERRAL OF PATIENT.—The organization shall maintain a list of physicians qualified to provide a second opinion and shall advise the patient as to which physicians are participating physicians (within the meaning of section 1842(h)) and which physicians have agreed to accept assignment for second opinions. If the patient seeking the second opinion so requests, the organization shall refer such patient to a physician of the appropriate specialty for purposes of providing the second opinion.

"(3) FREEDOM OF CHOICE OF PATIENT TO CHOOSE PHYSICIAN.—Subject to paragraph (4), the patient may choose any physician of the proper specialty to provide the second opinion.

"(4) PHYSICIANS PROHIBITED FROM PROVIDING SECOND OPINION.—For purposes of this section, a second opinion may not be provided by a physician who is affiliated with, or has any direct or indirect common financial interest with, the physician who rendered the first opinion that the procedure was necessary.

"(5) FORWARDING OF RELEVANT MEDICAL RECORDS.—Each such organization shall, if the patient seeking the second opinion so requests, obtain the relevant medical records from the physician who rendered the first opinion that the procedure was necessary, and provide the relevant information to the physician selected by the patient to render the second opinion in such form so as not to identify the physician who rendered the first opinion.

"(6) USE OF OTHER ENTITIES AS REFERRAL CENTERS.—(A) If no utilization and quality control peer review organization is available to perform the functions described in this subsection, the Secretary may enter into an agreement with a State or local agency or appropriate private entity to perform such functions.

"(B) If a State is utilizing an entity other than a utilization and quality control peer review organization to provide referrals for second opinions for purposes of title XIX, the Secretary may enter into an agreement under this section with such entity (rather than with a utilization and quality control peer review organization) to perform the functions described in this section if the Secretary determines that such arrangement would be more cost effective and would adequately protect the patients receiving benefits under this title.

"(C) If the Secretary determines that a utilization and quality control peer review organization is not able to perform the referral services described in this subsection in a manner that adequately protects patients, the Secretary may enter into an agreement with a State or local agency or appropriate private entity to perform such functions.

"(d) EXCEPTIONS TO REQUIREMENT.—The requirements of this section shall not apply—

"(1) if delay in providing the surgical procedure would result in a risk to the patient;

"(2) if no physician is available (within such reasonable limits as the Secretary shall determine by regulation) who is (A) an appropriate specialist, and (B) a participating physician or a physician who has agreed to accept assignment for the second opinion; or

"(3) the surgical procedure is to be performed on a patient who is a member of a health maintenance organization or competitive medical plan having a risk-sharing contract with the Secretary under section 1876(g).

"(e) DUTIES OF PHYSICIANS, HOSPITALS, AND AMBULATORY SURGICAL CENTERS TO NOTIFY PATIENTS.—

"(1) NOTICE.—Any physician, before performing a surgical procedure which requires a second opinion pursuant to this section, and any hospital or ambulatory surgical center, before a patient is furnished services at the hospital or center in connection with the performance of such a procedure, shall inform the patient in writing of the necessity of obtaining a second opinion, and make available to the patient, or to the entity performing referral services under subsection (c) if so requested by the patient, any medical records available to such physician, hospital, or center that are necessary in order for the patient to obtain such second opinion.

"(2) SANCTIONS.—(A) In the case of any physician, hospital, or ambulatory surgical center which fails to notify a patient of the need to obtain a second opinion or fails to make available medical records, as required under paragraph (1), the Secretary may—

"(i) impose a civil monetary penalty and assessment, in the same manner as such penalties are authorized under section 1128A(a), or

"(ii) in the case of a second or subsequent failure, bar the physician, hospital, or ambulatory surgical center from participation under the program under this title for a period not to exceed 5 years, in accordance with the procedures of paragraphs (2) and (3) of section 1862(d),

or both. No payment may be made under this title with respect to any item or service furnished by a physician, hospital, or ambulatory surgical center during the period when it is barred from participation in the program under this title pursuant to this subsection.

"(B) The Secretary may not bar a physician, hospital, or ambulatory surgical center pursuant to subparagraph (A) if such physician, hospital, or ambulatory surgical center

is a sole source of essential services in a community.

"(C) The Secretary shall take into account access of beneficiaries to physicians' services, hospital services, and other surgical facility services for which payment may be made under this title in determining whether to bar a physician, hospital, or ambulatory surgical center from participation pursuant to subparagraph (A).

"(D) In any case where payment under this title is denied by reason of this section, and a physician, hospital, or ambulatory surgical center failed to notify the patient as required by paragraph (1), the Secretary shall, out of any civil monetary penalty or assessment collected from such physician, hospital, or ambulatory surgical center pursuant to this subsection, make a payment to the patient in the nature of restitution for amounts paid by such patient to such physician, hospital, or ambulatory surgical center which otherwise would have been paid under this title.

"(f) NOTICE BY SECRETARY.—

"(1) NOTICE TO PHYSICIANS, HOSPITALS, AND AMBULATORY SURGICAL CENTERS.—The Secretary shall notify all physicians, all hospitals having agreements under section 1866, and all ambulatory surgical centers having an agreement with the Secretary described in section 1832(a)(2)(F) of the requirements of this section. The notice shall include the applicable list of surgical procedures to which such requirements apply, and a description of the penalties for failure to notify a patient concerning such requirements.

"(2) NOTICE TO BENEFICIARIES.—The Secretary shall provide for periodic notice to all beneficiaries under this title of the requirements of this section, including the applicable list of the surgical procedures to which such requirements apply and information about the availability of the referral services described in this section. The Secretary shall make the applicable lists and information about referral services available at district and branch offices of the Social Security Administration, in the offices of carriers, and to senior citizen organizations.".

(b) WAIVER OF DEDUCTIBLE AND COPAYMENTS.—

(1) DEDUCTIBLE.—Section 1833(b) of the Social Security Act (42 U.S.C. 1395l(b)) is amended by striking out "and" before "(4)", and by inserting before the period at the end of the first sentence the following: ", and (5) such deductible shall not apply with respect to items and services furnished in connection with obtaining a second opinion required under section 1890 (or a third opinion, if such second opinion was in disagreement with the first opinion)".

(2) COPAYMENTS.—(A) Section 1833(a)(1) of such Act (42 U.S.C. 1395l(a)(1)) is amended by striking out "and" before "(F)", and by adding at the end thereof the following: "and (G) with respect to items and services furnished in connection with obtaining a second opinion required under section 1890 (or a third opinion, if such second opinion was in disagreement with the first opinion), the amounts paid shall be 100 percent of the reasonable charges for such items and services;".

(B) Section 1833(a)(2)(A) of such Act (42 U.S.C. 1395l(a)(2)(A)) is amended by inserting ", items and services furnished in connection with obtaining a second opinion required under section 1890 (or a third opinion, if such second opinion was in disagreement with the first opinion)," after "(other than durable medical equipment)".

(C) Section 1833(a)(2)(D) of such Act (42 U.S.C. 1395l(a)(2)(D)) is amended by striking out "or to a provider having an agreement under section 1866" and inserting in lieu thereof "to a provider having an agreement under section 1866, or for tests furnished in connection with obtaining a second opinion required under section 1890 (or a third opinion, if such second opinion was in disagreement with the first opinion)".

(c) CONFORMING AMENDMENTS.—

(1) EXCLUSIONS FROM COVERAGE.—Section 1862(a) of the Social Security Act (42 U.S.C. 1395g(a)), as amended by section 147(a) of this Act, is amended—

(A) by striking out "or" at the end of paragraph (14);

(B) by striking out the period at the end of paragraph (15) and inserting in lieu thereof "; or"; and

(C) by adding at the end thereof the following new paragraph:

"(16) furnished in connection with a surgical procedure if a second opinion is required under section 1890 but is not obtained.".

(2) PROVIDER AGREEMENTS.—Section 1866(a)(1) of such Act (42 U.S.C. 1395cc(a)(1)) is amended—

(A) by striking out "and" at the end of subparagraph (G);

(B) by striking out the period at the end of subparagraph (H) and inserting in lieu thereof ", and"; and

(C) by inserting after subparagraph (H) the following new subparagraph:

"(I) to notify beneficiaries under this title for whom surgery is to be performed of the need to obtain a second opinion if such surgery is a procedure listed pursuant to section 1890.".

(3) FUNCTIONS OF PEER REVIEW ORGANIZATIONS.—Section 1154(a) of such Act (42 U.S.C. 1395c-3(a)) is amended by adding at the end thereof the following new paragraph:

"(12) The organization shall perform the referral functions for second opinions described in section 1890(c).".

(d) EFFECTIVE DATES.—(1) The amendments made by subsection (a) shall apply to items and services furnished on or after the first day of the first month which begins more than 6 months after the date of the enactment of this Act.

(2) The Secretary of Health and Human Services shall promulgate final regulations necessary to implement the amendments made by this section within 6 months after the date of the enactment of this Act.

(e) INTERIM LIST.—(1) If the Secretary of Health and Human Services has not established a list or lists of surgical procedures requiring second opinions, as required under section 1890 of the Social Security Act, within 6 months after the date of the enactment of this Act, then the following list shall be in effect for purposes of such section:

Coronary artery bypass.
Cardiac pacemaker implantation.
Cataract surgery.
Gall bladder surgery.
Prostate surgery.
Knee surgery.
Hysterectomy.
Back surgery.
Hernia repair.
Hemorrhoidectomy.

(2) The list in paragraph (1) shall remain in effect until such time as the Secretary establishes a new list for the applicable State or area pursuant to section 1890.

(f) STUDY.—The Secretary of Health and Human Services shall conduct a study of the results of the amendments made by this section. Such study shall include any changes in utilization of surgical procedures, changes in nonconfirmation rates of second opinions, and outcomes in cases where surgery is not done after a second opinion failed to confirm the necessity of the surgical procedure. The Secretary shall report the results of the study to the Congress within 30 months after the date of the enactment of this Act.

SEC. 157. CHANGING MEDICARE APPEAL RIGHTS.

(a) PERMITTING PROVIDER REPRESENTATION OF BENEFICIARIES.—Section 1869(b)(1) of the Social Security Act (42 U.S.C. 1395ff(b)(1)) is amended by adding at the end the following new sentence: "Sections 206(a), 1102, and 1871 shall not be construed as authorizing the Secretary to prohibit an individual from being represented under this subsection by a person that furnishes or supplies the individual, directly or indirectly, with services or items solely on the basis that the person furnishes or supplies the individual with such a service or item.".

(b) REVIEW OF PART B DETERMINATIONS.—(1) Section 1869 of such Act (42 U.S.C. 1395ff) is further amended—

(A) by inserting "or part B" in subsection (a) after "amount of benefits under part A",

(B) by inserting "or part B" in subsection (b)(1)(C) after "part A", and

(C) by amending paragraph (2) of subsection (b) to read as follows:

"(2) Notwithstanding paragraph (1)(C), in the case of a claim arising—

"(A) under part A, a hearing shall not be available to an individual under paragraph (1)(C) if the amount in controversy is less than $100 and judicial review shall not be available to the individual under that paragraph if the amount in controversy is less than $1,000; or

"(B) under part B, a hearing shall not be available to an individual under paragraph (1)(C) if the amount in controversy is less than $500 and judicial review shall not be available to the individual under that paragraph if the aggregate amount in controversy is less than $1,000.

In determining the amount in controversy, the Secretary, under regulations, shall allow two or more claims to be aggregated if the claims involve the delivery of similar or related services to the same individual or involve common issues of law and fact arising from services furnished to two or more individuals.".

(2) Section 1842(b)(3)(C) of such Act (42 U.S.C. 1395u(b)(3)(C)) is amended by striking out "$100 or more" and inserting in lieu thereof "at least $100, but not more than $500".

(3) Section 1879(d) of such Act (42 U.S.C. 1395pp(d)) is amended by striking out "section 1869(b)" and all that follows through "part B)" and inserting in lieu thereof "sections 1869(b) and 1842(b)(3)(C) (as may be applicable)".

(c) EFFECTIVE DATES.—(1) The amendment made by subsection (a) takes effect on the date of the enactment of this Act.

(2) The amendments made by subsection (b) shall apply to claims submitted on or after October 1, 1985.

SEC. 158. EXTENSION OF ON LOK WAIVER.

(a) CONTINUED APPROVAL.—

(1) MEDICARE WAIVERS.—Notwithstanding any limitations contained in section 222 of the Social Security Amendments of 1972 and section 402(a) of the Social Security Amendments of 1967, the Secretary of Health and Human Services shall continue approval of the risk-sharing application (de-

scribed in section 603(c)(1) of Public Law 98-21) for waivers of certain requirements of title XVIII of the Social Security Act after the end of the period described in that section.

(2) MEDICAID WAIVERS.—Notwithstanding any limitations contained in section 1115 of the Social Security Act, the Secretary shall approve any application of the Department of Health Services, State of California, for a waiver of requirements of title XIX of such Act in order to continue carrying out the demonstration project referred to in section 603(c)(2) of Public Law 98-21 after the end of the period described in that section.

(b) TERMS, CONDITIONS, AND PERIOD OF APPROVAL.—The Secretary's approval of an application (or renewal of an application) under this section—

(1) shall be on the same terms and conditions as applied with respect to the corresponding application under section 603(c) of Public Law 98-21 as of July 1, 1985, except that requirements relating to collection and evaluation of information for demonstration purposes (and not for operational purposes) shall not apply; and

(2) shall remain in effect until such time as the Secretary finds that the applicant no longer complies with the terms and conditions described in paragraph (1).

PART E—CHANGES RELATING TO THE MEDICAID PROGRAM

SEC. 161. SERVICES FOR PREGNANT WOMEN.

(a) EXPANDED COVERAGE.—Section 1905(n)(1) of the Social Security Act (42 U.S.C. 1396d(n)(1)) is amended—

(1) by striking out "; or" at the end of subparagraph (A) and inserting in lieu thereof a comma,

(2) by striking out "; and" at the end of subparagraph (B) and inserting in lieu thereof ", or", and

(3) by adding after subparagraph (B) the following new subparagraph:

"(C) otherwise meets the income and resources requirements of a State plan under part A of title IV; and".

(b) OPTIONAL EXPANSION OF PREGNANCY-RELATED SERVICES.—Section 1902(a)(10) of such Act (42 U.S.C. 1396a(a)(10)) is amended, in the matter after subparagraph (D) thereof—

(1) by striking out "and" before "(IV)" and inserting in lieu thereof a comma, and

(2) by inserting before the semicolon the following: ", and (V) the making available to all pregnant women covered under the plan of services relating to pregnancy (including pre-natal, delivery, and post-partum services) or to any other condition which may complicate pregnancy shall not, by reason of subparagraph (B), require the making available of these services, or the making available of such services of the same amount, duration, and scope, to any other individuals".

(c) POST-PARTUM ELIGIBILITY FOR PREGNANT WOMEN.—Section 1902(e) of such Act (42 U.S.C. 1396b(e)) is amended by adding at the end the following new paragraph:

"(5) A woman who, while pregnant, is eligible for, has applied for, and has received medical assistance under the State plan, shall be deemed to remain pregnant, for purposes of the provision of all pregnancy-related and post-partum medical assistance under the plan, until the end of the 60-day period beginning on the last day of her pregnancy.".

(d) EFFECTIVE DATES.—

(1) EXPANDED COVERAGE.—(A) The amendments made by subsection (a) apply (except as provided under subparagraph (B)) to payments under title XIX of the Social Security Act for calendar quarters beginning on or after October 1, 1985, without regard to whether or not final regulations to carry out the amendments have been promulgated by that date.

(B) In the case of a State plan for medical assistance under title XIX of the Social Security Act which the Secretary of Health and Human Services determines requires State legislation (other than legislation appropriating funds) in order for the plan to meet the additional requirement imposed by the amendments made by subsection (a), the State plan shall not be regarded as failing to comply with the requirements of such title solely on the basis of its failure to meet this additional requirement before the first day of the first calendar quarter beginning after the close of the first regular session of the State legislature that begins after the date of the enactment of this Act.

(2) OPTIONAL SERVICES.—The amendments made by subsection (b) shall take effect on October 1, 1985.

(3) CONTINUED COVERAGE.—The amendment made by subsection (c) shall apply to medical assistance furnished to a woman on or after October 1, 1985.

SEC. 162. MODIFICATIONS OF HOME AND COMMUNITY-BASED WAIVER UNDER SECTION 1915(c).

(a) EXPLICIT INCLUSION OF CERTAIN VOCATIONAL, PREVOCATIONAL, AND EDUCATIONAL SERVICES.—Section 1915(c) of the Social Security Act (42 U.S.C. 1396n(c)) is amended by adding at the end the following new paragraph:

"(5) For purposes of paragraph (4)(B), the term 'habilitation services', with respect to individuals who receive such services after discharge from a skilled nursing facility or intermediate care facility—

"(A) means services designed to assist individuals in acquiring, retaining, and improving the self-help, socialization, and adaptive skills necessary to reside successfully in home and community based settings, and

"(B) includes (except as provided in subparagraph (C)) prevocational, educational, and supported employment services, but

"(C) does not include—

"(i) special education and related services (as defined in section 602(16) and (17) of the Education of the Handicapped Act (20 U.S.C. 1401(16), (17)) which otherwise are available to the individual through a local educational agency, and

"(ii) vocational rehabilitation services which otherwise are available to the individual through a program funded under section 110 of the Rehabilitation Act of 1973 (29 U.S.C. 730).".

(b) PERMITTING HOSPITAL LEVEL OF CARE FOR CERTAIN PARTICIPANTS.—(1) Paragraph (1) of such section is amended by inserting "or but for the provision of such services the individuals would continue to receive inpatient hospital services because they are dependent on ventilator support the cost of which is reimbursed under the State plan" before the period at the end.

(2) Paragraph (2)(C) of such section is amended—

(A) by inserting "hospital or" after "provided in a", and

(B) by inserting "inpatient hospital services or" after "the provision of".

(c) PROHIBITING IMPOSITION OF CERTAIN REGULATORY LIMITS.—Such section, as amended by subsection (a), is further amended—

(1) in paragraph (2)(D), by inserting "100 percent of" after "does not exceed", and

(2) by adding at the end the following new paragraph:

"(6) The Secretary may not require, as a condition of approval of a waiver under this section under paragraph (2)(D), that the actual total expenditures for home and community-based services under the waiver (and a claim for Federal financial participation in expenditures for the services) cannot exceed the approved estimates for these services. The Secretary may not deny Federal financial payment with respect to services under such a waiver on the ground that, in order to comply with paragraph (2)(D), a State has failed to comply with such a requirement.".

(d) COMPUTATION OF EXPENDITURES FOR CERTAIN DISABLED PATIENTS.—Such section, as amended by subsection (c), is further amended by adding at the end the following new paragraph:

"(7) In making estimates under paragraph (2)(D) in the case of a waiver which applies only to physically disabled individuals who are inpatients in skilled nursing or intermediate care facilities, the State may determine the average per capita expenditure which would have been made in a fiscal year for those individuals under the State plan separately from the expenditure for other individuals who are inpatients of those facilities.".

(e) PERMITTING FLEXIBILITY IN ESTABLISHING MAINTENANCE INCOME STANDARDS.—Paragraph (3) of such section is amended by adding at the end the following new sentence: "A waiver may provide, with respect to post-eligibility treatment of income of all individuals receiving services under that waiver, that the maximum amount of the individual's income which may be disregarded for any month for the maintenance needs of the individual may be an amount greater than the maximum allowed for that purpose under regulations in effect on July 1, 1985.".

(f) EFFECTIVE DATES.—

(1) HABILITATION SERVICES AND HOSPITALIZED PATIENTS.—The amendments made by subsections (a) and (b) are effective for services furnished on or after October 1, 1985.

(2) PROHIBITION OF REGULATORY LIMITS AND TREATMENT OF CERTAIN PHYSICALLY DISABLED INDIVIDUALS.—The amendments made by subsections (c) and (d) shall apply to applications for waivers filed before, on, or after, the date of the enactment of this Act and for services furnished on or after August 13, 1981.

(3) INCOME STANDARDS.—The amendment made by subsection (e) shall apply to waivers approved on or after the date of the enactment of this Act.

(g) TASK FORCE ON ALTERNATIVE CARE FOR TECHNOLOGY-DEPENDENT, CHRONICALLY ILL CHILDREN.—(1) The Secretary of Health and Human Services, within six months after the date of the enactment of this Act, shall establish a task force concerning alternatives to institutional care for technology-dependent children (as defined in paragraph (5)).

(2) The task force shall include representatives of Federal and State agencies with responsibilities relating to child health, health insurers, large employers (including those that self-insure for health care costs), providers of health care to technology-dependent children, and parents of technology-dependent children.

(3) The task force shall—

(A) identify barriers that prevent the provision of appropriate care in a home or com-

munity-setting to meet the special needs of technology-dependent chidren, and

(B) recommend changes in the provision and financing of health care in private and public health care programs (including appropriate joint public-private initiatives) so as to provide home and community-based alternatives to the institutionalization of technology-dependent children.

(4) The task force shall make a final report to the Secretary and to the Congress on its activities not later than two years after the date of the enactment of this Act.

(5) In this subsection, the term "technology-dependent child" means a child who has a chronic illness which makes the child dependent upon the continuing use of medical care technology (such as a ventilator).

SEC. 163. OPTIONAL HOSPICE BENEFITS.

(a) COVERAGE OF HOSPICE CARE AS AN OPTIONAL MEDICAID BENEFIT.—Section 1905 of the Social Security Act (42 U.S.C. 1396d) is amended—

(1) in subsection (a)—

(A) by striking out "and" at the end of paragraph (17),

(B) by redesignating paragraph (18) as paragraph (19), and

(C) by inserting after paragraph (17) the following new paragraph:

"(18) hospice care (as defined in subsection (o)); and"; and

(2) by adding at the end the following new subsection:

"(o)(1) The term 'hospice care' means the care described in section 1861(dd)(1) furnished by a public, or private nonprofit, hospice program (as defined in section 1861(dd)(2)) to a terminally ill individual who has voluntarily elected (in accordance with paragraph (2)) to receive hospice care instead of certain other benefits (described in section 1812(d)(2)) under the plan.

"(2) An individual's voluntary election under this subsection—

"(A) shall be made in accordance with procedures that are established by the State and that are consistent with the procedures established under section 1812(d)(2),

"(B) shall be for such a period or periods (which need not be the same periods described in section 1812(d)(1)) as the State may establish, and

"(C) may be revoked at any time without a showing of cause and may be modified so as to change the hospice program with respect to which a previous election was made.".

(b) ELIGIBILITY.—

(1) LIMITATION TO TERMINALLY ILL INDIVIDUALS.—Section 1902(a)(10) of such Act (42 U.S.C. 1396a(a)(10)), as amended by section 161(b) of this Act, is further amended, in the matter following subparagraph (D), by striking out "and" before "(V)" and by inserting before the semicolon the following: ", and (VI) with respect to the making available of medical assistance for hospice care to terminally ill individuals who have made a voluntary election described in section 1905(o) to receive hospice care instead of medical assistance for certain other services, such assistance may not be made available in an amount, duration, or scope less than that provided under title XVIII, and the making available of such assistance shall not, by reason of this paragraph (10), require the making available of medical assistance for hospice care to other individuals or the making available of medical assistance for services waived by such terminally ill individuals".

(2) HIGHER INCOME STANDARD PERMITTED.—Section 1902(a)(10)(A)(ii) of such Act (42 U.S.C. 1396a(a)(10)(A)(ii)) is amended—

(A) by striking out "or" at the end of subclause (V),

(B) by striking out the semicolon at the end of subclause (VI) and inserting in lieu thereof ", or", and

(C) by adding at the end the following new subclause:

"(VII) who would be eligible under the State plan under this title if they were in a medical institution, who are terminally ill, and who will receive hospice care pursuant to a voluntary election described in section 1905(o);".

(c) PAYMENT FOR HOSPICE CARE.—

(1) USE OF MEDICARE RATES.—Section 1902(a)(13) of such Act (42 U.S.C. 1396a(a)(13)) is amended—

(A) by striking out "and" at the end of subparagraph (B),

(B) by redesignating subparagraph (C) as subparagraph (D), and

(C) by inserting after subparagraph (B) the following new subparagraph:

"(C) for payment for hospice care in the same amounts, and using the same methodology, as used under part A of title XVIII; and".

(2) LIMITATION ON COPAYMENTS.—Subsections (a)(2) and (b)(2) of section 1916 of the Social Security Act (42 U.S.C. 1396o) are each amended—

(A) by striking out "or" at the end of subparagraph (C),

(B) by striking out "; and" at the end of subparagraph (D) and inserting in lieu thereof ", or", and

(C) by adding at the end the following new subparagraph:

"(E) services furnished to an individual who is receiving hospice care (as defined in section 1905(o)); and".

(d) CONFORMING AMENDMENTS.—

(1) Section 1902(j) of such Act (42 U.S.C. 1396a(j)) is amended by striking out "(18)" and inserting in lieu thereof "(19)".

(2) Section 1902(a)(10)(C)(iv) of such Act (42 U.S.C. 1396a(a)(10)(C)(iv)) is amended by striking out "through (17)" and inserting in lieu thereof "through (18)".

(e) EFFECTIVE DATE.—The amendments made by this section apply to medical assistance provided for hospice care furnished on or after October 1, 1985.

SEC. 164. MEDICAID PAYMENTS FOR DIRECT MEDICAL EDUCATION COSTS OF HOSPITALS.

(a) MEDICAID PAYMENT METHODOLOGY.—Section 1902 of the Social Security Act (42 U.S.C. 1396a), as amended by section 163(c)(1) of this Act, is further amended—

(1) in paragraph (13) of subsection (a)—

(A) by striking out "and" at the end of subparagraph (C),

(B) by redesignating subparagraph (D) as subparagraph (E), and

(C) by inserting after subparagraph (C) the following new subparagraph:

"(D) for payment to hospitals for direct medical education costs in amounts determined in accordance with subsection (h); and"; and

(2) by inserting before subsection (i) the following new subsection:

"(h) PAYMENTS FOR DIRECT MEDICAL EDUCATION COSTS.—

"(1) SUBSTITUTION OF SPECIAL PAYMENT RULES.—Instead of any amounts that are otherwise payable under a State plan with respect to the costs of hospitals for direct medical education costs, the State shall provide for payments to hospitals for such costs in accordance with paragraph (3) of this subsection.

"(2) DETERMINATION OF HOSPITAL-SPECIFIC APPROVED FTE RESIDENT AMOUNTS.—The Secretary shall determine, for each hospital with an approved medical residency training program, an approved FTE resident amount for each residency year beginning on or after July 1, 1985, as follows:

"(A) DETERMINING ALLOWABLE AVERAGE COST PER FTE RESIDENT IN A HOSPITAL'S BASE PERIOD.—The Secretary shall determine, based on data from the most recent available audited cost report of the hospital, the average amount recognized as reasonable under title XVIII for direct medical education costs of the hospital for each full-time-equivalent resident.

"(B) UPDATING UP THROUGH JUNE 1985.—The Secretary shall update each average amount determined under subparagraph (A) through June 1985 by the percentage increase in the consumer price index from the midpoint of the cost reporting periods used under subparagraph (A) to the end of December 1984.

"(C) AMOUNT FOR RESIDENCY YEAR BEGINNING JULY 1, 1985.—For the residency year beginning July 1, 1985, the approved FTE resident amount for each hospital is equal to the amount determined under paragraph (B) for that hospital updated, to the end of December 1985, by projecting the estimated percentage increase in the consumer price index during the 12-month period ending with December 1985.

"(D) AMOUNT FOR SUBSEQUENT RESIDENCY YEARS.—

"(i) GENERAL RULE.—Except as provided in clause (ii), for each residency year beginning after July 1, 1985, the approved FTE resident amount for each hospital is equal to the amount determined under this paragraph for the previous residency year updated by projecting the estimated percentage change in the consumer price index during the 12-month period ending with December of that residency year, with appropriate adjustments to reflect previous under- or over-estimations under this paragraph in the projected percentage change in the consumer price index.

"(ii) LIMITATION ON APPROVED FTE RESIDENT AMOUNTS.—The approved FTE resident amount for a hospital for a residency year may not exceed—

"(I) for the residency year beginning on July 1, 1986, 175 percent,

"(II) for the residency year beginning on July 1, 1987, 150 percent, and

"(III) for residency years beginning on or after July 1, 1988, 125 percent,

of the median amounts determined under clause (i) for all the hospitals in the United States for that residency year.

"(E) TREATMENT OF CERTAIN HOSPITALS.—In the case of a hospital that did not have an approved medical residency training program and was not participating in the program under title XVIII for a cost reporting period ending before 1985, the Secretary shall provide, for the first such period for which it has such a residency training program and is participating under this title, for such approved FTE resident amount as the Secretary determines to be appropriate, based on comparable approved FTE resident amounts for similar programs of similar hospitals located in similar areas.

"(3) HOSPITAL PAYMENT AMOUNT PER RESIDENT.—

"(A) IN GENERAL.—The payment amount, for a hospital cost reporting period begin-

ning on or after October 1, 1985, is equal to the product of—

"(i) the aggregate approved amount (as defined in subparagraph (B)) for that period, and

"(ii) the hospital's medicaid patient load (as defined in subparagraph (C)) for that period.

"(B) AGGREGATE APPROVED AMOUNT.—As used in subparagraph (A), the term 'aggregate approved amount' means, for a hospital cost reporting period, the sum of the products, for each residency year occurring during the cost reporting period, of—

"(i) the fraction of that residency year that occurs during the period,

"(ii) the hospital's approved FTE resident amount (determined under paragraph (2)) for that residency year, and

"(iii) the number of full-time-equivalent residents (as determined under paragraph (4)) in the hospital's approved medical residency training programs in that year.

"(C) MEDICAID PATIENT LOAD.—As used in subparagraph (A), the term 'medicaid patient load' means, with respect to a hospital's cost reporting period, the fraction of the total number of inpatient-bed-days (as established by the Secretary) during the reporting period which are attributable to patients with respect to whom payment may be made under the State plan approved under this part.

"(4) DETERMINATION OF FULL-TIME-EQUIVALENT RESIDENTS.—

"(A) RULES.—The Secretary shall establish rules consistent with this paragraph for the computation of the number of full-time-equivalent residents in an approved medical residency training program.

"(B) COUNTING TIME SPENT IN OUTPATIENT SETTINGS.—Such rules shall provide that only time spent in activities relating to patient care shall be counted and that time so spent by a resident under an approved medical residency training program in an outpatient clinic, facility of a health maintenance organization, or other ambulatory setting shall be counted towards the determination of full-time equivalency.

"(C) ADJUSTMENT FOR PART-YEAR OR PART-TIME RESIDENTS.—Such rules shall take into account individuals who serve as residents for only a portion of a residency year with a hospital or simultaneously with more than one hospital.

"(D) WEIGHTING FACTORS FOR PRIMARY CARE AND OTHER SPECIALTIES.—Subject to subparagraphs (E) and (F), such rules shall provide, in calculating the number of full-time-equivalent residents in approved residency program for residency years beginning on or after July 1, 1987, for the application of a weighting factor for residents determined in accordance with the following table:

"For the residency year beginning in—	The weighting factor for each—		
	(i) primary care resident is—	(ii) other resident—	
		(I) during the initial residency period is—	(II) during any other period is—
1987	1.10	.90	.75
1988	1.20	.80	.50
1989 or later	1.30	.70	.50

"(E) ALTERNATIVE COMPUTATIONS OF FULL-TIME EQUIVALENTS.—For residency years beginning on or after July 1, 1989, the Secretary may change the weighting factors described in the table in subparagraph (D) or may establish alternative methods for calculating the number of full-time equivalent residents, based on recommendations of the Physician Payment Review Commission (established under section 1845).

"(F) SPECIAL RULES FOR FOREIGN MEDICAL GRADUATES.—

"(i) REQUIRED TO PASS FMGEMS EXAMINATION.—Except as provided in clause (ii), such rules shall provide that, in the case of an individual who is a foreign medical graduate (as defined in paragraph (5)(D)), the individual shall not be counted as a resident for a residency year beginning on or after July 1, 1986, unless the individual has passed the FMGEMS examination (as defined in paragraph (5)(E)) before the beginning of the residency year.

"(ii) TRANSITION FOR CURRENT FMGS.—For the residency year beginning on July 1, 1986, in the case of a foreign medical graduate who—

"(I) has served as a resident before that year and is serving as a resident during that year, but

"(II) has not passed the FMGEMS examination before July 1, 1986,

the individual shall be counted as a resident at a rate equal to one-half of the rate at which the individual would otherwise be counted.

"(iii) TREATMENT OF CERTAIN ECFMG-CERTIFIED INDIVIDUALS.—For purposes of this subparagraph, the Secretary may provide for an individual to be treated as having passed the FMGEMS examination if the individual is unable to take that examination because the individual has previously received certification from the Educational Commission for Foreign Medical Graduates.

"(5) DEFINITIONS.—As used in this subsection:

"(A) APPROVED MEDICAL RESIDENCY TRAINING PROGRAM.—The term 'approved medical residency training program' means a residency or other postgraduate medical training program participation in which may be counted toward certification in a specialty or subspecialty and includes formal postgraduate training programs in geriatric medicine approved by the Secretary.

"(B) CONSUMER PRICE INDEX.—As used in this paragraph, the term 'consumer price index' refers to the Consumer Price Index for All Urban Consumers (United States city average), as published by the Secretary of Commerce.

"(C) DIRECT MEDICAL EDUCATION COSTS.—The term 'direct medical education costs' means direct costs of approved educational activities for approved medical residency training programs.

"(D) FOREIGN MEDICAL GRADUATE.—The term 'foreign medical graduate' means an individual who is a graduate of a medical school not accredited by a body or bodies approved for this purpose by the Secretary of Education (regardless of whether the school of medicine is in the United States).

"(E) FMGEMS EXAMINATION.—The term 'FMGEMS examination' means parts I and II of the Foreign Medical Graduate Examination in the Medical Sciences recognized by the Secretary for this purpose.

"(F) INITIAL RESIDENCY PERIOD.—The term 'initial residency period' means, in the case of a resident, the minimum number of years of formal training necessary to satisfy the requirements (as specified in the 1985-1986 Directory of Residency Training Programs published by the Accreditation Council on Graduate Medical Education) for initial board eligibility in the particular specialty for which the resident is training; except that—

"(i) except as provided in clause (ii), in no case shall the initial period of residency exceed an aggregate period of residency of more than five years for any individual, and

"(ii) a period, of not more than two years, during which an individual is a resident in the field of geriatric medicine or the field of public health and preventive health shall not be counted towards the initial residency period.

"(G) PRIMARY CARE RESIDENT.—The term 'primary care resident' means an individual during the individual's first three years of postgraduate medical training in the field of internal medicine, pediatrics, or family medicine, but does not include such an individual who—

"(i) has been accepted for postgraduate medical training in a field other than internal medicine, pediatrics, family medicine, geriatric medicine, or public health and preventive medicine, and

"(ii) is receiving such training as part of the initial training for that field.

Such term also includes an individual during up to two years of postgraduate medical training in the field of geriatric medicine or the field of public health and preventive medicine.

"(H) RESIDENCY YEAR.—The term 'residency year' means a 12-month period beginning on July 1.

"(I) RESIDENT.—The term 'resident' includes an intern or other participant in an approved medical residency training program.".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to payments made on or after July 1, 1986, under State plans approved under title XIX of the Social Security Act; except that such amendments shall not apply to such payments for costs incurred (or services rendered) before that date.

(d) REPORT ON UNIFORMITY OF APPROVED FTE RESIDENT AMOUNTS.—The Secretary of Health and Human Services shall report to Congress, not later than December 31, 1986, on whether section 1902(h) of the Social Security Act should be revised to provide for greater uniformity in the approved FTE resident amounts established under paragraph (2) of that section, and, if so, how such revisions should be implemented.

SEC. 165. TREATMENT OF POTENTIAL PAYMENTS FROM MEDICAID QUALIFYING TRUSTS.

(a) AMOUNTS TREATED AS BEING AVAILABLE FROM GRANTOR TRUSTS.—Section 1902 of the Social Security Act (42 U.S.C. 1396a) is amended by adding at the end the following new subsection:

"(k)(1) In the case of a medicaid qualifying trust (described in paragraph (2)), the amounts from the trust deemed available to a grantor, for purposes of subsection (a)(17), is the maximum amount of payments that may be permitted under the terms of the trust to be distributed to the grantor, assuming the full exercise of discretion by the trustee or trustees for the distribution of the maximum amount to the grantor. For purposes of the previous sentence, the term 'grantor' means the individual referred to in paragraph (2).

"(2) For purposes of this subsection, a 'medicaid qualifying trust' is a trust, or similar legal device, established by an individual (or an individual's spouse) under which the individual may be the beneficiary of all or part of the payments from the trust and the distribution of such payments is determined by one or more trustees who are permitted to exercise any discretion with respect to the distribution to the individual.

"(3) This subsection shall apply without regard to—

"(A) whether or not the medicaid qualifying trust is irrevocable or is established for purposes other than to enable a grantor to qualify for medical assistance under this title, or

"(B) whether or not the discretion described in paragraph (2) is actually exercised.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to medical assistance furnished on or after the first day of the second month beginning after the date of the enactment of this Act.

SEC. 166. WRITTEN STANDARDS FOR PROVISION OF ORGAN TRANSPLANTS.

(a) DENIAL OF FEDERAL PAYMENTS FOR ORGAN TRANSPLANTS UNLESS PROVIDED UNDER WRITTEN STANDARDS.—Section 1903(i) of the Social Security Act (42 U.S.C. 1396b(i)) is amended by inserting before paragraph (2) the following new paragraph:

"(1) for organ transplant procedures unless the State plan provides for written standards respecting the coverage of such procedures and unless such standards provide that—

"(A) similarly situated individuals are treated alike, and

"(B) any restriction, on the facilities or practitioners which may provide such procedures, is consistent with the accessibility of high quality care to individuals eligible for the procedures under the State plan.".

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply to medical assistance furnished on or after July 1, 1986.

SEC. 167. DEEMED RESIDENCE FOR OUT-OF-STATE ADOPTIVE AND FOSTER CARE PLACEMENTS.

(a) GENERAL RULE.—Section 1902(b) of the Social Security Act (42 U.S.C. 1396a(b)) is amended by adding at the end the following:

"For purposes of this title, any individual receiving aid or assistance under any plan of a State approved under part E of title IV shall be deemed to be receiving such aid or assistance from the State in which the individual actually resides.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to medical assistance furnished on or after the first calendar quarter that begins more than 90 days after the date of the enactment of this Act.

SEC. 168. EXTENSION OF MMIS DEADLINE.

(a) NEW DEADLINE.—Section 1903(r)(1)(B) of the Social Security Act (42 U.S.C. 1396b(r)(1)(B)) is amended by striking out "the earlier of" and all that follows through the end of subparagraph (B) and inserting in lieu thereof "September 30, 1985.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to payment under section 1903(a) of the Social Security Act for calendar quarters beginning on or after October 1, 1982.

SEC. 169. EXTENSION OF CERTAIN WAIVER PROJECT.

(a) CONTINUED APPROVAL.—Notwithstanding any limitations contained in section 1115 of the Social Security Act but subject to subsection (b) of this section, the Secretary of Health and Human Services, upon application, shall continue approval of demonstration project number 11-P-97473/6-06 ("Modifications under the Texas System of Care for the Elderly: Alternatives to the Institutionalized Aged"), previously approved under that section, until December 31, 1988.

(b) TERMS AND CONDITIONS.—The Secretary's continued approval of the project under subsection (a)—

(1) shall be on the same terms and conditions as applied to the project as of the date of the enactment of this Act, and

(2) shall remain in effect until such time as the Secretary finds that the applicant no longer complies with such terms and conditions.

SEC. 170. REPORT ON ADJUSTMENT IN MEDICAID PAYMENTS FOR HOSPITALS SERVING DISPROPORTIONATE NUMBERS OF LOW INCOME PATIENTS.

The Secretary of Health and Human shall transmit to Congress, not later than July 1, 1986, a report that—

(1) describes the methodology used by States under section 1902(a)(13)(A) of the Social Security Act, in their making payments to hospitals, in taking into account the situation of hospitals that serve a disproportionate number of low income patients with special needs,

(2) identifies each of those hospitals that have had the amount of their payments under that title adjusted under that section, and

(3) for each of those hospitals, describes the proportion of total inpatient-days attributable to low income patients and the proportion of total inpatient-days attributable to patients entitled to medical assistance under that title.

SEC. 171. REFERENCE TO PROVISIONS OF LAW PROVIDING COVERAGE UNDER, OR DIRECTLY AFFECTING, THE MEDICAID PROGRAM.

Title XIX of the Social Security Act is amended by adding at the end the following new section:

"REFERENCES TO LAWS DIRECTLY AFFECTING MEDICAID PROGRAM

"SEC. 1919. (a) AUTHORITY OR REQUIREMENTS TO COVER ADDITIONAL INDIVIDUALS.—For provisions of law that make additional individuals eligible for medical assistance under this title, see the following:

"(1) AFDC.—(A) Section 402(a)(37) of this Act (relating to individuals who lose AFDC eligibility due to increased earnings).

"(B) Section 406(h) of this Act (relating to individuals who lose AFDC eligibility due to increased collection of child or spousal support).

"(C) Section 414(g) of this Act (relating to certain individuals participating in work supplementation programs).

"(2) SSI.—Section 1619 of this Act (relating to benefits for individuals who perform substantial gainful activity despite severe medical impairment).

"(3) REFUGEE ASSISTANCE.—Section 412(e)(5) of the Immigration and Nationality Act (relating to medical assistance for certain refugees).

"(4) MISCELLANEOUS.—(A) Section 230 of Public Law 93-66 (relating to deeming eligible for medical assistance certain essential persons).

"(B) Section 231 of Public Law 93-66 (relating to deeming eligible for medical assistance certain persons in medical institutions).

"(C) Section 232 of Public Law 93-66 (relating to deeming eligible for medical assistance certain blind and disabled medically indigent persons).

"(D) Section 13(c) of Public Law 93-233 (relating to deeming eligible for medical assistance certain individuals receiving mandatory State supplementary payments).

"(E) Section 503 of Public Law 94-566 (popularly known as the 'Pickle Amendment', relating to deeming eligible for medical assistance certain individuals who would be eligible for supplemental security income benefits but for cost-of-living increases in social security benefits).

"(b) ADDITIONAL STATE PLAN REQUIREMENTS.—For other provisions of law that establish additional requirements for State plans to be approved under this title, see the following:

"(1) Section 1618 of this Act (relating to requirement for operation of certain State supplementation programs).

"(2) Section 212(a) of Public Law 93-66 (relating to requiring mandatory minimum State supplementation of SSI benefits program).".

PART F—PRIVATE HEALTH INSURANCE CONTINUATION

SEC. 181. TEMPORARY EXTENSION OF COVERAGE AT GROUP RATES FOR FAMILY MEMBERS OF DECEASED, DIVORCED, OR MEDICARE-ELIGIBLE WORKERS.

(a) IN GENERAL.—Subsection (i) of section 162 of the Internal Revenue Code of 1954 (relating to deduction for trade or business expenses with respect to group health plans) is amended—

(1) by redesignating paragraph (2) as paragraph (3); and

(2) by inserting after paragraph (1) the following new paragraph:

"(2) CONTINUATION COVERAGE.—

"(A) REQUIRING OPTION OF CONTINUATION COVERAGE WHEN QUALIFIED BENEFICIARY WOULD LOSE COVERAGE.—The expenses paid or incurred by an employer for a group health plan shall not be allowed as a deduction under this section unless each qualified beneficiary who would lose coverage under the plan because of a qualifying event is given, in accordance with this paragraph, the option of electing continuation coverage under the plan.

"(B) ELECTION.—

"(i) ELECTION PERIOD.—The option of electing continuation coverage must be offered during a period that—

"(I) begins not later than the termination date (as defined in subparagraph (C)(ii)),

"(II) is of at least 60 days duration, and

"(III) ends not earlier than 60 days after the date the qualified beneficiary is notified under subparagraph (F)(iv) or the termination date, whichever date is later.

"(ii) EFFECT OF ELECTION ON OTHER BENEFICIARIES.—Unless otherwise specified in the election, any such election by a qualified beneficiary described in subparagraph (G)(ii)(I) shall be deemed to include an election of continuation coverage on behalf of any other qualified beneficiary whose coverage would, but for continuation coverage provided in accordance with this paragraph, be affected by the qualifying event.

"(C) QUALIFYING EVENT AND TERMINATION DATE.—For purposes of this paragraph—

"(i) A 'qualifying event' under a group health plan, with respect to a covered employee, is any of the following events if coverage of a qualified beneficiary under the plan would, but for continuation coverage provided in compliance with this paragraph, be terminated by the occurrence of the event:

"(I) The death of the covered employee.

"(II) The divorce or separation of the covered employee from the employee's spouse.

"(III) The covered employee becoming entitled to benefits under title XVIII of the Social Security Act.

"(ii) The term 'termination date' means, with respect to a qualifying event, the date

on which coverage of a qualified beneficiary under a group health plan would be terminated under the plan but for continuation coverage provided in compliance with this paragraph.

"(D) TERMS OF CONTINUATION COVERAGE.—Any continuation coverage elected by or on behalf of a qualified beneficiary shall meet the following requirements:

"(i) NO REQUIREMENT OF INSURABILITY.—The coverage may not be conditioned upon, or discriminate on the basis of lack of, evidence of insurability.

"(ii) CONTINUED BENEFITS.—The coverage shall consist of coverage which is identical to the coverage provided under the plan to similarly situated beneficiaries under the plan with respect to whom a qualifying event has not occurred.

"(iii) PERIOD OF CONTINUED COVERAGE.—The coverage shall be for a period commencing upon the termination date and ending not earlier than the earliest of the following:

"(I) MAXIMUM OF FIVE YEARS.—Five years after the termination date.

"(II) END OF PLAN.—The date on which the employer ceases to provide any group health plan to employees.

"(III) FAILURE TO PAY PREMIUMS.—The date on which there is a failure in making timely payment of any premium required under the plan with respect to the qualified beneficiary.

"(IV) REEMPLOYMENT OR MEDICARE ELIGIBILITY.—The date on which the qualified beneficiary first becomes or could become, after the date of the election, a covered employee under any other group health plan or becomes entitled to benefits under title XVIII of the Social Security Act.

"(V) REMARRIAGE OF SPOUSE.—In the case of a qualified beneficiary described in subparagraph (G)(ii)(I), the date on which the beneficiary remarries and becomes (or could become) covered under a group health plan as the spouse of a covered employee.

"(VI) CHILD TURNING MAJORITY.—In the case of an individual who is a qualified beneficiary by reason of having been a covered dependent child of a covered employee, the date on which the individual ceases to be a covered dependent child of the covered employee.

"(iv) CONVERSION OPTION.—In the case of a qualified beneficiary whose period of continued coverage expires under clause (iii)(I), the plan must provide to the beneficiary, during the 180-day period ending on the date of expiration of the period of continued coverage, the option of enrollment under a conversion health plan otherwise generally available to beneficiaries under the plan.

"(E) PREMIUMS FOR CONTINUATION COVERAGE.—

"(i) AMOUNT.—The total premium charged by a group health plan with respect to any qualified beneficiary for continuation coverage under the plan shall not exceed the sum of employer premiums and employee premiums generally charged with respect to coverage under the plan of similarly situated beneficiaries with respect to whom a qualifying event has not occurred. The total of all premiums charged by the plan in any plan year may be based upon reasonably anticipated community costs for such plan year of the entire pool of covered employees and other beneficiaries under the plan, including qualified beneficiaries receiving continuation coverage under the plan under this paragraph.

"(ii) PAYMENTS.—The plan may provide for payment of the total premium by the qualified beneficiary receiving such coverage, or for payment of all or part of such premium by the employer or other party and payment of the remainder of such premium by such beneficiary. The plan shall provide for payment of any premium by a qualified beneficiary in monthly installments if so elected by the beneficiary. If an election is made during an election period but after the termination date, the plan shall permit payment of any premium for continuation coverage during the preceding period to be made within 45 days of the date of the election.

"(iii) PREMIUM DEFINED.—As used in this subparagraph, the term 'premium' means any amount payable with respect to the provision of coverage under a group health plan.

"(F) NOTICE REQUIREMENTS.—In accordance with regulations of the Secretary—

"(i) the group health plan must provide, at the time of commencement of coverage under the plan, for written notice to each covered employee and spouse of the employee (if any) of the rights provided under this paragraph;

"(ii) the employer of an employee under the plan must notify the group health plan administrator if the employee dies;

"(iii) each covered employee is responsible for notifying the group health plan administrator of the occurrence of any qualifying event (other than that described in subparagraph (C)(i)(I)) respecting that employee; and

"(iv) the group health plan administrator must notify each qualified beneficiary, within a period of 14 days after the date the administrator is notified concerning the occurrence of a qualifying event affecting that beneficiary, of—

"(I) the termination date with respect to the beneficiary, and

"(II) the beneficiary's right to elect continuation coverage under this paragraph and the election period established under subparagraph (B)(i) during which the beneficiary can exercise that right.

"(G) DEFINITIONS.—For purposes of this paragraph—

"(i) COVERED EMPLOYEE.—The term 'covered employee' means an individual who is (or was) provided coverage under a group health plan by virtue of the individual's employment or previous employment with an employer.

"(ii) QUALIFIED BENEFICIARY.—The term 'qualified beneficiary' means, with respect to a covered employee under a group health plan, any other individual who, on the date before the date of a qualifying event for that employee—

"(I) is a beneficiary under the plan as the spouse of the employee and has been married to the employee for at least the immediately preceding 30-day period, or

"(II) is a beneficiary under the plan as a covered dependent child of the employee.

"(iii) COVERED DEPENDENT CHILD.—The term 'covered dependent child' means, with respect to a covered employee, an individual who meets the generally applicable requirements of the plan for treatment as a dependent child covered under the plan by reason of the coverage of the employee under the plan.

"(iv) GROUP HEALTH PLAN ADMINISTRATOR.—The term 'group health plan administrator' means, in connection with a group health plan, any person who provides for administrative functions relating to enrollment of individuals under the plan. For purposes of this subparagraph, the term 'person' includes one or more individuals, governments or agencies of the United States or any State or political subdivision thereof, labor unions, partnerships, associations, corporations, legal representatives, mutual companies, joint ventures, joint stock companies, societies, trusts, unincorporated organizations, trustees, trustees in bankruptcy, receivers, and fiduciaries.".

(b) CONFORMING AMENDMENT.—Paragraph (1) of section 162(i) of such Code is amended by striking out "GENERAL RULE" and inserting in lieu thereof "COVERAGE RELATING TO END STAGE RENAL DISEASE".

(c) EFFECTIVE DATES.—

(1) GENERAL RULE.—The amendments made by this section shall apply to plan years beginning on or after January 1, 1986.

(2) SPECIAL RULE FOR COLLECTIVE BARGAINING AGREEMENTS.—In the case of a group health plan maintained pursuant to one or more collective bargaining agreements between employee representatives and one or more employers ratified before the date of the enactment of this Act, the amendments made by this section shall not apply to plan years beginning before the earlier of—

(A) the date on which the last of the collective bargaining agreements relating to the plan terminates (determined without regard to any extension thereof agreed to after the date of the enactment of this Act), or

(B) January 1, 1987.

For purposes of subparagraph (A), any plan amendment made pursuant to a collective bargaining agreement relating to the plan which amends the plan solely to conform to any requirement added by this section shall not be treated as a termination of such collective bargaining agreement.

(d) NOTIFICATION TO COVERED EMPLOYEES.—At the time that the amendments made by this section apply to a group health plan described in section 162(i) of the Internal Revenue Code of 1954, the plan shall notify each covered employee, and spouse of the employee (if any), who is covered under the plan at that time of the continuation coverage required under paragraph (2) of that section. The notice furnished under this subsection is in lieu of notice that may otherwise be required under paragraph (2)(F)(i) of that section.

PART G—TASK FORCE ON LONG-TERM HEALTH CARE POLICIES

SEC. 191. GUIDELINES FOR LONG-TERM HEALTH CARE POLICIES.

(a) ESTABLISHMENT OF TASK FORCE.—(1) The Secretary of Health and Human Services (hereinafter in this section referred to as the "Secretary") shall establish a Task Force on Long-Term Health Care Policies (hereinafter in this section referred to as the "Task Force"). The Task Force shall be established not later than 60 days after the date of the enactment of this Act and in consultation with the National Association of Insurance Commissioners.

(b) COMPOSITION OF TASK FORCE.—The Task Force shall be composed of 18 members, which shall include—

(1) two members representing the National Association of Insurance Commissioners,

(2) three members representing Federal and State agencies with responsibilities relating to health or the elderly,

(3) three members representing private insurers,

(4) three members from organizations representing consumers or the elderly, and

(5) three members from organizations representing providers of long-term health care services.

The Secretary shall designate a member of the Task Force as chair.

(c) DEVELOPMENT OF GUIDELINES.—The Task Force shall develop guidelines for long-term health care policies, including guidelines designed—

(1) to limit marketing and agent abuse for those policies,

(2) to assure the dissemination of such information to consumers as is necessary to permit informed choice in purchasing the policies and to reduce the purchase of unnecessary or duplicative coverage,

(3) to assure that benefits provided under the policies are reasonable in relationship to premiums charged, and

(4) to promote the development and availability of long-term health care policies which meet these guidelines.

(d) REPORT.—Not later than 18 months after the date of the enactment of this Act, the Task Force shall report to the Secretary and Congress respecting—

(1) the guidelines developed under subsection (c), including an explanation of the reasons for their selection, and

(2) such recommendations for additional activities respecting long-term health care policies as the Task Force finds appropriate.

The Secretary, in cooperation with the National Association of Insurance Commissioners, shall provide for the dissemination of the report to each of the States.

(e) ANNUAL REPORT OF SECRETARY.—The Secretary shall annually report to Congress on—

(1) actions taken by the States to implement the guidelines developed under this section,

(2) recommendations for the development of additional guidelines (or modification of proposed guidelines), and

(3) recommendations for legislative and administrative action needed to respond to issues raised by the Task Force or to improve consumer protection with respect to long-term health care policies.

(f) LONG-TERM HEALTH CARE POLICY DEFINED.—In this section, the term "long-term health care policy" means an insurance policy, or similar health benefits plan, which is designed for or marketed as providing (or making payments for) health care services (such as nursing home care and home health care) or related services (which may include home and community-based services), or both, over an extended period of time.

TITLE II—TRADE AND CUSTOMS LAWS AMENDMENTS

PART A—TRADE ADJUSTMENT ASSISTANCE

SUBPART 1—WORKER ADJUSTMENT ASSISTANCE

Sec. 201. Group eligibility requirements.
Sec. 202. Qualifying requirements.
Sec. 203. Limitations on trade readjustment allowances.
Sec. 204. Worker training.
Sec. 205. Agreements with States regarding training.

SUBPART 2—FIRM ADJUSTMENT ASSISTANCE

Sec. 211. Petitions.
Sec. 212. Approval of adjustment proposals.
Sec. 213. Technical assistance.
Sec. 214. Financial assistance.
Sec. 215. Protective provisions.

SUBPART 3—EXTENSION OF TRADE ADJUSTMENT ASSISTANCE

Sec. 221. Extension of adjustment assistance for workers and firms.

SUBPART 4—EFFECTIVE DATES

Sec. 231. Effective dates.

PART B—AUTHORIZATION OF APPROPRIATIONS FOR TRADE AND CUSTOMS AGENCIES

Sec. 241. United States International Trade Commission.
Sec. 242. United States Customs Service.
Sec. 243. United States Trade Representative.

PART C—USER FEES FOR CUSTOMS SERVICES

Sec. 251. Fees to offset expenses incurred in processing arrivals in the United States.
Sec. 252. Conforming amendments.
Sec. 253. Advisory committee.
Sec. 254. Effective period for fees.

PART A—TRADE ADJUSTMENT ASSISTANCE

Subpart 1—Worker Adjustment Assistance

SEC. 201. GROUP ELIGIBILITY REQUIREMENTS.

Section 222 of the Trade Act of 1974 (19 U.S.C. 2272) is amended to read as follows:

"SEC. 222. GROUP ELIGIBILITY REQUIREMENTS.

"The Secretary shall certify a group of workers as eligible to apply for adjustment assistance under this part if he determines—

"(1) that—

"(A) a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated,

"(B) sales or production, or both, of such firm or subdivision have decreased absolutely, and

"(C) increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production; or

"(2) that a significant number or proportion of the workers in such workers' firm (if the firm has no subdivision) or subdivision of a firm have become totally or partially separated, or are threatened to become totally or partially separated, by reason of the relocation of the production functions of that firm or subdivision to a foreign country or instrumentality.

For purposes of paragraph (1)(C), the term 'contributed importantly' means a cause which is important but not necessarily more important than any other cause.".

SEC. 202. QUALIFYING REQUIREMENTS.

The last sentence of section 231(a)(2) of the Trade Act of 1974 (19 U.S.C. 2291(a)(2)) is amended by striking out all that follows after subparagraph (C) and inserting in lieu thereof "shall be treated as a week of employment at wages of $30 or more, but not more than 7 weeks, in case of weeks described in paragraph (A) or (C), or both, may be treated as weeks of employment under this sentence.".

SEC. 203. LIMITATIONS ON TRADE READJUSTMENT ALLOWANCES.

Section 233(a)(2) of the Trade Act of 1974 (19 U.S.C. 2293(a)(2)) is amended by striking out "52-week period" and inserting "104-week period".

SEC. 204. WORKER TRAINING.

Section 236(a)(1) of the Trade Act of 1974 (19 U.S.C. 2296(a)(1)) is amended by adding at the end thereof the following new sentence: "For purposes of applying subparagraph (C), a reasonable expectation of employment does not require that employment opportunities for a worker be available, or offered, immediately upon the completion of training under this section.".

SEC. 205. AGREEMENTS WITH STATES REGARDING TRAINING.

Section 239(a) of the Trade Act of 1974 (19 U.S.C. 2311(a)) is amended—

(1) by inserting "(1)" immediately after "(a)";

(2) by redesignating paragraphs (1), (2), and (3) as subparagraphs (A), (B), and (C), respectively;

(3) by amending subparagraph (B) (as so redesignated) to read as follows: "(B) where appropriate, but in accordance with paragraph (2), will afford adversely affected workers testing, counseling, referred to training, and placement services, and"; and

(4) by adding at the end thereof the following new paragraph:

"(2) Each cooperating State agency must, in carrying out paragraph (1)(B)—

"(A) advise each adversely affected worker to apply for training under section 236(a) at the time the worker makes application for trade readjustment allowances (but failure of the worker to do so may not be treated as cause for denial of those allowances); and

"(B) within 60 days after application for training is made by the worker, interview the adversely affected worker regarding, and review, suitable training opportunities available to the worker under section 236.".

Subpart 2—Firm Adjustment Assistance

SEC. 211. PETITIONS.

Section 251(c)(2) of the Trade Act of 1974 (19 U.S.C. 2341(c)(2)) is amended to read as follows:

"(2) sales or production, or both—

"(A) of the firm have decreased absolutely, or

"(B) of an article that accounted for not less than 25 percent of the total production or sales of the firm during the 12-month period preceding the most recent 12-month period for which data are available have decreased absolutely, and".

SEC. 212. APPROVAL OF ADJUSTMENT PROPOSALS.

Section 252 of the Trade Act of 1974 (19 U.S.C. 2342) is amended—

(1) by amending the second sentence of subsection (b)(1) by striking out "adjustment assistance" and inserting in lieu thereof "technical assistance under section 253(a)(3) or financial assistance under section 254"; and

(2) by striking out subsection (c) and redesignating subsection (d) as subsection (c).

SEC. 213. TECHNICAL ASSISTANCE.

Section 253(b)(2) of the Trade Act of 1974 (19 U.S.C. 2343(b)(2)) is amended by inserting "to a certified firm in the implementation of its adjustment proposal" immediately after "furnished".

SEC. 214. FINANCIAL ASSISTANCE.

Section 254(b) of the Trade Act of 1974 (19 U.S.C. 2344(b)) is amended by inserting ", either through a single loan or a combination of loans," immediately before "to the firm—" in subsection (b).

SEC. 215. PROTECTIVE PROVISIONS.

Section 258(d) of the Trade Act of 1974 (19 U.S.C. 2348(d)) is amended by striking out "them and".

Subpart 3—Extension of Trade Adjustment Assistance

SEC. 221. EXTENSION OF ADJUSTMENT ASSISTANCE FOR WORKERS AND FIRMS.

Section 285 of the Trade Act of 1974 (19 U.S.C. note preceding 2271) is amended by striking out "September 30, 1985" and inserting in lieu thereof "September 30, 1989".

Subpart 4—Effective Dates

SEC. 231. EFFECTIVE DATES.

(a) IN GENERAL.—Except as provided in subsection (b), the amendments made by this part shall take effect October 1, 1985.

(b) SPECIAL PROVISIONS.—(1) The amendments made by sections 201, 202, and 211 shall apply with respect to all petitions for certification filed after September 30, 1985, under section 221 or 251, as the case may be, of the Trade Act of 1974.

(2) The amendment made by section 204 shall apply with respect to workers covered under certifications issued under section 222 of such Act of 1974 after September 30, 1985.

PART B—AUTHORIZATION OF APPROPRIATIONS FOR TRADE AND CUSTOMS AGENCIES

SEC. 241. UNITED STATES INTERNATIONAL TRADE COMMISSION.

The first sentence of paragraph (2) of section 330(e) of the Tariff Act of 1930 (19 U.S.C. 1330(e)(2)) is amended to read as follows: "There are authorized to be appropriated to the Commission for necessary expenses (including the rental of conference rooms in the District of Columbia and elsewhere) for fiscal year 1986 not to exceed $28,901,000; of which not to exceed $2,500 may be used, subject to approval by the Chairman of the Commission, for reception and entertainment expenses.".

SEC. 242. UNITED STATES CUSTOMS SERVICE.

(a) AUTHORIZATION OF APPROPRIATIONS.—Section 301 of the Customs Procedural Reform and Simplification Act of 1978 (19 U.S.C. 2075) is amended as follows:

(1) Subsection (b) is amended to read as follows:

"(b)(1) There are authorized to be appropriated to the Department of the Treasury not to exceed $769,067,000 for the salaries and expenses of the United States Customs Service for fiscal year 1986; of which—

"(A) $27,900,000 is for the addition of 500 inspectors, 150 import specialists, 100 customs patrol officers, and 50 special agents;

"(B) $50,425,000 is for the operation and maintenance of the air interdiction program of the Service; and

"(C) not to exceed $14,000,000 is for the implementation of the 'Operation EXODUS' program and any related program designed to enforce or monitor export controls under the Export Administration Act of 1979.

"(2) No part of any sum that is appropriated under the authority of paragraph (1) may be used to close any port of entry at which, during fiscal year 1985—

"(A) not less than 2,500 merchandise entries (including informal entries) were made; and

"(B) not less than $1,500,000 in customs revenues were assessed.

"(3)(A) No part of any sum that is appropriated under the authority of paragraph (1) may be used for further research and development or acquisition of F-15 avionics for the P-3 aircraft and related equipment until 60 days after the Committee on Ways and Means and the Committee on Finance have received from the Secretary of the Treasury a written comparative assessment of the suitability of the P-3, E-2, or other appropriate aircraft for use by the Customs Service in its air drug interdiction program. Such assessment, which the Secretary may not submit to the Committees until the General Accounting Office study required under paragraph (6) is completed, shall include life cycle costs.

"(B) Acquisition of additional aircraft for use by the Customs Service for its air drug interdiction program after completion of the assessment required under subparagraph (A) shall be subject to competitive bidding through the use of the normal 'request for proposal' process.

"(4) No part of any sum that is appropriated under the authority of paragraph (1) may be used to consolidate the drawback liquidation centers within the Customs Service to less than 4 such centers. If a consolidation is undertaken, the Commissioner of Customs shall select the location of the centers after taking into account the drawback volume at, and the geographic dispersion of, the respective centers being considered for consolidation.

"(5) In addition to any sum authorized to be appropriated under paragraph (1), there are authorized to be appropriated to the Department of the Treasury for fiscal year 1986—

"(A) not to exceed $8,000,000 from the Customs Forfeiture Fund for the making of payments under section 613A of the Tariff Act of 1930 (19 U.S.C. 1613b), of which not to exceed $5,000,000 may be used for the modification of aircraft (whether or not aircraft described in subsection (a)(5) of that section) for drug interdiction; and

"(B) from the Treasury account established under section 236 of the Trade and Tariff Act of 1984 (19 U.S.C. 58b) such sums as may be necessary for the provision of customs services at airports under that section, but not to exceed $75,000 for each such airport.; and

"(6) As soon as possible after the date of the enactment of this paragraph, but not later than 12 months after that date, the General Accounting Office shall complete, and submit to the Committee on Ways and Means and the Committee on Finance, a study that evaluates the air detection and interdiction capability of the Customs Service, including assets, geographic dispersal, costs of operation, procurement practices, and the services and equipment provided by other Federal agencies. Within 6 months after commencing the study, the General Accounting Office shall consult with the Committees on the progress of the study."; and

(2) by adding at the end thereof the following new subsection:

"(f) USE OF SAVINGS RESULTING FROM ADMINISTRATIVE CONSOLIDATIONS.—If savings in salaries and expenses result from the consolidation of administrative functions within the Customs Service, the Commissioner of Customs shall apply those savings, to the extent they are not needed to meet emergency requirements of the Service, to strengthening the commercial operations of the Service by increasing the number of inspector, import specialist, patrol officer, and other line operational positions.".

(b) ELIMINATION OF SURETIES ON CUSTOMS BONDS.—(1) The Commissioner of Customs may not publish, nor take any other action to give force and effect to, any final rule that would revise any provision in 19 CFR part 113 or section 142.4 (as in effect on March 1, 1984) relating to the requirement for sureties on customs bonds—

(A) unless the Commissioner submits to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate, on the same day, a report containing—

(i) the text of the draft final rule;

(ii) an analysis of the revenue impact of the rule;

(iii) a regulatory impact analysis;

(iv) the estimated cost benefit of the rule to the Customs Service and to the importing community, and an explanation in support of those estimates; and

(v) a justification for each revision to be effected by the rule; and

(B) until the close of the first period of 90 calendar days of continuous session of Congress occurring after the date on which the report is submitted under subparagraph (A).

SEC. 243. UNITED STATES TRADE REPRESENTATIVE.

Section 141 of the Trade Act of 1974 (19 U.S.C. 2171) is amended—

(1) by inserting before the semicolon at the end of subsection (d)(1) the following: ", except that not more than 20 individuals may be employed without regard to any provision of law regulating the employment or compensation at rates not to exceed the rate of pay for level IV of the Executive Schedule in section 5314 of title 5, United States Code"; and

(2) by amending subsection (f)(1)—

(A) by striking out "$14,179,000 for fiscal year 1985" and inserting in lieu thereof "$13,582,000 for fiscal year 1986", and

(B) by striking out "$80,000" and inserting in lieu thereof "$68,000".

PART C—USER FEES FOR CUSTOMS SERVICES

SEC. 251. FEES TO OFFSET EXPENSES INCURRED IN PROCESSING ARRIVALS IN THE UNITED STATES.

Section 214 of the Customs Procedural Reform and Simplification Act of 1978 (19 U.S.C. 58a) is amended to read as follows:

"SEC. 214. (a) The Secretary of the Treasury shall charge and collect the following fees to cover the expenses incurred by the Customs Service in processing arrivals at ports of entry in the customs territory of the United States:

"(1) For the arrival of a commercial vessel of 100 or more tons, $425.

"(2) For the arrival of a commercial truck, $5.

"(3) For the arrival of a railroad car, whether passenger or freight, $5.

"(4) For all arrivals made during a calendar year by a private aircraft or private vessel, $25.

"(5) For the arrival in the United States of each passenger aboard a commercial vessel or commercial aircraft from a place outside the United States other than a place described in paragraph (6), $5.

"(6) For the arrival in the United States of each passenger aboard a commercial vessel, commercial aircraft, or train from Canada, Mexico, a territory or possession of the United States, or any island that is an adjacent island within the meaning of section 101(b)(5) of the Immigration and Nationality Act (8 U.S.C. 1101(b)(5)), $1.

"(b) Each person providing transportation for hire by vessel, aircraft, or train shall—

"(1) separately identify the fee charged under subsection (a)(5) or (6), as the case may be, as a Federal inspection fee on the document or ticket issued to each passenger for that transportation;

"(2) collect the fee from the passenger at the time the documentation or ticket is purchased; and

"(3) remit to the Secretary the fees collected under paragraph (2) during each calendar quarter before the 31st day after the last day of that quarter.

"(c) Except with respect to those services for which fees are imposed under subsection (a), the Secretary of the Treasury may charge such fees as may be necessary to

cover the costs of providing those services which customs officers were authorized to provide under subsection (a), as in effect before the date of the enactment of this subsection.

"(d) Notwithstanding any other provision of law, the customs services required to be provided to passengers upon arrival in the United States on scheduled airline flights shall be adequately provided when and where needed at no cost to airlines and airline passengers other than the fees imposed under subsection (a).

"(e) The receipts for reimbursable charges, including those collected under subsection (a), and expenses which have been paid for out of any appropriation for collecting the revenue from customs that are covered into the Treasury as miscellaneous receipts under the first section of the Act of March 4, 1907 (19 U.S.C. 527), shall be placed in a proprietary account."

SEC. 252. CONFORMING AMENDMENTS.

(a) REPEAL OF APPROPRIATION REFUND AUTHORITY.—Section 524 of the Tariff Act of 1930 (19 U.S.C. 1524) is repealed.

(b) RAIL PASSENGER SERVICE ACT.—Section 305(i) of the Rail Passenger Service Act, as amended (45 U.S.C. 545(i)), is amended by striking out the last sentence thereof.

(c) AIRPORT AND AIRWAY DEVELOPMENT ACT OF 1970.—Section 53(e) of the Airport and Airway Development Act of 1970 (49 U.S.C. App. 1741(e)) is repealed.

SEC. 253. ADVISORY COMMITTEE.

In accordance with the provisions of the Federal Advisory Committee Act, the Secretary of the Treasury shall establish an advisory committee, whose membership shall consist of representatives from the airline, shipping, and other transportation industries, the general public, and others who may be subject to any fee or charge (1) authorized by law, or (2) proposed by the Customs Service for the purpose of covering expenses incurred by the Customs Service. The advisory committee shall meet on a periodic basis and shall advise the Secretary on issues related to the performance of the Customs Service. This advice shall include, but not be limited to, such issues as the time periods during which such services should be performed, the proper number and deployment of inspection officers, the level of fees, and the appropriateness of any proposed fee. The Secretary shall give substantial consideration to the views of the advisory committee in the exercise of his duties.

SEC. 254. EFFECTIVE PERIOD FOR FEES.

The fees authorized under section 214(a) of the Customs Procedural Reform and Simplification Act of 1978 (as amended by section 251) shall be charged with respect to arrivals in the United States occurring after the 180th day after the date of the enactment of this Act and before the close of the 3-year period beginning on that day.

TITLE III—PROVISIONS RELATING TO AID TO FAMILIES WITH DEPENDENT CHILDREN

Sec. 301. Improvements in AFDC quality control standards and procedures.
Sec. 302. Grants for programs to prevent teenage pregnancies and to assist pregnant individuals and teenage parents in achieving self-sufficiency.
Sec. 303. Mandatory provision of aid with respect to dependent children in two-parent families.

SEC. 301. IMPROVEMENTS IN AFDC QUALITY CONTROL STANDARDS AND PROCEDURES.

(a) IN GENERAL.—Section 403(i) of the Social Security Act is amended to read as follows:

"(i)(1)(A) In order to establish and maintain improved quality control standards and procedures in the operation and administration of State plans approved under this part—

"(i) each State, in accordance with a timetable and standards which shall be established by the Secretary in regulations, shall—

"(I) collect a statistically reliable sample of the cases under its approved State plan under this part for each fiscal year or (at the option of the State) for each of the two six-month periods in such year, for purposes of quality control review under this subsection,

"(II) review the sample so collected and (on the basis of such review) make its original findings with respect to errors for the period involved, and

"(III) submit such findings to the Secretary;

"(ii) the Secretary, after studying the State's original findings as submitted under clause (i)(III), shall select specified cases for further review and notify the State thereof; and the State shall submit to the Secretary the records of the cases so selected and specified;

"(iii) the Secretary shall review and analyze the case records submitted under clause (ii) and (on the basis of such review and the State's original findings) shall determine the State's error rate for the period involved (without any adjustment under paragraph (2)(C)) and notify the State of such error rate within six months after the close of the fiscal year or within six months after the date on which the sample is submitted, whichever is later; and

"(iv) the State shall develop and submit to the Secretary (except as provided by subparagraph (B)) a corrective action plan for eliminating or reducing errors identified as a result of the reviews under clauses (i) and (iii) (whether or not such errors are subject to inclusion for purposes of disallowances under paragraph (2)(A)) and, after such plan has been reviewed and approved by the Secretary in accordance with subparagraph (C), shall implement the corrective actions provided for in such plan in accordance with a timetable established by the Secretary in regulations; and the Secretary shall continuously monitor the State's corrective action process under such plan.

"(B) The requirement (in subparagraph (A)(iv)) that States submit corrective action plans for eliminating or reducing errors may be waived by the Secretary in the case of any State which has consistently had an error rate below its error rate tolerance level (as determined by the Secretary, upon the request of the State, in the manner provided in subparagraphs (B) and (C)(i) of paragraph (2)).

"(C) The Secretary shall establish criteria for corrective action plans submitted by States under subparagraph (A)(iv), and shall approve any plan so submitted upon determining that it meets such criteria. If a plan so submitted is disapproved, the Secretary shall specify (in notifying the State of such disapproval) the respect or respects in which the plan fails to meet the criteria so established, and shall provide appropriate advice and assistance to the State in eliminating such failure with the objective of facilitating the resubmission and approval of the plan at the earliest possible time.

"(D) The sample obtained under subparagraph (A)(i) by a State which collected such sample on an annual basis rather than electing to collect two six-month samples for the fiscal year involved shall in no case include a smaller number of cases than the number that the Secretary determines would be required for a statistically reliable sample if the State had elected to collect two six-month samples for that fiscal year.

"(E) The requirements imposed upon a State by subparagraph (A) with respect to the collection and review of samples and the submission of the results thereof, and the requirement that a State (under subparagraphs (A)(iv) and (C)) submit a corrective action plan which meets the Secretary's criteria established under subparagraph (C), shall be deemed for purposes of section 404 to be included in the State's plan approved under section 402.

"(2)(A) Notwithstanding subsection (a)(1) (but subject to subparagraph (C) and paragraph (3)), if a State's error rate for any fiscal year (as defined in paragraph (5)(A)) exceeds the error rate tolerance level determined for the State (for that year) under subparagraph (B), then the Secretary shall disallow Federal payments for such fiscal year with respect to the State's erroneous payments (as defined in paragraph (5)(B)) to the extent that the inclusion of such erroneous payments in determining the State's error rate caused such rate to exceed the tolerance level so determined.

"(B) A State's error rate tolerance level for any fiscal year shall be 3.5 percent, increased by—

"(i) 0.5 percentage points if, throughout such fiscal year, the plan of such State approved under this part provides for the payment of aid with respect to dependent children of unemployed parents as provided in section 407,

"(ii) 0.1 percentage points for each full 20 percent increment (up to a maximum of five such increments) by which (I) the ratio of the number of families with earned income who are receiving aid under such State's plan approved under this part to the total number of families receiving such aid exceeds (II) the average ratio, per State, of the number of families with earned income who are receiving aid under all of the State plans approved under this part to the total number of families receiving such aid, and

"(iii) 0.1 percentage points for each full 20 percent increment (up to a maximum of five such increments) by which (I) the population per square mile of land area in such State exceeds (II) the average population per square mile of land area, per State, in all of the States having plans approved under this part.

"(C) In determining the error rate in any State for purposes of this paragraph—

"(i) such rate shall be fixed at the midpoint of the standard interval for errors within which the State's true error rate falls (as determined without regard to this clause on the basis of the sample or samples collected by the State under paragraph (1)(A)(i)), or at the lower bound of such standard interval in the case of a State which has collected a sample or samples sufficiently large to produce a lower limit of such interval no more than 2.5 percentage points below the midpoint; and

"(ii) errors which are technical in nature, and which would not change the AFDC payment levels involved, shall be disregarded.

For purposes of clause (i), the lower limit of the standard interval for errors within

which a State's true error rate falls shall be calculated in accordance with regulations prescribed by the Secretary to adjust for variability among the States in the number, proportion, or dollar value of cases in which the State's findings under paragraph (1)(A)(i)(II) (with respect to errors in its sample or samples collected under paragraph (1)(A)(i)(I)) differ from the Secretary's findings with respect to the State's error rate under paragraph (1)(A)(iii).

"(D) The total amount of the disallowances that would otherwise be imposed with respect to any State under subparagraph (A) on account of an error rate in excess of the applicable error rate tolerance level for any fiscal year shall be reduced by the Federal share of any overpayments collected by such State (on account of erroneous payments) during that fiscal year.

"(3)(A) The Secretary, in accordance with this paragraph, may waive all or any part of any disallowance that would otherwise be imposed with respect to a State under paragraph (2)(A) if such State is unable to reach the applicable error rate tolerance level for the fiscal year involved despite a good-faith effort by such State.

"(B) Any State may request a waiver of all or part of any disallowance that would otherwise be imposed with respect to such State for any fiscal year under paragraph (2)(A), basing such request upon a showing—

"(i) that the State has made (and is continuing to make) a good-faith effort to reduce or eliminate the erroneous payments involved but was unable to reach the applicable error rate tolerance level for such fiscal year despite that effort; or

"(ii) that (I) the Secretary's determination of the State's error rate for such fiscal year was made incorrectly or in a manner inconsistent with the provisions of this subsection, and (II) the State's error rate, if determined correctly and in a proper manner, would be lower than the rate so determined by the Secretary.

The Secretary shall consider and review such request, and either approve it or disapprove it in whole or in part, in accordance with a timetable which shall be specified in regulations. If the Secretary disapproves the request, the State may appeal the Secretary's decision to the Grant Appeals Board in the Department of Health and Human Services for such further action as may be provided for by law or regulations (including judicial review of the Secretary's decision or the Board's determination).

"(C) In considering and reviewing any request for a waiver submitted by a State under this paragraph, the Secretary shall take into account—

"(i) factors beyond the State's control (including disasters, strikes by State or other staff personnel engaged in determining eligibility or processing cases, sudden workload changes resulting from changes in Federal or State laws or regulations or from rapid caseload growth, and State actions resulting from incorrect policy interpretations by Federal officials);

"(ii) factors relating to agency commitment, including demonstrated commitment by upper level State officials to the error reduction program under this subsection, the sufficiency and quality of operational systems designed to reduce errors, the use of effective systems and procedures for the statistical and program analysis of quality control and related data, and effective management and execution of the corrective action process;

"(iii) the State's past performance with respect to erroneous payments, including past error rate levels and past error rate reduction efforts;

"(iv) the cost effectiveness of error rate reduction, both in general and in the particular circumstances existing within the State; and

"(v) such other factors as the Secretary may determine to be appropriate, as specified in regulations or as detailed by the State in its waiver request.

The Secretary's regulations shall specify the factors to be considered and the criteria to be used in assessing waiver requests under this paragraph, and shall indicate the relative weight or importance of each of such factors and criteria in order to assist States in determining the appropriateness of proposed requests.

"(D) Notwithstanding the preceding provisions of this paragraph, the Secretary shall in any case grant a waiver requested by a State under subparagraph (B) for any fiscal year if such State's corrective action plan submitted under paragraph (1)(A)(iv) or (1)(C), or a separate plan for the reduction of errors submitted by such State along with its waiver request, provides in detail for the expenditure of additional State and local funds for the reduction of errors in such fiscal year in a total amount (over and above the amount of State and local funds that would otherwise be expended in such fiscal year for the administration of the State plan approved under this part) equal to or exceeding one-half of the net amount of the disallowances that would otherwise be imposed with respect to such State under paragraph (2)(A) for such fiscal year. Expenditures of additional State and local funds for the reduction of errors as provided for in the corrective action plan or separate plan described in the preceding sentence shall be considered (for purposes of subsection (a)) to be expenditures for the proper and efficient administration of the State plan approved under this part.

"(4)(A) Each State agency administering a plan approved under this part shall, at such times and in such form as the Secretary may specify, provide information on the rates of erroneous payments made in connection with its administration of such plan, together with any other data which the Secretary may request that are reasonably necessary for the Secretary to carry out the provisions of this subsection.

"(B) If a State fails to cooperate with the Secretary in providing information necessary to carry out this subsection, the Secretary, directly or through such contractual or other arrangements as the Secretary may find appropriate, shall establish the error rates for that State on the basis of the best data reasonably available and in accordance with such techniques for sampling and estimating as the Secretary may find appropriate.

"(C) In any case in which it is necessary for the Secretary to exercise the authority under subparagraph (B) to determine a State's error rate for a fiscal year, the amount that would otherwise be payable to such State under this part for quarters in such year shall be reduced by the costs incurred by the Secretary in making such determination.

"(5) For purposes of this subsection—

"(A) the term 'error rate', with respect to any State for any fiscal year, means the ratio of such State's erroneous payments for such year (as defined in subparagraph (B)) to its total payments under the State plan approved under this part for such year, determined (except as otherwise specifically provided) subject to the adjustments provided for in paragraph (2)(C); and

"(B) the term 'erroneous payments' means—

"(i) payments to ineligible families receiving assistance, and

"(ii) overpayments to eligible families receiving assistance.

"(6) This subsection shall not apply with respect to Puerto Rico, Guam, or the Virgin Islands.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall be effective only with respect to quarters in the fiscal year 1983 and subsequent fiscal years; except that such amendment may also be effective in the case of any State, at the election of the State made in such manner and within such time as the Secretary of Health and Human Services shall by regulation prescribe, with respect to quarters in the fiscal year 1982 or with respect to quarters in the fiscal years 1981 and 1982.

SEC. 302. GRANTS FOR PROGRAMS TO PREVENT TEENAGE PREGNANCIES AND TO ASSIST PREGNANT INDIVIDUALS AND TEENAGE PARENTS IN ACHIEVING SELF-SUFFICIENCY.

(a) IN GENERAL.—Part A of title IV of the Social Security Act is amended by adding at the end thereof the following new section:

"GRANTS FOR PROGRAMS TO PREVENT TEENAGE PREGNANCIES AND TO ASSIST PREGNANT INDIVIDUALS AND TEENAGE PARENTS OF YOUNG CHILDREN IN ACHIEVING SELF-SUFFICIENCY

"SEC. 416. (a)(1) For the purpose of assisting States and localities in establishing and carrying out programs—

"(A) to reduce the rate of teenage pregnancies in AFDC families; and

"(B) to help pregnant individuals and teenage parents of young children in such families, who might otherwise become long-term recipients of aid to families with dependent children, in achieving self-sufficiency,

there are authorized to be appropriated the sum of $50,000,000 for the fiscal year 1986 and the sum of $100,000,000 for the fiscal year 1987, to be used by the Secretary in making grants for such programs in accordance with this section. Any State which provides for the establishment and carrying out of one or more such programs in accordance with this section shall be entitled to receive a grant under this section for each such fiscal year, in an amount determined under subsection (d).

"(2) The State agency administering or supervising the administration of the State's plan approved under section 402 shall be responsible for administering or supervising the administration of the State's programs described in paragraph (1) for which grants under this section are made. Such grants shall be made directly to the State agency, and may be—

"(A) used by such agency for the purpose of conducting and providing in accordance with this section (directly or under contracts with others) the activities and services required to carry out the program or programs involved, or

"(B) paid by such agency to local school districts or to other local agencies or public or private nonprofit entities meeting the requirements of this section, under arrangements made with such districts or (through such districts) with such other agencies and entities, for use by such districts, agencies, or entities in conducting and providing in

accordance with this section (directly or under contracts with others) the activities and services required to carry out the program or programs involved;

but such grants may be used only in areas which are determined by the State agency to be areas of high teenage pregnancy or high infant mortality, and it must be the objective of any program for which such grants are used to carry out both the purpose described in subparagraph (A) of paragraph (1) and the purpose described in subparagraph (B) of such paragraph.

"(3) In order to qualify for a grant under this section for any fiscal year with respect to a program or programs described in paragraph (1) in any State, the State agency must submit to the Secretary no later than 3 months after the beginning of such year, in such manner and form as the Secretary may prescribe, a full and complete description of the program together with satisfactory assurances that the program will be operated in an effective and efficient manner and will otherwise meet the requirements of this section.

"(4) Grants made under this section—

"(A) shall be in addition to any amounts payable to States under section 403, and shall supplement and not replace any other funds which may be available for the same general purposes, or for the provision of services of any kind to needy individuals, in the localities involved, and

"(B) shall not be used to provide any individual with services which are available to that individual under a State plan approved under section 1902.

"(b)(1) In carrying out the purpose described in subparagraph (A) of subsection (a)(1), it shall be the objective of each program under this section (subject to the availability of funds) to—

"(A) conduct activities and provide services which may help to reduce pregnancies among children, targeting such activities and services to children who are eligible for aid to families with dependent children, in order to assure that such children will not be prevented from achieving self-sufficiency by parental responsibilities imposed upon them before they reach adulthood;

"(B) identify and address all of the factors which may play important roles in determining teenage sexual activity and contraceptive use;

"(C) encourage active participation by the parents of the children involved in the activities and services being conducted or provided under the program; and

"(D) encourage the children involved to develop education and employment goals for the future, combining new and existing resources to assist such children in achieving those goals and encouraging such children to postpone sexual activity and child bearing and to assume responsibility for family planning in order to achieve them.

"(2)(A) To the maximum extent appropriate and feasible, the activities conducted and services provided in carrying out the purpose described in subparagraph (A) of subsection (a)(1) shall include the services which are made available to pregnant individuals and teenage parents with young children under the program as more specifically described in subsection (c).

"(B) None of the activities conducted or services provided under this subsection or subsection (c) as a part of any program under this section may include the performance of abortions, or include the counseling of individuals to have abortions except where the life of the mother would be endangered if the fetus were carried to term.

"(c)(1) In carrying out the purpose described in subparagraph (B) of subsection (a)(1), it shall be the objective of each program under this section (subject to the availability of funds) to help achieve self-sufficiency for individuals under the age of 25 who are eligible for aid to families with dependent children, who (at the start of their participation in the program) are pregnant or are teenage parents with children under the age of 6, and who voluntarily elect to participate in the program, by—

"(A) requiring such individuals to seek a high school diploma or its equivalent or to take part in appropriate training,

"(B) providing each participant with academic or vocational training, job counseling, employment readiness, and job placement services,

"(C) integrating and coordinating services otherwise available to participants, and

"(D) providing each participant with other services and assistance designed to meet such objective, including an individualized assessment and plan, as more particularly described in paragraph (3).

"(2) Participation in program activities conducted and services provided with the objective specified in paragraph (1) shall be limited to individuals under the age of 25 residing within the area covered by the program who are pregnant, or who are teenage parents of dependent children under the age of 6, and shall include any such individual only if he or she (at the time of initial participation in the program)—

"(A) has not graduated from high school or its equivalent, and

"(B) voluntarily elects (subject to subsection (e)) to participate;

and the funds made available under this section may be used only for activities and services so conducted or provided in the case of individuals (described in the preceding provisions of this paragraph) who are eligible under this part (individually or as members of families) for aid to families with dependent children under the State's plan approved under section 402, or whose children are eligible for such aid.

"(3) A program described in subsection (a)(1) meets the requirements of this section only if the activities conducted and services provided with the objective specified in paragraph (1) include—

"(A) provision for the assignment to each participant of an agency staff person who, utilizing the case management approach and in coordination with the participant, will establish an individualized program, based on an individualized assessment of need and set forth in an individualized written plan, to meet the health needs of the participant and his or her dependent (or unborn) child, and to ensure the provision and coordination (on behalf of such participant and child) of such other services as the State determines to be necessary or appropriate to carry out the objective of this section, including, at a minimum, academic and vocational services, health services, training in parenting skills, job counseling, employment readiness, job placement, transportation, and child day care;

"(B) provision for the integration and coordination of services which are otherwise available at the local level to individuals under age 25 who are pregnant or are teenage parents with children under age 6 and which are offered under this part, under parts B and C of this title, under title V, under title XX, under the Job Training Partnership Act, and under other Federal and State programs that would assist in achieving the objectives of the program under this section;

"(C) provision for the coordination (with the local school system) of academic and vocational programs leading to a high school diploma or its equivalent, with a requirement of active participation in an educational program leading to a high school diploma or its equivalent, or in an appropriate training program, as a condition of participation in the program under this section;

"(D) provision for job counseling, training, employment readiness, and job placement and relevant supportive services independently or in conjunction with one or more programs of employment and training under this part or part C of this title, under the Job Training Partnership Act, or under another Federal or State law;

"(E) provision of child care at the program site or of other child day care services which have been contracted for on a reimbursable basis, to the extent necessary for teenage parents to participate effectively in the program, with a requirement that such care and services meet applicable State and local standards and with emphasis upon services that are compatible with the goal of achieving self-sufficiency;

"(F)(i) assurances that all such child care and services, and any transportation to and from work which may be necessary for a teenage parent or pregnant individual to participate effectively in the program, will be provided or arranged for without any charge to such parent or individual while he or she is participating in any phase of the program, and

"(ii) assurances that such care, services, and transportation will be provided or arranged for on a sliding scale basis (with charges based on ability to pay) during at least the first 6 months of work after the teenage parent or pregnant individual has completed his or her participation in the program, in order to ensure a smooth transition into the workforce;

"(G) provision for variations in the selection and offering of services to individual participants to the extent necessary to take account of differences in the needs of such participants and in their age, family composition, cultural background, and geographic location;

"(H) assurances that, in order to encourage participants to take advantage of the full range of services offered, as many of such services as possible will be provided at a single site, with programs and activities being conducted in the local schools to the maximum extent feasible;

"(I) provision for the establishment of peer groups of participants, led by experienced group counselors, to enable such participants to meet and discuss program-related problems and issues and to share their common concerns, and to serve as a medium for the communication and dissemination of relevant information; and

"(J) provision for the establishment of an outreach program designed to attract pregnant individuals and teenage parents of young children who would be eligible to participate.

Program activities conducted and services provided with the objective specified in paragraph (1) must include but need not be limited to the services and assistance set forth in the preceding provisions of this paragraph, and may include such other health, family planning, educational, train-

ing, and social services as may be needed to achieve such objective in cases where the necessary funding is not available from other sources.

"(4) In the case of a teenage parent participating in program activities conducted or services provided with the objective specified in paragraph (1), absences from his or her child for the purpose of attending a secondary or post-secondary school or participating in other education or training activities as a part of the program shall not be considered 'absences from the child' in determining whether he or she is exempted under clause (v) of section 402(a)(19)(A) from the requirement of registration under that section.

"(5) As used in this section, the term 'teenage parent' means a male or female individual who is the parent of a child under the age of 6 and who (A) has not attained the age of 20 or (B) became the parent of such child before attaining the age of 20.

"(d)(1) The grant to which any State is entitled from the sum appropriated pursuant to subsection (a)(1) for any fiscal year shall be in an amount bearing the same ratio to the sum so appropriated as the amount expended by such State during the preceding fiscal year as aid to families with dependent children under its plan approved under section 402 bears to the total amount expended by all the States during such preceding year as aid to families with dependent children under their plans so approved.

"(2) If any State does not qualify for a grant under this section for any fiscal year within the time provided in subsection (a)(3), the amount of the grant to which it would have been entitled for such year shall be reallocated to one or more other States on the basis of their relative need for additional assistance under this section (as determined by the Secretary).

"(e) If any State wishes to require participation in activities and services provided under subsection (c) by all individuals who are eligible to participate in such activities and services (or would be eligible to so participate if they satisfied paragraph (2)(B) of such subsection) and with respect to whose participation funds made available under this section may be used, such State may request that the Secretary waive the requirement of such paragraph (2)(B) and permit the State to make participation mandatory for all such individuals. The Secretary shall grant any such request and permit the State to require participation by all such individuals if he or she determines that—

"(1) the funds available for the program from Federal, State, local, and other sources (including this section) are sufficient to conduct all of the activities and provide all of the services which would be necessary to serve such individuals; and

"(2) mandatory participation in the program by all such individuals can be effectively administered and enforced by the State and the locality or localities involved.

"(f)(1) Prior to expenditure by a State of any grant payments made to it under this section for any fiscal year, the State shall report to the Secretary on the intended use of such payments; and such report shall be revised from time to time throughout the fiscal year involved if and to the extent that there are significant changes in such use.

"(2) No later than March 1, 1987, each State shall submit to the Secretary a full and complete report on the activities carried out with the proceeds of the grant or grants theretofore made to it under this section. The report—

"(A) shall be in such form and contain such information as may be necessary to provide an accurate description of such activities, to provide a complete record of the purposes for which the grant funds were spent, to indicate the extent to which such funds were spent in a manner consistent with the report or reports submitted under paragraph (1), and to indicate the extent to which the expenditure of such funds succeeded in accomplishing the objectives for which the grant was made, and

"(B) shall specifically contain such information as the Secretary may require in order to include in his or her evaluation under paragraph (3) the overall description referred to in subparagraph (B) thereof.

"(3)(A) No later than July 1, 1987, the Secretary, on the basis of the reports submitted by a State under paragraphs (1) and (2) for the fiscal year 1986 and of such additional information as he or she may obtain or develop, shall evaluate the use by such State of the grant or grants made to it under this section for that year in the light of the purposes of this section, with the objective of appraising the achievements of the programs for which such grants were made and developing comprehensive information and data on the basis of which decisions can be made with respect to the improvement of such programs and the desirability of providing further assistance in subsequent years. The Secretary shall report such evaluation to the Congress.

"(B) As a part of the evaluation under subparagraph (A) the Secretary shall include, at a minimum, a detailed overall description of the number and characteristics of the individuals served by the programs, the various kinds of activities conducted and services provided, and the results achieved, and shall set forth in detail his or her findings and comments with respect to the various State programs and a statement of his or her plans and recommendations for the future.

"(C) If as a result of the evaluation the Secretary determines that any such grant was used in a manner inconsistent with the purposes of this section or the objective stated in subparagraph (A) or if the reports submitted by the State were insufficient to indicate whether or not the grant was so used, the Secretary shall notify the State of his or her disapproval, and the inconsistent use of such grant shall be subject to sanctions of the type described in section 404(a) as though this section were a part of the approved State plan and such inconsistent use were a failure to comply with a provision required by section 402(a) to be included in such plan.

"(g) Grant payments to a State under this section for any fiscal year—

"(1) shall be used only for the specific purposes described in this section;

"(2) may be made on an estimated basis in advance of the determination of the exact grant amount, with appropriate subsequent adjustments to take account of any error in the estimates; and

"(3) shall be expended by such State in that fiscal year or in the succeeding fiscal year.

"(h) Notwithstanding any other provision of this title, payments made and services provided to participants in a program under this section, as a direct consequence of their participation in such program, shall not be considered as income or resources for purposes of determining their eligibility (or the eligibility of any other persons) for aid under the State's plan approved under section 402, or for purposes of determining the level of such aid.".

(b) DURATION OF PROGRAM.—Subject to section 416(g)(3) of the Social Security Act (as added by subsection (a)), the amendment made by subsection (a) shall be in effect only from October 1, 1985, until September 30, 1987.

SEC. 303. MANDATORY PROVISION OF AID WITH RESPECT TO DEPENDENT CHILDREN IN TWO-PARENT FAMILIES.

(a) REQUIREMENT THAT AID BE PROVIDED.—Section 402(a) of the Social Security Act is amended—

(1) by striking out "and" after the semicolon at the end of paragraph (38);

(2) by striking out the period at the end of paragraph (39) and inserting in lieu thereof "; and"; and

(3) by inserting immediately after paragraph (39) the following new paragraph:

"(40) provide that payments of aid will be made under the plan with respect to dependent children of unemployed parents, in accordance with section 407.".

(b) CONFORMING AMENDMENTS.—(1) Section 407(b) of such Act is amended by striking out "(b) The provisions" and all that follows down through "(1) requires" and inserting in lieu thereof the following:

"(b) In providing for the payment of aid under the State's plan approved under section 402 in the case of families which include dependent children within the meaning of subsection (a) of this section, as required by section 402(a)(40), the State's plan—

"(1) shall require".

(2) Section 407(b)(2) of such Act is amended by striking out "provides—" and inserting in lieu thereof "shall provide—".

(c) QUARTERS OF WORK BASED ON EDUCATION OR TRAINING.—(1) Section 407(d)(1) of such Act is amended—

(A) by inserting "(A)" after "means a calendar quarter"; and

(B) by inserting before the semicolon at the end thereof the following: ", or (B) if the State plan so provides (but subject to the last sentence of this subsection), in which such individual (i) was in regular full-time attendance as a student at an elementary or secondary school, (ii) was in regular full-time attendance in a course of vocational or technical training designed to fit him or her for gainful employment, or (iii) participated in an education or training program established under the Job Training Partnership Act".

(2) Section 407(d) of such Act is further amended by adding at the end thereof (after and below paragraph (4)) the following new sentence:

"No individual shall be credited during his or her lifetime (for purposes of subsection (b)(1)(C)(i)) with more than 4 'quarters of work' based on attendance in a course or courses of vocational or technical training as described in paragraph (1)(B)(ii) of this subsection.".

(3) Section 407(b)(1)(C)(i) of such Act is amended by inserting after "6 or more quarters of work (as defined in subsection (d)(1))" the following: ", including 2 or more quarters of work as defined in subsection (d)(1)(A),".

(d) EFFECTIVE DATE.—The amendments made by this section shall become effective October 1, 1986.

TITLE IV—PROVISIONS RELATING TO RAILROAD UNEMPLOYMENT REPAYMENT TAX AND UNEMPLOYMENT COMPENSATION

Sec. 401. Railroad unemployment repayment tax.

Sec. 402. Extension of borrowing authority under the Railroad Unemployment Insurance Act.
Sec. 403. Supplemental unemployment compensation for certain individuals.

SEC. 401. RAILROAD UNEMPLOYMENT REPAYMENT TAX.

(a) RATE OF TAX.—Subsection (c) of section 3321 of the Internal Revenue Code of 1954 (relating to rate of railroad unemployment repayment tax) is amended to read as follows:

"(c) RATE OF TAX.—For purposes of this section—

"(1) IN GENERAL.—The applicable percentage for any taxable period shall be the sum of—

"(A) the basic rate for such period, and

"(B) the surtax rate (if any) for such period.

"(2) BASIC RATE.—For purposes of paragraph (1)—

"(A) FOR PERIODS BEFORE 1989.—The basic rate shall be—

"(i) 4.3 percent for the taxable period beginning on July 1, 1986, and ending on December 31, 1986,

"(ii) 4.7 percent for the 1987 taxable period, and

"(iii) 6 percent for the 1988 taxable period.

"(B) FOR PERIODS AFTER 1988.—For any taxable period beginning after December 31, 1988, the basic rate shall be the sum of—

"(i) 2.9 percent, plus

"(ii) 0.3 percent for each preceding taxable period after 1988.

In no event shall the basic rate under this subparagraph exceed 5 percent.

"(3) SURTAX RATE.—For purposes of paragraph (1), the surtax rate shall be—

"(A) 3.5 percent for any taxable period if, as of September 30 of the preceding calendar year, there was a balance of transfers (or unpaid interest thereon) made after September 30, 1985, to the railroad unemployment insurance account under section 10(d) of the Railroad Unemployment Insurance Act, and

"(B) zero for any other taxable period.

"(4) BASIC RATE NOT TO APPLY TO RAIL WAGES PAID AFTER SEPTEMBER 30, 1990.—The basic rate under paragraph (1)(A) shall not apply to rail wages paid after September 30, 1990."

(b) BASE OF TAX TO BE COMPENSATION USED FOR RAILROAD RETIREMENT TAX PURPOSES.—Subsection (b) of section 3323 of such Code (defining rail wages) is amended to read as follows:

"(b) RAIL WAGES.—

"(1) IN GENERAL.—For purposes of this chapter, the term 'rail wages' means compensation (as defined in section 3231(e) for purposes of the tax imposed by section 3201(a)) with the modifications specified in paragraph (2).

"(2) MODIFICATIONS.—In applying subsection (e) of section 3231 for purposes of paragraph (1)—

"(A) ONLY EMPLOYMENT COVERED BY RAILROAD UNEMPLOYMENT INSURANCE ACT TAKEN INTO ACCOUNT.—Such subsection (e) shall be applied—

"(i) by substituting 'rail employment' for 'services' each place it appears,

"(ii) by substituting 'rail employer' for 'employer' each place it appears, and

"(iii) by substituting 'rail employee' for 'employee' each place it appears.

"(B) $7,000 WAGE BASE.—Such subsection (e) shall be applied by substituting for 'the applicable base' in paragraph (2)(A)(i) thereof—

"(i) except as provided in clauses (ii) and (iii), '$7,000',

"(ii) '$3,500' for the taxable period beginning on July 1, 1986, and ending on December 31, 1986, and

"(iii) for purposes of applying the basic rate under section 3321(c)(1)(A), '$5,250' for the taxable period beginning on January 1, 1990.

"(C) SUCCESSOR EMPLOYERS.—For purposes of this subsection, rules similar to the rules applicable under section 3231(e)(2)(C) shall apply."

(c) USE OF TAXES.—

(1) IN GENERAL.—Paragraph (2) of section 232(a) of the Railroad Retirement Revenue Act of 1983 (relating to tax used to repay loans made to railroad unemployment insurance account) is amended to read as follows:

"(2) TAXES CREDITED AGAINST LOANS TO RAILROAD UNEMPLOYMENT INSURANCE ACCOUNT.—

"(A) TAXES ATTRIBUTABLE TO BASIC RATE TO REDUCE RAILROAD UNEMPLOYMENT LOANS MADE BEFORE OCTOBER 1, 1985.—So much of the amount transferred under paragraph (1) as is attributable to the basic rate under section 3321(c)(1)(A) of the Internal Revenue Code of 1954 shall be credited against, and operate to reduce, the outstanding balance of railroad unemployment loans made before October 1, 1985.

"(B) TAXES ATTRIBUTABLE TO SURTAX RATE TO REDUCE RAILROAD UNEMPLOYMENT LOANS MADE AFTER SEPTEMBER 30, 1985.—So much of the amount transferred under paragraph (1) as is attributable to the surtax rate under section 3321(c)(1)(B) of such Code shall be credited against, and operate to reduce, the outstanding balance of railroad unemployment loans made after September 30, 1985."

(2) TRANSFERS TO RAILROAD UNEMPLOYMENT FUND AFTER LOAN REPAID.—Subsection (c) of section 232 of such Act is amended—

(A) by striking out "the amount" in paragraph (1) and inserting in lieu thereof "the amount described in subparagraph (A) or (B) of subsection (a)(2)", and

(B) by inserting before the comma at the end of paragraph (2) "against which the amount described in such subparagraph may be credited under such subparagraph".

(d) TECHNICAL AMENDMENTS.—

(1) Subsection (a) of section 3322 of such Code (relating to taxable period) is amended—

(A) by adding "and" at the end of paragraph (1), and

(B) by striking out paragraphs (2) and (3) and inserting in lieu thereof the following:

"(2) each calendar year after 1986."

(2) Subsection (b) of section 3322 of such Code (relating to earlier termination if loans to rail unemployment fund repaid) is amended—

(A) by striking out "The tax imposed by this chapter shall not apply" and inserting in lieu thereof "The basic rate under section 3321(c)(1)(A) of the tax imposed by section 3321 shall not apply", and

(B) by inserting "made before October 1, 1985," after "no balance of transfers" in paragraph (1) thereof.

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to remuneration paid after June 30, 1986.

SEC. 402. EXTENSION OF BORROWING AUTHORITY UNDER THE RAILROAD UNEMPLOYMENT INSURANCE ACT.

Section 10(d) of the Railroad Unemployment Insurance Act is amended by striking out the last sentence thereof.

SEC. 403. SUPPLEMENTAL UNEMPLOYMENT COMPENSATION FOR CERTAIN INDIVIDUALS.

(a) IN GENERAL.—If—

(1) an individual was receiving Federal supplemental compensation for the week which includes March 31, 1985, or a series of consecutive weeks which began with such week, and

(2) such individual did not meet the consecutive-week eligibility requirements of the Federal Supplemental Compensation Act of 1982 during any period of 1 or more subsequent weeks by reason of performing temporary disaster services described in subsection (e),

weeks in such period shall be disregarded for purposes of the consecutive-week requirement of section 602(f)(2)(B) of such Act, and, notwithstanding the requirements of State law relating to the availability for work, the active search for work, or the refusal to accept work, such individual shall be entitled to payment of Federal supplemental compensation for each week of unemployment which is described in subsection (b) and for which a certification of unemployment is made by such individual in accordance with subsection (c).

(b) WEEKS FOR WHICH PAYMENT SHALL BE MADE.—A week of unemployment for which payment shall be made under subsection (a) is a week which occurred during the period which commences with the first week beginning after the close of the period described in subsection (a)(2) and ends with the beginning of the first week in which the individual was employed after the close of such period.

(c) CERTIFICATION.—The certification of unemployment referred to in subsection (a) shall be a certification—

(1) that is made on a form provided by the State agency concerned and signed by the individual; and

(2) that identifies the weeks of unemployment for which the individual is making the certification.

(d) LIMITATION ON AMOUNT OF PAYMENT.—In no case may the total amount paid to an individual under subsection (a) exceed the amount remaining in the account established for such individual under section 602(e) of the Federal Supplemental Compensation Act of 1982 after payments were made from such account for weeks of unemployment beginning before the period described in subsection (a)(2).

(e) DEFINITION.—For purposes of subsection (a), the term "temporary disaster services" means services performed as a member of the National Guard after being called up by the Governor of a State to perform services related to a major disaster that was declared on June 3, 1985, by the President of the United States under the Disaster Relief Act of 1974.

(f) MODIFICATION OF AGREEMENT.—(1) The Secretary of Labor shall, at the earliest possible date after the date of the enactment of this Act, propose to any State concerned a modification of the agreement that the Secretary has with such State under section 602 of the Federal Supplemental Compensation Act of 1982 in order to carry out this section.

(2) Pending modification of the agreement, the State may make payment in accordance with the provisions of this section and shall be reimbursed in accordance with the provisions of section 604(a) of the Federal Supplemental Compensation Act of 1982. For purposes of carrying out this para-

graph, the term "this subtitle" in such section 604(a) shall include this section.

(g) EFFECTIVE DATE.—The provisions of this section shall apply to weeks beginning after March 31, 1985.

TITLE V—REVENUE PROVISIONS

Sec. 501. Restoration of proposed cuts in Internal Revenue Service budget and further increases in funds for revenue enforcement and related purposes.
Sec. 502. Increase in rate of tax on cigarettes made permanent; portion of tax revenues dedicated to tobacco price support program.
Sec. 503. Increase in excise tax on coal.
Sec. 504. Only railroad retirement benefits equivalent to social security benefits treated as tier 1 benefits.
Sec. 505. Temporary increase in pension benefit guaranty corporation premiums for single employer plans.

SEC. 501. RESTORATION OF PROPOSED CUTS IN INTERNAL REVENUE SERVICE BUDGET AND FURTHER INCREASES IN FUNDS FOR REVENUE ENFORCEMENT AND RELATED PURPOSES.

It is the sense of the Congress that—

(1) the restoration of the cuts in the budget for the Internal Revenue Service for fiscal year 1986, and

(2) the further increase in such budget total,

recommended by the Committee on Appropriations of the House of Representatives are necessary for the efficient operation of the Government and to carry out the purposes of this Act.

SEC. 502. INCREASE IN RATE OF TAX ON CIGARETTES MADE PERMANENT; PORTION OF CIGARETTE TAX REVENUES DEDICATED TO TOBACCO PRICE SUPPORT PROGRAM.

(a) INCREASE IN TAX MADE PERMANENT.—Subsection (c) of section 283 of the Tax Equity and Fiscal Responsibility Act of 1982 is amended by striking out "and before October 1, 1985".

(b) DEDICATION OF PORTION OF CIGARETTE TAX REVENUES FOR TOBACCO PRICE SUPPORT PROGRAM.—

(1) IN GENERAL.—Subchapter A of chapter 98 of the Internal Revenue Code of 1954 (relating to Trust Fund Code) is amended by adding at the end thereof the following new section:

"SEC. 9505. TOBACCO EQUALIZATION TRUST FUND.

"(a) CREATION OF TRUST FUND.—There is established in the Treasury of the United States a trust fund to be known as the 'Tobacco Equalization Trust Fund', consisting of such amounts as may be appropriated or credited to the Tobacco Equalization Trust Fund as provided in this section or section 9602(b).

"(b) TRANSFERS TO TOBACCO EQUALIZATION TRUST FUND.—There is hereby appropriated to the Tobacco Equalization Trust Fund an amount equal to so much of the taxes received in the Treasury after September 30, 1985, and before October 1, 1990, under section 5701(b) (relating to tax on cigarettes) as is attributable to such tax determined at the rates of—

"(1) 50 cents per thousand in the case of cigarettes taxable under section 5701(b)(1), and

"(2) $1.05 per thousand in the case of cigarettes taxable under section 5701(b)(2).

"(c) EXPENDITURES FROM TRUST FUND.—

"(1) IN GENERAL.—Amounts in the Tobacco Equalization Trust Fund shall be available, as provided in appropriation Acts, for the reimbursement of the Commodity Credit Corporation for part or all of the amount of any net realized losses sustained after September 30, 1985, by such Corporation under section 106, 106A, or 106B of the Agricultural Act of 1949 (or any successor tobacco support provision hereafter enacted) with respect to crop years of tobacco after 1981.

"(2) REPAYMENTS AND CREDITS.—The Secretary shall pay from time to time from the Tobacco Equalization Trust Fund to the general fund of the Treasury amounts equivalent to the same proportion of the credits allowed, and refunds made, after September 30, 1985, and before October 1, 1990, with respect to the tax imposed by section 5701(b) as the portion the tax imposed by section 5701(b) appropriated to the Tobacco Equalization Trust Fund bears to the aggregate tax imposed by section 5701(b)."

(2) CLERICAL AMENDMENT.—The table of sections for such subchapter A is amended by adding at the end thereof the following new item:

"Sec. 9505. Tobacco Equalization Trust Fund."

(3) EFFECTIVE DATE.—The amendments made by this subsection shall take effect on October 1, 1985.

SEC. 503. INCREASE IN EXCISE TAX ON COAL.

(a) INCREASE IN TAX.—Subsections (a) and (b) of section 4121 of the Internal Revenue Code of 1954 (relating to imposition of tax on coal) are amended to read as follows:

"(a) TAX IMPOSED.—

"(1) IN GENERAL.—There is hereby imposed on coal from mines located in the United States sold by the producer a tax equal to the rate per ton determined under subsection (b).

"(2) LIMITATION ON TAX.—The amount of the tax imposed by paragraph (1) with respect to a ton of coal shall not exceed the applicable percentage (determined under subsection (b)) of the price at which such ton of coal is sold by the producer.

"(b) DETERMINATION OF RATES AND LIMITATION ON TAX.—For purposes of subsection (a)—

In the case of sales during calendar year:	The rate for coal from underground mines is:	The rate for coal from surface mines is:	The applicable percentage is:
1986 through 1990	$1.50	$.75	6
1991 through 1995	$1.60	$.80	6.4
After 1995	$1.50	$.75	6."

(b) REDUCTION OF TAX AFTER 1995 IF LOANS MADE TO BLACK LUNG DISABILITY TRUST FUND REPAID.—Section 4121 of such Code is amended by striking out subsection (e) and inserting in lieu thereof the following:

"(e) REDUCTION OF TAX AFTER 1995 IF LOANS MADE TO BLACK LUNG DISABILITY TRUST FUND REPAID.—

"(1) IN GENERAL.—In the case of sales during any calendar year to which this subsection applies, for purposes of subsection (a)—

"(A) the rate of tax on coal from underground mines shall be $1.00,

"(B) the rate of tax on coal from surface mines shall be $.50, and

"(C) the applicable percentage shall be 4 percent.

"(2) CALENDAR YEARS TO WHICH SUBSECTION APPLIES.—This subsection shall apply to any calendar year after 1995 (and all calendar years thereafter) if throughout the 2 most recent fiscal years ending before the beginning of such calendar year there was—

"(A) no balance of repayable advances made to the Black Lung Disability Trust Fund, and

"(B) no unpaid interest on such advances."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to sales after December 31, 1985.

SEC. 504. ONLY RAILROAD RETIREMENT BENEFITS EQUIVALENT TO SOCIAL SECURITY BENEFITS TREATED AS TIER 1 BENEFITS.

(a) IN GENERAL.—Paragraph (4) of section 86(d) of the Internal Revenue Code of 1954 (defining social security benefits) is amended to read as follows:

"(4) TIER 1 RAILROAD RETIREMENT BENEFIT.—For purposes of paragraph (1), the term 'tier 1 railroad retirement benefit' means—

"(A) the amount of the annuity under the Railroad Retirement Act of 1974 equal to the amount of the benefit to which the taxpayer would have been entitled under the Social Security Act if all of the service after December 31, 1936, of the employee (on whose employment record the annuity is being paid) had been included in the term employment as defined in the Social Security Act, and

"(B) a monthly annuity amount under section 3(f)(3) of the Railroad Retirement Act of 1974."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to any monthly benefit for which the generally applicable payment date is after December 31, 1985.

SEC. 505. TEMPORARY INCREASE IN PENSION BENEFIT GUARANTY CORPORATION PREMIUMS FOR SINGLE EMPLOYER PLANS.

(a) IN GENERAL.—Clause (i) of section 4006(a)(3)(A) of the Employee Retirement Income Security Act of 1974 is amended by inserting "($8.00 for plan years beginning after December 31, 1985, and before January 1, 1989)" after "$2.60".

(b) TECHNICAL AMENDMENTS.—

(1) Clause (iii) of section 4006(a)(3)(C) of such Act is amended by striking out "The maximum" and inserting in lieu thereof "In the case of a multiemployer plan, the maximum".

(2) Clause (iv) of section 4006(a)(3)(C) of such Act is amended by striking out "The provisions" and inserting in lieu thereof "In the case of a multiemployer plan, the provisions".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to plan years beginning after December 31, 1985.

TITLE VI—AMENDMENTS RELATING TO SINGLE EMPLOYER PLANS

SEC. 601. EXCISE TAX ON UNPAID LIABILITY TO PENSION PLAN AT PLAN TERMINATION.

(a) IN GENERAL.—Chapter 43 of the Internal Revenue Code of 1954 (relating to qualified pension, etc., plans) is amended by adding at the end thereof the following new section:

"SEC. 4979. TAX ON UNPAID EMPLOYER LIABILITY TO PENSION PLAN AT PLAN TERMINATION.

"(a) INITIAL TAX.—

"(1) IN GENERAL.—In the case of an employer who maintains a plan to which section 4062 of the Employee Retirement Income Security Act of 1974 applies, there is hereby imposed a tax equal to 5 percent of

the portion of any required payment which is not paid on the date such payment is required.

"(2) REQUIRED PAYMENT.—For purposes of this section, the term 'required payment' means, with respect to any date, the portion of the termination liability of the employer which is required to be paid on such date pursuant to section 4062 of the Employee Retirement Income Security Act of 1974 plus interest on such portion at the adjusted rate applicable under section 6621(b).

"(b) ADDITIONAL TAX WHERE LIABILITY REMAINS UNPAID.—

"(1) IN GENERAL.—If any required payment remains unpaid as of the close of the 90-day period beginning on the date such payment is required, the tax imposed by subsection (a) shall be increased by—

"(A) 5 percent of the portion of such payment which is unpaid as of the close of such 90-day period, and

"(B) an additional 5 percent of the portion of such payment which is unpaid as of the close of each 30-day period thereafter.

"(2) LIMITATION ON ADDITIONAL TAX.—The amount of the additional tax imposed by reason of this subsection with respect to any required payment shall not exceed the portion of such payment which is not paid before the close of the 90-day period beginning on the date such payment is required.

"(c) TERMINATION LIABILITY.—For purposes of this section—

"(1) IN GENERAL.—The term 'termination liability' means the excess of—

"(A) the current value of the plan's benefits guaranteed under title VI of the Employee Retirement Income Security Act of 1974 on the date of termination, over

"(B) the current value of the plan's assets allocable to such benefits on the date of termination.

For purposes of subparagraph (B), the current value of the plan's assets shall be determined without regard to any receivable which is attributable to any accumulated funding deficiency.

"(2) LIMITATION ON LIABILITY WHERE EMPLOYER CEASES TO EXIST.—

"(A) IN GENERAL.—In the case of an employer which ceases to exist (and with respect to which no other person is liable under section 4062 of the Employee Retirement Income Security Act of 1974 for the liability under such section of such employer), the excess of—

"(i) the amount of the termination liability under paragraph (1) (determined without regard to this paragraph), over

"(ii) the accumulated funding deficiency (if any) as of the date of termination,

shall not exceed 30 percent of the net worth of the employer.

"(B) DETERMINATION OF NET WORTH.—For purposes of subparagraph (A), the determination of the net worth of the employer shall be made—

"(i) as of a day, chosen by the Pension Benefit Guaranty Corporation but not more than 120 days before the date of termination, and

"(ii) without regard to any liability under section 4062 of the Employee Retirement Income Security Act of 1974.

"(3) RULES RELATING TO ACCUMULATED FUNDING DEFICIENCY.—For purposes of this subsection—

"(A) WAIVED FUNDING DEFICIENCY INCLUDED IN ACCUMULATED FUNDING DEFICIENCY.—The accumulated funding deficiency of an employer shall include the amount of any waived funding deficiency (as defined in section 412(d)(3)) of such employer.

"(B) ACCUMULATED FUNDING DEFICIENCY.—The term 'accumulated funding deficiency' has the meaning given such term by the last 2 sentences of section 412(a).

"(4) COORDINATION WITH DETERMINATION OF LIABILITY UNDER SECTION 4062 OF ERISA.—Subtitle D of title IV of the Employee Retirement Income Security Act of 1974 shall apply for purposes of determining termination liability under this subsection.

"(d) CREDIT AGAINST ADDITIONAL TAX.—There shall be allowed as a credit against the tax imposed by this section with respect to any termination liability an amount equal to the lesser of—

"(1) the amount paid, not later than 2 years after the date of final determination, to the Pension Benefit Guaranty Corporation with respect to such liability, or

"(2) the amount of the tax imposed by reason of subsection (b).

"(e) SPECIAL RULES.—For purposes of this section—

"(1) LIABILITY ONLY AFTER FINAL DETERMINATION.—The tax imposed by this section shall apply to any termination liability only after a final determination of the amount of such liability.

"(2) LIABILITY OF CONTROLLED GROUP.—

"(A) IN GENERAL.—Any liability under this section of any member of a controlled group shall be a joint and several liability of all members of such group.

"(B) CONTROLLED GROUP.—For purposes of subparagraph (A), the term 'controlled group' means all persons who are treated as a single employer under subsection (b), (c), (m), or (o) of section 414.

"(3) TITLE 11 AND SIMILAR CASES.—In the case of an employer which is in a title 11 or similar case (as defined in section 368(a)(3)(A))—

"(A) the date such case begins shall be treated as the date of the final determination, and

"(B) the period of the pendency of such case shall be substituted for the 2-year period described in subsection (d)(1).

"(4) REFERENCES TO ERISA.—For purposes of this section—

"(A) except as provided in subparagraph (B), any reference to a provision of the Employee Retirement Income Security Act of 1974 shall be treated as a reference to such provision as in effect on the date of the enactment of this section, and

"(B) for purposes of subsection (a), section 4062 of such Act shall be treated as applying to a plan if such section would have applied to such plan as such section was in effect on such date of enactment."

(b) LIABILITY UNDER SECTION 4062 OF ERISA TO BE JOINT AND SEVERAL AMONG MEMBERS OF CONTROLLED GROUP.—

(1) IN GENERAL.—Section 4062 of the Employee Retirement Income Security Act of 1974 (relating to liability of employer) is amended by adding at the end thereof the following new subsection:

"(f)(1) Any liability under subsection (a) of any member of a controlled group shall be a joint and several liability of all members of such group.

"(2) For purposes of paragraph (1), the term 'controlled group' means all persons who are treated as a single employer under subsection (b), (c), (m), or (o) of section 414 of the Internal Revenue Code of 1954."

(2) TECHNICAL AMENDMENT.—Paragraph (2) of section 404(g) of the Internal Revenue Code of 1954 (relating to certain employer liability payments considered as contributions) is amended by striking out "subsection (b) or (c)" and inserting in lieu thereof "subsection (b), (c), (m), or (o)".

(c) NET WORTH LIMITATION ON LIABILITY OF EMPLOYER TO APPLY ONLY WHERE EMPLOYER GOES OUT OF BUSINESS.—Subsection (b) of section 4062 of the Employee Retirement Income Security Act of 1974 is amended to read as follows:

"(b)(1) Any employer to which this section applies shall be liable to the corporation in an amount equal to the excess of—

"(A) the current value of the plan's benefits guaranteed under this title on the date of termination, over

"(B) the current value of the plan's assets allocable to such benefits on the date of termination.

For purposes of subparagraph (B), the current value of the plan's assets shall be determined without regard to any receivable which is attributable to any accumulated funding deficiency.

"(2)(A) In the case of an employer which ceases to exist (and with respect to whose liability under this section no other person is liable), the excess of—

"(i) the amount of the liability under paragraph (1) (determined without regard to this paragraph), over

"(ii) the accumulated funding deficiency (if any) as of the date of termination,

shall not exceed 30 percent of the net worth of the employer.

"(B) For purposes of subparagraph (A), the determination of the net worth of the employer shall be made—

"(i) as of a day, chosen by the corporation but not more than 120 days before the date of termination, and

"(ii) without regard to any liability under this section.

"(3) For purposes of this subsection—

"(A) the accumulated funding deficiency of an employer shall include the amount of any waived funding deficiency (as defined in section 412(d)(3) of the Internal Revenue Code of 1954) of such employer, and

"(B) the term 'accumulated funding deficiency' has the meaning given such term by the last 2 sentences of section 412(a) of such Code."

(d) PBGC MUST OFFER OPTIONS TO PAY LIABILITY OVER 5 AND 15 YEARS.—Section 4067 of the Employee Retirement Income Security Act of 1974 is amended—

(1) by inserting "(a)" before "The corporation", and

(2) by adding at the end thereof the following:

"(b) Among the options offered by the corporation shall be—

"(1) a 5-year amortization of the liability, and

"(2) a 15-year amortization of the liability.

If the employer has not ceased business and if the corporation deems that to do so will not jeopardize the collection of the liability, no security shall be required in the case of the 5-year amortization of the liability.

"(c) In any deferred payment arrangement under this section, interest from the date of termination shall be charged at the adjusted rate applicable under section 6621(b) of the Internal Revenue Code of 1954."

(e) DEDUCTION FOR EMPLOYER LIABILITY PAYMENTS TO PBGC.—Subsection (g) of section 404 of the Internal Revenue Code of 1954 (relating to certain employer liability payments considered as contributions) is amended by inserting "(as such sections and part were in effect on the date of the enactment of this parenthetical material)" after "1974".

(f) CLERICAL AMENDMENT.—The table of sections for chapter 43 of such Code is amended by adding at the end thereof the following new item:

"Sec. 4979. Tax on unpaid employer liability to pension plan at plan termination.

(g) EFFECTIVE DATES.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall apply to terminations with respect to which notification is filed with the Pension Benefit Guaranty Corporation after the date of the enactment of this Act.

(2) DEDUCTION FOR EMPLOYER PAYMENTS.—The amendment made by subsection (e) shall apply to taxable years ending after the date of the enactment of this Act.

SEC. 602. SECURITY FOR WAIVERS OF MINIMUM FUNDING STANDARD AND EXTENSIONS OF AMORTIZATION PERIOD.

(a) AMENDMENTS TO THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974.—

(1) IN GENERAL.—Part 3 of subtitle B of title I of the Employee Retirement Income Security Act of 1974 is amended—

(A) by redesignating section 306 (29 U.S.C. 1086) as section 307; and

(B) by inserting after section 305 (29 U.S.C. 1085) the following new section:

"SECURITY FOR WAIVERS OF MINIMUM FUNDING STANDARD AND EXTENSIONS OF AMORTIZATION PERIOD

"SEC. 306. (a) IN GENERAL.—Except as provided in subsection (c), the Secretary of the Treasury may require security to a single-employer plan as a condition for granting or modifying a waiver of the minimum funding standard with respect to such plan under section 303 of this Act or section 412(d) of the Internal Revenue Code of 1954 or an extension of an amortization period with respect to such plan under section 304 of this Act or section 412(e) of such Code. The providing of such security to the plan in accordance with this section shall not be considered an extension of credit for purposes of part 4 of this subtitle or section 4975 of such Code. Such security may be perfected and enforced only by the Pension Benefit Guaranty Corporation or by the employer acting at the direction of the Corporation.

"(b) CONSULTATION WITH THE PENSION BENEFIT GUARANTY CORPORATION.—Except as provided in subsection (c), before granting or modifying a waiver of the minimum funding standard with respect to a single-employer plan under section 303 of this Act or section 412(d) of the Internal Revenue Code of 1954 or an extension of the amortization period with respect to such plan under section 304 of this Act or section 412(e) of such Code, the Secretary of the Treasury shall provide the Pension Benefit Guaranty Corporation notice of the proposed waiver, modification, or extension and 15 days to comment with respect to such waiver, modification, or extension and shall consider any comments of such Corporation relating to such waiver, modification, or extension which are provided to such Secretary during such period.

"(c) EXCEPTION.—The requirements of subsections (a) and (b) shall not apply in the case of any waiver, modification, or extension referred to in such subsections with respect to a plan if the sum of—

"(1) the outstanding balance of the accumulated funding deficiencies (within the meaning of section 302(a)(2) of this Act and section 412(a) of the Internal Revenue Code of 1954) of the plan (which, for purposes of this paragraph, shall include the amount of any increase in such accumulated funding deficiencies of the plan which would result if all applications for waivers and modifications of the minimum funding standard under section 303 of this Act or 412(d) of such Code and for extensions of the amortization period under such section 304 of this Act or 412(e) of such Code which are pending with respect to such plan were denied),

"(2) the outstanding balance of the amount of waived funding deficiencies of the plan waived under section 303 of this Act or section 412(d) of such Code, and

"(3) the outstanding balance of the amount of decreases in the minimum funding standard allowed under section 304 of this Act or section 412(e) of such Code,

is less than $1,000,000."

(2) CLERICAL AMENDMENT.—The table of sections in section 1 of such Act is amended by striking out the item relating to section 306 and inserting in lieu thereof the following new items:

"Sec. 306. Security for waivers of minimum funding standard and extensions of amortization period.

"Sec. 307. Effective dates."

(b) AMENDMENTS TO THE INTERNAL REVENUE CODE OF 1054.—Subsection (f) of section 412 of the Internal Revenue Code of 1954 (relating to requirement that benefits may not be increased during waiver or extension period) is amended—

(1) by striking out "BENEFITS MAY NOT BE INCREASED DURING WAIVER OR EXTENSION PERIOD.—" and inserting in lieu thereof "REQUIREMENTS RELATING TO WAIVERS AND EXTENSIONS.—";

(2) in paragraph (1), by striking out "IN GENERAL.—" and inserting in lieu thereof "BENEFITS MAY NOT BE INCREASED DURING WAIVER OR EXTENSION PERIOD.—"; and

(3) by adding at the end thereof the following new paragraph:

"(3) SECURITY FOR WAIVERS AND EXTENSIONS.—

"(A) IN GENERAL.—Except as provided in subparagraph (C), the Secretary may require security to a single-employer plan as a condition for granting or modifying a waiver of the minimum funding standard with respect to such plan under subsection (d) or an extension of an amortization period with respect to such plan under subsection (e). The providing of such security to the plan in accordance with this paragraph shall not be considered an extension of credit for purposes of section 4975 or part 4 of subtitle B of title I of the Employee Retirement Income Security Act of 1974. Such security may be perfected and enforced only by the Pension Benefit Guaranty Corporation or by the employer acting at the direction of the Corporation.

"(B) CONSULTATION WITH THE PENSION BENEFIT GUARANTY CORPORATION.—Except as provided in subparagraph (C), before granting or modifying a waiver of the minimum funding standard with respect to a single-employer plan under subsection (d) or an extension of the amortization period with respect to such plan under subsection (e), the Secretary shall provide the Pension Benefit Guaranty Corporation notice of the proposed waiver, modification, or extension and 15 days to comment with respect to such waiver, modification, or extension and shall consider any comments of such Corporation relating to such waiver, modification, or extension which are provided to the Secretary during such period.

"(C) EXCEPTION.—The requirements of subparagraphs (A) and (B) shall not apply in the case of any waiver, modification, or extension referred to in such subparagraphs with respect to a plan if the sum of—

"(i) the outstanding balance of the accumulated funding deficiencies (within the meaning of subsection (a)) of the plan (which, for purposes of this clause, shall include the amount of any increase in such accumulated funding deficiencies of the plan which would result if all applications for waivers and modifications of the minimum funding standard under subsection (d) and for extensions of the amortization period under subsection (e) which are pending with respect to such plan were denied),

"(ii) the outstanding balance of the amount of waived funding deficiencies of the plan waived under subsection (d), and

"(iii) the outstanding balance of the amount of decreases in the minimum funding standard allowed under subsection (e),

is less than $1,000,000."

(c) EFFECTIVE DATES.—The amendments made by this section shall apply with respect to applications filed after the date of the enactment of this Act.

SEC. 603. TREATMENT OF TRANSACTIONS TO EVADE LIABILITY.

"(a) IN GENERAL.—Subtitle D of title IV of the Employee Retirement Income Security Act of 1974 is amended by adding at the end thereof the following new section:

"TREATMENT OF TRANSACTIONS TO EVADE LIABILITY

"SEC. 4069. If, within 10 years before the date of termination, a person undertakes a transaction a principal purpose of which is to fraudulently evade any liability to the corporation, such transaction shall not be treated as transferring such liability (or any portion therefo) away from such person or any member of a controlled group which included such person.".

"(b) CLERICAL AMENDMENT.—The table of sections in section 1 of such Act is amended by adding after the item relating to section 4068 the following new item:

"Sec. 4069. Treatment of transactions to evade liability.

"(c) EFFECTIVE DATE.—The amendments made by this section shall apply to transactions after the date of the enactment of this Act.

SEC. 604. STUDY OF RISK RELATED PREMIUM.

The Secretary of the Treasury shall conduct a study on the feasibility of imposing a risk related premium under title IV of the Employee Retirement Income Security Act of 1974 which is based on the different risk exposures imposed on the Pension Benefit Guaranty Corporation by employers with different histories and in different circumstances. The results of such study shall be submitted, not later than 2 years after the date of the enactment of this Act, to the Committee on Ways and Means and the Committee on Education and Labor of the House of Representatives and the Committees on Finance and Labor and Human Resources of the Senate.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore [Mr. LEVIN of Michigan], having assumed the chair, Mr. BARNARD, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3128), to make changes in spending and revenue

provisions for purposes of deficit reduction and program improvement, consistent with the budget process, pursuant to House Resolution 301, he reported the bill back to the House with sundry amendments considered to have been adopted under the rule.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

The three amendments made in order by House Resolution 301 are considered as having been adopted under the rule.

The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. GRADISON

Mr. GRADISON. Mr. Speaker, I offer a motion to recommit with instructions.

The SPEAKER pro tempore. Is the gentleman opposed to the bill?

Mr. GRADISON. In its present form, I am, Mr. Speaker.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. GRADISON of Ohio moves to recommit the bill, H.R. 3128 to the Committee on Ways and Means with instructions to report it back forthwith with the following amendment:

In title I (text of H.R. 3290 as made in order under the rule), strike out section 122 (limiting the penalty for late enrollment in part A), section 145 (relating to occupational therapy services), section 149 (relating to demonstration of preventive health services under medicare), section 155 (relating to vision care), section 157 (relating to changing medicare appeals rights), section 161 (relating to services for pregnant women), and section 168 (relating to extension of MMIS deadline); and redesignate the remaining sections accordingly (with conforming changes in the table of contents).

Strike out title III (relating to aid to families with dependent children); and redesignate the succeeding titles and sections accordingly.

Mr. GRADISON (during the reading). Mr. Speaker, I ask unanimous consent that the motion to recommit be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Ohio for 5 minutes in support of his motion to recommit.

Mr. GRADISON. Mr. Speaker, I will not take the full customary 5 minutes. The matter which is included in the motion has been debated at length during the discussion of the rule itself as well as during the discussion which has occurred on this measure.

Basically, what this would do is to strike from the bill all of the new spending proposals. It would not touch any other item. For example, trade adjustment assistance, which has been mentioned earlier by the gentleman from Ohio [Mr. PEASE], which is a program now on the books, would be continued; it would not in any way be modified by the approval of this motion to recommit.

There are, Mr. Speaker, 10 new programs included in the bill before us which, in aggregate, according to the Congressional Budget Office, would increase Federal spending by $954 million, almost $1 billion over the next 3 years.

The Office of Management and Budget, calculating the cost over the same 3-year period for the same package, estimates the cost at almost $2.5 billion over that period.

Mr. Speaker, the purpose of this amendment is not to deny the House an opportunity to consider these proposals, it is to remove these new spending proposals from this specific measure so that they can be considered separately, as they should.

There were efforts made, which failed, by a very small vote earlier in the day to make in order this motion to strike.

The objective was to require the House, which has plenty of time with the pace at which we have been operating, to take up these increased spending measures under normal procedure rather than burying them in what, on the surface, is said to be a package of deficit reduction amendments.

Mr. Speaker, I hope the motion to recommit is approved. If it is, it will indicate that the will of the House is not just to talk about cutting spending but to do something about it.

This amendment will save at least $1 billion over the next 3 years. That, alone, is reason to support it.

□ 1500

The SPEAKER pro tempore. The gentleman from California [Mr. STARK] is recognized for 5 minutes in opposition to the motion to recommit.

Mr. STARK. Mr. Speaker, I rise in opposition to the motion to recommit with instructions and urge my colleagues to support the bill as it was reported from the Ways and Means Committee and the Energy and Commerce Committee.

This bill was carefully crafted to provide a balance of services and humanitarian care to those people that the President had agreed he wanted to protect in his safety net. And at this hour to come and suggest that we should take vision care out of the bill and to have this suggestion come from an administration which I have often suggested has no vision, for if it did, it would understand that the preventive medicine demonstration for a mere $3 million in this bill was designed to create a demonstration in five States that would show how we could save money in Medicare by providing preventive medicine to our senior citizens.

If you want to close your eyes and not understand the value of forward-thinking programs, you might care to restrict children and the elderly from getting quicker hearings, from getting better service for teenage pregnancies so that we do not have more costs in the outyears. Lack of prenatal care will triple and quadruple the costs of pediatric care for a child who may be maimed as a result.

Occupational therapy, providing that for the people who are disabled will put them back into the work force more quickly and make taxpaying citizens of them.

This bill saves money in every facet. To suggest that a few new programs should be cut I suggest is coming in at the 11th hour, nitpicking and nitpicking in the area of denying services. It is a nasty trick, at the 11th hour on Halloween.

I urge my colleagues to support the bill which is the first bill which has come out to meet the budget requirements, to do it on a bipartisan basis, to cut here and add back there where we have found in our bipartisan judgment we could best serve the Nation.

I urge that you defeat the motion to recommit.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. MADIGAN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 183, nays 238, not voting 13, as follows:

Messrs. JONES of North Carolina, KLECZKA, and RODINO changed their votes from "yea" to "nay."

Messrs. RAY, HUNTER, and STANGELAND changed their votes from "nay" to "yea."

So the motion to recommit was rejected.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. MADIGAN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 245, nays 174, not voting 15, as follows:

□ 1535

The Clerk announced the following pairs:

On this vote:

Mr. Nelson of Florida for, with Mr. O'Brien against.

Mr. LaFalce for, with Mr. Denny Smith against.

Mr. Tauzin for, with Mr. McCollum against.

Mr. Wheat for, with Mr. Parris against.

Mr. RALPH M. HALL changed his vote from "yea" to "nay."

Mr. BUSTAMANTE changed his vote from "nay" to "yea."

Ms. KAPTUR changed her vote from "present" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

APPOINTMENT OF CONFEREES ON S. 1078, FEDERAL TRADE COMMISSION ACT AMENDMENTS OF 1985

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1078) to amend the Federal Trade Commission Act to provide authorization of appropriations, and for other purposes, with House amendments thereto, insist on the House amendments, and agree to the conference asked by the Senate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California? The Chair hears none and, without objection, appoints the following conferees:

For the entire bill: Mr. DINGELL, Mr. FLORIO, Mrs. MIKULSKI, Mr. BROYHILL, and Mr. LENT;

For sections 16 (b), (c), and (d) and 17 only (legislative veto of rules of the Consumer Product Safety Commission and enforcement thereof): Mr. WAXMAN and Mr. MADIGAN; and

For sections 16 and 17 only (legislative veto: amendment to Rules of the House—enforcement of congressional review of rules): Messrs. MOAKLEY, FROST, and LOTT.

There was no objection.

LEGISLATIVE PROGRAM

(Mr. LOTT asked and was given permission to address the House for 1 minute.)

Mr. LOTT. Mr. Speaker, I have asked permission to address the House for the purpose of advising the Members of what the schedule will be for the balance of the day and tomorrow.

Mr. Speaker, I am glad to yield to the distinguished majority leader so we could get that information.

Mr. WRIGHT. Well, I thank the gentleman for yielding.

Aside from some bills to be considered under unanimous-consent requests, this would conclude the legislative business for today.

At 4 o'clock, the conferees on the debt extension bill are to resume their conference, and while I cannot with any accuracy forecast the outcome, I am going to ask unanimous consent at the conclusion of our colloquy that it be in order on tomorrow for us to consider a conference committee report, if they are able to agree on a conference committee report, or in the absence, any Senate amendments reported from conference in disagreement on the joint resolution, so that we will not have to sit around here for another day awaiting rules and if that request then is agreed to, since there is no legislative schedule for tomorrow except for the consideration of this debt extension bill, I will ask unanimous consent that when we adjourn, we adjourn to meet at 11 o'clock tomorrow. I surly do hope that we will be able to conclude our work on this matter tomorrow.

It is conceivable that it may become necessary to vote a very short simple extension so as to permit the House and the Senate conferees and the staff to complete their work, but we will face that tomorrow, if necessary.

Mr. LOTT. Well, if I could reclaim my time, as I understand it, the gentleman is going to ask unanimous consent to go over until 11 o'clock tomorrow. So the Members on our side will be aware, that has been discussed with our leader and he has agreed to that. The reason for 11 o'clock instead of 10 is simply because there is some technical staff work that has to go into being prepared to have anything considered tomorrow.

I also understand the gentleman may have an additional unanimous-consent request that he will ask for; is that correct?

Mr. WRIGHT. Yes. I will ask unanimous consent that it will be in order tomorrow or any day thereafter to consider the conference report on the joint resolution on the debt ceiling and any Senate amendments thereto.

Mr. LOTT. That would just be waiving the 3-day rule so that we could take it up and consider whether it is in agreement or disagreement; is that correct?

Mr. WRIGHT. Precisely so, paving the way in order that we may be able under the rules to take it up tomorrow and act on it, whatever the actions of the conferees.

Mr. LOTT. The gentleman is not addressing in any way at this time recess authority for the Chair; is that correct?

Mr. WRIGHT. I do not intend to ask that this evening. If it should appear to us tomorrow that it is necessary for us to wait around for some period of time, I think at that time we would want to get recess authority so that we would not be stuck here on the floor without any business; but we will just wait and see how that comes out. To paraphrase the immortal Scarlet O'Hara, "We will worry about that tomorrow."

Mr. LOTT. That is right. I will be glad to yield in a moment, but let me make sure the Members understand. The likelihood now is that we would have at least one and as many as three votes tomorrow. There could be one on the Journal. There could be one or two on packages in agreement or disagreement on the conference.

Mr. WRIGHT. That is exactly right. If there were things in agreement, we could vote on those. Someone might demand a rollcall vote.

If they came in disagreement, there might be a motion to recede and concur in the Senate amendments. That would be a separable motion. We might say that we would vote on receding and then a second motion to concur in the Senate amendments could be subject itself to an amendment which would have to be voted upon before that motion itself was voted upon; so there could be a number of votes tomorrow. Members should be advised that they could be of some significance.

Mr. LOTT. If we should be in agreement, the Senate would have to act first and that would involve some time of waiting; so I do not think we can tell the Members exactly when or how many or on what we might be voting tomorrow, but it appears now that we will have those votes tomorrow, two or three or more; is that correct?

Mr. WRIGHT. The gentleman has stated it with as much precision as I think it can be done.

Mr. LOTT. That is subject to change in the next 15 minutes, so do not get locked in on that.

Mr. CONYERS. Mr. Speaker, will the gentleman from Mississippi yield?

Mr. LOTT. I would like to ask some more questions of the majority leader, but I will yield to the gentleman from Michigan.

Mr. CONYERS. Mr. Speaker, I thank the gentleman from Mississippi for yielding, because I would like to ask the majority leader if there is that possibility that there may be a short statutory limitation increase of the public debt, would it not be more feasible for us to entertain that motion here this evening, release the Members for Friday and whatever other time until the conferees can work their will and that we can more carefully move about the disposition of the very important business that is in the conference? I hope the majority leader can respond to that, so that we can move on that expeditiously now instead of tomorrow or possibly even Saturday.

Mr. WRIGHT. Well, I would just say to my friend, the gentleman from Michigan, that it would please me, suit me fine; but normally we would await the report of our appropriate committee, the Committee on Ways and Means to bring us such a piece of legislation.

In any event, were it to come today or tomorrow, it will have to come on a unanimous consent request for the immediate consideration of that piece of legislation.

I find it hard to conceive of any Member objecting if we got to the point where it was necessary to avoid the disinvestment of the Social Security trust funds.

Mr. LOTT. If I could continue now, I have also been asked about Saturday. I do not think we know. We hope this thing is going to come to a head tomorrow and be resolved one way or the other, facing the realization that we cannot resolve it tomorrow; but Saturday I guess is a possibility, but we do not know; is that correct, may I ask the majority leader?

Mr. WRIGHT. I should not want to give any assurances with regard to Saturday. It is a possibility that we will have a session on Saturday. We would hope to avoid that. There are ways by which we could avoid it, but those ways would require unanimous consent and there may be some Member who is just itching to be in session on Saturday and would object to the unanimous consent request. I hope not.

We would try to conclude the business for the week tomorrow and will do so if it is possible to do so.

Mr. LOTT. Is the gentleman prepared to give us the schedule as he sees it at this time for next week, or does the gentleman want to wait until tomorrow on that?

Mr. WRIGHT. I had a very clearcut schedule this morning at 9 o'clock which I reported to the Democratic whips. I think the gentleman and his colleagues on his side of the aisle should be pleased that they were not at that meeting, because what I reported to the Democratic whips this morning is wildly awry. It no longer holds. It has been overtaken by numerous events and I have no schedule at this time.

Mr. LOTT. All right, one further point. It is still anticipated, I assume, that we would not be in session unless there should be some involvement with the debt ceiling on Monday or that there would be any votes between 2 o'clock on Tuesday, and that only if the suspensions had been demanded on Monday; but since that is an election day, that is still the intent of the leadership at this time; is that correct?

Mr. WRIGHT. It is the intent of the leadership at this time that we would have no votes on Monday, and if anything were considered that was in the nature of a suspension, there would be no votes on suspensions on Tuesday before 2 o'clock or any other votes on matters of substance prior to 2 o'clock on Tuesday.

Mr. LOTT. Mr. Speaker, I thank the majority leader.

MAKING IN ORDER TOMORROW OR ANY DAY THEREAFTER CONSIDERATION OF CONFERENCE REPORT AND SENATE AMENDMENTS IN DISAGREEMENT OF HOUSE JOINT RESOLUTION 372, PUBLIC DEBT LIMIT INCREASE

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that it be in order on tomorrow or any day thereafter to consider a conference report and any Senate amendments reported from conference in disagreement on the joint resolution, House Joint Resolution. 372

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

□ 1550

HOUR OF MEETING ON TOMORROW

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it shall adjourn to meet at 11 a.m. tomorrow

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

REQUEST FOR CONSIDERATION OF H.R. 3658, TEMPORARY DEBT LIMIT INCREASE

Mr. CONYERS. Mr. Speaker, I ask unanimous consent to report a bill to the floor, namely H.R. 3658, and that it be immediately taken into consideration.

PARLIAMENTARY INQUIRY

Mr. LOTT. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. LOTT. Has this matter been cleared with the membership of the Committee on the Judiciary from this side of the aisle?

Mr. CONYERS. No, it has not. If the gentleman will let me report it, I will explain it to him.

The SPEAKER pro tempore. The Chair will explain to the gentleman that he may proceed for 1 minute to explain the matter. He may not call it up.

Mr. CONYERS. I have asked unanimous consent that the bill, H.R. 3658, be immediately considered, Mr. Speaker.

The SPEAKER pro tempore. The Chair would state to the distinguished gentleman from Michigan that under the rules and policies of the House, the Chair cannot recognize the gentleman for that purpose unless he has cleared his unanimous-consent request with the opposite side.

H.R. 3658—TEMPORARY DEBT LIMIT INCREASE

(Mr. CONYERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONYERS. Mr. Speaker and my colleagues, if I may gain your attention for a moment, I have a bill, H.R. 3658, that will accomplish precisely what has been the subject of the colloquy between the gentleman from Mississippi and the distinguished majority leader. If passed, it would increase the statutory limit on the public debt and give us until November 14 to proceed with this matter. It would have the following salutary consequences:

No. 1, we would not have to be here Friday and hope that we are not here until Saturday.

No. 2, it would prevent the Secretary of the Treasury from having to cancel securities held by the Social Security and other retirement trust funds in order to free up additional credit.

No. 3, it would assist a number of Members who might be involved in the elections that are taking place on Tuesday of next week.

I would ask that my colleagues and the leadership on both sides of the aisle consider this. What the bill does specifically is amend subsection (b) of section 3101 of title 31 by striking out "$1,575,700,000,000, or $1,823,-800,000,000 on and after October 1, 1984," and inserting in lieu thereof "$1,841,800,000,000". This will increase the debt limit by $18 billion, enabling the Government to borrow enough

funds to continue functioning until November 15. This would allow the conferees to complete their work in a careful, responsible, and not a hurried manner.

I would respectfully request that the leadership agree to place H.R. 3658 before the House for consideration today. It would relieve this body of a great deal of disturbance.

20TH ANNIVERSARY OF HIGHER EDUCATION ACT OF 1965

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the concurrent resolution (H. Con. Res. 207) to recognize the 20th anniversary of the Higher Education Act of 1965 and reaffirm its purpose, and ask for its immediate consideration.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

Mr. COLEMAN of Missouri. Mr. Speaker, reserving the right to object, I do so to allow the gentleman from Michigan to explain the purpose of this resolution.

Mr. FORD of Michigan. Mr. Speaker, if the gentleman will yield, the Higher Education Act of 1965 was signed into law on November 8, 1965, by President Lyndon Baines Johnson on the campus of Southwest Texas State College—now Southwest Texas State University—his alma mater.

Over the 20-year history, this landmark legislation has contributed significantly to the development of the Nation by increasing its investment in human capital, thereby fostering economic growth, enriching civic and cultural life, and strengthening the national security.

The act has been instrumental in moving nearer to the goal of providing an opportunity for a postsecondary education for all qualified students through its grant, loan, work-study, and student service programs.

The act has improved the quality of education through support to college libraries, construction of academic facilities, graduate study fellowships, developing institutions, foreign language and area studies, and other institutional programs which advance national priorities such as cooperative education and continuing education for adult learners.

Periodically the act has been amended with broad bipartisan support, including major expansion of Federal student assistance programs in 1972, extension of eligibility to students from middle-income families in 1978 and revision of the act in 1980.

While reauthorizing the act, the Subcommittee on Postsecondary Education, which I am privileged to chair, is now examining the unfinished agenda of American higher education: reaching the significant number of youths who still do not reach their full potential, providing new opportunities for adult learners to remain creative and productive, improving the training of teachers, renovating campuses, and sustaining graduate education and scholarship.

Southwest Texas State University will observe the 20th anniversary of the signing of the Higher Education Act on November 8, 1985, with special ceremonies on the campus. In conjunction, my Subcommittee on Postsecondary Education will hold a hearing on the reauthorization of the Higher Education Act at Southwest Texas State University on November 8.

The Committee on Education and Labor ordered reported this resolution on October 23 with no objection. It is cosponsored by 72 Members of Congress. I urge my colleagues to support this resolution recognizing the act and its important role in the Nation's development and the historic partnership between the Federal Government, and the college, and universities in the development of human resources required for an increasingly complex and technological society be reaffirmed.

Mr. COLEMAN of Missouri. I thank the gentleman for his comments.

Mr. Speaker, without the provisions of the Higher Education Act, which this resolution commemorates, there are many young people and adults who would have been otherwise unable to participate in and benefit from postsecondary education programs over the past 20 years. Higher education enrollment has increased rapidly from the mid-1960's, when the Higher Education Act was first enacted, and has grown to approximately 12.2 million students today.

The major thrust of this resolution reaffirms the historic partnership established between the Federal Government and the colleges and universities of this country 20 years ago. A recent Gallup survey indicates that over the passed 10 years, the importance of a college education has almost doubled, to a point where now 64 percent believe that a college education is very important.

There are over 3,200 higher education institutions in the Nation, 1,500 of which are public institutions. These public institutions comprise about 46 percent of the total, and enroll over 75 percent of the students. For the 1984-85 school year, the National Center for Education Statistics estimated that expenditures from all sources for higher education will be over $95 billion. Of the revenues received by all institutions in 1981-82, about 13 percent came from Federal sources.

It is fitting that at this time when we are commemorating the 20th anniversary of the Higher Education Act, the Education and Labor Committee is again engaged in its reauthorization. I hope that as in the past, we can continue the bipartisan support we have had for these programs. I am confident that we will be able to draft legislation that supports the goals established in the original law, but which also reflects our needs as we move into the 21st century.

Mr. Speaker, I withdraw my reservation of objection.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 207

Whereas the Higher Education Act of 1965 was signed into law on November 8, 1965, by President Lyndon Baines Johnson on the campus of Southwest Texas State University, his alma mater;

Whereas over its twenty-year history this landmark legislation has contributed significantly to the development of the Nation by increasing its investment in human capital, thereby fostering economic growth, enriching civic and cultural life, and strengthening the national security;

Whereas the Act has brought closer to fulfillment the goal of providing an opportunity for postsecondary education for all qualified students through grants, loans, work-study and student service programs;

Whereas the Act has improved the quality of education through support to college libraries, construction of academic facilities, graduate study fellowships, developing institutions, foreign language and area studies improvements, and other institutional programs which advance national priorities such as cooperative education and continuing education for adult learners;

Whereas the Act has been periodically amended with broad bipartisan support, including major expansion of Federal student assistance programs in 1972, extension of eligibility to students from middle-income families in 1978 and revision of the Act in 1980:

Whereas in considering the reauthorization of the Act, Congress is now examining the unfinished agenda of American higher education: reaching the significant number of youths who still do not reach their full potential, providing new opportunities for adult learners to remain creative and productive, improving the training of teachers, renovating campuses, and sustaining graduate education and scholarship;

Whereas Southwest Texas State University will observe the twentieth anniversary of the signing of the Higher Education Act on November 8, 1985, with special ceremonies on the campus;

Whereas the House Postsecondary Education Subcommittee will hold a hearing on the reauthorization of the Higher Education Act at Southwest Texas State University on November 8, 1985: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That the Congress—

(1) recognizes the twentieth anniversary of the Higher Education Act of 1965 and the important role that legislation has played in the Nation's development; and

(2) reaffirms the historic partnership between the Federal Government and the colleges and universities toward the development of human resources required for an in-

creasingly complex and technological society.

Mr. FORD of Michigan. Mr. Speaker, I submit for printing in the CONGRESSIONAL RECORD the cost estimate of the Congressional Budget Office, which was not received at the time of filing of the committee report. CBO indicates that there are no costs associated with the resolution.

The letter from the Congressional Budget Office is as follows:

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, October 29, 1985.

Hon. AUGUSTUS F. HAWKINS,
Committee on Education and Labor, U.S. House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: The Congressional Budget Office has examined the federal cost impact of H. Con. Res. 207 as ordered reported from the House Education and Labor Committee on October 23, 1985. This resolution commemorates November 8, 1985 as the twentieth anniversary of the Higher Education Act of 1965. Based on our analysis, this bill would not affect budgets of federal, state, or local governments.

The purpose of H. Con. Res. 207 is to recognize the twentieth anniversary of the Higher Education Act of 1965 and to express the sense of Congress that the program has played an important role in the Nation's development. H. Con. Res. 207 reaffirms Congressional support for the partnership between the federal government and the colleges and universities to develop the human resources needed for society.

Please call me if you have any questions or have your staff contact Bernadette Costello or Deborah Kalcevic (226-2820).

With best wishes,
Sincerely,

ERIC HANUSHEK,
(for Rudolph G. Penner).

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and include extraneous matter, on the House Concurrent Resolution 207 the concurrent resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

QUALITY OF LIFE IN AMERICA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida [Mr. IRELAND] is recognized for 5 minutes.

Mr. IRELAND. Mr. Speaker, we hear a lot of talk these days about the rising costs of medical care—exorbitant doctors' bills, expensive new equipment for hospitals, higher prices for precription drugs. It is not news that medical costs are indeed on the rise, and I'm sure everyone agrees that we need to take action to curb the escalating costs of health care in this country. But before we get caught up in a fear of "health inflation", we must take a moment to look at the other side of the story.

Let's talk for a moment about quality of like in America.

It is true that, as a percentage of gross national product, we are spending more and more on health care every year. This does represent a trend of escalating costs, however, it also reflects our priorities as a country. We believe in the need for quality and innovative health care and we have the ability to make great contributions in this field. America boasts the finest medical system in the world. We provide quality health care and are at the forefront of medical education and research. These benefits must not go unrecognized.

Our quality of living reflects this medical progress. Americans are living longer and are enjoying better health than ever before. At the turn of the century, average life expectancy in America was only 47. Today, the average American can expect to live almost twice as long.

We not only have a steadily increasing life expectancy but a decreasing infant mortality rate as well. New technologies—while costly—have made this possible. Everywhere you look today you can see examples of American research and development in medical science—laser surgery, sonar technology, artificial hearts, cat scans. We are even making great headway in finding a cure for the common cold—opening the door to major breakthroughs in the study of viruses and other infectious diseases.

These benefits affect every facet of our society. Today's senior citizen, for example, is living longer, retiring earlier and enjoys a higher standard of living than ever before in our history.

When today's seniors reach their golden age of retirement, they are still a vital part of our society. No longer do we envision the typical picture of retirees sitting in a front porch rocking chair—today's senior citizens are on the move—involved in charity and volunteer work, community service and part-time jobs. Many have even begun second careers. Their contributions to our society are the gifts of their time, experience, age and wisdom.

That is not to say, however, that all seniors who reach retirement age do so in such fine style. Many of our older Americans are still at the poverty level and must rely on Government welfare programs. There are problems associated with age discrimination in employment and mandatory retirement. We are, however, making great progress and today's seniors are enjoying a better life than their predecessors. On the average, today's senior citizen is better educated, retires earlier and enjoys some form of income security.

Older Americans are one of this country's greatest resources. We can all look forward to a longer, more productive life as a result of our great progress. This is only one of the many benefits of our increased quality of living—the product of a society which provides opportunities and incentives for growth and progress.

Yes, we can feel good about America. While we cannot ignore the problems of escalating health care costs, we know there is a solution in sight. Our short-term investments in medical science have reaped great long-term benefits, and we can be proud of our achievements.

□ 1600

PAN AM OPENED THE AIRWAY TO AMERICAN SAMOA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from America Samoa [Mr. SUNIA] is recognized for 5 minutes.

Mr. SUNIA. Mr. Speaker, this week the Secretary of Transportation is sending to the White House her recommendations for approval of the sale by Pan American World Airlines of its routes in the Pacific to United Airlines. If the White House approves that recommendation, Pan American will be out of the Pacific Ocean, an area brought together and brought closer to us all largely due to the efforts of this fine American business organization.

Our territory, American Samoa, is a group of islands known only to a few and visited only by people with a purpose—Margaret Meade and Somerset Maugham and others. Pan Am put American Samoa on the map and made sure we joined the rest of the world in the march to civilization.

For many years after the war, and up until American Samoa's jet runway was officially opened in 1962, the weekly arrival of the chartered Pan Am flight from Honolulu at the Tafuna Airport was an island event. Busloads of islanders converged on the airport to welcome returning relatives and bid farewell to the departing ones. It was a county fair every week.

When the jet runway was completed in 1962, bringing American Samoa into the jet age, it was a Pan Am Boeing 707 that touched down first. What a day that was! Almost all of American Samoa was there to see this big bird, with the blue circle painted on its tail, come down with grace and determination. With that Pan Am landing, American Samoa had become a part of the truly modern world.

Many of us have taken for granted our air travel service. But it has not

been all that long since the territory I represent, American Samoa, only started to enjoy this luxury. What laid the groundwork for the American Samoa event occurred on December 29, 1937. A Pan American S-42 carried out a survey flight on the Southern Pacific route to New Zealand, by way of Kingman Reef, and fortunately for us, sought a convenient refueling stop in Pago Pago, American Samoa.

Now we have learned that Pan American World Airways, which pioneered air travel to the Pacific before World War II, with its storied "China Clipper" service, is selling its Pacific routes to United Airlines for $750 million, in the biggest such deal in civil aviation history. Because of their outstanding example in aviation history, and their contribution to expanding opportunities for American Samoa, and the Pacific I want to honor Pan Am today.

The thousands of miles of ocean between Hawaii, American Samoa, and New Zealand had never, until Pan American Airway development, been traveled by more than the very occasional aircraft, much less been equipped with suitable navigation and weather forecasting facilities, or landing sites. To forge the way to American Samoa, a 6,000-ton tanker, the SS *North Wind*, was chartered to steam ahead of the S-42B aircraft, complete with fuel supply, full Pan American direction finding and radio equipment, and aircraft servicing facilities, in effect serving as a mobile airway station.

Six Pan American technicians had already landed at the Pago Pago Harbour, on the island of Tutuila which is the largest in the six-island cluster making up American Samoa. The harbour itself was excellent, but on the approach and takeoff sides it was surrounded by 1,500-foot hills rising almost sheer out of the water, necessitating a steep final descent if the flying boat was to give itself an adequate landing run.

A Pan American Clipper left Kingman Reef for Pago Pago a day or two after arrival, undertaking a few local survey flights in the meantime, and with good tail winds the 1,600-mile sector was covered in just 10 hours. From American Samoa, it was on to Auckland, New Zealand, for the completion of a successful South Pacific run that brought our small island into aviation history books.

Pan Am's woes, however, are a matter of public record. One of the areas affected first in their search for economic solutions to financial difficulties, was the South Sea islands for whom American Samoa was the gateway. But before American Samoa was dropped, Juan Trippe, the ambition and motivation behind Pan Am, brought the Pan American board to the Rainmaker Hotel on the shores of Pago Pago Harbor. At that meeting, there was a Rockefeller and a Ford; there was also a General Gunther and a Lindbergh. It was to be the only time in the history of the territory when a group of men representing the Nation's top businesses, were to have come on the islands at the same time.

I distinctly remember Mr. Trippe getting up to offer a toast, not to the Governor or any of our chiefs, but to the memory of a friend of his who helped in the founding of Pan Am, Capt. Edwin Musick. There was a moment of silence as everyone stood to remember the famous pilot-navigator, who searched and mapped the Pan Am routes.

Musick had left Pago Pago Harbor one morning with his crew and for some reason attempted to return minutes after he was airborne and headed to another exotic South Seas destination. He never made it back to Pago Pago Harbor. His S-42B blew up outside of Fagasa Bay on the north shore of Tutuila Island. My own father, a young village pastor at the time, taking his young son into the town to see a doctor, was one of the witnesses who saw the fire in the sky from the top of Fagasa Pass.

The Samoan people loved Captain Musick, and when it was learned that he was lost, songs were composed in his honor.

Even as late as the mid-1930's, transocean crossings by conventional airplanes were rare and spectacular struggles. With the notable exception of Zeppelin airship services between the United States and Europe, together with a mailplane route across the 1,864 miles of South Atlantic between French West Africa and Brazil, airline operations across the Pacific or Atlantic scarcely seemed a ripe proposition—at least by heavier-than-air airplane. It was the determination of Pan Am to meet challenges such as this by commercial shrewdness and the carefully planned harnessing of all available technical resources, which led to the unqualified success of its world-leading innovations. The development of regular transpacific air services was an outstanding example of such finesse in the airline's field. It is because of this that we honor Pan American World Airways.

Pan Am's chairman and chief executive officer said after the recent transaction that sold their Pacific route to United Airlines that "Nostalgia is a very important thing to individuals in the airline industry." We are pleased that they feel sadness in leaving us because we in American Samoa want Pan Am to know we will always remember their dedication and unmatched strides in the aviation industry. In later years, the people of Samoa and others of the South Seas who used Samoa as their point of contact with Pan Am, came to love and depend on this airline. It was more than just an airline. It was a part of this history of the islands.

INCONSISTENCIES BY SOME WOULD-BE DEFICIT-REDUCERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts [Mr. FRANK], is recognized for 5 minutes.

Mr. FRANK. Mr. Speaker, it has become clearer and clearer that the dispute we have over the deficit is not whether to reduce it, but how. There are differences of opinion about what items are to be increased and what are to be decreased.

There are Members who would like to claim that they alone are the ones interested in reducing the deficit. On the other hand, a certain inconsistency appears to me to exist on behalf of some of those who have been most vocally talking about that recently, because their votes do not always, in some cases, do not often show that commitment.

We voted on a couple of very expensive items that many of us feel are of dubious necessity within recent times. We have the Dairy Subsidy Program, one of the great boondoggles of the Western World, which the Reagan administration has been trying to rework. And an amendment was offered, cosponsored by the minority leader on that side, and a Member on this side, which would have begun to reduce that in a reasonable and controlled way, that Dairy Subsidy Program. That amendment was defeated.

Yesterday we voted on an amendment which I offered that would have taken $1.7 billion out of the budget for 12 additional MX missiles. We have agreed to cap that program. No one, no one argues that the 10 additional missiles have any strategic significance, and yet we have Members again voting narrowly, under pressure from the White House this time, to kill that amendment and keep spending the $1.7 billion.

I looked at the list of cosponsors of the pending Gramm-Rudman deficit-reduction package here. Here it is sponsored by the gentleman from Florida [Mr. MACK]. And I was interested to find that there are 41 Members of this body who are cosponsors of the resolution offered by the gentleman from Florida [Mr. MACK], embodying the Gramm-Rudman notion. These 41 are simultaneously cosponsors of this drastic deficit-reduction measure, and at the same time, voted against the President's request that we begin to scale down the very expensive Dairy Program, and voted to spend the $1.7 billion on MX.

I think this makes the point. When 41 cosponsors of that drastic deficit-reduction measure, people who tell us

how urgent it is to reduce the deficit, turn around and vote to perpetuate the dairy subsidy, and vote for those dubiously necessary MX's, we understand that there is a very great gap between reality and the rhetoric on the part of some of those who would do it.

It does not appear to me intellectually possible to be arguing for the absolute necessity of deficit reduction, and at the same time to vote to perpetuate the dairy subsidy and to vote to perpetuate spending on an MX missile strategic system which has already been decided to be put aside.

I was particularly interested to note that seven of those cosponsors, in pursuit of the goal of deficit reduction, voted against eliminating the honeybee subsidy to $250,000 per farmer. When we have people who simultaneously sponsor that kind of deficit reduction, but will not vote to cut the MX missile, will not vote to cut the way the President wanted to the dairy subsidy, will not ever vote to limit the Honeybee Program to $250,000 per farmer, I think we understand, as I said, the gap between rhetoric and reality.

Mr. BARTON of Texas. Mr. Speaker, will the gentleman yield?

Mr. FRANK. I am happy to yield to the gentleman from Texas.

Mr. BARTON of Texas. Mr. Speaker, I agree with the gentleman from Massachusetts that the question now is not whether to cut the deficit, but how.

I would comment on the gentleman's dialog so far that under the current regulations Members do not have to make priority decisions. They can vote for everything. They do not have to make decisions about how they want to spend their money, and that is the reason that this Member of Congress supports Gramm-Rudman-Mack.

Mr. FRANK. I thank the gentleman. I would point out to him that technically I was not having a dialog until he spoke. He was commenting on a prior monolog. He has now made it a dialog, for which I thank him.

Yes, I agree. I am for a mechanism which would allow us to reduce the deficit, although I would point out to the gentleman he says Members do not have to make priority decisions. He is right, but a Member acting in good conscience, with some good faith, would make them, and I agree with him. It is, under the rules, legitimate for someone to say he is all for deficit reduction, all for the MX, all for honeybee subsidies, all for the dairy subsidies, and the Member from Texas is not one of those, and I want to make that very clear. He is not on this list, and I intend to put this list in the RECORD under the permission that I have been given.

But I agree that the rules should be changed. My difference with the proposal as it exists is, as I have said before, I do not want the President's veto to trigger that.

You see, I agree with the President in some areas and I voted with him on dairy subsidies. But when the President tells us we have to increase the MX money when we know we do not need it, and when the President tells us we should not get the cigarette tax up but should tax Medicare people instead, I think he is wrong.

So I hope we can focus again on the quality of spending, and let us examine the claims of some of those great deficit-reducers when we continue to waste billions of dollars.

Sponsors of the Mack resolution who voted against the Olin-Michel amendment to reduce dairy subsidies and against the amendment to save $1.7 billion on the MX:

Representatives BROWN of Colorado, BROYHILL, BURTON of Indiana, COBEY, COBLE, COLEMAN of Missouri, COMBEST, CRAIG, DAUB, DEWINE, FISH, FRENZEL, GALLO, HAMMERSCHMIDT, KASICH, KINDNESS, LUJAN, MCCANDLESS, MCEWEN, MARTIN of Illinois, MILLER of Ohio, OXLEY, QUILLEN, ROGERS, SCHUETTE, SILJANDER, ROBERT SMITH of Oregon, STANGELAND, STRANG, TAUZIN, WEBER, WYLIE, TAYLOR, EMERSON, HENDON, KRAMER, RAY, YOUNG of Alaska, HUCKABY, MOORE, and MORRISON of Washington.

These Members also voted against limiting bee subsidies to $250,000 per beekeeper:

Representatives CRAIG, HAMMERSCHMIDT, LUJAN, QUILLEN, STANGELAND, WEBER, and HUCKABY.

PERSONAL EXPLANATION

The SPEAKER pro tempore (Mr. WHEAT). Under a previous order of the House, the gentleman from Florida [Mr. PEPPER] is recognized for 5 minutes.

Mr. PEPPER. Mr. Speaker, I was unavoidably absent October 29, 1985, for roll No. 374 to the agreement of House Concurrent Resolution 201, amended. This resolution commemorated Public Law 94-142, the Education for All Handicapped Children Act on its 10th anniversary by a yea and nay vote. Had I been present, I would have voted "aye."

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida [Mr. NELSON] is recognized for 5 minutes.

Mr. NELSON of Florida. Mr. Speaker, due to official business, I was unable to be present for rollcall votes 380 to 382 on October 31, 1985.

Had I been present, I would have voted "aye" on roll No. 380, a motion to approve the Journal; "nay" on roll No. 381, on ordering the previous question; and "aye" on roll No. 382, the motion to recommit H.R. 3128 with instructions to strike the spending provisions.

□ 1615

THE GRAMM-RUDMAN-MACK EMERGENCY DEFICIT REDUCTION LEGISLATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas [Mr. BARTON] is recognized for 60 minutes.

Mr. BARTON of Texas. Mr. Speaker, I am here to speak on the Gramm-Rudman-Mack Emergency Deficit Reduction Act that is currently in conference committee between the other body and the House of Representatives. That conference committee went into session at 4 p.m. this afternoon; hopefully they are, as we speak, beginning to come to grips with some of the issues and will report back favorably to us on that legislation tomorrow morning.

Mr. Speaker, I do not want to be a broken record, but I view the Gramm-Rudman-Mack legislation to be of paramount importance to this Congress. As my colleague, the gentleman from North Carolina [Mr. COBEY] pointed out in this Chamber last evening, we have not had a balanced budget at the Federal level since fiscal year 1969. That is some time ago.

In 1969, that was the first one we had had in about 14 years. We have had one balanced budget in the last 25 years at the Federal level.

If that is not bad enough, the budget deficits are not becoming smaller; we are not making progress in reducing the deficit or eliminating the deficit; the deficits are becoming larger and larger.

I have some information here from the Office of Management and Budget that says, for the fiscal years 1950 to 1959 as a percent of gross national product the deficit was 0.4 percent. For the fiscal years 1960 to 1969, the deficit as a percent of GNP doubled, to 0.81 percent. For the fiscal years 1970 to 1979, the deficit increased, again as a percent of GNP, to 2.17 percent, so it almost tripled; and then for fiscal years 1980 to 1985, as a percent of GNP, the deficit is now 4.52 percent.

So we have a situation where our deficit is doubling and redoubling every 5 to 10 years. It has now reached the point—the deficit that we reported in fiscal year 1985 was $211 billion. That is an increase over the prior year's deficit of $185 billion and there is no end in sight.

Now, we cannot continue to borrow and borrow and borrow and spend and spend and spend. At some point in time, as Members of the House of Representatives, we have got to begin to make some financially, fiscally responsible decisions to reduce spending.

Unfortunately, we have shown ourselves totally incapable of it. As my distinguished colleague from Massachusetts [Mr. FRANK] pointed out in his 5-minute special order this evening, we do not make decisions, we do not make choices; we do spend for the honey program, we do spend for defense, we continue to spend and spend and spend; and basically we are depending on our children and our grandchildren to pay those costs.

For every $1 that we borrow today, between now and the year 2000, which is 15 years from now, we have to repay in interest alone $71. When you calculate that, that means for the money we are borrowing to run the Government today, we are pledging our children and our grandchildren to repay literally trillions and trillions of dollars.

So I think that we do need to pass Gramm-Rudman. We need to pass it tomorrow, we need to get on about the business of making these priority decisions, and we need to do it as soon as possible.

Mr. WALKER. Will the gentleman yield?

Mr. BARTON of Texas. I yield to the gentleman.

Mr. WALKER. I thank the gentleman for yielding. Let me begin by thanking him for the work that he has done on the floor over the last several days providing an information stream with regard to the Gramm-Rudman proposal.

I think that many of the people around the country who have a chance to observe the workings of this House are very knowledgeable at this point about what is contained in that particular proposal because of the work that the gentleman from Texas [Mr. BARTON] and some of the rest of our colleagues have done providing that information flow.

I think it has been a very good exercise, and I think in fact it has helped inform a number of our colleagues about things on this bill that they were not aware of.

There has been a great deal of misinformation that has circulated in this body, a great deal of misinformation that has been propounded to the Nation with regard to the proposal, and I think that the educational effort that has taken place here in these special orders has been most valuable.

Mr. BARTON of Texas. I serve on the Committee on Interior and Insular Affairs, and the chairman of that committee is the distinguished gentleman from Arizona [Mr. UDALL], a Democrat, a fine man, a great American; and his rule of thumb is "when all else fails, read the bill."

I have read the bill, Senate Resolution 372, and sometimes it does pay to read the legislation.

Mr. WALKER. If the gentleman would yield further, I have often found that to be the case out here. In the midst of some of the debate, I will go back to the back of the Chamber, pull out the bill, and begin reading. One finds some surprising things in legislation if you actually read the bill, or even more surprising if you read the committee reports about what they are saying is in the bill, one gets shocked from time to time.

I did want to make a point, Mr. Speaker, with regard to the gentleman's reference to the 1969 balanced budget, because in the context of what the gentleman was saying, some people might interpret that as meaning that Congress finally got responsible back in 1969 and did what the gentleman is contending needs to be done, and that is, cut spending in a way in which we balanced the budget.

In fact, nothing could be further from the truth. What happened in 1969 was a process not unlike that which some of the liberals are proposing that we do today, in order to come up with at least a momentary balanced budget; and that is what we had in 1969, a momentary balanced budget.

What happened in 1969 was, we had passed the whole Great Society Program, we were in the midst of the height of the Vietnam war, and President Lyndon Johnson at the point came forward with a proposal that we impose a 10-percent surcharge, tax surcharge, on the American people.

That in fact generated revenues out of a growing economy. We had had a rather expansive economic growth during the period of the sixties, largely because John F. Kennedy, back in the early sixties, had brought forth a proposal that cut tax rates, and that led to an economic boom during the mid to late seventies.

However, the attempt then was made to capitalize on that economic boom by raising taxes with a 10-percent surcharge. In fact, it did bring in revenues to the Federal Government in that 1 year that were $3 billion more than expenditures.

However, the result of that surcharge and the result of that increase in taxes was the period of the seventies when this economy was destroyed. It was destroyed by high inflation; it was destroyed by massive new deficits, because the economic expansion was cut off.

Instead of having economic expansion, we went into economic retreat. Over a period of years, that led to greater and greater inflation. Congress, in order to meet the demands of the growing downturn of the economy tended to spend more money, and the deficits expanded.

□ 1625

The deficit is expanded. That particular approach in 1969 produced a balanced budget but precisely at the cost of the economy as a whole. We do not want to do that. That is precisely what we want to stay away from. We do not want to raise taxes in an expanding economy and thereby destroy the whole of the economy.

What we want to do is to do the responsible thing, and that is begin to back the Federal Government out of the overspending problem it has created for itself in the past several years. And the gentleman is absolutely correct in pointing out that the Gramm-Rudman-Mack proposal does give us that kind of opportunity. To hear many of our colleagues talk about it, you would think that the whole program centers around sequestering. That is a little like suggesting that if parents tell children, "If you don't get good marks in school, I am going to impose a curfew on you as to when you come in in the evenings," and have the whole debate center around the curfew rather than on the grades.

Well, the fact is that if the children get good grades, they do not have to worry about the curfew times.

Mr. BARTON of Texas. It might be educational, there still may be some Members of this body, in spite of the fact that the other body debated this thing for approximately 3 weeks, passed it, I believe, on October 10 or 11, and we have been reviewing it in this body since that time, which is approximately 3 weeks, there may be Members who are still uncertain about just what it does. The gentleman mentioned the term "sequestering," All that does is, it means the President must proportionately, across the board, reduce funding of programs, with the exception of Social Security, that exceed the deficit ceiling for that particular fiscal year.

As the gentleman from Pennsylvania indicated, that is a last resort. The first thing is, the President of the United States has to submit a budget to the Congress that is within the target, within the ceiling. For the budget we will be considering in January and February, that target is $144 billion. So the President of the United States must submit to this body a budget that does not include spending in excess of $144 billion in the red. Now, the committees and the subcommittees of this Congress, they take what the President submits, and if we, in our wisdom, decide that we do not agree with the President's priorities, we can change those around. But we cannot go above $144 billion in deficit spending. If I want to spend more on MX missiles, I have to force the other Members of this body to spend less on the Dairy Program, for example.

Now, we pass the bill, the other body passes a similar bill, we send it back to the President, and as long as it stays within those guidelines, there is no sequestering that takes place. It is only if, after that point in time, spending

exceeds those projections or if the Congress passes legislation that knowingly exceeds those targets does the sequestering order come into effect.

Mr. WALKER. What the gentleman is describing is a process whereby the sequestering is simply a discipline that exists to force Congress to do that which Congress should have been doing all the way along, is that correct?

Mr. BARTON of Texas. The gentleman is totally correct.

Mr. WALKER. And that would be to have a budget which puts us on a declining road on deficits and then enforce that budget by assuring that the legislation that we pass lives within the budget.

Mr. BARTON of Texas. That is correct.

Mr. WALKER. Which is precisely what we refuse to do. We have passed budgets around here recently. Most of them have not put us on a declining trend on deficits but, in fact, on an expanding trend because we use phony figures in them and therefore render them almost useless as an economic document, and deficits continue to climb and climb and climb, despite what we say in the figures.

But then, more importantly, at least to this gentleman's mind, we refuse to enforce that budget on time after time after time. I have pointed out on several occasions on the House floor that as we come to spend the money on the floor, as we bring the authorization bills out and the appropriation bills out, we invariably bring them out under a rule which says specifically that we are going to waive the Budget Act for the purposes of spending this money.

Mr. BARTON of Texas. Being a new Member of this body, I was somewhat surprised to learn that that is not just an automatic procedure. I am not aware of many spending bills where we have not had to waive the Budget Act in order to act upon.

Mr. WALKER. The gentleman is correct. In fact, I have gone back and counted them up here, and on recent days, on ones where we have had votes, we have had about 9 votes, recorded votes, on bills where it was a rule to waive the Budget Act

Now, the gentleman from Massachusetts, who was out here a little while ago, has his list of people who he says somehow were not living up to what they were putting into Gramm-Mack.

Well, I have a list, too. Now, I am not going to publish it in the RECORD tonight. I just want people to know that I have a list, too, and that list shows there are about a similar number of Members that he referred to. I think he said 41. There are about a similar number of Members in this body who have voted each and every time for a budget waiver. They have voted every time a rule was on the floor to waive the Budget Act, they have voted to waive the Budget Act. Now, what can we say about them?

I can understand there might be some people around here who would have a set of priorities that would differ from the gentleman from Massachusetts. But I cannot imagine anyone who has been talking budget deficits or has been talking about budget enforcement or talking about doing something about controlling Government spending, who could vote on every single occasion to waive the Budget Act.

Surely a person of that ilk cannot be regarded as someone who is willing to impose much discipline on the process.

As I say, that list exists. I choose not to publish it at the present time, but I do think that if we are going to get into this political process of having lists of Members published from people's unique perspectives, then maybe what we will want to do is just carry that process on a little bit further and demonstrate that there are other unique perspectives, among them the question of whether or not you are willing to do anything about the budget that you voted for. The fact is, there are a lot of people on that list who came out here and gloried in voting for a budget just a few weeks ago and now have voted every single time, not once did they differ, but every single time they voted to waive the very budget that they passed.

Now, I will tell you that I think that that is something the American people might want to focus on. But it creates the problem that there is no discipline in the process today. What I think the gentleman has suggested here in his special order before and what I join him in suggesting is the fact that that process has broken down. It has become nonsensical. It has become impossible to orient toward real budget savings.

What we are now faced with is a need to change the process. And Gramm-Rudman-Mack is literally the only chance we have, the only chance we have since the other side has been unable to come up with an alternative. It is the only chance we have of enforcing budget discipline through some new device aimed at bringing down deficits.

Mr. BARTON of Texas. We have a conference committee now, as I indicated earlier, that is meeting as we speak. There are 48 Members of the House of Representatives on that conference committee. Those 48 Members are made up of, for the most part, the senior Members of this body in both parties, Democrats and Republicans. Now, if one assumes that seniority brings experience and wisdom, one would have to conclude that we have got the best and the brightest in the House of Representatives working with the other body in this conference committee to come up with a solution to the deficit problem. And those that say Gramm-Rudman is not the answer, remember that we have 48 Members, the best, the brightest, and most senior Members from the House of Representatives, one would think that—one would have to say that they should be able, if they disagree strongly with Gramm-Rudman-Mack, they should have come up with an alternative.

Now, I am not aware of any alternative. I have not heard any Member in this body speak of an alternative. I have heard parts of alternatives.

I have heard some of the Members say they wanted to reduce the level for the fiscal year we are in right now, the deficit ceiling level, from $180 billion to $172 billion. I applaud that. I think if we can lower it, the more the better.

But I have not heard a comprehensive alternative, considering that we have got our best and brightest on the conference committee, and as a rational Member of this body, one has to conclude that there is no alternative.

If we do not pass Gramm-Rudman-Mack, then we do not do anything; we continue to spend on our merry way.

Mr. WALKER. I heard the gentleman agree with the gentleman from Massachusetts a few moments ago, and I think I may take issue with him on something. The gentleman from Massachusetts said that the question is not whether we are willing to do something about deficits but how.

The gentleman from Texas, I think, agreed with him on that point.

I am not certain I totally agree on that. I think the question before the American people is whether this body is willing to do anything about deficits.

Many of the big spenders in this body would like you to believe they are willing to do something about deficits and that the question is how. Do we gut defense? Do we do something along that line? It is the "how" of the matter that worries them.

Well, I will tell you, as someone who has been a Member of this body for 5 terms, my question is whether this body is willing to do anything about deficits? Because all I have seen is an expanding trend. All I have seen is spenders who are willing to use every devious device known to man in order to spend the money. They are willing to violate the law of the land which requires right now that we have a balanced budget. They are willing to violate the rules of the House. They are willing to do everything in their power to go on spending more money than we take in every year.

I would say that, given the past history, and given the vote on budget waiver after budget waiver after budget waiver, I have to question

whether we are willing to reduce deficits.

I think the question of "how" is embodied in what we are willing to do on Gramm-Rudman-Mack, that does give us one device.

But my guess would be that even if we pass that, that we will see the big spenders in this body try to figure out all kinds of devious devices to get around that provision, because every time you pass a provision, they try to figure out a way around it. And I bet you that we will find rules coming to the floor that attempt to work their way past it, that there will be attempts to force the President's hand in some devious devices, and so on, to spend money over and above the sequestering process; that there will be attempts to go to court to abandon the sequestering process, all kinds of things.

I understand one of the proposals they put before the conference committee is to keep the President from using his veto power which is given to him in the Constitution. They literally put a proposal on the table over there, after talking constitutional issues on this floor, one of their proposals has been a way to take away the President's veto power with regard to this process.

I am telling you that if they are willing to go that far, I have to guess that they are going to use all kinds of other things. Then the question is not how are we going to reduce deficits but whether we are going to reduce deficits.

Mr. BARTON of Texas. What the gentleman just outlined is an addictive problem. It reminds me of people who have an alcoholism or drug problem, they are addicted to it. We have people in this Congress who are addicted to spending. When we pass Gramm-Rudman, we may have to set up a "Spenders Anonymous" group in the U.S. Congress and have counseling sessions and one-on-one rap sessions to help them counteract the withdrawal pains of being able to spend however and whenever in whatever sums they want to.

Fortunately, I am not addicted to spending, and I do not plan to be a member of that group, but it could be a pretty large group.

Mr. WALKER. We may have to use the gentleman's account book.

Mr. BARTON of Texas. I yield to the gentleman from Georgia.

Mr. GINGRICH. Well, if I can pick up on that, although the gentleman is dealing with it in an amusing manner, I think there is a kernel of truth in where we are at as the gentleman is describing it.

I do not think that the Gramm-Mack proposal is going to significantly, by itself, change the world. I think, if anything, it is going to create a whole new set of difficulties and complexities and we are going to suddenly find ourselves asking questions like, "How do you deal with the budget when you have to have that kind of change?"

□ 1640

I suspect that the President's Budget Director is going to find that Mr. Stockman left at the right moment and that the next job is even harder. I think that the Pentagon is going to find itself with real problems. But I think under any circumstances where we start to control spending we are going to face those problems.

I am not going to get up here and claim that Gramm-Rudman-Mack is a perfect proposal or even that it is as good a proposal as it would be a year from now. What I am willing to say is that we are at a moment in American history where, hopefully tomorrow, Members of this House can vote either to start controlling spending or they can vote to continue to go down the road of spending and spending and then either borrowing and borrowing or taxing and taxing.

Now, I do not know of any alternative in the long run except to either raise taxes massively, in which cases Mr. Mondale, who carried only one State, will be proved to have been right, or to control spending.

I must say that there are some in the Reagan administration who have not been as aggressive in facing up to this as they could have been. I think in that sense the Gramm-Mack proposal has forced a much tougher decision than possibly some of the people in the executive branch would like.

But the thing I like about the Gramm-Mack proposal is that it lays it on the line and it says we are at a crossroads.

Now, if you really want to start learning how to control spending, vote "yes," and then we are going to have to work very hard, in my judgment, to sort it out. It is going to mean that when the President sits down in January and February and works out his budget plans and sends up his budget message, he is going to make a lot of tough choices. Many of those tough choices are not going to survive. We, in the Congress, looking at those, are going to have our own ideas. But then we are going to face, when our Budget Committees have to meet the Gramm-Mack proposals, we are going to face a lot of tough choices.

I would not be at all surprised, I say to my friend from Pennsylvania, that we are going to almost certainly have changes in the budget proposals next year from the current language of Gramm-Mack. The question that will be there is whether the changes are serious and legitimate modifications in order to allow us to more rationally and prudently control spending, in which case we on this side of the aisle will be for them, or whether the changes and deceptive efforts to avoid controlling spending in order to continue building up the liberal welfare state.

So I think that when we have our friends come in, as we have heard over the last few days, and our friends on the left say, "Oh, Gramm-Mack is not perfect," the correct answer is, "Of course it is not." It is, however, a major step toward the right medicine.

We are a little bit like the patient who is going to a doctor, he is not quite sure exactly what medicine we need, but he knows the general disease that we have, and he knows that the first medicine is better than no medicine at all. And the choice we are faced with tomorrow, and I hope that the Democratic leadership will let us have a straight up or down vote on this tomorrow, the first choice we are faced with is whether or not we want to say, "Yes, let's go down the road of controlling spending."

I will tell you, if we pass the Gramm-Mack proposal and the Senate passes it, as I am certain they will, and the President signs it, we are going to see every executive branch agency and every interest group in this city suddenly have to sit down and think about the next 5 years with a level of care and a level of frugality and a level of concern about money that we have not seen in our lifetime. For our entire lifetime we have been dominated by a liberal welfare state vision that, basically, said, "If you want to spend the money to take care of your constituents, what the heck, we will either raise taxes or we will inflate the currency or we will go out and borrow it. But go ahead and make them feel good, spend a little more. What is an occasional billion?"

When I was kid, Everett Dirkson used to say, "A billion here, a billion there, sooner or later it adds up to real money." Now we are talking about trillions. And I recently heard someone refer to millions and I was certain they were not talking about a Federal program because it was not a large enough amount.

I think we have to face the fact that literally in our lifetime we have become a government which, as my friend said, basically, is involved in a spendaholic problem. There are at least 130, or so, Members of this House who walk in, and if it involves spending, they will vote yes and ask later what it was.

What I think Gramm-Mack does is, it says that you cannot afford to do that any more.

Now, every family that has gone through the credit card cycle—and I happen to have two daughters, one in college and one just out of college, and they have both gone through this cycle—phase 1, is, "Isn't this plastic

wonderful?" Phase 2 is, "Why do they send you these pieces of paper with all this printing involving numbers on it?" Phase 3 is, "What do you mean, I have to pay for it?" And phase 4 is, "Gosh, I don't have very much money this week. You know I had to send all that in to pay for the credit card." And phase 5 is, "I don't think I will charge this next item because I cannot afford to pay for it."

Now, we as a country, I think, are right at the point where we have a credit card. It is the most expensive, largest credit card in the world. Every Member has one. It is the voting card we use in this House. And we have been running up our credit bills. I think that Gramm-Mack gives us a chance to bring it under control.

I thank the gentleman from Texas for his leadership in developing this special order on the Gramm-Mack proposal.

Mr. BARTON of Texas. I thank the gentleman from Georgia.

My early remarks were somewhat humorous. It is a serious problem. I would point out that since the withdrawal pains are going to be so serious, that Gramm-Rudman is a 5-year plan, it is not a 1-year plan, under Gramm-Rudman we are going to increase the national debt over $500 billion. So we are not talking about going to a balanced budget next year. We are talking about over a 5-year plan, a 5-year period, each year reducing the amount of allowable increase in the debt by approximately 4 percent a year, so that by fiscal year 1991 we will be down to zero deficit and a balanced budget.

I would like to yield to my distinguished colleague, the gentleman from Utah [Mr. MONSON].

Mr. MONSON. I thank the gentleman from Texas for yielding and I commend him for the work that he has done on this most important subject, the most important subject facing the Nation today and facing the Congress. I appreciate the other words that have been said here today, as well.

I come from a State that has a mechanism similar to this. It is not identical, but it is similar. It works somewhat the same. The biggest difference is that we do not start using that mechanism with a huge debt that faces the United States and an already yearly deficit, and maybe it would be easier to work if we were in that circumstance, but we are not. We have got to come up with a rational plan to deal with it, and I think that a rational plan has been developed. It maybe is not perfect, but we will have a chance to judge that as time goes on and make the modifications that are necessary. But until we get started, we are never going to find out whether it is even close to perfection. We will never get that opportunity. I think the people of America say it is time to start something, and this is the thing that we have got available to us to do it with.

Now, I gave a 1-minute address earlier today, and no sooner had I finished than someone popped up and said, in calling my bluff, so to speak, "The problem with your side of the aisle is, we are willing to deal with it but we want it to start right now."

Well, we have started it already. It is not a matter of wanting to start right now. We have started it. We set targets earlier this year for deficits. And we have already exceeded those deficit targets in what we have decided to spend with the appropriation and authorization bills that we have been passing already. It is not a matter that we have not started it. They are saying that, "we will go a step further, we will lower that target to $160 billion-something instead of the $185 billion that is proposed in Gramm-Mack." We have not even met the $171 billion target that was set. Already we have escaped that.

So I do not know how we can justify that kind of rhetoric. It just does not coincide with the action that we are taking.

On top of that, they say that Gramm-Mack is a disaster leading us to economic chaos and probably recession. Well, is it not going to do that just a little bit quicker if we do what they are proposing?

Sure, it would be nice to reduce it to $161 billion right now, the target; but I think in doing whatever we do, we have got to be realistic in it, we have got to set achievable goals, we have got to do it in a way that it will succeed, not in a way that it is doomed to failure from the start. And I think that that is really what they would like to see us do, start it so that it will fail as quick as possible so that they can move on with their agenda of raising taxes, and that is what we want to avoid. It is what the people sent us here to avoid. The message was loud and clear that the people do not want tax increases. I think we are trying to achieve that.

Now, let me just add one more thing, in comparing it with what we do in my own State.

Another criticism is that it excludes too much, that we take too much off. In my State, we exclude all of education, which is about half of our budget. In the mechanisms we have got to avoid deficit spending in Utah, you cannot touch education in dealing with potential deficits. So one-half of the budget is excluded. And yet somehow that works. Every time we get into a situation where a deficit becomes anticipated, we have to kick in the mechanism to deal with that so that we do not run that deficit. One-half of the budget is excluded from cuts. Somehow that system is working in the State of Utah. I think all we are saying here is, let's try it. I bet it will work here, too.

Mr. BARTON of Texas. How long has the State of Utah had this mechanism?

Mr. MONSON. I am not sure just how long this exact mechanism has been in place. We have been required, of course, since statehood in 1896, to have balanced budgets, but the exact mechanism we are using right now has been in effect for a number of years. The Governor is the one that is required to kick it in once a deficit is anticipated.

Mr. BARTON of Texas. How often has the State of Utah actually had to use the automatic pro rata proceedings?

Mr. MONSON. Oh, in the last 10 years, we have probably used it 5 or 6 times, at least. We may have used it even more than that. It has been a bad economic time, as we all know. But we have done it, and we have survived.

Mr. BARTON of Texas. I thank the gentleman.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. BARTON of Texas. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

Mr. Speaker, I just want to build on a point the gentleman made a moment ago about an artful attempt being made to destroy the program before it begins, kind of killing it with kindness, suggesting that we will do it all right away. I think that history shows that that is precisely what the big spenders and the liberals try to do with programs of this type. There has been a lot of talk on this floor in recent days about Gramm-Latta, and we hear people coming to the floor suggesting that Gramm-Latta failed and that this is built upon that.

Well, first of all, I am not certain that I would agree with their economic history. The fact is, the programs put into effect under Gramm-Latta are what have led to an economic expansion and has produced more jobs in a matter of couple of years than all of Europe has been able to do in a couple of decades. But putting that behind us, I think we ought to go back and look at the history of what we did during that time period, because Gramm-Latta at the outset was a program built upon the idea that we would reduce the amount of money going into the economy at the Federal level at a time when we were expanding opportunities in the private sector of the economy. That was largely to be done with a proposal put forward by the President for a 30-percent tax cut.

Let us remember what the liberals did with the 30-percent tax cut idea. First of all, they cut it to 25 percent. That was not a major problem initial-

ly, but how they front-loaded the program was a major problem, because what they did was, did they give the 10-percent tax cut in the first year? No. They gave a 5-percent tax cut in the first year. They back-loaded that in a way that the 5 percent did not even kick in immediately. And so as a result, an economy that was headed toward recession anyhow at the end of the Carter term plunged deeper into recession before any kind of meaningful tax cut could kick in. And then they ran around the country in 1982 blaming the recession on Ronald Reagan when Ronald Reagan had proposed in fact a program to cut taxes immediately to get the economy growing.

What happened once the entire 25 percent of the tax cut kicked in? This economy took off like a skyrocket. We had industrial production up, we had the number of jobs up, the economy has been growing at a fantastic rate. The negative growth of the economy—and I never liked the term "negative growth"—the decline of the economy under the Carter years has become positive growth every year since the full 25 percent of the tax cut kicked in. We are back in a period of growth not unlike that which the Kennedy era spawned in the early 1960's.

So we have a record of liberals and spenders attempting to kill a program by the way in which they design it, and that is precisely what I think we will see in the alternative that they are likely to bring to the floor tomorrow, that we will get an alternative out on the floor tomorrow brought to us by the big spenders in this body that will attempt to do some things that have an attractive sound to them but in fact are specifically designed to hurt the program early so that they can use it as a campaign point next year, hopefully to kill off the whole idea so that they can go back to spending without any kind of discipline.

So the point of the gentleman from Utah is right on target. We are seeing proposals already aimed not at helping us with this program but of hurting the program, and I think it is something that the American people need to be aware of. They are not changing their ways. They are simply changing their rhetoric for the moment so that they can hopefully kill off the best thing we have had before us in a long time to stop spending.

Mr. BARTON of Texas. I thank the gentleman.

I would point out that when we are talking about billion-dollar deficits and trillion-dollar national debt, it might be instructive to just give a brief mathematical description of what a trillion dollars is. A million dollars is a thousand thousand. A billion dollars is a thousand million. A trillion dollars is a thousand billion. And we are at the level now that we are going to have a debt ceiling increase to $2 trillion. Now, the entire gross national product of the United States of America is around $4.5 trillion, and that is 25 percent, approximately, of the total gross national product of the entire world. So we are getting to the point that the national debt is going to approach the entire gross national product for 1 year of this country, which is the greatest economic power on the face on the Earth.

□ 1655

We just cannot go on spending and spending and spending. We have to have fiscal responsibility, and Gramm-Rudman-Mack, it may not be the best fire extinguisher to put out the fire, but it is the only one available right now.

I yield to the gentleman from Georgia [Mr. GINGRICH].

Mr. GINGRICH. I want to build on a general theme here that I think is very important. With the Reagan tax cuts of 1981, we have had a very long and very succesful period of economic growth. We have added 8.5 million jobs in the last few years. We have added more jobs in any given month in the last 2 years than Europe has added in the last decade. We have been a society on the move.

The question is how do we continue to grow and how do we continue to have economic development and how do we continue to have more jobs created. That is important for two reasons. It is important first because the more jobs there are and the better off we are doing, the more tax money comes in and the more we are able to have paid for by the Government. Second, because of the human factor; that nothing is more painful in this society than a deep recession. A situation where people find themselves out of work and needing more help from the Government instead of being able to go to work and pay taxes.

Now, the thing that makes the Gramm-Rudman-Mack proposal, it seems to me, very exciting is that we are at a point where the economy is waivering a little bit. If the money markets and the people who set the interest rates were convinced that this Congress was finally getting spending under control, I think you would see a decline in interest rates, you would see a continuation of the growth of the economy. You would see more new factories being build and more new jobs being created. You would see the boom continue for another 3 or 4 years.

That would mean that the economy would generate more jobs, more people would be at work, the work they would be at would pay them more salaries. They would be able to pay higher taxes, and frankly, that would actually make the job of the Gramm-Rudman-Mack proposal less difficult because it would mean that with higher taxes coming in we would have less spending that we had to cut to finally get a balanced budget.

So I think that if you really want to both have more prosperity and have more jobs, and if you are interested in making it easier to get to a balanced budget, then adopting this kind of 5-year plan to get to some kind of a systematic, year-by-year step to a balanced budget will send a signal, particularly if we are vigilant and we are serious about it.

If, as the gentleman from Pennsylvania said earlier, we are willing to fight and the President is willing to fight to make sure that we actually implement reductions in the deficit. At that point I guess all I would like to say is that a vote for Gramm-Rudman-Mack would not only be a vote for a balanced budget, but it is a vote to continue the growth in jobs. It is a vote to continue the recovery and the economic growth of the last few years, and it is a vote to continue to increase opportunities for Americans to work.

Mr. BARTON of Texas. I see that the distinguished gentleman from Oregon has joined us. I yield to the gentleman [Mr. WEAVER].

Mr. WEAVER. I thank the gentleman for yielding to me.

Mr. Speaker, I wonder if my friend from Georgia realizes that it is also a vote for caesardom. That we are in the same boat that the Roman Senate was in 2,000 years ago when it abdicated its responsibility and would rather have just the prestigious positions of the Roman Senate and let Caesar run the empire nation of Rome, and that is what we are doing here today.

If the Congress does not have the guts to balance the budget, and it has not up to now; there is no question of that. If we do not, we certainly should not handle the situation by abdicating our entire responsibility to create a "Caesar" in the presidency. I am not talking about the encumbent; I am talking about the presidency itself becoming the office of Caesar.

To run by dictate, this country. I think it is a terrible thing that we would be doing.

Mr. BARTON of Texas. I yield to the gentleman from Georgia to respond [Mr. GINGRICH].

Mr. GINGRICH. I just want to thank the gentleman from Oregon for raising the issue because I think it is a serious issue, and I think that it is not something to be looked at lightly. It troubles me a great deal.

For example, I would vote against a line item veto as a constitutional amendment because I think it would be too large a shift of power from the legislative to the executive.

Let me pose two suggestions to my friend from Oregon and if you would,

I would really like to hear your answers.

First of all, it seems to me one can make the case that a sunsetted, 5-year shift of power is a reasonable gamble in a situation where, as you yourself concede, this Congress has been peculiarly unable to bring spending under control.

Second, I would just say from the standpoint of history, that a nation which is unable to adapt to its own powerlessness invites greater problems. That the failure of the Italian Government prior to Mussolini to find some resolution to its problems led to the disrespect for all of democracy; that the very weakness of Weimar led to Hitler. In that sense, I have to ask a question, and I really mean this in a nonpartisan, intellectual sense. Is not Gramm-Rudman-Mack a better gamble than a continuation of the current spending chaos, with this one thing in mind, and correct me if I understand the way it would work. It goes back in a sense to the Vietnam war arguments because Congressmen would run home and say, "Why, we never did anything; it is not our fault; it is all Lyndon Johnson's fault." Or later on it was all Richard Nixon's fault.

But it always struck me from a constitutional standpoint that if you do not vote it, they cannot spend it. But at any point under the Constitution that a President, this President, and that is who we are really talking about, but any President, were to abuse the Gramm-Rudman-Mack provisions, you really have an enormous capacity to bring them to their knees the first time that there is an appropriations bill. Because while they can cut spending down, they cannot create spending. The Congress is doing nothing to give up its ultimate power over the purse, which goes back to the British House of Commons and the very reason for the Magna Carta and the rebellion against King John III. That is the whole notion that the legislative branch, if it refuses to give the king the money, stops the king from doing anything. Of course, the President is simply an elected kingship.

In that setting, it would seem to me that we do not in any way give away our most basic power to control Presidents by our capacity to refuse to vote the dollars in the first place if we decide that he is acting in too tyrannical a manner.

So I would be glad to hear my friend's reflections on this.

Mr. BARTON of Texas. I yield to the gentleman from Oregon for his response.

Mr. WEAVER. I want to say to my friend from Georgia that his treatise, and perhaps you will see a tear dropping from my eye—there is one—is right. There is no question the weakness of the Italian Government before Mussolini welcomed Mussolini, as did the Weimar Republic bring in Hitler.

I just see this happening to my own country, my own great country with its great traditions of freedom and representative democracy. It just makes me anguished within my heart. That is what I see now. I understand why it is happening, and it is happening for the very reasons that the gentleman from Georgia outlined just now; he is right.

Mr. GINGRICH. If the gentleman would continue to yield, I guess the point I was trying to make and did not make very clearly was that a halfway measure which substantially strengthened either Italian democracy or Weimar Germany would have preempted the dictatorship. That another 5 or 10 years of $200 billion deficits and a body politic seemingly out of control, it seems to me is a far greater threat to our democracy than a temporary jury-rigged system which is going to collapse at the end of 5 years anyway because it is sunsetted, and which does not give up our central power to appropriate in the first place.

Mr. WEAVER. If the gentleman from Texas will yield, the situation is that once power is abdicated, it is never regained. The history of the Roman Caesars after the first, Augustus, was that, and by the way, Augustus ruled not as an emperor or a dictator, but as a consul, and did not even hold the consulship for much of his 40 years in power, and always had his acts pass the Senate, even though he was complete dictator, he pretended, and the Roman Senate pretended that he was not.

□ 1705

After Augustus, each new Roman Emperor, Tiberius, Caligula, Claudius, Nero, all made in their inauguration speeches a great show of giving back the power to the Senate. And here is the lesson we have to learn. They offered to give back the power, the power of the purse. I remember Nero in his famous inauguration speech written by Seneca, his aide, said that he wanted to return to the Roman Treasury, the facie, as you can see, was what the Roman Treasury was called, and it became the facism of Mussolini. The Roman Senate said no, they did not want that power. They said thanks but no thanks.

That is what I see happening here. The Congress of the United States is saying, "We no longer want the power of the purse. We want to give it to the President," because what the gentleman from Georgia said is right, they could not do it. What a shame. If we do not have the backbone to vote cuts in things we hold dear—if you are a militarist hawk, you are going to have to get up and vote against some military spending. If you feel deeply about the condition of the poor, you are going to have to get up and vote against some of that. If you love education as I do, you are going to have to say we are going to have to have some cuts there. We cannot do that, and we are not. We have not been able to—then we are going to have that abdication.

I just want to say, however, that the idea of the sunset, the idea that it is going to go in 5 years, is just like the Gramm-Rudman.

I do not disparage the people involved here. I do not disparage my friend from Georgia, my friend from Texas or my friend from Pennsylvania or the gentleman from Florida [Mr. MACK] or GRAMM or RUDMAN themselves, or any of them. I do not personally. They are trying to do something about this.

I am saying, however, what is happening, the language in the provision and its enthusiastic reception by the Congress is a charade. It is a charade. It is an abdication, in other words. And the idea of the sunset is part of that charade. We will never get that power back.

I truly appreciate my friend from Texas giving me this time.

Mr. BARTON of Texas. It is an honor to have my distinguished colleague from Oregon join us on the floor. Having served in this body a much shorter time than my colleague from Oregon, I do appreciate the wisdom and the experience that you bring to the membership as a whole and to the committees that we serve on together.

I guess if I would have a comment on your very eloquent comments, it would be that I personally would be willing to consider some alternatives, if there were any, that were reasonably being presented. I see none.

If we do our job even under Gramm-Rudman-Mack, the President will not be sequestering, he will be submitting budgets, and we will rearrange his priorities if we so see fit, so long as we stay within the budget deficit ceilings and go down each year by $36 billion. It is business as usual. It is only if we do abdicate and say we cannot make these priority decisions that the President comes in and pro rata makes the cuts, and even there it is strictly a ministerial function. It is an across the board. It excludes Social Security. It excludes long-term contracts. But anything else, it is a pro rata. The pro rata is split 50-50, half in automatic increases and the rest in controllable spending.

Mr. WEAVER. Mr. Speaker, will the gentleman yield for one final comment?

Mr. BARTON of Texas. I would be happy to yield.

Mr. WEAVER. The gentleman is sincere, and I completely agree that it sounds like the sort of thing that we

have to do. There is no question we have to get the budget into constraint. I voted against almost every appropriations bill for 10 years; 10 years ago I said this was going to happen, and I said we have just simply got to get spending in line or it is just going to continue up until it goes into an exponential curve, which it has now.

The thing about this ministerial function, and that is the problem, we are granting to the President awesome powers, but we are saying that all he does is simply follow a set that kind of puts a rule across it and chops the paper off.

It does not matter what the words are in this provision that we are about to pass tomorrow. It is really the thrust of the thing. It is going to say, "Mr. President, we can't do it, you have to," and we are kidding ourselves by calling it ministerial even though some of us, I am sure my friends here on the floor are included, have tried to tighten it up as best they could to make it ministerial. I commend them for that.

It, nevertheless, is not going to be. It is a grant of power to the President. It is an abdication of our ability to control the purse of this Nation, and I can only say the tears are coming down my face. I have anguish in my heart. I simply wanted to come to the floor to express these views, and I thank my friends for allowing me to do so.

Mr. BARTON of Texas. It was a pleasure.

We have about 5 minutes. I will yield 1 minute to the distinguished Congressman from North Dakota.

Mr. DORGAN of North Dakota. I simply wanted to say again, having been listening to the remarks of the gentleman, that we all seem to be opposed to the deficit. I do not think I ever met anyone on the floor of the House in about 5 years who wanted to stand up and give a ringing call in support of Federal deficits.

The question is whether we are going through an exercise here that will lead to the same place that other exercises have led to in recent years.

We have this continuing debate between those who make policy in this town, the leader of our Government, the President, and the branch of Congress that has equal power under the separation of powers. We have this continuing debate about what we will do to actually solve the problem, what will bring the deficit under some amount of control.

We spend a little over 24 percent of the GNP in spending, and we raise about 19 percent on the revenue side, and the President says the solution is on the spending side only. Some of us say, "Well, we think that is part of the solution. The other part of the solution is on the 19-percent side."

Again I would say to the gentleman that with a tax system that has about $90 billion that is not collected that should be collected, with a tax system that legally allows a great many people to avoid the taxes that they ought to be paying, I think part of the answer is also on the revenue side.

Does the gentleman believe that and, if so, would the gentleman work with me to see if we cannot solve the revenue side of the problem as well?

Mr. BARTON of Texas. I thank the gentleman.

I would point out that in the years since I have been born, and I was born in 1949, the spending has gone up and taxes have gone up something like 2,000 percent for the average taxpayer, and we have not done anything to cut spending at all. Spending is increasing as fast now as it ever has.

The first thing we have to do is get spending under control. Until we do that, we could double the taxes on your average American taxpayer and still not bring the deficit under control.

I have about 1 minute left. I think we are going to do another special order immediately after this.

I would just like to wrap up by saying Gramm-Rudman-Mack is serious business. We have got to get spending under control. It is extremely important that we do so. It appears that we are going to have a chance to vote up or down on Gramm-Rudman-Mack tomorrow. I urge my colleagues in this body to vote in the affirmative on Gramm-Rudman-Mack.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Saunders, one of his secretaries.

□ 1715

ORDER OF BUSINESS

Mr. WALKER. Mr. Speaker, I ask unanimous consent that my special order may be called at this time.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

THE BUDGET

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. WALKER] is recognized for 60 minutes.

Mr. WALKER. Mr. Speaker, I yield to the gentleman from Georgia [Mr. GINGRICH].

Mr. GINGRICH. Mr. Speaker, I just wanted to make a couple of comments. First of all, I think the points the gentleman from Oregon was making are real. I think anybody looking at as sweeping and decisive an act as the Gramm-Rudman-Mack proposal has to recognize that it undoubtedly is going to contain a lot of complications, and we are undoubtedly going to have to revisit it a number of times over the next year or two.

But the point I would have made to the gentleman from Oregon was that I think there are people downtown in the executive branch who are as worried about this proposal as anybody on Capitol Hill, because I think that there are elements of the executive branch which have been interested in spending more money, and I say this in part as a cofounder of the Military Reform Caucus. I have felt for a very long time that we need to control spending on the defense side as much as we do on any other side, and I am glad to see us begin to grasp the issue of controlling spending.

I would also say that the reality is that Congress under the Gramm-Mack proposal will have the opportunity to pass a budget and then to pass an appropriate authorization bill that are under the limits set by the proposal, and that there is no automatic reason why we would have to go to sequestering or why we would have to be granting power to the President. The President only gets a ministerial capacity to control spending if the Congress fails to do its job.

Mr. WALKER. Mr. Speaker, if the gentleman will yield, I think the power-abdication question has been a very, very clear issue, and I think it is one that we need to address, and one that I think that concerns many Members of this body, among them those of us who have been supporters of the proposal. But the fact is that there is not a power abdication here by Congress under any set of circumstances. First of all, as the gentleman points out, Congress still has the ability to take the steps necessary in order to meet the test of reducing deficits without ever kicking in the sequestering formula, so that Congress can, by doing its job, assure that no sequestering and therefore the Presidential ministerial function never takes place.

Second, even if the President does become the minister of the finance as a result of our inability to do it, he has to proceed under a formula that we have provided by law. Congress has defined the formula whereby we grant the President that power.

Third, if at any time we find the President has abused that power in any way or it is not working as though we want it to, we have given this in a statutory procedure that we by majority vote of both bodies can withdraw. Of course, the President could veto that, but then by a two-thirds vote of Congress over a Presidential veto of that type we could withdraw that power.

So power abdication is not the real issue here in this gentleman's view. I

think that the question is whether or not we are going to use issues of that type in order to retreat from what is necessary to do on the side of controlling our finances.

One other point I would make in reference to the earlier remarks of the gentleman from Oregon [Mr. WEAVER]. My guess is that we gave up more power to the Executive by adopting rules here several weeks ago or several months ago now which limited our ability to provide legislative limitations on appropriation bills than any power abdication that is involved in the Gramm-Rudman-Mack approach. When we said to this body that the historic entitlement of Members to place on bills some language limiting spending in particular areas, things that have been used to limit spending, for instance, during the Vietnam war, and that that can only be done after defeating a motion to rise in the House. At that point we gave up more power to the Executive than we are giving up in this particular bill. That was an extremely important abdication of traditional legislative power which went through here very, very quickly because it was thought to be convenient to the Members.

So for our own convenience, we are willing to give up power. When it comes to the question of controlling finances, all of a sudden the power question comes up. I find that a little hard to rationalize, myself.

To the point made a few moments ago by my friend from North Dakota, I would say that the one reason why we on our side are somewhat reluctant to deal with the revenue side of the question, the tax side, is because the fact of the matter is that the expanding deficit is not a revenue-base question, it is a spending-base question. And while the gentleman makes a legitimate point that real pro-growth, pro-family tax reform would be the kind of thing that we ought to move toward as a country—and I would hope that ultimately the Ways and Means Committee might report that kind of bill to the floor—I would also say to the gentleman that we know that over the last several years that taxes have represented about 19 percent of gross national product, that that has been the historic pattern of tax revenue collection by the Federal Government, that we have collected 19 percent of GNP. That is precisely what we are collecting today, and in fact the growth of revenue has been at far larger over the last couple of years than the growth of the economy as a whole or than inflation. And so there has been real growth in the revenue flow under the present Tax Code, and today we are collecting 19 percent of GNP.

Mr. DORGAN of North Dakota. Mr. Speaker, will the gentleman yield?

Mr. WALKER. Well, just let me make my point.

However, deficits have expanded within that same period of time because we have moved from a spending pattern of 20 percent of GNP up to 24 percent of GNP at the Federal level. Today the Federal Government spends about 24 percent—a little bit better than 24 percent of GNP—for its programs. That has been a tremendous expansion that has taken place over a period of just a few years, and so it has been that gap which has widened which is the problem. And so therefore we say that what you need to do is deal with the side of the problem that is in fact expanding the deficit, being the spending side, and we think that you need to have mechanisms designed to at least halt the rise in that spending trend and then at that point, once you have done that, take a look at your revenue side and find out whether or not there is not something that can be done in terms of reform that we had better blend the system.

Mr. DORGAN of North Dakota. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from North Dakota.

Mr. DORGAN of North Dakota. Mr. Speaker, I appreciate the gentleman's yielding.

Mr. Speaker, first of all, when I came here, we were spending roughly $150 billion on defense. Now the budget authority is going to be close to $300 billion, slightly under $300 billion. It is about a $150 billion increase. There have been no increases in revenue to pay for that, and we have about a $211 billion budget deficit.

When the gentleman talks about spending, I agree, we have to exercise great spending restraint, but take a look at the two largest pieces of spending in the Federal budget. What are they? Defense and Social Security. I serve on the Ways and Means Committee. I have been through all of those Social Security hearings in the last several years. We made Social Security whole. In fact, as I understand it, there is a slight surplus in this fiscal year from Social Security.

So we took our lumps, made the tough decisions. I voted "yes" on that bill. We made Social Security whole. Put that aside for a moment, because that is not causing the deficit.

Take a look at the biggest part of the Federal budget, defense. We have increased that by about $150 billion in about a 5-year period, but we have not said the honest thing to the American people. If we need that kind of defense increase, we also have to have the courage to pay for it. Nobody said to the American people, "We've got to pay for this as we go. We know it's tough, we don't like to ask you to pay for it, but you have to."

We took, and the President especially took, the easy road. He said, "I'm going to increase that defense budget $150 billion, and we're going to charge it."

Now, one other point, if I might. The gentleman said something that I think is not quite accurate. The gentleman said that we were raising about 19 percent of GNP in the revenue base in years past, and we now have a revenue base of about 19 percent of GNP. And then the gentleman said we are increasing our revenue base as the economy expands.

Mr. WALKER. That is right.

Mr. DORGAN of North Dakota. The fact is that the revenue base is constant with respect to our economy. The gentleman said it himself. The spending side has increased to about 24 percent of the GNP, the major part of that stimulus coming from defense. The revenue side is still 29 percent of gross national product. That 5 percent represents the Federal deficit.

Now when the President says, or the gentleman says, or I say, "Let's force Congress to go off and fix this problem," they give us the puzzle, or it is a puzzle we create, and say, "All right, now it is our responsibility to fix it." Except a couple pieces of the puzzle are missing, and we can play with that puzzle for months and never get it solved because a couple of pieces are missing, the most important of which is not only spending restraint—and I am talking about tough spending restraint, as I am sure the gentleman is—but also revenue.

Let me make one final point, and I appreciate the generosity of the gentleman in yielding. Everyone in this House, everyone on the floor of this House, has their interest. The gentleman stood up yesterday in his interest, SDI. He wanted a very significant increase in the account on the defense bill. That is the gentleman's business.

Mr. WALKER. What I wanted to do is get back to the authorized level.

Mr. DORGAN of North Dakota. I understand that, but all I wanted to say is when we were dealing with an appropriation bill the gentleman said, "The SDI star wars stuff is important to me. I want a 100-percent increase in that versus spending last year." That is the gentleman's issue.

Mr. WALKER. No, I did not call for a 100-percent increase. No, the gentleman is wrong.

Mr. DORGAN of North Dakota. Well, the gentleman wanted a very substantial increase if you measure it over last year's spending, a very substantial increase.

Mr. WALKER. A 10-percent increase over the committee bill.

Mr. DORGAN of North Dakota. All I am trying to say is that the gentleman has his issue.

Mr. WALKER. True.

Mr. DORGAN of North Dakota. The gentleman is a conservative. The gentleman stands up when his issue is up and he says, "I want more money for mine." And then everyone else sitting in every other chair says, "This issue is important to me." And the collective problem that we all have is all of us saying, "Look, we're all going to have to give a little bit on everything—defense, domestic, and also revenue, and in that way we'll solve this problem."

All of us I think want to go to the same direction, the same place. We all come from the same cut of cloth here. We all want to solve the deficit problem. And yet I am just saying that given the pieces of the puzzle that we are furnished with, the President saying in his Clint Eastwood drawl, "Go ahead and make my day. Pass something that increases any revenues and I'll veto it." With that caveat, I am saying that I do not think we are going to get where we are supposed to go, because I do not think you can get there without all the pieces there. And I just hate to go through the exercise and then not end up where the American people darn well expect us to end up, with something representing fiscal policy in some kind of balance.

Mr. WALKER. Mr. Speaker, let me say that I thank the gentleman for his observations. Let me just say a couple of things in response before I yield to the gentleman from Arizona.

First of all, the defense question, I think the gentleman is absolutely right that we do have to look at that. I would say to the gentleman that I am perfectly willing to vote for cuts in areas of defense in order to see to it that we can fund things that I think are important for the future like star wars. And so therefore I have opposed things like the chemical weapons program and a number of other things in order to find the money necessary to do things that I think have more relevancy to the future, and my record is clearly one of attempting to find some balance within those programs.

Now the gentleman can make the point that we ought to all accept cuts on everything. I can probably accept that if that was in fact what really happens out there. But what I find is that too many people do not want to even try the balancing act on this floor, and as a result we end up with problems.

I do think we have an obligation within the process to determine priorities. That is what this gentleman does consistently. Most of my priorities, I think the gentleman will have to admit, when I come to the floor for amendments has typically been to reduce funding, and reduce it substantially, and sometimes I must admit that there are some things that I consider of intense priority enough that I am willing to offset some of those cuts with increases where it is important to the future of the country.

I also say to the point of the gentleman on taxes, here are the figures with which I am working. The economy last year, over the last year, at the highest point grew at 7 percent a year, at the highest point of growth. That was not the average for the year; I think the average for the year worked out to something around 5 percent. The revenue increase last year to the Federal Government was 10.1 percent, so that in fact revenue increases relative to revenue were growing faster than the economy as a whole was growing. That is that point that I was making: 10.1-percent increase in revenues to the Federal Government versus about a 5-percent increase in the economy as a whole.

Inflation, on the other hand, grew at about 3½ percent. So that in fact revenues were three times higher than inflation, and about twice as high—revenue growth—as the growth of the economy as a whole. Now that did not make much, because of the magnitude of what we are dealing with, that did not make much change in the overall revenue figures; the 19-percent figure grew only nominally. But nevertheless, it was an increase because the revenue flow to Government is increasing. The problem, I would say to the gentleman, is that we did not get any advantage out of the fact that economic growth was producing greater revenue flow, because Congress proceeded to spend last year at an 11.4-percent rate—the growth rate of Federal spending last year was 11.4 percent. And so the 10.1-percent revenue increase was wiped out by an 11.4-percent spending-rate increase.

If we had the guts to simply hold the rate of growth of Federal spending to 3.5 percent, where the inflation rate was, or even the 5 percent where the economy as a whole was growing, we would have ended up with a fairly significant surplus of revenues that could be applied against the deficit.

My contention is that one of the advantages of moving to the Gramm-Rudman-Mack approach is that we might be forced to set that kind of priority, and here are the figures. If, for example, last year we had been able to use the $65 billion in new revenue, approximately $65 billion—that is what the 10.1-percent increase would be—and we would have kept up with inflation only, only had an inflationary amount to the Federal Government, that would have been about a $35 billion increase.

□ 1730

That would have left us with $30 billion of growth-derived revenues, which then could be applied against the deficit. If you take the formula under Gramm-Rudman that says that we have to get $36 billion a year, that would have left us with only $6 billion to find; $6 billion, it seems to me, is a manageable amount. That is an amount that we can find using defense, entitlements, and a number of other things in order to get us on that downward trend.

I think that if we really begin to look at using growth-derived revenues against deficits, we could, in fact, begin to manage this process without taking massive cuts that so many on your side have indicated have to be taken out of all these programs. I do not think that is the case. All we have to do is discipline ourselves not to spend more in a given year in spending growth than the revenue growth is taking in.

Mr. DORGAN of North Dakota. If the gentleman will yield further, I just cannot think there are more than two dozen people left alive, and certainly no economists, who believe that growth-derived revenues will solve the problem. We have been living with that pill for about 2 years and we have been swallowing it and swallowing it and swallowing it and swallowing it.

The fact is, no responsible economist I know of says that we are going to grow out of this problem.

Mr. WALKER. Let me say to the gentleman, as I reclaim my time, the problem is that every time that we have had those growth-derived revenues, we have spent them all, plus some. That is where the deficit is coming from. Sure, the economists will not believe it under that scenario. They do not believe this Congress will cut its spending habits.

I am simply saying to the gentleman, the reality of the situation is that this year we took in $65 billion more than we did last year. Had we used that differently, and used it in part against the deficit, that in fact would begin to bring it down. But we did not. We spent even more. We spent 11 percent of approximately $900 billion, $95 billion, or $100 billion.

Mr. DORGAN of North Dakota. Does the gentleman have some statistics on where that went?

Mr. WALKER. I think it went to a lot of different programs. Obviously, it did not go very much to entitlement programs, though, because the cost of living would be about the inflation rate. There would be some above that. Some of it went to defense. The gentleman is absolutely correct.

Mr. DORGAN of North Dakota. And how much for interest on the debt?

Mr. WALKER. I do not have those figures here in front of me because I am just working off notes I have made to myself, but I would say to the gentleman if, in fact, he is talking about the fact that the defense budget has gone up $150 billion during the time he has been here, my guess is, based upon the figures I have looked at, that

social programs have gone up even more; that if he takes a look at the social program area that the rise in spending has been more than that $150 billion in his time in the Congress.

Mr. DORGAN of North Dakota. Is the gentleman speaking of Social Security and Medicare, for example?

Mr. WALKER. Not necessarily Social Security, but I would include Medicare, Medicaid, the AFDC Programs, a lot of the social welfare entitlement programs, food stamps, all of those. My guess is, if you add those all together in the domestic spending program areas that the cost of those programs has gone up just as much, if not more, than defense spending in that same period of time, because as the gentleman well knows, we have over a 20-year period moved from a 45 percent of Federal budget level of spending for defense down to about a 29-percent level of spending for defense today. In terms of the budgetary impact, we now have about 45 percent of all spending going for domestic programs, which is a direct reversal of what it was 25 years ago.

Just the magnitude of the programs would indicate that there has been a spending increase in that area almost equal to the defense spending increases.

Mr. DORGAN of North Dakota. If the gentleman will yield further, he is comparing apples and oranges. As he well knows, in the early 1960's when they were making these famous comparisons of what percent of the GNP was spent on defense, the Social Security System was a separate trust fund. In the late 1960's, of course, President Johnson brought it into the unified budget and now it exists there.

Mr. WALKER. I cannot let the gentleman get away with that, because we do not compare apples and oranges on those figures. We go back and we utilize the Social Security figures for that period of time, too. We blend in the Social Security. It would be unfair to use that kind of figure.

What we do is go back and derive the figures from what would have been a unified budget at that point, and the figure I am quoting the gentleman is based upon a unified budget. Even though it did not exist at that time, the figures that we are deriving are based upon having a unified budget at that point.

Mr. DORGAN of North Dakota. If I might interject one more time, I would say this to the gentleman: There is no question that the Federal budget has fat in it and it exists in a good number of places.

If we do not deal with Social Security for the moment, because we have made that system whole, we have increased taxes, we have taxed Social Security above $32,000 per couple, we have done a dozen different things——

Mr. WALKER. That is why Gramm-Rudman does not deal with it, as the gentleman knows.

Mr. DORGAN of North Dakota. All right, but I am saying set that aside for the moment and then set interest on the debt aside, which is one of the fastest growing items in the Federal budget, and which has grown radically since I have been here——

Mr. WALKER. Because of high interest rates. High interest rates make a big difference in that.

Mr. DORGAN of North Dakota. There is no question about that, and we probably agree on the Federal Reserve Board, I do not know, but I think the Federal Reserve Board has steered an almost drunken course of monetary policy that no one can define, or no one can predict.

Mr. WALKER. We do agree.

Mr. DORGAN of North Dakota. And that has not been good for this country. But aside from that, I am saying if you take that basket of money that we spend at the Federal level that the gentleman calls entitlements, programs basically for the poor in this country, and go out and represent a poor person for a week or two yourself and live on them, you will see that the amount of money we have spent on those, both in the aggregate in the budget, if you take Social Security and Medicare away, and the aggregate has not increased very radically in the last 5 years in the budget and certainly has not increased at all with respect to the person who is having to live on those kinds of assistance from the Federal budget.

All I am saying is that I think that we now spend about 24 percent of the GNP. We can cut that. We are probably not going to cut it back to 19 percent because the gentleman would not vote for the kind of defense cuts that would be necessary to get back there. If we are going to solve this problem seriously, because again, we have seen all these gymnastics in the well for years about the deficit down payment—remember that program?—the deficit down payment, we heard that for months and months and months. We got the down payment and got that all squared away. It was a compromise, I agree, between everybody, and then the deficit increases. The gentleman will explain why it increased, but the fact is that these progams do not work unless we have all the pieces with which to solve the puzzle. It includes spending restraint. It includes asking those people in this country who do not now pay taxes when they should to start paying those taxes to the Federal Government. That is a tax increase as the President defines it, but that is tough luck. That is precisely what we ought to do, and his standing in the way of that, in my opinion, jeopardizes our ability to finally solve this fiscal problem and I am hoping he will re-think his position. I am hoping the gentleman and I and others on this floor can compromise sufficiently so that we do what we need to do, not only for the defense of this country, and we should, but also for the people in this country who need help through our social programs.

Mr. WALKER. As the gentleman well knows, the problem is not with the idea of, through a revenue mechanism, finding a way to get those people to pay taxes who do not now pay. The trouble is that most of the mechanisms that have thus far been derived in order to try to do that end up also making people pay more who are now paying more than their fair share of taxes. That is the real problem.

In many cases, the other problem is that, for instance, if we change the corporate tax structure, and so on, for minimum corporate taxes, as has been suggested by some people, we wipe out the ailing steel industry, which is already in trouble. The few profitable elements of the ailing steel industry that have used, for instance, investment tax credits in order to stay whole end up being wiped out by an approach which requires a minimum corporate tax. That would not be the intention of it, but the fact is that it would have that impact. It would be particularly devastating in the older industrial belt, in what some have called the Rust Belt at the present time. That kind of program would be particularly devastating in undercutting the very industries that are now struggling to survive.

I would say to the gentleman that I do not think that in the name of doing some of these things that we ought to; No. 1, destroy industries that are now struggling to survive; or No. 2, make people who are now paying more than their fair share of the taxes pay even more in order to catch some others.

I would favor changes in the tax code that could literally target people who are not now picking up their fair share, but not at the expense of the great middle class of this country who I think at the present time are paying more than their fair share.

Mr. DORGAN of North Dakota. Might I understand what the gentleman is saying? Not only does he selectively on occasion want an increase in spending, as he witnessed yesterday, but he also on some occasions supports certain tax preferences if it goes to something he thinks is important. The investment tax credit is an interesting example. The ailing steel industry is an especially interesting example. Those ailing in the steel industry are not earning great incomes on which they are paying substantial income taxes, as the gentleman well knows.

□ 1740

And their problem is not a tax code, their problem is represented by a dozen different things, including trade policies.

Mr. WALKER. And the gentleman well knows that trade policy is in large part a problem derived from deficits that have overpriced our products on world markets and made us uncompetitive.

So we have come full circle, it seems to me, and we come back to the reason why I am standing here tonight supporting Gramm/Rudman/Mack, because I think that what we need is a deficit policy in this country that then helps us get a tax policy, helps us get a trade policy, helps us get at farm policy and all of the various other plagues that are upon the land at the present time, largely growing out of the fact that this Government has been spending more than it has been taking in.

Mr. KOLBE. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Arizona.

Mr. KOLBE. I thank the gentleman from Pennsylvania for yielding.

We have gotten a little bit away this evening in this discussion, as I have been listening to it here, from the discussion of the Gramm-Mack amendment. But I think this discussion about taxes is very useful, and I think the gentleman from Pennsylvania put his finger on it a few minutes ago when he spoke of the fact that last year alone, the tax revenues grew, our revenues to the Federal Government, by more than 10 percent.

Mr. WALKER. 10.1 percent.

Mr. KOLBE. But spending grew by 11.4 percent, a difference there of 1.3 percent.

The gentleman from North Dakota [Mr. DORGAN] said earlier there is not an economist around that believes we are going to grow out of the problem of spending and to grow out of the deficit. We do not have a stagnant revenue base in this country. We have a growing economy, and as the gentleman from Pennsylvania pointed out so well, tax revenues are growing at a very substantial rate.

The problem is that Congress cannot control its own appetite to control spending, and yes, we could grow out of this deficit if we would just restrain ourselves on the spending side; it would be possible not overnight, not in 1 year, but it would be possible for us to get ourselves out of this box if we could really control our spending appetite.

It seems to me that is exactly what Gramm/Mack is all about. I have listened for the last several days to the national media, and read discussions in the newspapers and heard discussions on the floor of this body about all of the technical things wrong with Gramm-Mack, and we need to look at those and make sure it is in the best possible condition that it can be. But the real issue that is involved, it seems to me, in the Gramm-Mack amendment is a fundamental question: When is this body going to establish priorities in spending? When are we going to face up to the tough choices that we have to make about spending? When are we going to stop borrowing from our children and our grandchildren? When are we going to stop spending their inheritance in this country? When are we going to deal with the questions of spending.

The American people understand that issue very well.

A couple of weeks ago I was in my district and I went to one of the rural parts of my district and we had some car trouble. We stopped at a service station to get the car fixed, and the hose on the radiator was broken. The guy was under the hood working on the radiator hose, and while he had his head under the hood there, he was yelling at me all the time, when he found out that I was his Congressman, and he said, "If you guys don't do something about that spending here in Washington, I'm going to lose my business here," and he said, "And you are going to be out of a job, too." He said that in a pleasant way. But I think the threat is one that all of us ought to heed here.

The American people, whether it is in Sun City, AZ, or whether it is Chicago, IL, understand what this deficit problem is about. And they want something done to control spending.

We are raising enough money in taxes. We need fair taxes. We need to make sure people are paying their taxes, but the answer is not to increase the tax burden on people. Every time we come around to say we want to make taxes fair, we just increase taxes on people, it seems to me.

Mr. WALKER. I think maybe what we ought to do is to go through and break down the figures again for people because it is sometimes difficult for people to understand when we deal with percentages as to just what it is so people have some grasp of what we are talking about of how growth could make a difference here.

When we talk about, for instance, that the revenues to the Federal Government rose by about 10.1 percent, what does that mean? What it means, in essence, is that we collected $65 billion more in revenues for the Federal Government for the last year than we did the year before, a very substantial amount of money. Because we are around a $650 billion revenue level at the Federal Government, and it may be even a little bit more than that—I am using an old figure. That is the one that comes to mind. It may be closer to $700 billion at the present time, but let us take the lower figure just so that I make sure that I am near ways accurate; 11.4 percent growth in spending is a whallop of a lot of money, because you are talking about a trillion dollar budget. You are talking about a budget somewhere between $900 billion and $1 trillion. So when you increase that by 11.4 percent, you are talking about something on the order of $100 billion in increases in spending.

The difference between $65 or $70 billion in revenue growth and $100 billion of add-on spending is $30 to $35 billion of add-on deficit. The money that we spent new, that we did not collect new, we have to borrow, and that is our problem. Every year we are doing that kind of add-on.

The problem is not that we do not have revenue growth. We do. And if we could discipline ourselves in such a way that we would not spend more than what the economy as a whole could sustain, or what inflation was demanding that we spend, you could begin to use growth-derived revenues.

Let us say, for example, in that trillion dollar budget that you only spent what inflation required you to spend; that is, $35 billion that you would end up spending anew, $65 billion of increased revenues, $35 billion worth of spending. All of a sudden you have $30 billion to apply against the deficit if you simply live within inflation. If you live within the economy, the economy as a whole rose about 5 percent. That is $50 billion. If we live within the range of economic growth, we still end up with $15 billion or $20 billion that can be applied against the deficit.

That is what we ought to be doing. In no way should Government be growing faster than the economy as a whole, and it seems to me in times of crisis, we ought not be growing any faster than inflation requires us to grow.

Mr. KOLBE. I appreciate what the gentleman just said, and I think again he has put his finger on it, and the question is one of discipline. We have heard that word over and over again on the floor of this body in the last several days. What are we going to do to discipline ourselves? I do not know how the gentleman feels, but I found myself today very dismayed when earlier in the discussion that we had today on the reconciliation for the Ways and Means Committee, we addressed the question of whether or not we were going to try to change, send the rule back and get a different rule so that we could come with an amendment that might allow us to address new spending authority, new budget authority in the Medicare and Medicaid Programs.

Now, if, and probably most of the people in this body would agree, and certainly most Americans would agree that if we cannot restrain our appetite

on new spending, new programs, we are going to have a hard time ever controlling spending. And so today we had a demonstration of the inability of this body to impose that discipline on itself that Gramm-Mack clearly brings, would bring about or help bring about. In fact, I think that is the reason that so many Members are really scared about adopting Gramm-Mack, because it is going to force this body to make some tough choices. Some of them are going to be choices that I am not going to want to have to make. I will be very honest, there are going to be tough decisions for me, and there is not going to be a Member of this body that is not going to have to make some difficult choices here. But someplace we have to start that. We cannot keep on doing as we have been doing and it is clear we do not have the discipline to do it ourselves.

We have had a Budget Act since 1974 which is an absolute shambles. We paid no attention to it this year. We adopted a budget resolution which says we are going to cut $51 billion out of spending in the next year, and what do we do? We come back after the Labor Day recess and we vote every single appropriation bill that has come to the floor of this House that has come with a waiver on it, and most of them had the waivers because they have been increases in spending over what the budget resolution contemplated.

Mr. WALKER. If the gentleman will let me reclaim my time for just a moment, one of the interesting things was that the defense authorization, after hearing all of this talk about defense spending, which happens to be a priority this gentleman thinks is important to the country, I think defending this Nation is, in fact, an important priority, and I know under Gramm-Rudman-Mack I am going to have to swallow hard on some of the things that we are going to have to do in defense, but so be it. But even on the defense authorization, we hear so much talk about defense has gone up so much, and they come to the floor with a rule that had a budget waiver in it and they waived the Budget Act in order to spend more money in defense, after all of this talk we have heard about defense, and nearly everyone who has been out on this floor talking that language voted for the rule to waive the Budget Act for defense.

So the gentleman is absolutely correct, the rhetoric just is not matched by the actions, and that is the problem, that is the reason why we have the deficit.

I will be glad to yield to the gentleman from Arizona.

Mr. KOLBE. I appreciate the gentleman yielding.

Again, the national defense is a priority of mine as well. It is something I think is certainly one of, if not the foremost responsibility the Federal Government has to the people of this country, to provide for our national defense.

But I have made the point all along that we have an even more overriding problem right now, and that is literally the economic survival of this country, and we are not going to survive if we do not get a handle on this spending problem.

So I believe that defense is going to have to take its share of the cuts too. And I have voted for making those cuts. I voted for spending no more than we have spent in terms of the budget authority for next year.

Mr. WALKER. If the gentleman will let me reclaim my time just a moment, let us understand that when the gentleman talks about cuts, and when I talk about cuts within the context of a growth-oriented process, that we are talking about cuts in increases, not real cuts in programs, in most instances, be they social programs or defense programs and so on. Under this scenario I just sketched a few moments ago, you could allow a defense program to grow at the rate of inflation, you could allow social programs to grow at the rate of inflation, you could allow COLA's that did not exceed inflationary increases to go forward. You could allow all of those things to happen and still, and still get yourself growth-derived dividends for application against the deficit if we simply would stop spending new money, stop add-ons, stop all of the things that go beyond that.

So, you know, cuts are a relative term here rather than a real term in many ways.

I will ge blad to yield back to the gentleman from Arizona.

Mr. KOLBE. I appreciate the gentleman yielding again. It is very apparent to me from the kind of budget resolution we adopted, and the kind of action we take when it comes to the real gut issues, which is the spending of the actual appropriations for those programs, it is apparent that a lot of people in this body would like to have it both ways. It is a popular thing to do. You would like to be able to go home and say I voted for a tough budget resolution which is cutting $51 billion out of spending over the next year, and then you come back and vote for appropriation bills that increase that spending. So then you can go down the street to whatever interest group there may be. As I point out to every town hall that I have talked to, everybody in that audience is a member of a half a dozen or a dozen special interest groups, whether they are veterans, whether they are farmers, whether they are senior citizens, whatever it is, we are all a member of a variety of special interest groups, and we like to be able to go back to that special interest group and say I voted $200 million more for your program this year than you got last year, and that is what cannot continue, it seems to me. We have got to put a stop to that. The American people understanding that, they know that.

I would like to share with you just one thing we have done in my district in the last couple of weeks because I am so convinced this issue is of such priority, and that the American people believe that it is. When the Gramm-Mack amendment went to the conference committee with instructions from the House of Representatives to enact some tough deficit reduction programs, we organized back in Congressional District 5 of Arizona an ad hoc, informal committee to stop overspending now, we called it, the SOS Now Committee, which consists of business people, consists of retired people, citizens who just came together to try to get grassroots support, grassroots pressure on the Congress of the United States to do something about this deficit reduction. And we have been circulating letters, letters back to the leadership of the House of Representatives, to the conferees, asking them to adopt the Gramm/Mack amendment.

Monday, while I was in my district, one person, a realtor, came into my office. She had collected in just 10 days that she had the letter, and had duplicated all kinds of signature pages to go behind it, she had collected herself 518 signatures in 10 days on that letter to the leadership saying do something about deficit spending now. The mayor of the city of Tucson took the letter and just put it on his desk there in his office, and he pointed it out to people as they came in, and he has had employees, people coming in his office standing in line to sign that letter.

The American people understand this issue and they want action. They are watching what Congress is going to do. I think that it is the people of the United States that are watching, and certainly the credit markets around the world and in this country are watching. This is the last best chance we have to really do something serious about reducing the deficit.

□ 1755

We have got to do it now, and I think that is why the gentleman and I are here this evening; urging the leadership of this House, urging our colleagues to bring that issue back to the floor so that we can have a straight up-or-down vote. Let the people decide, let the Members of this body decide whether or not we really want a meaningful deficit reduction program.

Mr. WALKER. Reclaiming my time, to paraphrase the President a few months ago, "If not us, who? If not now, when?"

Mr. KOLBE. I could not agree more with what the gentleman said.

THE HEALTH CARE SAVINGS ACCOUNT ACT OF 1985

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia [Mr. SLAUGHTER] is recognized for 20 minutes.

Mr. SLAUGHTER. Mr. Speaker, in the last few weeks newspaper headlines around my district and throughout the Nation reported that next year the fees Medicare beneficiaries pay to enter hospitals will increase by 23 percent. That means that the out-of-pocket deductible payment will go up on January 1 from its present $400 level to $492 for each Medicare recipient admitted to a hospital.

We can expect these headlines to continue for years to come unless we act to end the vicious cycle of benefit cuts, payroll tax increases, and freezes on providers so long offered in Congress as "solutions" to Medicare's financial problems.

And the situation is getting worse. Medicare's trustees are predicting the financial collapse of the Medicare system sometime in the 1990's which can only mean that more benefit cuts, tax increases, or both, are on the way.

Our elderly deserve better. The taxpayers of this country deserve better.

We do not have to continue down this road to further benefit cuts, tax increases, and financial crisis. On October 3, I introduced with three of my colleagues—Congressmen CRANE, DREIR, and SILJANDER—what we believe is an alternative route: The Health Care Savings Account Act of 1985, H.R. 3505.

This legislation could solve the financial problems of the Medicare system without benefits cuts for our elderly, tax increases on our citizens, or freezes on payments to our health care providers. It does this by maintaining Medicare payroll taxes in full to pay for current benefits while providing incentives for increased savings by today's workers to use for health care costs in retirement before tapping the Medicare fund.

In addition, this proposal would put downward pressure on health care costs by increasing competition in the health care industry. With out-of-pocket health care costs for the elderly rising at the rate of 11.4 percent per year since 1980, this aspect of the proposal would have a very positive effect on the standard of living of our elderly.

I encourage my colleagues to join a growing bipartisan list of cosponsors of the Health Care Savings Account Act to ease the burdens on our Nation's elderly, as well as our Nation's workers.

SOVIET FORCES IN AFGHANISTAN: A MAJOR ISSUE AT THE UNITED STATES-SOVIET SUMMIT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. KEMP] is recognized for 15 minutes.

Mr. KEMP. Mr. Speaker, I am proud that President Reagan has committed himself to making Afghanistan a major focus of his upcoming talks at Geneva with Soviet leader Mikhail Gorbachev. The summit is the first opportunity since the invasion of Afghanistan for an American President to personally express to a Soviet ruler the deep hope and expectation of the American people that the Soviets will withdraw their soldiers from Afghanistan and allow democracy and self-determination to prevail in this beseiged country.

With the summit only a few weeks away, the United States Congress should send a clear signal to the Soviet regime that the American people are deeply committed to the spread of freedom and the protection of human rights throughout the world. We can begin by reaffirming our own faith: That the rights of every citizen to life and liberty are inalienable rights so fundamental that they are beyond the power of any individual to relinquish or any government to take away. These rights apply as much to Afghan citizens and the Soviet people as to all Americans.

Therefore, along with 33 other Members of Congress, I am introducing a bipartisan congressional resolution on the upcoming meeting in Geneva between President Reagan and Soviet leader Mikhail Gorbachev. The resolution condemns the flagrant human rights abuses committed by the Soviets in Afghanistan and expresses Congress' intent that negotiations begin with the Soviet Union that lead to the withdrawal of outside troops from Afghanistan, the return of Afghan refugees, and the restoration of self-determination and independence.

A similar resolution has been introduced in the Senate by Senator GORDON HUMPHREY.

It is now beyond doubt that the Soviets are engaged in gross violations of basic human rights in Afghanistan. In fact, everything we know points to the fact that the Soviets are conducting a concerted campaign of genocide against the Afghan nation. This has been substantiated by Helsinki Watch, Amnesty International, a forthcoming special United Nation's report on human rights in Afghanistan, and thousands of personal accounts from Afghan refugees.

Since the Soviets invaded Afghanistan 6 years ago, 27,000 people have been executed in just the Poli Charki concentration camp, including diplomats, engineers, professors, spiritual leaders, and doctors; in short, any person with even a remote connection to Western life or culture.

Amnesty International estimates that 4,854 prisoners have been killed more or less clandestinely. And a United Nations report says that approximately 9,000 individuals disappeared in Kabul before the coup of December 27, 1979. The Soviets continue to carry on a campaign of destruction of farmland, crops, villages, and countryside, inflicting widespread starvation and famine throughout the country. Indeed, the scope of famine and the resulting starvation in Afghanistan is fully comparable to the Ethiopian tragedy, according to international reports.

Jean-Francois Revel in a recent article notes that more than 4½ million Afghans have fled the country since 1978, mostly to Pakistan. It is an astounding fact that more than one out of every two refugees on this planet today is an Afghan.

According to Revel: "If you add to this figure the number of resistance fighters killed, of those executed, of civilians massacred or starved to death (a figure that can prudently be put at a million) this means that of the 13 to 14 million inhabitants of the country in 1978 there remain today on Afghan soil about 8 million." "Put otherwise," says Revel, "nearly 40 percent of the population is either in exile, or dead."

Afghanistan is on the front lines of freedom. The Afghan people are paying with the supreme sacrifice of their lives. But the Afghan fight is our own fight. If they fail, freedom throughout the world will take a heavy blow. If they succeed, the chances for freedom everywhere are advanced.

The Afghans have imposed a heavy toll on the Soviet-backed government. Afghanistan is costing the Soviet Union $4 billion a year. Since 1979, they have lost 750 planes in Afghanistan, mainly on the ground. The guerrillas now control twice as large a portion of Afghanistan as they did when they started. And CIA Director William Casey estimates that the Soviets, who are increasing their troops from 100,000 to 200,000, would have to commit an additional 400,000 soldiers into the country in order to pacify it.

The Soviets are searching for ways to get out of Afghanistan, according to CIA Director Casey. If the Afghan people can maintain their determination, surely the American people must also maintain optimism and hope; and we must give the Soviets additional reasons to come to a quick accommodation. The strongest tide in history is the tide of human freedom. And I really believe that a turning point has been reached. The forces of totalitarianism are receding to the tide of human rights and democracy throughout the world.

This resolution is not a substitute for firm action. Nor do we pretend it will induce the Soviets to leave Afghanistan or cause them to begin to show respect for basic human rights.

But in the face of widespread human suffering and flagrant human rights abuses, civilized nations cannot remain silent. We are compelled to speak out, to affirm the sacred Afghan cause and express our solidarity for their courageous resistance against the Soviets.

We must also speak out because there appears to be an emerging opportunity for

peace with freedom in Afghanistan. It is appropriate, therefore, that we join in one united and unceasing voice of praise for the Afghan freedom fighters and their noble cause—until the Soviets have left Afghanistan and allow the Afghans and their families to live in peace and freedom. The spirit of the Afghan people will not be broken. But we can nurture that spirit by reaffirming that the American people embrace the Afghan cause as their own.

Therefore, join with us in this resolution to honor the great struggle of the Afghan people and proclaim their right to democracy and self-determination. And let us pray that someday the forces of tyranny will finally be lifted from this Earth and that all nations under God will respect the sacred and inalienable rights of mankind.

NICARAGUAN TRADE CONTROL REGULATIONS—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 99-120)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Foreign Affairs and ordered to be printed:

(For message, see proceedings of the Senate of today, Thursday, October 31, 1985.)

CONFERENCE REPORT ON H.R. 3036

Mr. ROYBAL submitted the following conference report and statement on the bill (H.R. 3036) making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain independent agencies for the fiscal year ending September 30, 1986, and for other purposes:

CONFERENCE REPORT (H. REPT. 99-349)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3036) making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain independent agencies for the fiscal year ending September 30, 1986, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1, 2, 4, 5, 6, 8, 9, 10, 13, 15, 16, 17, 18, 22, 23, 28, 30, 31, 32, 33, 34, 35, 37, 38, 39, 40, 44, 46, 56, 57, 58, 60, 65, 67, 72, 74, 80, 81, 82, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 99, and 100.

That the House recede from its disagreement to the amendments of the Senate numbered 7, 11, 12, 21, 24, 25, 26, 27, 29, 43, 48, 49, 50, 53, 54, 59, 62, 63, 66, 69, 73, 75, 77, 78, 79, 95, and 96, and agree to the same.

Amendment numbered 14:

That the House recede from its disagreement to the amendment of the Senate numbered 14, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$717,000,000*; and the Senate agree to the same.

Amendment numbered 36:

That the House recede from its disagreement to the amendment of the Senate numbered 36, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert, *$294,000,000*; and the Senate agree to the same.

Amendment numbered 41;

That the House recede from its disagreement to the amendment of the Senate numbered 41, and agree to the same with an amendment, as follows:

Restore the matter stricken and inserted by said amendment, amended to read as follows:

For payment to the Postal Service Fund for revenue forgone on free and reduced rate mail, pursuant to subsections (b) and (c) of section 2401 of title 39, United States Code; $820,000,000; and the Senate agree to the same.

Amendment numbered 45;

That the House recede from its disagreement to the amendment of the Senate numbered 45, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$37,299,000*; and the Senate agree to the same.

Amendment numbered 70:

That the House recede from its disagreement to the amendment of the Senate numbered 70, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,100,000*; and the Senate agree to the same.

Amendment numbered 83:

That the House recede from its disagreement to the amendment of the Senate numbered 83, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows:

SEC. 513. None of the funds appropriated under this Act shall be obligated or expended to implement, promulgate, administer, enforce, or reissue the proposed Office of Personnel Management regulations and the proposed Federal Personnel Manual issuances published in the Federal Register on March 30, 1983, on pages 13341 through 13381, as superseded by proposed regulations and Federal Personnel Manual issuances published in the Federal Register on July 14, 1983, on pages 32275 through 32312, and as further superseded by proposed regulations and the Federal Personnel Manual issuances published in the Federal Register on October 25, 1983, on pages 49462 through 49498: Provided, That this section shall expire on May 15, 1986.

And the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 3, 19, 20, 42, 47, 51, 52, 55, 61, 64, 68, 71, 76, 97, and 98.

JOINT EXPLANATORY STATEMEMT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3036) making appropriations for the Treasury Department, the United States Postal Service, the Executive Office of the President, and certain Independent Agencies for the fiscal year ending September 30, 1986, and for other purposes, submit the following joint statement to the House and Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

TITLE I—DEPARTMENT OF THE TREASURY

OFFICE OF THE SECRETARY

Amendment No. 1: Deletes language proposed by the Senate which would have authorized certain activities overseas.

Amendment No. 2: Makes available $22,000 for official reception and representation expenses as proposed by the House instead of $105,000 as proposed by the Senate.

Amendment No. 3: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate amended to read as follows:

In lieu of the matter proposed by said amendment, insert the following:

: Provided, That none of the funds appropriated by this Act shall be available for the salaries and expenses of the Office of the Assistant Secretary of the Treasury for Enforcement of Operations if any of the following products of the Union of Soviet Socialist Republics are entered, or withdrawn from warehouse, for consumption in the customs territory of the United States after December 31, 1985 unless the Commissioner of Customs is provided with sufficient information pursuant to 19 CFR 12.43 attesting to the fact that the products have not been produced, manufactured, or mined (in whole or in part) by forced labor, convict labor, or indentured labor under penal sanctions:

(1) gold ore,
(2) agricultural machinery,
(3) tractor generators,
(4) tea,
(5) crude petroleum,
(6) motor fuel,
(7) kerosene, and
(8) any other product that the Commissioner of Customs

determines to have been produced, manufactured, or mined (in whole or in part) by forced labor, convict labor, or indentured labor under penal sanctions: Provided further, That none of the funds appropriated by this Act shall be available to hinder or impede the Commissioner of Customs in making determinations under subsection (8) of the preceding proviso

The Managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

This amendment withholds funds for the salaries and expenses of the Office of the

Assistant Secretary of the Treasury for Enforcement and Operations if Section 307 of the 1930 Tariff Act is not enforced.

The Conferees note that the Commissioner of Customs has the exclusive authority under 19 CFR 12.42(e) to deny the importation of goods on which there is reasonable but not conclusive evidence that such goods were made by forced labor in accordance with Section 307 of the 1930 Tariff Act, and to enforce this regulation by promptly notifying his district directors to withhold release of such merchandise.

The Conferees are aware that, pursuant to regulation, the Commissioner of Customs twice has made the determination that certain articles are now being imported into the United States which are being produced with the use of convict, forced or indentured labor (September 28, 1983 and December 2, 1983). Despite making findings that such goods are being presented for entry into the United States, enforcement of the ban on importation of such goods has not been enforced.

This amendment withholds funds for the Office of the Assistant Secretary of the Treasury for Enforcement and Operations who has jurisdiction over this law if the goods listed as identified by the Customs Commissioner of December 2, 1983, are not barred entry into the United States under 19 CFR 12.42(e).

Amendment No. 4: Appropriates $54,274,000 for salaries and expenses as proposed by the House instead of $76,400,000 as proposed by the Senate. The Conferees request that the Office of the Secretary provide the Committees on Appropriations additional justification for the proposed consolidation of these two accounts.

INTERNATIONAL AFFAIRS

Amendment No. 5: Restores a provision proposed by the House but deleted by the Senate which appropriates $22,442,000 for International Affairs. The Senate had proposed to consolidate this activity with the Office of the Secretary into a single appropriation.

FEDERAL LAW ENFORCEMENT TRAINING CENTER

Amendment No. 6: Deletes a provision proposed by the Senate which permits the purchase of certain types of motor vehicles without regard to the general price limitation contained in the Act.

Amendment No. 7: Appropriates $23,803,000 for salaries and expenses as proposed by the Senate instead of $25,500,000 as proposed by the House.

The Conferees direct the Office of Management and Budget, the Secretary of the Treasury, and the Director of the Federal Law Enforcement Training Center to provide the full cost of basic law enforcement training for the agencies that train at the Federal Law Enforcement Training Center, in the fiscal year 1987 budget of FLETC. The conferees also direct the Secretary of the Treasury, in cooperation with the Director of FLETC to conduct a comprehensive study and develop a detailed plan for establishing an anti-terrorist training program for all affected law enforcement personnel in fiscal year 1987. The conferees expect the Secretary of the Treasury to report by no later than January 1, 1986 on compliance with these directives and progress by that date.

The additional $6,000,000 provided above the budget estimate is to be used for the construction of the first wing of a new dormitory at FLETC.

BUREAU OF ALCOHOL, TOBACCO AND FIREARMS

Amendment No. 8: Appropriates $174,212,000 for salaries and expenses as proposed by the House instead of $178,825,000 as proposed by the Senate.

The Conferees note with deep concern problems facing the Bureau of Alcohol, Tobacco and Firearms with regard to the enforcement of machinegun kit violations. The Bureau has been hamstrung by statute which gives the Bureau jurisdiction over machinegun kit violations but no jurisdiction over machinegun kit parts. The same problem exists with the Bureau's enforcement of silencer and muffler violations. The Conferees therefore request the authorizing committees to take timely action to address this problem in lieu of the Conferees including language in this bill which would amend the law.

Amendment No. 9: Deletes a provision proposed by the Senate which would have permitted the purchase of certain types of motor vehicles without regard to the general price limitation contained in the Act.

Amendment No. 10: Deletes a provision proposed by the Senate which would have delayed the Bureau from promulgating or enforcing any final rulemaking or other action concerning the labeling of low or reduced alcohol distilled spirits. The Conferees direct the Bureau to allow an additional 90 days for comments from the public on this issue.

U.S. CUSTOMS SERVICE

Amendment No. 11: Authorizes the purchase of up to 500 motor vehicles as proposed by the Senate instead of limiting the procurement to 200 motor vehicles as proposed by the House.

The Customs Service has in current years faced a restriction on replacement of vehicles. The Service has approximately 3,000 vehicles and has been limited to replacing only 200 per year. As a result of the 15 year replacement cycle a vast majority of the existing fleet exceed current mileage and age limitations with regard to replacement. The Conferees wish to reverse this trend and have, therefore, acted to allow Customs to increase the replacement rate.

Amendment No. 12: Authorizes the purchase of 490 motor vehicles for police-type use as proposed by the Senate instead of limiting the purchase to 190 vehicles as proposed by the House.

Amendment No. 13: Makes available $10,000 for official reception and representation expenses as proposed by the House instead of $15,000 as proposed by the Senate.

Amendment No. 14: Appropriates $717,000,000 for salaries and expenses instead of $725,000,000 as proposed by the House and $709,000,000 as proposed by the Senate.

The Conferees direct the Customs Service to withdraw 19 CFR Part 142.4(c) which removes the requirement for a surety on a customs bond valued over $250 but not over $2,500 since such rule is violative of Section 511 of this bill and Section 511 of H.R. 5798 which was incorporated by reference in Section 101(j) of P.L. 98-473.

The Conferees direct the Customs Service to report by March 1, 1986 on the feasibility of establishing pre-clearance of Japanese travellers bound for Hawaii. In preparing its report, the Customs Service shall solicit the views of the States of Hawaii and Hawaii's travel industry and make these views available to the committees with its report.

The Conferees concur in the language contained in the House report regarding section 114 of P.L. 98-473.

The Conferees note that the production or possession of child pornography is illegal in the U.S. in accordance with the Child Protection Act of 1984, and directs the Customs Service to investigate means for stepping up enforcement of this law in seizing objectionable materials entering the U.S. from outside. The Congress is firmly committed to assisting the Customs Service's enforcement procedures and towards that end, supports having pornographic material forfeited to the U.S. Attorney in the district at the point of delivery rather than released at the port of entry.

The Conferees are agreed that the Customs Service should follow existing law concerning payment of overtime and also agree that the language contained in Senate Report 99-133 on overtime is not necessarily binding on the Service.

The Conferees understand the increased need for U.S. Customs inspection personnel at the preclearance facility in Nassau, Bahamas due to the expanding commercial air traffic from the U.S. mainland. So that maximum facilitation benefits are realized from the preclearance process, and delays at U.S. airports are minimized, the U.S. Customs Service is directed to assign two full time inspectors and two part-time inspectors to the perclearance facility at Nassau no later than November 15, 1985.

The Conferees are concerned that in certain instances where U.S. flag carriers operate their own international arrival terminals that Customs provide them service to meet all their scheduled flights at those terminals. It is recognized that the U.S. carriers must schedule their international flights, not only to be competitive with foreign carriers, but to utilize their aircraft to the fullest possible extent. Since deregulation, the U.S. carriers have had to organize hub and spoke operations at major international gateways in order to maintain their markets. Customs must provide the necessary manpower for the shifts required in order for these U.S. carriers to meet their objectives.

Amendment No. 15: Restores a provision proposed by the House and deleted by the Senate which prohibits redirection of the Equal Employment Opportunity Program.

Amendment No. 16: Restores a provision proposed by the House and deleted by the Senate which prohibits the Customs Service from reducing the number of Customs regions below seven during fiscal year 1986.

Amendment No. 17: Deletes a provision proposed by the Senate which would have permitted the purchase of certain types of motor vehicles without regard to the general price limitation contained in the Act.

Amendment No. 18: Deletes a provision proposed by the Senate which would have prohibited the Customs Service from closing certain offices in Wisconsin.

Amendment No. 19: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate amended to read as follows:

In lieu of the matter proposed by said amendment, insert the following:

: Provided further, That none of the funds made available by this Act shall be available for administrative expenses to reduce the personnel level of the Customs Service during fiscal year 1986 below an average of 14,041 full time equivalent positions

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The Conferees have recommended funding for the annualization of the 150 positions provided in the Supplemental Appropriation Bill, 1985, (P.L. 99-88) and have approved an additional 473 positions for the Customs Service. The Conferees note that both House Report 99-210 and Senate Report 99-133 reflect certain high priority areas where additional Customs personnel should be allocated in fiscal year 1986.

The Conferees direct that the Customs Service, in allocating the additional positions provided by the Committee of Conference, give the highest priority to allocating those positions in accordance with the priorities outlined in both House Report 99-210 and Senate Report 99-133. The Conferees also concur with the Senate that phase I of the Southwest Border initiative should be implemented in fiscal year 1986 in conjunction with the priorities outlined in House Report 99-210. The Conferees are agreed that in addition to the positions provided for in the House and Senate Reports, additional Customs positions should be assigned to the San Francisco District.

The Conferees direct the Commissioner of Customs to report personally on a quarterly basis to both the House and Senate Committees on Appropriations regarding his compliance with these directives.

Amendment No. 20: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which mandates a reduction in the number of Customs Service headquarters personnel.

The Conferees are agreed that this reduction is to be made over the next two fiscal years. In implementing these reductions, Customs is not to reduce overall personnel numbers, but rather use these positions to supplement current and future "line" positions.

OPERATION AND MAINTENANCE, AIR INTERDICTION PROGRAM

Amendment No. 21: Appropriates $75,000,000 for the air interdiction program as proposed by the Senate instead of $60,425,000 as proposed by the House. The Conferees are concerned that the rigid directives outlined for the Customs Service air interdiction program in Senate Report 99-133 would severely restrict the flexibility of the Commissioner of Customs and his air program staff to effectively manage this important drug interdiction program. Although the Conferees do not necessarily object to the priorities outlined in the Senate Report, they believe that the Commissioner of Customs should have more flexibility in the management of the assets and activities funded by this account. Therefore, the Commissioner of Customs should examine the priorities set forth in the Senate Report and report to the House and Senate Committees on Appropriations regarding the Customs Service priorities for the air program for fiscal year 1986.

CUSTOMS FORFEITURE FUND

Amendment No. 22: Restores a center heading proposed by the House and deleted by the Senate.

CUSTOMS SERVICE AT SMALL AIRPORTS

Amendment No. 23: Restores a center heading proposed by the House and deleted by the Senate.

UNITED STATES MINT

Amendment No. 24: Deletes a center heading proposed by the House and inserts a center heading proposed by the Senate.

Amendment No. 25: Appropriates $46,500,000 for salaries and expenses as proposed by the Senate instead of $46,954,000 as proposed by the House.

BUREAU OF THE PUBLIC DEBT

Amendment No. 26: Appropriates $195,225,000 for administering the public debt as proposed by the Senate instead of $197,225,000 as proposed by the House.

INTERNAL REVENUE SERVICE

Amendment No. 27: Appropriates $94,000,000 for salaries and expenses as proposed by the Senate instead of $95,932,000 as proposed by the House.

Amendment No. 28: Appropriates $1,103,041,000 for processing tax returns as proposed by the House instead of $1,005,000,000 as proposed by the Senate.

Admendment No. 29: Establishes a limitation of $35,000,000 on the amount of funds to remain available until expended for systems modernization initiatives as proposed by the Senate instead of $50,000,000 as proposed by the House.

Amendment No. 30: Appropriates $1,425,902,000 for examinations and appeals as proposed by the House instead of $1,400,000,000 as proposed by the Senate.

Admendment No. 31: Restores a provision proposed by the House and deleted by the Senate which mandates a certain minimum level of operations for the taxpayer service activity.

Amendment No. 32: Deletes language proposed by the Senate which would have permitted the purchase of certain types of motor vehicles without regard to the general price limitation contained in the Act.

Amendment No. 33: Appropriates $1,064,325,000 for investigation, collection and taxpayer service as proposed by the House instead of $1,055,000,000 as proposed by the Senate.

U.S. SECRET SERVICE

Amendment No. 34: Restores language proposed by the House which requires advance approval from the Appropriations Committees when Secret Service employees on protective missions exceed the travel limitation in the Act. The Senate amendment would have required prior notification only.

Amendment No. 35: Deletes language proposed by the Senate which would have permitted the purchase of certain types of motor vehicles without regard to the general price limitation contained in the Act.

Amendment No. 36: Appropriates $294,000,000 for salaries and expenses instead of $283,805,000 as proposed by the House and $298,805,000 as proposed by the Senate.

DEPARTMENT OF THE TREASURY—GENERAL PROVISIONS

Amendment Nos. 37 and 38: Restore a limitation of 1 percent on transfer authority as proposed by the House instead of 2 percent as proposed by the Senate.

Amendment No. 39: Deletes a provision inserted by the Senate which would have extended an order issued by the Commissioner of Customs regarding importation of certain fuels.

The Conferees agree to delete this Senate provision which would have retroactively provided for an increased tariff on products containing a certain level of ethyl alcohol. This action is not intended to condone the action taken unilaterally by the Customs Service not to collect revenues. In the period of tight budgets and large deficits, the Conferees direct that in future actions of this nature the Commissioner of Customs not act in such an arbitrary manner.

Amendment No. 40: Deletes a provision inserted by the Senate regarding tax exemptions for certain organizations.

TITLE II—U.S. POSTAL SERVICE

Amendment No. 41: Appropriates $820,000,000 for Payment to the Postal Service Fund instead of $961,121,000 as proposed by the House and $801,000,000 as proposed by the Senate.

The Conferees are agreed that $19,000,000 of the amount appropriated is to cover the costs of delaying the rate increase until January 1, 1986.

Amendment No. 42: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate. This amendment limits the purposes for which funds appropriated in this Act for revenue foregone may be used.

TITLE III—EXECUTIVE OFFICE OF THE PRESIDENT

SPECIAL ASSISTANCE TO THE PRESIDENT

Amendment No. 43: Appropriates $1,794,000 for salaries and expenses as proposed by the Senate instead of $1,659,000 as proposed by the House.

NATIONAL CRITICAL MATERIALS COUNCIL

Amendment No. 44: Appropriates $500,000 for salaries and expenses as proposed by the House instead of $250,000 as proposed by the Senate.

OFFICE OF MANAGEMENT AND BUDGET

Amendment No. 45: Appropriates $37,299,000 for salaries and expenses instead of $37,689,000 as proposed by the House and $36,909,000 as proposed by the Senate.

Amendment No. 46: Restores a provision proposed by the House and stricken by the Senate which limits the authority of the Office of Management and Budget to review transcripts.

Amendment No. 47: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate. This amendment prohibits the Office of Management and Budget from reducing the scope or publication frequency of certain statistical information regarding the alcohol and tobacco industries.

TITLE IV—INDEPENDENT AGENCIES

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Amendment No. 48: Appropriates $1,430,000 for salaries and expenses as proposed by the Senate instead of $1,450,000 as proposed by the House.

ADVISORY COMMISSION ON INTERGOVERNMENTAL RELATIONS

Amendment No. 49: Appropriates $2,041,000 for salaries and expenses as proposed by the Senate instead of $2,058,000 as proposed by the House.

ADVISORY COMMITTEE ON FEDERAL PAY

Amendment No. 50: Appropriates $210,000 for salaries and expenses as proposed by the Senate instead of $219,000 as proposed by the House.

GENERAL SERVICES ADMINISTRATION

FEDERAL BUILDINGS FUND

Limitation on availability of revenues

Amendment No. 51: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides for an appropriation to the Federal Buildings Fund.

Amendment No. 52: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $7,000,000 into the Federal Buildings Fund.

Amendment No. 53: Makes available a total of $2,412,001,000 as proposed by the Senate instead of $2,356,893,000 as proposed by the House.

The Committee is concerned that agency requirements for additional facilities and space continue unabated even with a decline in Governmental functions. This concern manifests itself in two areas:

(1) work space management reform

(2) location of Governmental activities

To ensure that proper support and emphasis is being placed on these problem areas the Committee directs the Office of Management and Budget and the General Services Administration to:

Submit, as part of each years' budget justification, the workstation utilization rate for each major agency. This information will be reported for each of the years covered by the budget and accompanied by the year in which the particular agency is to reach the goal of 135 square feet per person. The Office of Management and Budget is to closely monitor agency plans to ensure that utilization goals are met within the approved time frame.

Establish a policy to locate or colocate agencies in lower cost sections of major U.S. communities. OMB and GSA should require agencies to certify as to extenuating circumstances if they request space in high cost locations within a particular area. GSA, within agency mission requirements, should be given the authority to consider the broadest possible physical areas and to determine least-cost locations for housing agency functions.

The Conferees direct that the Office of Management and Budget and the General Services Administration submit a joint report on progress made on these matters by March 30, 1986.

Amendment No. 54: Makes available $243,419,000 for construction as proposed by the Senate instead of $198,444,000 as proposed by the House.

Amendment No. 55: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate making available $44,975,000 for construction of a Federal Building Courthouse in Newark, New Jersey.

Amendment No. 56: Restores a provision proposed by the House which requires the approval of the Appropriations Committees instead of notification as proposed by the Senate.

Amendment No. 57: Inserts the word "for" as proposed by the House instead of the word "of" as proposed by the Senate.

Amendment No. 58: Restores a provision proposed by the House which requires prior approval by the Appropriations Committees as proposed by the House instead of notification as proposed by the Senate.

Amendment No. 59: Makes available $133,227,000 for design and construction services as proposed by the Senate instead of $123,094,000 as proposed by the House.

The Conferees have included funding for design for a new federal office building in the San Francisco Bay area to be built on a site donated by the City of Oakland. It is the position of the Conferees that high-cost leased federal office space be replaced with more economical, federally-owned space. The new building in the Bay Area will replace 700,000 square feet of currently leased space, at a cost to the federal government below that of comparable leased space in San Francisco and Oakland.

It is the intention of the Conferees that, as current leases expire and workers are moved to the new building, they be workers currently housed in the local area around the new structure. It is not the intention of the Conferee that federal offices in San Francisco be moved out of that City into Oakland. Rather, the Conferees wish to retain the ability of Congress to consider, at a future date, the acceptance of land donated by the City of San Francisco for the purpose of the construction of a new federal facility.

Amendment No. 60: Restores a provision proposed by the House which requires prior approval by the Appropriations Committees as proposed by the House instead of notification as proposed by the Senate.

Amendment No. 61: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate making available $2,000,000 for design and construction to be transferred to the city of Mesa, Arizona.

Amendment No. 62: Makes available a total of $2,412,001,000 as proposed by the Senate instead of $2,356,893,000 as proposed by the House.

PERSONAL PROPERTY ACTIVITIES

Personal property

Amendment No. 63: Appropriates $163,257,000 for operating expenses as proposed by the Senate instead of $164,257,000 as proposed by the House.

GENERAL MANAGEMENT AND ADMINISTRATION

Amendment No. 64: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in amendment of the Senate making a technical change in the wording of the House provision which makes $900,000 available for support of Congressional District and Senate State offices. The Conferees are agreed that this action obviates the necessity for the voluminous record keeping now being done in connection with this program.

Amendment No. 65: Deletes a Senate provision which would have made available $2,500 for reception and representation expenses. These expenses are not authorized by law.

FEDERAL PROPERTY RESOURCES SERVICE

Amendment No. 66: Appropriates $40,000,000 for operating expenses as proposed by the Senate instead of $40,748,000 as proposed by the House.

NATIONAL DEFENSE STOCKPILE TRANSACTION FUND

Amendment No. 67: Restores a provision proposed by the House and stricken by the Senate which appropriates $10,000,000 for a grant to construct a research facility.

Amendment No. 68: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate amended to read as follows:

In lieu of the matter proposed by said amendment, insert the following:

For the year ending September 30, 1986, in addition to the funds previously appropriated for the National Defense Stockpile Transaction Fund, pursuant to 50 U.S.C. 98 a and g(a) (2)(c) and 50 U.S.C. 100(a), notwithstanding the provisions of 50 U.S.C. 98h, an additional $10,000,000 is appropriated, to remain available until expended, for a grant to construct Phase II of the Mines Building at the Mackay School of Mines, University of Nevada Reno, relocate the Generic Center on the Recycling of Strategic Metals and establish the Policy Center on Strategic Materials, including such equipment as the school deems necessary to the conduct of its activities.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

This amendment appropriates $10,000,000 for a grant to construct and relocate a research facility. The Conferees recognize the importance of these facilities, but in this time of budget constraint only partial federal funding was provided this year for both projects included in amendments numbered 67 and 68. In addition to the cost sharing programs developed by the institutions involved, the Conferees will consider providing in FY 1987 the balance required to complete construction.

OFFICE OF INFORMATION RESOURCES MANAGEMENT

Amendment No. 69: Appropriates $30,000,000 for operating expenses as proposed by the Senate instead of $30,630,000 as proposed by the House.

ALLOWANCE AND OFFICE STAFF FOR FORMER PRESIDENTS

Amendment No. 70: Appropriates $1,100,000 instead of $931,600 as proposed by the House and $1,151,000 as proposed by the Senate

GENERAL PROVISIONS

Amendment No. 71: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate amended to read as follows:

In lieu of the matter stricken by said amendment, insert the following:

SEC. 6. Funds hereafter made available to the General Services Administration for the payment of rent shall be available for the purpose of leasing, for periods not to exceed thirty years, space in buidlings erected on land owned by the United States.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The Conferees are agreed that GSA may under certain conditions lease space for a period of not to exceed thirty years. The Conferees are also agreed that the words "erected by the lessor" be deleted from the language of the general provision which permits the General Services Administration to lease back space in buildings which are built on land owned by the United States. This change will allow the GSA the flexibility to leaseback these properties even though the building may be owned by persons other than the original developer. The Conferees are agreed that funds made available to GSA in this fiscal year as well as in future fiscal years may be used for this purpose.

Amendment No. 72: Deletes a provision proposed by the Senate regarding the leas-

ing of space in buildings erected by the lessor on land owned by the United States.

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Amendment No. 73: Appropriates $101,363,000 for operating expenses as proposed by the Senate instead of $103,513,000 as proposed by the House.

OFFICE OF PERSONNEL MANAGEMENT

Amendment No. 74: Deletes a provision proposed by the Senate which would have made available $2,500 for official reception and representation expenses. These expenses are not authorized by law.

Amendment No. 75: Makes available $54,202,000 for administrative expenses as proposed by the Senate instead of $52,844,000 as proposed by the House.

Amendment No. 76: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate regarding regulations pertaining to the 1985 Combined Federal Campaign.

Amendment No. 77: Inserts a provision making available $12,000 for entertainment expenses of the President's Commission on Executive Exchange as proposed by the Senate.

MERIT SYSTEMS PROTECTION BOARD

Amendment No. 78: Appropriates $20,000,000 for salaries and expenses as proposed by the Senate instead of $20,349,000 as proposed by the House.

FEDERAL LABOR RELATIONS AUTHORITY

Amendment No. 79: Appropriates $17,064,000 for salaries and expenses as proposed by the Senate instead of $17,364,000 as proposed by the House.

The Conferees are concerned that, as the workload at the Office of General Counsel within the Federal Labor Relations Authority grows, better review and control is necessary. The Conferees, therefore, direct that of the total appropriation for the FLRA $7,657,000 and 191 positions be directed for use by the Office of General Counsel.

In order that the Committees on Appropriations can continue this review, the Conferees direct that the FY 1987 budget submission include a separate budget justification for the Authority and one for the Office of General Counsel.

TITLE V—GENERAL PROVISIONS—THIS ACT

Amendment No. 80: Restores a provision proposed by the House and stricken by the Senate which prohibits the closing of a GSA office.

Amendment Nos. 81 and 82: Restore section numbers proposed by the House.

Amendment No. 83: Restores a provision proposed by the House and deleted by the Senate amended to provide that the provision expires on May 15, 1986, and amended to permit the revision of certain proposed Office of Personnel Management regulations.

Amendment Nos. 84 thru 92: Restore section numbers proposed by the House.

TITLE VI—GENERAL PROVISIONS DEPARTMENTS, AGENCIES AND CORPORATIONS

Amendment No. 93: Restores a provisions proposed by the House and stricken by the Senate which prohibits the Customs Service from closing certain offices. The Conferees have agreed with the House language which prohibits centralization and consolidation of Customs activities. The Conferees are concerned that future operations might be adversely impacted. To avoid such problems the Conferees direct Customs Service to prepare a plan which will meet the needs of the Service, the trade community and the general public in future years, and provide that plan to the Congress.

Amendment No. 94: Restore section number proposed by the House.

Amendment No. 95: Deletes a provision proposed by the House which would have prohibited distribution of a news summary.

Amendment No. 96: Deletes a provision proposed by the House which would have provided for a across-the-board reduction in funding to most of the appropriation accounts funded in the Act.

Amendment No. 97: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate amended to read as follows:

In lieu of the matter proposed by said amendment, insert the following:

SEC. 616. The increase in postage rates for nonprofit and certain other mailers announced by the Governors of the Postal Service in Resolution No. 85-7 shall not take effect until January 1, 1986.

SEC. 617. (a) Section 3626(a) of title 39, United States Code, is amended to read as follows:

"(a) In the administration of Subchapters II and III of this chapter, each time rates of postage are established for mail under former sections 4358, 4452 (b) and (c), and 4554 (b) and (c) of this title, the estimated revenues to be received for each class or kind of such mail shall be equal to the direct and indirect postal costs attributable to mail of such class or kind excluding all other costs of the Postal Service.".

(b) This section is effective January 1, 1986.

SEC. 618. If the postage rate delay required by section 616 of this Act causes a shortfall in postal revenues from the amounts which would have been provided by the adjustment contemplated by section 3627 of title 39, United States Code, the Postal Service shall request a supplemental appropriation to avoid placing the burden of that shortfall on unsubsidized mailers.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

This amendment provides that the increase in certain postal rates will not take place until January 1, 1986. It also amends certain sections of title 39 of the United States Code.

Amendment No. 98: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate amended to read as follows:

In lieu of the section number proposed by said amendment insert the following: *619*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

This amendment permits the use of space in federal buildings for day care services.

Amendment No. 99: Deletes a provision proposed by the Senate which would have amended the basic law regarding the reimbursement of certain expenses for certain federal employees.

The Conferees urge the appropriate legislative Committees to consider expeditiously legislation that addresses reimbursement of certain relocation expenses for federal employees.

Amendment No. 100: Deletes a provision proposed by the Senate which would have reduced all nondefense discretionary spending by 2%.

CONFERENCE TOTAL—WITH COMPARISONS

The total new budget (obligational) authority for the fiscal year 1986 recommended by the Committee of Conference, with comparisons to the fiscal year 1985 amount, the 1986 budget estimates, and the House and Senate bills for 1986 follow:

New budget (obligational) authority, fiscal year 1985	$13,105,938,000
Budget estimates of new (obligational) authority, fiscal year 1986	12,203,272,000
House bill, fiscal year 1986	13,237,868,125
Senate bill, fiscal year 1986	12,858,659,080
Conference agreement, fiscal year 1986	13,154,375,000
Conference agreement compared with:	
New budget (obligational) authority, fiscal year 1985	+48,437,000
Budget estimates of new (obligational) authority, fiscal year 1986	+951,103,000
House bill, fiscal year 1986	−83,493,125
Senate bill, fiscal year 1986	+295,715,920

Mr. MRAZEK.
Mr. HAYES.
Mr. EDGAR.
Mr. MURTHA.
Mr. MARTINEZ.
Mr. LEHMAN of Florida.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 1706. An act to authorize the Architect of the Capitol, in cooperation with the Union Station Redevelopment Corporation, to design a building or buildings adjacent to Union Station in Washington, DC; to the Committee on Public Works and Transportation.

ENROLLED BILL SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 2942. An act making appropriations for the legislative branch for the fiscal year ending September 30, 1986, and for other purposes.

ADJOURNMENT

Mr. WALKER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 57 minutes p.m.) under its previous order, the House adjourned until tomorrow, Friday, November 1, 1985, at 11 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

[Omitted from the Record of October 30, 1985]

2195. A letter from the Deputy Assistant Secretary of the Air Force (Logistics and Communications), transmitting notice of the plan to study conversion from in-house operation to commercial contract several activities at Randolph Air Force Base, pursuant to 10 U.S.C. 2304 nt.; to the Committee on Armed Services.

2196. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Department of the Army's proposed Letter of Offer to Korea for defense articles and services, pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

2197. A letter from the Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting a report of political contributions for John E. Upston, of Virginia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Rwanda, and Laurence W. Lane, Jr. of California, to Ambassador Extraordinary and Plenipotentiary of the United States of America to Australia, pursuant to 22 U.S.C. 3944(b)(2); to the Committee on Foreign Affairs.

2198. A letter from the Under Secretary for International Affairs and Commodity Programs, Department of Agriculture, transmitting the first quarterly commodity and country allocation table showing current programming plans for food assistance for fiscal year 1986, pursuant to the Act of July 10, 1954, ch. 469, section 408(b) (91 Stat. 552; 94 Stat. 2246; E. O. 11963); jointly, to the Committees on Agriculture and Foreign Affairs.

2199. A letter from the Secretary of Transportation, transmitting a proposal for codification of laws related to shipping and maritime matters, pursuant to Public Law 98-89, section 2(j); jointly to the Committees on Merchant Marine and Fisheries and the Judiciary.

2200. A communication from the President of the United States, transmitting notification of the decision not negotiate voluntary production restraints on copper, pursuant to Public Law 98-573, section 247(c) (98 Stat. 2997) (H. Doc. No. 99-119); jointly, to the Committees on Ways and Means and Education and Labor and ordered to be printed.

[Submitted October 31, 1985]

2201. A letter from the Director, Defense Security Assistance Agency, transmitting the Price and Availability Report for the quarter ending 30 September 1985, pursuant to 22 U.S.C. 2768; to the Committee on Foreign Affairs.

2202. A letter from the Secretary of Commerce, transmitting the annual report of the Export Administration for fiscal year 1984, pursuant to Public Law 96-72, section 14; to the Committee on Foreign Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. RODINO: Committee on the Judiciary. H.R. 2817. A bill to amend the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, and for other purposes; with amendments (Rept. No. 99-253, Pt. 3). Ordered to be printed.

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. H.R. 2817. A bill to amend the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, and for other purposes; with amendments (Rept. No. 99-253, Pt. 4). Ordered to be printed.

Mr. ROYBAL: Committee of conference. Conference report on H.R. 3036 (Rept. No. 99-349). Ordered to be printed.

Mr. FOLEY: Committee on House Administration. H. Con. Res. 203. A bill authorizing printing of the brochure entitled "How Our Laws Are Made" (Rept. No. 99-350). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. CONYERS:

H.R. 3658. A bill to increase the statutory limit on the public debt; to the Committee on Ways and Means.

By Mr. AKAKA (for himself, and Mr. HEFTEL of Hawaii):

H.R. 3659. A bill to authorize the Secretary of Transportation to approve construction of a 10.7-mile section of Interstate route H-3 in Hawaii, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. FORD of Michigan (for himself, Ms. OAKAR, Mr. CLAY, Mrs. SCHROEDER, Mr. SOLARZ, Mr. GARCIA, Mr. LELAND, Mr. YATRON, Mr. SIKORSKI, Mr. MCCLOSKEY, Mr. ACKERMAN, Mr. DYMALLY, Mr. DE LUGO, Mr. UDALL, Mr. GILMAN, Mr. PASHAYAN, Mr. HORTON, Mr. YOUNG of Alaska, Mr. HOYER, Mr. ALEXANDER, Mr. OWENS, Mrs. BURTON of California, Mr. MATSUI, Mr. WRIGHT, Mr. COELHO, Mr. ADDABBO, Ms. MIKULSKI, Mr. MARTINEZ, Mr. GRAY of Illinois, Mr. LEHMAN of California, Mr. STOKES, Mr. DYSON, Mr. WHEAT, Mr. BARNES, Mrs. BOXER, Mr. EDGAR, Mr. FAUNTROY Mr. FAZIO, Mr. FOGLIETTA, Mr. GEJDENSON, Mr. HEFTEL of Hawaii, Mr. HOWARD, Mr. ROE, Mr. WIRTH, Mr. EVANS of Illinois, Mr. AKAKA, Mr. BORSKI, Mr. DICKS, Mr. DWYER of New Jersey, Mr. LANTOS, Mr. DE LA GARZA, Mr. PEPPER, Mr. MADIGAN, Mrs. COLLINS, and Mrs. BYRON):

H.R. 3660. A bill to amend title 5, United States Code, to establish a new supplemental retirement plan for those Federal employees, postal employees, and Members of Congress who are covered by title II of the Social Security Act, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. BARTON of Texas (for himself, and Mr. UDALL):

H.R. 3661. A bill to deny most-favored nation trade treatment to any country that provides support for acts of terrorism; to the Committee on Ways and Means.

By Mr. BIAGGI:

H.R. 3662. A bill to provide for the negotiation of maritime agreements for the carriage of United States waterborne trade and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. DYSON:

H.R. 3663. A bill to provide for the striking of medals commemorating the 100th Congress; to the Committee on Banking, Finance and Urban Affairs.

By Mr. FISH (for himself, Mr. MOORHEAD, Mr. HYDE, Mr. KINDNESS, Mr. SENSENBRENNER, Mr. SHAW, and Mr. DANNEMEYER):

H.R. 3664. A bill to amend title 28, and title 11 of the United States Code to provide for the appointment of U.S. trustees to supervise the administration of bankruptcy cases in judicial districts throughout the United States and for other purposes; to the Committee on the Judiciary.

By Mr. KLECZKA (for himself, Mr. OBEY, Mr. HENRY, Mr. FAWELL, Mr. GUNDERSON, and Mr. PORTER):

H.R. 3665. A bill amending the Merchant Marine Act, 1936, to limit the kinds of vessels that qualify for cargo preference; to the Committee on Merchant Marine and Fisheries.

By Mr. McCLOSKEY (for himself and Mr. HERTEL of Michigan):

H.R. 3666. A bill to require the Secretary of Defense to assign a senior medical officer of the Armed Forces as the chief medical officer of the U.S. European Command; to the Committee on Armed Services.

By Mr. NEAL (for himself, Mr. FAUNTROY, Mr. LEVIN of Michigan, Mr. KLECZKA, Mr. FRANK, Mr. NELSON of Florida, and Mr. LAFALCE):

H.R. 3667. A bill to eliminate unfair and predacious export financing practices; to the Committee on Banking, Finance and Urban Affairs.

By Mr. PEASE (for himself, Mr. SEIBERLING, Mr. LUNDINE, Mr. WRIGHT, Mr. FRANK, Ms. KAPTUR, Mr. ECKART of Ohio, Mr. VENTO, Mr. ORTIZ, Mr. BEILENSON, Mr. FEIGHAN, Mr. GLICKMAN, Mr. BEDELL, Mr. VISCLOSKY, Mr. KANJORSKI, and Mr. WILSON):

H.R. 3668. A bill to prevent the misalignment of the U.S. dollar, to improve the U.S. response to unfair trading practices, to provide for a more effective import relief program, and for other purposes; to the Committee on Ways and Means.

By Mr. DIXON (for himself, Mr. BERMAN, Mr. LEVINE of California, Mr. ANDERSON, Mr. ROYBAL, Mr. DREIER of California, Mr. HAWKINS, Mr. DYMALLY, Mr. BEILENSON, Mr. MARTINEZ, Mr. TORRES, Mr. FAZIO, and Mr. LOWERY of California):

H.J. Res. 437. Joint resolution disapproving the deferral of certain budget authority for the Urban Mass Transportation Administration; to the Committee on Appropriations.

By Mr. LUNGREN (for himself, Mr. ADDABBO, Mr. BARTON of Texas, Mr. BENNETT, Mrs. BENTLEY, Mr. BEREUTER, Mr. BIAGGI, Mr. BONER of Tennessee, Mrs. BOXER, Mr. BRYANT, Mr. BURTON of Indiana, Mr. CAMPBELL, Mr. CARNEY, Mr. CHAPPIE, Mrs. COLLINS, Mr. CROCKETT, Mr. DANIEL, Mr. DARDEN, Mr. DAUB, Mr. DE LA GARZA, Mr. DIOGUARDI, Mr. DWYER of New Jersey, Mr. EDWARDS of Oklahoma, Mr. EMERSON, Mr. FAZIO, Mr. FIELDS, Mr. FRENZEL, Mr. FUQUA, Mr. GRAY of Illinois, Mr. HAYES, Mr. HEFNER, Mr. HENDON, Mrs. HOLT, Mr. HORTON, Mr. HYDE, Mr. JENKINS, Mr. JONES of North Carolina, Ms. KAPTUR, Mr. LAFALCE, Mr. LAGOMARSINO, Mr. LIGHTFOOT, Mr. LIVINGSTON, Mr. LOWERY of California, Mr. MAZZOLI, Mr. McCAIN, Mr. McEWEN, Mr. McGRATH, Ms. MIKULSKI, Mr. MOLLOHAN, Mr. MONSON, Mr. MRAZEK, Mr. MURPHY, Mr. NEAL, Mr. NELSON of Florida, Mr. NIELSON of Utah, Mr. RAHALL, Mr. REID, Mr. ROE, Mr. SAXTON, Mr. SCHEUER, Mr. SCHUETTE, Mr. SILJANDER, Mr. SMITH of New Jersey, Mr. DENNY SMITH, Mr. SMITH of New Hampshire, Mr. SUNIA, Mr. TAUZIN, Mr. TOWNS, Mr. WOLF, Mr. WORTLEY, Mr. YATRON, Mr. YOUNG of Florida, Mr. YOUNG of Missouri, Mr. DORNAN of California, Mr. COBEY, Mr. CRAIG, Mr. McCOLLUM, Mr. THOMAS of California, Mr. HUGHES, Mr. WALKER, and Mr. DELLUMS):

H.J. Res. 438. Joint resolution to designate October 31, 1986, as "National Child Identification and Safety Information Day"; to the Committee on Post Office and Civil Service.

By Mr. DYSON:

H. Con. Res. 225. Concurrent resolution to express the sense of the Congress that the Postmaster General should issue a postage stamp commemorating the 100th Congress; to the Committee on Post Office and Civil Service.

By Mr. KEMP (for himself, Mr. BROOMFIELD, Mr. McCAIN, Mr. SMITH of New Jersey, Mr. FRENZEL, Mr. FAUNTROY, Mr. WOLF, Mrs. VUCANOVICH, Mr. HUGHES, Mr. ZSCHAU, Mr. HENDON, Mr. EMERSON, Mr. BRYANT, Mr. GREGG, Mr. ROE, Mr. DIOGUARDI, Mr. ECKERT of New York, Mr. COURTER, Mr. ACKERMAN, Mr. HUNTER, Mr. WILSON, Mr. LAGOMARSINO, Mr. McGRATH, Mr. WORTLEY, Mr. RITTER, Mr. MONSON, Mr. LANTOS, Mr. GINGRICH, Mr. LEVIN of Michigan, Mr. ROGERS, Mr. WEBER, Mr. FROST, Mr. REID, and Mr. SCHUETTE):

H. Res. 304. Resolution supporting the intent of the President to discuss with leaders of the Soviet Union the concerns of the United States with the Soviet presence in Afghanistan, and for other purposes; to the Committee on Foreign Affairs.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 1626: Mr. WEISS.

H.J. Res. 127: Mr. JONES of Oklahoma.

REGULATION OF LOBBYING ACT

In compliance with Public Law 601, 79th Congress, title III, Regulation of Lobbying Act, section 308(b), which provides as follows:

(b) All information required to be filed under the provisions of this section with the Clerk of the House of Representatives and the Secretary of the Senate shall be compiled by said Clerk and Secretary, acting jointly, as soon as practicable after the close of the calendar quarter with respect to which such information is filed and shall be printed in the CONGRESSIONAL RECORD.

The Clerk of the House of Representatives and the Secretary of the Senate jointly submit their report of the compilation required by said law and have included all registrations and quarterly reports received.

REGISTRATIONS

The following registrations were submitted for the third calendar quarter 1985:

(NOTE.—The form used for report is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective headings.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19.....

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:
(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)
(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".
(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:
(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.
(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:
1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (*a*) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (*b*) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(*a*) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§302(e).
(*b*) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).
(*c*) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, ☐ place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (*a*) Short titles of statutes and bills; (*b*) House and Senate numbers of bills, where known; (*c*) citations of statutes, where known; (*d*) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (*a*) Description, (*b*) quantity distributed; (*c*) date of distribution, (*d*) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out items "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

AFFIDAVIT

QUARTERLY REPORTS*

*All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following quarterly reports were submitted for the third calendar quarter 1985:

(NOTE.—The form used for reporting is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective headings.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19.....

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:
(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)
(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".
(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:
(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.
(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:
1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§302(e).
(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).
(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, ☐ place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (a) Description, (b) quantity distributed; (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out items "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

AFFIDAVIT

[Omitted in printing]

PAGE 1

NOTE ON ITEM "D."—(a) *In General.* The term "contribution" includes *anything of value.* When an organization or individual uses printed or duplicated matter in a campaign attempting to influence legislation, money received by such organization or individual—for such printed or duplicated matter—is a "contribution." "The term 'contribution' includes a gift, subscription, loan, advance, or deposit of money, or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribution"—Section 302(a) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN EMPLOYER.—(i) *In General.* Item "D" is designed for the reporting of all receipts from which expenditures are made, or will be made, in accordance with legislative interests.

(ii) *Receipts of Business Firms and Individuals.*—A business firm (or individual) which is subject to the Lobbying Act by reason of expenditures which it makes in attempting to influence legislation—but which has no funds to expend except those which are available in the ordinary course of operating a business not connected in any way with the influencing of legislation—will have no receipts to report, even though it does have expenditures to report.

(iii) *Receipts of Multipurpose Organizations.*—Some organizations do not receive any funds which are to be expended solely for the purpose of attempting to influence legislation. Such organizations make such expenditures out of a general fund raised by dues, assessments, or other contributions. The percentage of the general fund which is used for such expenditures indicates the percentage of dues, assessments, or other contributions which may be considered to have been paid for that purpose. Therefore, in reporting receipts, such organizations may specify what that percentage is, and report their dues, assessments, and other contributions on that basis. However, each contributor of $500 or more is to be listed, regardless of whether the contribution was made solely for legislative purposes.

(c) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE.—(i) *In General.* In the case of many employees, all receipts will come under Items "D 5" (received for services) and "D 12" (expense money and reimbursements). In the absence of a clear statement to the contrary, it will be presumed that your employer is to reimburse you for all expenditures which you make in connection with legislative interests.

(ii) *Employer as Contributor of $500 or More.*—When your contribution from your employer (in the form of salary, fee, etc.) amounts to $500 or more, it is not necessary to report such contribution under "D 13" and "D 14," since the amount has already been reported under "D 5," and the name of the "employer" has been given under Item "B" on page 1 of this report.

D. RECEIPTS (INCLUDING CONTRIBUTIONS AND LOANS):

Fill in every blank. If the answer to any numbered item is "None," write "None" in the space following the number.

Receipts (other than loans)

1. $.....Dues and assessments
2. $.....Gifts of money or anything of value
3. $.....Printed or duplicated matter received as a gift
4. $.....Receipts from sale of printed or duplicated matter
5. $.....Received for services (e.g., salary, fee, etc.)
6. $.....TOTAL for this Quarter (Add items "1" through "5")
7. $.....Received during previous Quarters of calendar year
8. $.....TOTAL from Jan. 1 through this Quarter (Add "6" and "7")

Loans Received

"The term 'contribution' includes a . . . *loan* . . ."—Sec. 302(a).

9. $.....TOTAL now owed to others on account of loans
10. $.....Borrowed from others during this Quarter
11. $.....Repaid to others during this Quarter

12. $.....Expense money" and Reimbursements received this Quarter

Contributors of $500 or more
(from Jan. 1 through this Quarter)

13. Have there been such contributors?

Please answer "yes" or "no": .....

14. In the case of each contributor whose contributions (including loans) during the "period" from January 1 through the last days of this Quarter total $500 or more:

Attach hereto plain sheets of paper, approximately the size of this page, tabulate data under the headings "Amount" and "Name and Address of Contributor"; and indicate whether the last day of the period is March 31, June 30, September 30, or December 31. Prepare such tabulation in accordance with the following example:

Amount	*Name and address of Contributor*
	(*"Period"* from Jan. 1 through....., 19.....)
$1,500.00	John Doe, 1621 Blank Bldg., New York, N.Y.
$1,785.00	The Roe Corporation, 2511 Doe Bldg., Chicago, Ill.
$3,285.00	TOTAL

NOTE ON ITEM "E".—(a) *In General.* "The term 'expenditure' includes a payment, distribution, loan, advance, deposit, or gift of money or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make an expenditure"—Section 302(b) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE. In the case of many employees, all expenditures will come under telephone and telegraph (Item "E 6") and travel, food, lodging, and entertainment (Item "E 7").

E. EXPENDITURES (INCLUDING LOANS) in connection with legislative interests:

Fill in every blank. If the answer to any numbered item is "None," write "None" in the spaces following the number.

Expenditures (other than loans)

1. $.....Public relations and advertising services
2. $.....Wages, salaries, fees, commissions (other than item "1")
3. $.....Gifts or contributions made during Quarter
4. $.....Printed or duplicated matter, including distribution cost
5. $.....Office overhead (rent, supplies, utilities, etc.)
6. $.....Telephone and telegraph
7. $.....Travel, food, lodging, and entertainment
8. $.....All other expenditures
9. $.....TOTAL for this Quarter (Add "1" through "8")
10. $.....Expended during previous Quarters of calendar year
11. $.....TOTAL from January 1 through this Quarter (Add "9" and "10")

Loans Made to Others

"The term 'expenditure' includes a . . . *loan* . . ."—Sec. 302(b).

12. $.....TOTAL now owed to person filing
13. $.....Lent to others during this Quarter
14. $.....Repayment received during this Quarter

15. Recipients of Expenditures of $10 or More

In the case of expenditures made during this Quarter by, or on behalf of the person filing: Attach plain sheets of paper approximately the size of this page and tabulate data as to expenditures under the following heading: "Amount," "Date or Dates," "Name and Address of Recipient," "Purpose." Prepare such tabulation in accordance with the following example:

Amount	*Date or Dates—Name and Address of Recipient—Purpose*
$1,750.00	7-11: Roe Printing Co., 3214 Blank Ave., St. Louis, Mo.—Printing and mailing circulars on the "Marshbanks Bill."
$2,400.00	7-15, 8-15, 9-15: Britten & Blaten, 3127 Gremlin Bldg., Washington, D.C.—Public relations service at $800.00 per month.
$4,150.00	TOTAL
